**Kewanee
Strain Spout** RENEWABLE
BOTTOM
Use a Kewanee Renewable Bottom Spout and when the bottom wears slip in a new one. We guarantee each Kewanee section to wear out 12 bottoms and the bottoms are made from a special analysis steel—tough and long wearing. If you wore out a set of bottoms every year the replacement cost would be little—renewable bottoms for 8" size and smaller cost about 37 1/2 cents. And it's far less expensive to buy new bottoms than to replace entire spouts or try to patch them.
ORDER ONE ON TRIAL—Give us the outside diameter, or outside rectangular measurements of your down spout, and length of spout wanted. We will ship you a Kewanee. Use it a month, six months or a year. If it's not satisfactory to you return it and we'll refund your money.

BUSINESS AND TRADE CONDITIONS

AMONG the details of first importance to the President in the closing days of Congress, are bills pending on the agricultural situation and measures contemplating the consolidation of several departments of the Government. The customary complaint is now being heard that failure to complete the Congressional calendar can be laid at the door of the legislative branch and not the executive branch of the Government. We have always had a "jam" in the last few days of the session and there seems to be no process known whereby relief may be found. It appears at this writing that an extraordinary session will be called after the closing date of March 4.

In next December, a new Congress will convene, carrying the approval of the election, some thirteen months earlier. There has been some sound criticism of this procedure, wherein the taking of office is so long delayed, citing the possible forgetfulness by congressmen of the platform on which they were elected or the stated demand or expectations of their constituents.

Secretary Hughes Against Radicalism.

During a Lincoln's birthday speech in New York, Secretary Hughes referred to potential dangers confronting this nation from within. He emphatically cautioned the exercising of care in offsetting the intentions of "turbulent spirits among us whose aim seems to be to foment ill will."

The Secretary knows the intimate details of our country's effort to assimilate imported blood; to police radicals of the "red" type, and his urgent appeal should bear much fruit. Offsetting the menace of dissension of this character, Mr. Hughes expressed the belief that political despotism and corruption was growing less. He believes that the cultivation of peace with other nations must and can be accomplished.

Threatened Government Interference "In Grain."

It is very apparent that the widely discussed Government investigation of rising grain prices is largely political in its aspect. It may not be amiss to charge it up to the radical element of Congress who are unable to justify their earlier statements at the time grain prices were low. Such individuals lost no opportunity in the past three years to make political capital of low grain prices in soliciting farm support. It will be recalled that these radicals stated with the boldest confidence that grain prices would slump after the election and urged their constituents to market every bushel possible before the fourth of November, which was set up as a "day of judgment."

Now that the natural laws of supply and demand are, in the main, responsible for the recent ups and downs "in grain," and in view of the fact that the large advance has occurred since the November 4th elections, not chargeable by even the farthest stretching of the imagination to political capital, our radical friends are playing a rather cheap game in passing the buck to certain unknown interests with the accusation that the market is under manipulation.

It is difficult to perceive where any just cause for investigation exists, certainly not in the misguided protection of the farmer whose interests have been most handsomely conserved in a natural manner. Therefore, the Department of Agriculture or the Department of Commerce, either of which is well able to furnish a correct explanation of the present economic grain situation on short order, will not be called upon. If, however, the consuming public and

interests representing them prevails upon the Federal Trade Commission to institute an investigation of this character, public funds will be expended; unproven accusations will be made, and nothing will be accomplished.

As a matter of fact, the instability of grain prices in the early days of last week has so shaken public confidence that the market is now without the buying support of outside interests. It is such buyers who are among the first to be disturbed by threatened Government interference. We pray for the early arrival of that day when the encouragement of regularly constituted business and the avoidance of un-

MARKET SETTLING DOWN

THE general opinion is that the recent advances in wheat were entirely too rapid to be permanent and the break of about 30 cents was not unlooked for.

Speculation from the outside was held to be responsible for the spectacular rise and the break came through heavy selling by this group.

An outstanding feature of the trading this week was a widening of the difference between May wheat in Chicago and Buenos Aires, thus opening the way for larger exports of American grain.

If it is true, as reported, that nearly 8,000,000 people in Russia are starving, further extensive purchases, either by the Soviet government or by relief agencies, must be inevitable and that, of course, would have a marked influence on the export market.

Recent liquidation has left the market in a much healthier condition and further violent changes are not looked for.

usual procedure, governmental investigation and control, shall obtain. History has shown the folly of unwarranted disturbance to the established forms and customs of business and finance. Those who have endeavored to step over such laws, frequently with paternalistic support, have met with reverses and often with disaster.

Advancing Living Costs.

In discussing this subject of such general interest, we find in breadstuffs an immediate reaction in the bakery loaf and in sacked flour, up or down as the case may be, to the price of wheat. Other articles of necessity are not so easily traced in an endeavor to explain their current prices. There is very evidently in progress a notable advance in living costs although it is a matter of common knowledge that the high prices which were pegged during the war have in many instances not declined at all in proportion with the much lower prices on the basic ingredients from which such manufactured products are made. In this, lies the great trouble.

When emergencies arise, as for instance, in coal, gasoline, building materials or what not, in the list of raw materials there is an immediate advance and usually a decline, when effective which is passed along to the consumer, but in the more complex lines there

undeniably exists a tendency to keep up prices to former high levels.

Many well posted people are inquiring why living costs are advancing along the whole line, for it is believed that overhead producing costs are slightly less than a year ago; taxes are somewhat lower, and the outlook for spring and summer business suggests a highly competitive state of affairs which, on the face of things, does not seem to warrant higher living costs.

Exponents of the coöperative idea take advantage of this situation in pointing out that the tendency of wholesalers, jobbers, and other middlemen is to arbitrarily handle perishables in such volume that former high prices will be maintained. Broadly viewed, and no doubt particularly applying to perishable goods, a coöperative merchandising scheme whereby during periods of large production, prices would be reduced, seems reasonable. No one quarrels with its sound features, but the difficulty is in securing men of sufficient ability to manage its affairs as big business demands.

Bankers' Comment.

The Continental & Commercial Banks of Chicago, in one of their periodical surveys of the business situation, find that there is a sound basis for optimism, saying "It is not surprising that confidence prevails."

There have been eight significant changes since the bank's last survey, so far as general business is concerned, which are:

1. The general level of prices is higher, due largely to the rise in the average price of farm products, which is at least in line with the price level.
2. Money rates did not soften as is usual in January.
3. Exports of gold in December exceeded imports, adding evidence that the government has been reversed.
4. Reserve banks reduced their security holdings.
5. Stock prices continued to rise.
6. The improvement in agriculture was confirmed as fact.
7. Manufacturing output increased, but not to boom proportions.
8. Trade has held a high level.

Canadian Business Gaining.

Our friends in Canada are progressing on about the same basis as the business interests of the United States, rather accurately indicated probably in carloading for the week ending Jan. 24 of 50,433, an increase of 4,782 for the corresponding week of last year. The grain market pages of the THE PRICE CURRENT-GRAIN REPORTER have referred to grain and flour export business from Canadian ports, and so reference to such merchandising is only touched upon here, but in general the provinces are "looking up."

A notable bit of railroad financing, the largest Canadian issue for sometime, was placed in New York recently by the Canadian National Railways, \$35,000,000 in bonds. It has been intimated that this road will require a total of \$100,000,000, mainly to be expended for terminal facilities and partly for branch line construction. American capitalists are also anticipating a liberal share of the new financing in telephone, lumbering and Canadian industrial expansion generally.

Nation's Fire Loss Heavy.

Outside the very natural interest of our trade in fire losses within the ranks, is the common knowledge that commercial fire losses generally have been discreditable. In a large part of the country, the

month of January was unquestionably called severe, inducing the heavy operation of heating plants in dwellings and consequent serious fire losses. 1925 opened up in a disheartening manner to insurance company officials who hoped for a reduced loss ratio as compared with heavy losses for the past three years. Most of the insurance companies have weathered the gale through profits which were earned from the banking end of their business, large enough to offset damage claims. These banking profits were largely from increased security values and simply offset reduced values of their security lists during the period of deflation somewhat earlier.

THE PRICE CURRENT-GRAIN REPORTER again urges its readers to take all possible precaution in the protection of their plants against this insidious demon, fire, which undermines capital account and turns profits into red items on the ledger.

LOSS IN TRANSIT

TWO prevalent causes of claims for loss are inaccurate scales and bad-order cars. A little additional care on the part of the shipper in having his scales tested and in examining cars both before loading and before releasing will do much to eliminate these two types of claims.

Because a scale weighs correctly on the first of January is no sign that it will do so on the last of the following December. Yet there are many dealers who do not have regular inspections of their scales, regardless of the fact that every purchase and shipment may mean a material loss.

Of the cars received in bad order at one terminal market in the course of one year, 2,383 of them had side, end, bottom, or corner leaks; 1,538 leaked at grain doors; 92 had seals improperly applied; 136 had the side doors cleated; 4 had end doors cleated; and 72 had side or end doors boarded. In many, not all, of these cases, the shipper could have avoided the leak or bad-condition report by proper inspection and careful coöpering of the car before loading and by correct sealing of all doors after loading, but above all things it is necessary to have correct sealing of all doors after loading.

TEACHING US ALL TO CO-OPERATE

NOW comes the American Institute of Coöperation which has just been incorporated under the laws of the District of Columbia, with the backing, according to the announcement, of farm organizations representing over 2,000,000 farmers and coöperative associations with an annual turnover of over a billion dollars, as well as state departments of agriculture, state bureaus of markets, teachers of agricultural economics and finally the U. S. Department of Agriculture.

With such an organization and such backing, we shall expect its graduates after the completion of their course, which, we are told will extend through a period of four long weeks, to make us a nation of true coöperators, thus bringing us to the dawn of the millenium.

GOVERNMENTAL ADVICE

THE Bureau of Agricultural Economics of the Department of Agriculture, in a series of statements, on the agricultural outlook for 1925, which have just been issued, presumes to give advice concerning the acreage which should be planted this year, to a wide range of crops, including wheat, corn, oats, barley, hay, cotton, potatoes, beans, tobacco, etc.

The responsibility attached to the giving of advice of this kind, and we had almost said the wantonness of it, will in a measure be realized, when we begin to study the variations in yield from year to year, due to late springs, early frosts, cool nights, hot winds, floods and other climatic conditions over which we mortals have no control, as well as the

ravages of weevil, grain beetles and other pests, some of which are ever present and others making only infrequent invasions.

Taking wheat for example, and on the basis of the 1924 acreage, there would be a spread of more than 260,000,000 bu. between the crop on the basis of the high and low yield per acre within the past dozen years, or using the 1924 crop as a standard, a difference of 30 per cent.

We do not however have to use widely separated years in this sort of an analysis to show the risk in giving advice of the kind referred to, as the years 1923 and 1924 with a difference of 2.6 bushels in the average yield per acre would, if the same acreage had been planted, have shown a difference in production amounting to 140,852,000 bushels, an increase of more than 19 per cent over the low yield.

Giving advice as to kinds of seed, preparation of soil, fertilization, planting, cultivation, etc., are it seems to us, quite properly, functions of the Department of Agriculture and that department of the government has done a monumental work along that line.

Giving paternalistic advice, however, which fundamentally has behind it the idea of price regulation and increased selling prices to the grower, can hardly be considered a legitimate function of any governmental department, so long as the inevitable result would be increased cost prices to the consumer.

Furthermore, curtailment of production with consequent higher prices, automatically brings a reduction in consumption, a thing which the Brazilian coffee trust is just now having forcefully brought to its attention.

It is hoped that the new Secretary of Agriculture, may see the wisdom of having departmental heads confine themselves to the prompt preparation and dissemination of proven facts, omitting entirely, propaganda mentioned of the kind we have referred to.

LESS BUREAUS, LESS TAXES

IT IS said that the best government is the one that governs least. This great government of ours has had a mania for bureaus and departments which have entailed a great hardship by creating an army of employes to be supported by the taxpayers. The best service the government can perform is to deflate itself along these lines and let the personal initiative of its citizenship assert itself. Some states have had an idea that they could take the taxpayers' money, build business enterprises and operate them in competition with the already built private institutions. Take North Dakota and its state mill and elevator enterprise. Three million dollars was invested in constructing this hopeless project. A million dollars was used as operating capital for the plant, and a half million dollars has already been lost in its operation. The politicians said "all that was necessary to get a slice of this 'easy money' was for the state of North Dakota to stick up a milling plant and get into the game no matter how much it cost; no matter where it was built; no matter how handicapped by railroad rates, or shifting milling business or other factors." But the "easy money," as usual, comes from the general public through taxes. Neither the government nor the state can be developed by the continual piling up of taxes to a point where they become a burden. Let's hope that the federal and state "aid" in the future will be to govern as little and as economically as possible.

DO YOU BELONG

WE occasionally hear of some man's being referred to as a "jiner," meaning, of course, that he belongs to all of the lodges, social clubs, business organizations, etc., that are open to him.

There is no complaint that can be made against such a person, except that he is usually not very active and therefore not very valuable to any of them.

In these days, however, the man who owns and

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.

operates an elevator or who is otherwise engaged in the grain business and who does not belong to his state association can, with great profit to himself, run the risk of being dubbed a "jiner," by at once putting in his application for membership.

There are many ways in which the association can and will be helpful to him if he will only be helpful to it by joining and taking a man's part in its activities.

A thousand unorganized men make a mob; a thousand organized ones make a regiment of soldiers or a great industrial establishment.

WHEN "GREEK MEETS GREEK"

REPORTS come to us of plans being seriously considered in England looking to a consolidated purchasing organization, to handle the buying of all of the grain used in Great Britain, and we are very naturally wondering what would happen if a single buying agency of this kind was confronted by a single selling agency, such as our co-operative friends in this country are hoping they may eventually effect.

However, if we are to export no grain, the consideration of such a question would be mere idle speculation, our only problem being to find suitable storage facilities for use during the "fat" years or to evolve a plan which would cause us to eat the surplus when there was one, or to eat sparingly when there was a short crop.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, FEBRUARY 18, 1925

GRAIN TRADE REVIEW

Grain values have been on the down-grade the past week, with all deliveries of wheat, corn, oats and rye in new ground on the present downturn, the continued failure of an active cash demand to develop, being the main depressing influence. There seems to be but little doubt but that the recent advance in wheat prices was entirely too fast for permanent results, and the break of around 29 cents from the high point was not surprising. Outside speculative interest was largely responsible for the upturn, and the break was due largely to selling by those who thought that grain trading was an immediate passport to great wealth. If the grain trade will take the trouble to check up they will find that practically all commission houses advised customers to sell out their long wheat on the advance, but as is usual when the market shows a tendency to advance rapidly the general public refused to take the advice, and the bulk of the weekly held grain went out on stop loss orders on the break. As is usual when the markets start to advance or decline rapidly there are numerous reports in circulation, that under normal conditions would receive little attention, and they have a drastic effect on values. This was decidedly noticeable during the past week, when anything that tended to have a depressing effect was highly magnified. One of the outstanding features of the week's trading was the material widening of the difference between May wheat in Chicago and in Buenos Aires, the latter going to a substantial premium while Liverpool also gained sharply as compared with this market.

Liberal Export Looked For.

As a result of this, it would not be surprising if a liberal export business developed in American wheat. Clearances during the past few weeks have been relatively small, and it is probable that the total for the season from July 1 to January 31 fell somewhat under 200,000,000 bu., the big advance checking foreign buying, but prices in Chicago are now back to around where they were about 30 days ago, while in the Southern Hemisphere prices are higher and more in line with America than for a long time.

Statistically the world's wheat situa-

tion shows little change despite the violent price fluctuations, and it is estimated that on Feb. 1 the United States had around 75,000,000 bu. for export the balance of the season, after allowing for a carryover of a like amount into the new crop. Canada has been doing a fair business in low grades of late and there has also been large sales in the way of flour to Russia. The latter country came into the world's market as a big buyer the past week, and has already taken more wheat and flour than anticipated a short while ago. So far, the aggregate exceeds 10,000,000 bu., and it is regarded as almost impossible that there will be any bread grain of consequence in view of the shortage in the crop.

Winter Wheat Outlook.

The outlook for the new winter wheat crop in this country and also in Europe will be a factor of no mean importance in the immediate future as the period when growing weather will be experienced is near at hand. The domestic visible supply is decreasing slowly, as it usually does at this season of the year. In fact the big decreases do not usually come until the opening of lake navigation which is still some weeks away. How much wheat will be worked to go out by way of Montreal remains a question, although if the wide difference prevailing between Chicago and Buenos Aires is maintained, it is regarded as certain that some business will be done. The Department of Agriculture has suggested that it is advisable for farmers not to increase the spring wheat acreage this season, but the trade in general looks for a big increase both sides of the international line, owing to the high price, and also the excellent yield in the American northwest last season.

Coarse Grains.

Liquidation was on in both corn and oats the past week, and both grains dropped sharply with September oats at a new low on the crop to date. There has been little or no improvement in the cash demand and No. 3 yellow corn was offered to the east at a full delivery discount as compared with the May and found little call for the grain. The visible supply of corn is steadily increasing, and there is a rather pronounced scarcity of storage room developing in many of the leading western markets. The immense holdings of cash oats are a factor in this respect and so far the promised export call has failed to develop. The pressure of cash grain promises to continue and sooner or later readjustment between the futures and the cash grain will be necessary. Field work is already getting under way in parts of the southwest, although plowing is being hindered by dry weather in parts of Texas. Winter oats would be benefited by rains in the latter state, although the freezes during the winter caused considerable damage. The new Argentine corn crop is coming along in good shape, and the deferred deliveries at Buenos Aires have been declining rather rapidly in consequence. There appears to be little chance of any export business in corn from the United States this season unless there is a radical change in conditions. With low grade corn selling at a big discount under futures, farmers are not inclined to press sales at the present time.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.
Wheat	4,772,000	6,768,000	4,975,000
Corn	5,320,000	6,195,000	10,292,000
Oats	4,282,000	4,718,000	4,433,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	14,314,000	19,700,000
Preceding week.....	17,671,000	16,491,000
Since July 1.....	821,806,000	741,436,000

Liquidation was on in wheat the past week with a break of 12%@16%^c from

the high point, but the finish was on a strong rally with net losses of 3%@4%^c. The revival in the foreign demand which came toward the last, combined with short covering, was largely responsible for the upturn from the inside figures of the week, and at the last the technical position was regarded as stronger than for sometime past. May at the inside showed 8%^c under the recent high point. Foreign markets went to a wider premium over Chicago during the week, and very erratic price changes are expected to continue.

Corn had a range of 11%@11%^c the past week, the largest in a long time. Liquidation was on and prices declined rapidly from the early high point, only to rally later with wheat, and close with net losses of 6%@6%^c. The big discount of cash corn under the futures, as well as the slow shipping demand, had considerable to do with creating bearish sentiment. Argentine new crop outlook remains favorable, and grain from that country is offered abroad far below a parity with that from America.

Liquidation was on in oats and with stop loss orders uncovered in profusion on the way down, the close was at net losses of 4%@6%^c, the latter on May after a range of 8%@10%^c for the week, the widest in a long time. Improvement in the cash demand on the decline was a factor in making a strong rally from the inside figures. Foreigners took a fairly liberal quantity of rye on the break, and helped to make a good rally, but net losses as compared with the previous week were 5%@5%^c, the latter on July. Range of prices the past week follows:

	High.	Low.	Close	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.
Wheat—						
May	\$1.94½	\$1.77½	\$1.86½	\$1.80½	\$1.10½	
July	1.64½	1.49½	1.57½	1.62½	1.10½	
Sept.	1.50½	1.38	1.45½	1.48½	1.10½	
Corn—						
May	1.35½	1.24½	1.28½	1.34½	.80	
July	1.36½	1.25½	1.29½	1.35½	.80½	
Sept.	1.36½	1.24½	1.28½	1.35½	.80½	
Oats—						
May	.61½	.51½	.54½	.60½	.48

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	1925.	1925.	1924.
	Feb. 14.	Feb. 7.	Feb. 16.
American	5,790,000	5,849,000	8,914,000
Argentine	6,347,000	6,479,000	5,443,000
Australian	4,800,000	5,472,000	2,960,000
Indian	1,792,000	960,000
Russian	400,000
Others	48,000

Total18,729,000 18,760,000 17,765,000

Of the above total wheat from America there cleared in the form of flour 1,950,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	279,824,000	264,401,000	287,943,000
Argentine	65,459,000	60,656,000	55,695,000
Australian	41,336,000	34,416,000	21,336,000
Indian	23,976,000	5,364,000	6,412,000
Russian	328,000	20,640,000
Others	2,544,000	12,698,000	3,463,000
Total	414,067,000	398,675,000	374,952,000
Season	753,195,000	662,698,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.
American	355,000	372,000	500,000
Argentine	975,000	2,275,000	1,421,000
Others	10,000

Total1,340,000 2,647,000 1,921,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	14,379,000	12,377,000	23,825,000
Argentine	29,339,000	16,789,000	13,893,000
Russian	180,000
Others	1,624,000	580,000	2,900,000
Total	45,842,000	29,926,000	40,400,000
Season	67,500,000	65,765,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.
American	20,000	16,000	713,000
Argentine	1,380,000	1,516,000	392,000
African
Russian	238,000	204,000	340,000
Others	834,000	731,000	442,000

Total2,472,000 2,467,000 1,887,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	332,000	4,861,000	28,344,000
Argentine	41,764,000	18,236,000	52,344,000
African	867,000	4,629,000
Russian	1,497,000	1,121,000
Others	10,920,000	14,948,000	190,000
Total	55,380,000	43,795,000	81,128,000
Season	229,932,000	205,235,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Feb. 6:

	Feb. 6, 1925.	Jan. 30, 1925.	Feb. 8, 1924.
Wheat	2,196,092	2,389,019	355,355
Oats	1,710,343	1,710,343	11,984
Barley	334,594	334,594
Rye	3,970,505	3,902,324	843,560
Corn	1,127,927	1,144,540	130,767
Total, bus.....	9,339,461	9,480,820	1,341,666

GRAIN MARKETING PROPERTIES

Appraised at More Than a Million Dollars
Over Agreed Price—Want Appraisal
Investigated.

The announcement was made last week that the appraisal of the properties which the Grain Marketing Company contracted to purchase had been completed by W. Jett Lauck, the statistician, and that he had found them to be worth \$17,382,083, or more than a million dollars above the purchase price agreed upon.

This valuation was made without taking into consideration anything for good will or other intangible values. It was pointed out by W. Jett Lauck of Washington, D. C., who directed the work of getting out the five months' appraisal, that were the cost of building such a huge business, along with the advertising and standing of its executives, added in the properties would figure as a good buy at several million dollars more.

Bought Some Junk.

Answering interrogations as to whether there was not some "junk" taken over from the vendors, he admitted that the charge was true. "In one case, however, we gave one elevator a nominal value of \$1, while another is charged up at \$1,000. These plants have a wrecking value much over the nominal values assigned them," Mr. Lauck said. The questions were aimed to quiet rumors that some of the plants were of no value whatever.

Gray Silver, president of the company, asserted that the presentation of the appraisal, which adversaries of the big co-operative had charged was never intended to be made, would enable the company to widen its scope of operations by entering many states in which it had been unable to work through "blue sky" laws.

Earnings of the selling companies were stated to be in excess of interest charges. These earnings were stated to be free from any profits from speculative trades, against which the Grain Marketing Company is prevented by its charter.

Summarized the report shows that the value of real estate sought to be taken over runs \$1,760,531; value of leaseholds, \$2,811,140; value of terminal and country elevators and feed mills, \$11,810,412; total \$17,382,083. This exceeds the original price set on the properties by the vendors by \$975,083, without taking into consideration any values for good will, the latter being conservatively estimated at \$7,375,665. This is not figured in the appraisal as there is nothing tangible existing on which to base any figures, beyond earning power.

The report shows a total of 11,465,000 bushels owned, and 31,800,000 bushels of capacity under lease.

Appraisal Not Satisfactory.

That this appraisal did not satisfy some, however, is indicated by the fact that the matter was taken up with the Illinois Public Utilities Commission and that department, through Chairman Funk, has announced that an investigation will be made.

At the meeting of the Farmers' Grain Dealers' Association, in Peoria last week, it was charged that the men behind the Grain Marketing Company had never been co-operators and that it was not reasonable to expect them to co-operate now.

INTERNATIONAL INSTITUTE OF CO-OPERATION ORGANIZED.

Fifteen national and international co-operative associations assisted in the organization of the International Institute of Co-operation at a recent meeting held in Cleveland, Ohio. The committee on plans and scope has recommended the calling of annual trade conferences to be participated in by all members interested in the same industry or commodity. The committee on study will outline the institute's educational program to be carried out when the first international meeting is held in 1925. Maintenance of the institute's activities will probably depend on gifts.

CHANGE IN ARGENTINA GRAIN EXPORT DUTIES.

Argentina has made several changes in the export duties for the month of January, according to the Department of Commerce. The old and new rates in gold pesos per metric ton are as follows: Corn, from 2.17 to 2.16; linseed, from 4.15 to 4.11; oats, 1.42 to 1.41; barley, 2.74 to 2.69; wheat, from 2.16 to 2.13.

THE LETTER BOX.

Price Current-Grain Reporter: We are handling a considerable side line business in auto tires, coal, lumber, roofing, tile, twine, etc.

We are particularly interested in your discussion on the general grain business, hedging and futures.—L. A. Peters & Co., Lacon, Ill.

Price Current-Grain Reporter: I have just read your article "Overlapping Departments," and I wish to express to you my hearty approval. If every public journal in the country would write articles of similar character from time to time about the muchly mistaken statesmen in Washington who are looking after their own fences instead of public good, there might be a considerable waste of public money averted and some real good derived through the Department of Agriculture at Washington.

It has reached the point in such matters that there is nothing that is more nearly parallel to public expenditure of money than sending missionaries to the Congo where a missionary and his staff are paid from \$1,500 to \$2,000, and their expenses from \$1,500 to \$3,000 more, to carry words of comfort to little naked pickaninnies, and distributing leaflets printed in the English language, from which they get about as much information as a goose—they also have a trunk full of beads and ribbons to amuse the little negroes while the missionary talks to them in an unknown tongue.—John A. Lusk, Guntersville, Ala.

ADDRESS BY SAM L. RICE

President Ohio Grain Dealers' Association,
Before the Eastern Federation
of Feed Dealers.

AS I become acquainted with men engaged in your line I am impressed with the fact that no class of men have a higher degree of integrity and are more ethical in the conduct of their business.

To corroborate this I remember the vice president of one of Toledo's largest banks, a bank which had nearly all the grain accounts of that city, state that in their experience of handling accounts of the grain men of that city they had never lost a dollar.

The other day we were moving, and when we came to that precious old grandfather's clock we hesitated on having the moving-van handle it, so I decided to carry it. As I tugged along the street with grandfather's clock in my arms a half-wit halted me. I asked him what he wanted. He replied, "Why don't you carry a watch?" Since then I have carried a watch, and each business day of the year at the exact moment the gong peals out 10:30 a. m. Eastern standard time, the world's greatest grain market opens, and instantly by radio and private wires reaching every nook and corner of the civilized world, prices are broadcast at which grain can be bought or sold for instant or future delivery.

Our grain marketing system, of which we can be justly proud, was not acquired in a single day, but had its inception back in 1607 at Jamestown, Va., when the settlers pooled the results of their efforts and placed in store the products of the soil for their maintenance during the nonproductive months of the year. They soon found there were idlers in the colony, who would not put anything into store. Then the man of the hour arose, Capt. John Smith, who told the idlers, "He who will not work, shall not eat."

Thus we have the first unwritten law with reference to the distribution of our agricultural products. The Jamestown colonists also believed in future trading; they stored in their public granaries the food products for future use. Since that time our marketing system has developed as our country has developed until today it is interwoven into the very life of our nation.

So essential in the distribution of grain and grain products to the welfare of our nation that we have been subjected during the past 34 years to 30 investigations by the federal government. These investigations comprise over 27,000 pages—the net results of these investigations is that our marketing system is still intact and those interested in keeping it at the high standard it has maintained can look the whole world in the face without making an apology for the manner in which our business is conducted.

The early settlers of the Jamestown colony were not the only poolers of farm products, for in these modern times there has been formed fifteen so-called wheat pools, whose aim has been to take charge of the selling of the grain instead of intrusting this function to the established dealers. Four pools have ceased to operate—Washington, Oregon, Idaho, Arizona. Eleven remain at this date in the field.

The total weakness of the pool is its high cost of operation. Really fostering that which they aim to eliminate, that is the cost of distribution.

The cost of marketing wheat through line elevators, farmers' elevators, mill elevators and independent elevators for the five crop years beginning 1912-13, as reported by the U. S. Department of Agriculture paper, "Agriculture Co-operation," averaged .0657c a bushel, while the average cost of marketing through the pool for 1922-23 was 14.9c a bushel. Is it any wonder the farmers of Dakota, Nebraska, Colorado, Oklahoma and Texas are crying for aid? These comparative operative costs are conclusive evidence that our grain

marketing system wrought out of the solid rock of human endeavor is the best and cheapest method of distributing our essential food products.

Today we are well over the threshold of a new year, and as we review with a dispassionate analysis the grain markets of the past eight or ten months, we find early last June our corn crop started in a crippled condition due to inferior seed and unfavorable weather conditions. The early killing frosts in certain sections further hampered the crop. The story of the 1924 corn crop in the central part of the corn belt of my own state to go into details would be nothing short of pitiful.

It is safe to say that Ohio did not produce enough marketable corn to take care of her requirements within the corn producing belt. Most fortunately for us we had a wonderful wheat and oat crop, both as to quality and quantity. Oats are rapidly passing into consumption on the very farms they were grown. Many stations are grinding more oats for the farmers to take home and feed than they are buying from them to ship. While our country was harvesting 75,000,000 bushels more wheat than we grew in 1923, our northern neighbor was sending reports of almost a total wheat crop failure; then came Argentina with a shortage, and recently Russia has been importing wheat, showing she was unable to feed herself. So with a world shortage of wheat and rye estimated by the U. S. Department of Agriculture of 760,000,000 bushels as compared with 1923 and a corn crop estimated at 621,000,000 bushels short of the previous year, \$2 wheat has become a reality and \$1.50 corn to the farmer who was fortunate enough to have at least part of a crop is his fondest expectation.

With grain prices occupying the position they do at present, with the annual income of our people nearly \$60,000,000,000, and of this \$6,000,000,000 is estimated as available for investments and savings. With all industrial lines looking forward for a steady demand for their goods and consumption of farm products having well overtaken production, I cannot see anything but very interesting prices for agricultural products during 1925 and well into 1926.

Of course, we must take into consideration legislation which might be passed, but very doubtful at this time. However, less than a year ago Congress was trying to pass some sort of thing to aid the American farmer—but let me tell you that the farmers have learned that any relief for them must come through their own efforts. They are amply able to care for themselves and will, if let alone by legislation. One favorable outlook is that the legislation that has been proposed in Congress has been so ridiculously void of common sense most of the propositions died before coming into life.

In conclusion, let us conduct our business with each other not so much for self, but for all. Let us cooperate to the fullest extent, and if difficulties arise try and get the other fellow's point of view before thinking too harshly of him.

Let us also remember whether prices are high or low, legislation or no legislation, that the Flag floats with protecting folds equally for all, and that we are living in the best country on the globe—the United States of America.

I desire to extend to you all an invitation to attend the next annual meeting of the Ohio Grain Dealers' Association, which will be held at Toledo next June. I am sure a cordial welcome will await you.

WHEAT FOR FRANCE.

Paris.—The government's wheat bill, designed to combat the high bread cost in France increases the credit for the purchase of foreign wheat from 100,000,000 francs to 150,000,000 francs, creates a control office for imported wheat and leaves with the local prefects the task of ruling whether bakeries should be closed one day a week or not.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Feb. 14:

ANNUAL CONVENTION AT PEORIA

Year 1924 Prosperous for Illinois Grain Dealers—Twenty-second Annual Convention Largely Attended.

All records, both for numbers and enthusiasm, were broken at the twenty-second annual convention of the Farmers' Grain Dealers' Association of Illinois, which was held at Peoria last week.

In his annual report, the secretary, Lawrence Farlow, stated that 90 per cent of the members made a profit from the business during the past year, a decided improvement over the year before, more than 150,000,000 bushels of grain having been handled and \$10,000,000 worth of farm supplies sold.

There are now 540 companies operating 615 stations belonging to the association and these companies have 65,000 farmer stockholders.

The association participated in the organization of the Midwest regional advisory board, which is splendidly functioning in the matter of freight transportation—car supply, etc.—and steps have been taken looking to the organization of a farmers' elevator commission company to operate in Chicago, Peoria and St. Louis.

During the year an auditing department was established and 20 companies have been audited since the first of the year.

Mr. Farlow's report laid particular emphasis upon the slogan, "We need to advertise," and called attention to the fact that free and unlimited storage of grain were factors bringing disaster to grain men.

Sleeping Giants.

Among the speakers were Charles Latshaw, secretary of the Farmers' Grain Dealers' Association of Ohio, who told those present they were "sleeping giants." "If you stick together you can get anything you want, and because you haven't been together in the past is the reason why you have failed to get the things you needed. Next to the church, the farmers' elevator points nearest Heaven of any institution in your town and your elevator is the biggest thing in your community besides the church," said Mr. Latshaw.

Throughout his address Mr. Latshaw emphasized the point that the elevators are in need of greater publicity and it was repeatedly said that if the managers would only stick together there is nothing in their business which they cannot accomplish.

The only way to keep the boys and the girls on the farms is to put farming on a paying basis, Sam Thompson, president of the Illinois Agricultural Association, told the men. "Co-operative marketing is like law enforcement," he said, "and it must work from the ground up rather than from the top down." He devoted the greater part of his time in making an appeal for greater co-operation and pledged the support of the farm bureau forces to the grain dealers' organization. Farmers do not want special legislation according to Mr. Thompson, but they only want the same consideration as is given to other industries.

Charging that the men behind the Chicago grain merger are the men who have fought co-operative elevators in every city, George E. Mellen, Mazon, Ill., was greeted with great applause. It was further charged that the *American Co-operative Journal* was under direct influence of the men behind the merger and for that reason the publication has failed to present the merger in the proper light. Realizing that the merger will again come before the grain dealers today, Mr. Mellen closed his address with the remark that "if you have any guts, show them today."

Charles Peavey, Chicago, was the last speaker on the morning program. He told of the many injustices done to the grain men during the early years of the present century.

At the banquet Tuesday night Thomas McMichaels, president of Monmouth Col-

ROY V. HARPER, PITTSBURGH.

AMONG the modern grain elevators of Pittsburgh, Pa., is the plant of the Harper Grain Co. The president of the corporation and its active manager is Roy V. Harper, a man of long experience in Eastern grain trade circles, honored for two successive terms as president of the Pittsburgh Grain and Hay Exchange. This market

lege, in delivering the principal address, brought out the point that the young people today are getting many advantages from the community in which they live, but are not giving anything in return.

Men Not Co-operators.

Charges that the men behind the Grain Marketing company have never been co-operators and that it is not reasonable to expect them to co-operate now were made by J. W. Shorthill, Omaha, Neb., secretary of the Farmers' National Grain Dealers' Association. The warning was given that elevator managers know little about the possibilities of terminal elevator marketing and that it would be five or more years before the farmers get control of the elevator holdings.

These statements, together with many others, were made about the company. Mr. Shorthill further declared that farmers or others could not expect to run a business on the plans outlined by the company and that it would be impossible for the farmers ever to govern the organization, because, if there are eventually a million shareholders, then, even voting by proxy, a meeting of 83,334 persons would be required. What is really needed is elevators on the farms and not terminal facilities, according to Mr. Shorthill.

Denies Charges.

Many of these charges were denied by J. W. Coverdale, secretary of the Grain Marketing company. He pointed out that the company is already doing a huge business; it has holdings in many of the leading distributing points of the United States; it has done business with more than 700 elevators which are scattered throughout the central west, and that it is a farmers' company and, combined with the features of co-operative marketing principles, it has men directing it who are leaders in the grain trading world. Its credit is unlimited and it is economically sound, asserted Mr. Coverdale.

Sam Thompson, president of the Illinois Agricultural Association, declared that the business must be developed from the ground up rather than to be forced on the farmers from any superior body.

Course in Marketing.

Early in June a short course in elevator management will be given at the University of Illinois, Prof. Charles L. Stuart, director of agricultural economics, stated. That part of the course dealing with terminal marketing may

be given in Chicago. Economy in handling grain and buying and selling are the problems that will receive special emphasis.

In developing community spirit, farmers can learn much from the activities carried out by such organizations as Rotarians, Kiwanians and chambers of commerce, according to Mrs. Charles W. Sewell, second vice-president of the Indiana Farm Bureau Federation. The threshing ring was mentioned as the best example of co-operation, while the only thing that can stop the farmer from being well organized is himself.

F. B. Olmstead of Somonauk, who was elected president for the ensuing year, is a lawyer and a grain dealer and one of the organization's most capable members. He has been connected with the association for years and was its vice-president during the past year.

Peoria was again chosen for the convention city.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Feb. 2...	70,422	17,408	11,730	3,701	10,261

WHEAT CONTROL IN ENGLAND

Arguments for and Against Governmental Control of Wheat and Flour Importations—Would Prove Disastrous in India.

By JACK BROOKS.

London, Jan. 30.—The Socialist plan for the state control of wheat supplies is strongly condemned here by the Earl of Crawford, former president of the Board of Agriculture and a chairman of the Royal Commission on Wheat Supplies. Crawford says that wheat cannot be controlled in isolation—the control of all other cereals being made necessary.

The subject of wheat control came up again before the Food Supplies Commission this week, the commission looking for flaws in the wheat import board plan. E. F. Wise, a Socialist, formerly in the Ministry of Food office, urged, when giving evidence, that it is the duty of the government to form an import board for the importation, under government control, of all wheat and flour required in Great Britain. He said he spoke on behalf of the Independent Labor party. He suggested that—

All wheat and flour importations here be regulated by government.

All unnecessary middlemen's charges be eliminated and distribution costs be reduced.

All bulk contracts be made with organized wheat producers, especially in the dominions.

Maintenance of steady prices for British wheat be made possible for long periods at prices dependent on the anticipated average prices for the period of imported wheat which should be supplied to the market in sufficient quantities to ensure the absorption of British wheat at the stated prices.

Wise said that the import board should be formed as a business corporation carrying out defined duties by act of Parliament. It would be responsible to a minister for the discharge of its duties, and be guaranteed by the Treasury a working capital sufficient for its operations. He said committee reports showed that the milling industry is in a parlous state owing to inefficient organization and that millers are meeting the situation by forming price-fixing rings, the consumer having to foot the bill for the inability of the milling industry to organize on efficient lines. Independent milling companies, he said, are becoming "trustified" into vast combines, with ramifications in producing markets. The cost of distribution, he said, could be reduced by 50 per cent by proper organization. Wide powers also should be given local authorities, he thought, to regulate control of bread making.

Wise was closely questioned by Sir Auckland Geddes (chairman of the Food Supplies Commission). He asked whether government purchasing would not open the door to political pressure. Wise thought this phase of the question greatly exaggerated. The operations, he said, would not be conducted as between governments, the importing board purchasing in world markets at world prices. It would buy not from dominion governments, for instance, but from the organized wheat growers.

"Then why the insistence of a Treasury guarantee of sufficient working capital?" asked Geddes.

"Various organizations are set up for special purposes with parliamentary guarantees," said Wise.

Chairman Geddes said he thought no one selling wheat would be misled by the camouflage that he was not selling to the British government.

Wise said it was very different during the war. Europe had to buy from America. It was the only country from which one could transport. Prices naturally went up. But today, Wise said, Britain has the whole world to buy from. Asked from his experience as food minister if he thought a producers' organization and fixed producers' prices would help the consumer so far

as wheat and flour is concerned, Wise said that only in a degree is the experience of the Ministry of Food applicable, but the operations of a food ministry are an immense advantage to the consumer.

Chairman Geddes said the commission has a great deal of evidence to the effect that there is such an enormous supply of wheat in the world and its movement is so free that nothing in the nature of cornering wheat is now possible. Wise said it was not desirable that prices should be "fixed" for the whole world. He denied that his intention was to exercise control over the wheat growing industry at the grower's expense.

The Earl of Crawford then gave evidence. The general control of millers, he said, is impossible. If, he said, the state imported wheat as suggested, then controlled its conversion into flour and also settled the price of bread, the consumer would claim uniform quality. The logical outcome was standardized flour. Ultimately 40,000 bakers and some 100,000 retailers of flour would have to be state controlled. Compensation to them and the millers would be unavoidable. Government intervention in domestic trade, however, neutral, paralyzed private initiative. In his opinion, he thought a government wheat buying department would encourage, rather than eliminate the speculator. If a board succeeded in stabilizing prices it would be a maximum level and not a minimum one. The notion, he said, that an imports board should estimate the yield of wheat three, or possibly five, years ahead, is quite fantastic, since importers often are at a loss to estimate bulk five weeks ahead. State action, he thought, would be dangerous. Foreign relations would become complicated, and, in times of difficulty, embittered by this commercial element. As regards the suggestion that the state should take action to keep down wheat prices abroad, Lord Crawford said:

"In India, any announcement that this country was using its gigantic credit to depress the export value of the Ryots wheat would spread through the bazaars like wildfire and the results would be perfectly disastrous."

Considerable more evidence on wheat and flour and the advisability of creating an import board is to be heard by the commission which was appointed by Premier Baldwin as a result of gradually mounting prices of foodstuffs, particularly flour and the loaf.

GRAIN MARKETING COMPANY

A plan has been evolved to liquidate the entire indebtedness of the U. S. Grain Growers, Inc., roughly, one half million dollars. The plan as announced by Eugene Funk of Bloomington, Ill., chairman of a special committee appointed by the grain growers to consider the Grain Marketing Co.'s stock selling project, is this: Provision is offered for members of the U. S. Grain Growers, Inc., to wipe out their indebtedness, their chief creditors being state and county farm bureaus. Of the approximate \$300,000 indebtedness, \$217,071 was loaned by state or county farm bureaus, the total amount owed to farm bureau organizations is listed by states as follows:

Illinois \$180,101.54; Indiana, \$17,300.90; Iowa, \$1,301.06; Kansas, \$1,398.69; Minnesota, \$3,900.99; Missouri, \$4,572.50; Nebraska, \$1,564.33; Ohio, \$6,841.14.

The method of liquidating this indebtedness through the Grain Marketing Company was brought about by a contract which provides the members of the U. S. Grain Growers with the cooperative marketing privileges of the Grain Marketing Company and also with one share of non-assessable common stock, which gives members in the U. S. Grain Growers full membership and patronage dividend privileges in the Grain Marketing Company, Mr. Funk explained. This contract incurs no additional obligation on the U. S. Grain Growers' member.

The contract further provides that the obligations of the U. S. Grain Growers will be liquidated by districts or states through a representative or a committee. When a certain percentage of the membership of the U. S. Grain Growers in such a district or state shall have accepted the membership in the Grain Marketing Company, 10 per cent of the obligations for the district or state will be paid by the Grain Marketing Company at once and the remaining 90 per cent will be absorbed by a fund created from the grain sold directly or indirectly to the Grain Marketing Company from its members in such a district or state.

In connection with this matter of such general interest to the grain trade, it is stated by the officials of the Grain Marketing Co. that stocks sales have been satisfactory.

SANTA FE ELEVATOR PROGRESS.

Work on the big terminal elevator at the Santa Fe elevator at Argentine, Kans., which is in the Kansas City switching district, is progressing nicely. The foundations for the additional storage are finished and concrete running for the bins will start early in March. The office building and the shop and boiler house are practically completed. Much of the machinery in the old house has been changed and the following orders have been placed for the new house: Westinghouse motors, "Diamond" rubber conveyor belts, Morse chain drives, Huntley cleaners, four No. 6 Hess grain driers and Webster Manufacturing Co. handling machinery.

ADDITIONAL UNIT FOR BUFFALO ELEVATOR.

The Superior Elevator Co. of Buffalo has just awarded a contract for an additional unit to its plant, equipped with one of the largest marine unloading legs, and additional loading out facilities. Construction will begin at once and will be completed by Sept. 1, in time for fall business from the head of the lakes.

The Superior elevator was built in 1914, with a capacity of 1,500,000 bus. In 1923 another unit was added, giving the company a capacity of 2,500,000 bus. With the proposed addition, the capacity will be increased to 4,000,000 bus.

FINAL GERMAN CROP REPORTS.

German harvests of bread grains for the year 1924 evidently do not show quite as great a decrease as had been predicted by earlier movement and private estimates. According to harvest figures, just published by the German Statistical Office, wheat and spelt harvest were 16 per cent smaller than the yield last year and rye harvest showed a decrease of 14 per cent. According to these new figures the harvest of wheat and spelt amounted to 94,000,000 bus., and that of rye to 226,000,000 bus. On the same territory, the yields in 1913 were 164,000,000 bus. of wheat and spelt, and 399,000,000 bus. of rye.

WOULD CENTRALIZE AUTHORITY.

The report of Justice Turgeon and the Canadian grain commission, renews the recommendation of the interim report that all terminal elevators owned or financed by the government be placed under one authority. Whether this will be done or not is questionable. The Vancouver harbor commission is among those who will resist. There are now seven different authorities exercising jurisdiction over grain elevators and the argument is that one would secure greater uniformity and efficiency. On the other hand, the objection is that these harbor boards would continue in business anyway and the new scheme simply would be adding another commission.

ORDERS NEW DRIER.

The Northwestern Elevator Company of Fort William, Ont., have ordered a large Hess Drier for its new elevator, now building the Barnett-McQueen Construction Company. The drier will be installed in a concrete building placed alongside the elevator. A large supply bin is built above the drier, and another large bin directly below, which will enable the operators to run the drier at night, without operating any machinery in the elevator.

ORGANIZE NEW EXCHANGE.

Through the election of a permanent set of officers and directors the newly incorporated Boston Flour & Grain Exchange becomes a separate organization instead of being a department of the Chamber of Commerce. The officers of the exchange are: Dean K. Webster, president; Elmer E. Dawson, first vice-president; Richard F. Pope, second vice-president; directors for three years, Caleb H. Jaquith, Frank A. Noyes, Henry P. Smith and Warren G. Torrey; directors for two years, Robert C. Bacon, Harry Hamilton, Alexander S. MacDonald and Charles Varga; directors for one year, E. H. Day, Edward M. Hagarty, William B. Hanna and Andrew L. O'Toole.

CANADA THISTLES.

A definite plan carefully thought out and consistently followed is more than half the battle in exterminating Canada thistles, says Dr. Freda Detmers, assistant in botany, Ohio Experiment Station, in suggesting plans for the control of this weed pest.

"To eradicate Canada thistles in fields of small grain the use of smother crops is most effective. For this purpose alfalfa and sweet clover have given the best results. Fields now in winter wheat may be sown to alfalfa in March, provided the soil has been sufficiently limed to insure a heavy stand of alfalfa. If the field is to be sown to grain in the spring, the alfalfa or sweet clover should be drilled in at the same time as the grain.

"Cultivated crops when possible should be planted far enough apart in the row to permit of cross-cultivation.

"To clean up permanent grass lands, orchards in sod, meadows, pastures, fence rows, and roadsides, recourse may be had to herbicides or poison sprays. The soluble arsenites are the only ones which have thus far proved satisfactory. These are applied with a power or compression sprayer.

"Thistles in small isolated patches

American grain is being exported constantly across the water and the above photograph illustrates in a very striking way, two loading spouts discharging a cargo of grain from the B. & O. Elevator at Baltimore into a steamer for export.

Copyright by Ewing Galloway Co., New York.

GRAIN EXCHANGE ANNUAL REPORT.

The annual statistical report of the St. Joseph, Mo., grain exchange which has just been put out, shows that the total receipts of grain at St. Joseph last year amounted to 27,818,650 bushels, and the shipments to 14,247,800. The officers of the exchange for 1925 are C. L. Scholl, president; S. A. Penney, vice president; N. K. Thomas, secretary, and F. L. Ford, treasurer.

can be successfully disposed of by cutting the green shoots with a spud or hoe just below the surface of the ground. The operation must be repeated as often and as long as green shoots appear."

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

SCAB ENEMY OF GRAIN

Wheat and Corn Suffer from This Destructive Disease—It is Wide Spread.

AFTER five years of careful study of wheat scab or head blight, under the direction of Dr. E. C. Stakman of the division of plant pathology and botany at the Minnesota Agricultural Experiment Station, Jean MacInnes and Raymond Fogelman report that in the United States the infection now ranks as one of the very destructive diseases of wheat and corn.

They say that in 1919 an epidemic of the disease in the wheat-growing regions of the United States caused a loss of about 5 per cent of the total wheat crop. In both 1919 and 1920 the same disease attacked corn, decreasing the yield by about 4 per cent. Severe attacks of scab have occurred not infrequently. According to the report of the Minnesota investigators, in technical bulletin No. 18 of the Minnesota Experiment Station, "Wheat Scab in Minnesota," there were "epidemics" of the scab in 1905, 1907, and 1915. The 1915 epidemic caused a loss of 5 per cent.

Disease Is Wide-Spread.

The disease is widespread in Europe, Australia, and North America. It has been reported from practically all of the wheat-growing regions of the United States east of the Rocky Mountains, as well as from Utah and Oregon. In Canada it is most prevalent in the maritime provinces, Nova Scotia, Quebec, Ontario, New Brunswick, and Prince Edward Island. It was destructive in those provinces in 1919, and at the same time appeared in southern Manitoba and Saskatchewan. In Minnesota the scab has been most prevalent in southern, southwestern, and west central wheat-growing counties, though it occurs also in the Red River Valley. Marquis, the most popular spring variety, is peculiarly susceptible.

The symptoms of scab on wheat are most conspicuous on the heads. The disease may sometimes be seen soon after the heads have emerged from the sheath, though it may not become visible until much later. According to the bulletin, affected spikelets often seem to have ripened prematurely while healthy spikelets are still green. The glumes of the diseased spikelets, however, are usually pale and sickly, especially when they have been attacked while still young, and they may be partly covered with a varying amount of a white or slightly pinkish substance known as mycelium. They are often cemented together with a smooth pinkish, orange, or reddish incrustation. The number of affected spikelets in a head varies greatly. Only a single one may be affected or nearly all may be diseased. The appearance of affected kernels depends largely upon the age at which the head is attacked. If it is attacked while still very young, practically nothing but the seed coats may remain and these are often covered with the whitish or pinkish mycelium. If kernels develop they are usually very small, much shrunken and can easily be crushed between the fingers. If the kernels become affected after they have developed to some extent they may be less shrunken but they usually have the same general appearance as the more badly shrunken kernels. When the disease attacks rye, barley, oats and grasses, the symptoms are similar to those on wheat.

The disease may also attack the seedling. It is then known as seedling blight and often appears in definite patches in a field, and the plants in considerable areas are sometimes killed. They usually appear stunted, their root systems are small, and the individual rootlets are often brown or pink and may decay rapidly.

Attacks Roots of Corn.

When the disease attacks corn it affects the roots chiefly, causing what is known as root-rot. In 1919 a careful summary of the plant disease survey

of Minnesota, made by the U. S. Department of Agriculture, showed a much higher average percentage of scab on wheat grown on corn-land than on wheat grown after either wheat, rye, or barley. This seems to be a common experience. Wheat on land which has just been in corn seems to fare worse than elsewhere. Perhaps this accounts for the fact that wheat scab in the United States is most prevalent in the corn belt. The accompanying map shows that its ravages are worse in Illinois, Indiana, Ohio, Kentucky and Tennessee, though it is found in the entire corn belt.

By experiment the investigators showed that the infection could also be carried to clover, flax, beans, sunflowers, potatoes, tomatoes, cucumbers, carrots, peas, squash, and even radishes.

No Control Methods Yet.

Satisfactory methods of controlling wheat scab are not known. The fact that the disease may thrive on so many different grains and other vegetation complicates the problem. Methods such as the burning of stubble, the cleaning of seed, and the rotating of crops, while they have helped, have not enabled the control of the infection. The most promising plan seems to lie in the development of scab-resistant varieties just as the control of wilt in flax has been found in the development of wilt resistant varieties. Inasmuch as

GEOGRAPHIC DISTRIBUTION OF WHEAT SCAB IN NORTH AMERICA.

The area where scab is reported serious corresponds closely with that of the production of soft red winter wheat in the United States.

infection may be carried by infected seed, by infested soil, by corn stubble, and other debris, the fanning of seed and the rotation of crops are advised, but these precautions will not altogether prevent the spread of the disease because spores may be scattered by the wind, by insects, and other carriers.

Another Spore Attacks Roots.

Louise Dosdall, another investigator in the division of plant pathology and botany at University Farm, St. Paul, under the direction of Dr. Stakman, has issued technical bulletin No. 17, on another cause of disease known as Helminthosporium sativum, which causes a foot- and root-rot of wheat, rye and barley and which has been serious in certain parts of Minnesota. The disease also attacks the leaves and stems and especially the nodes, glumes, and kernels of cereals, and a large number of wild grasses. The disease seems to thrive under a wide range of environmental conditions, though it appears to develop most severely at high temperatures in the presence of sufficient moisture. The disease becomes apparent in the form of brown spots of irregular outline upon the leaves, which are easily broken up and, in some cases, completely destroyed. The straw at harvest time is dull brown, and instead of standing erect becomes a tangled mass. The author does not suggest means of control, though the possibility here again seems to lie in the direction of the development of resistant varieties.

NEW SANTA FE ELEVATOR

The large new modern terminal elevator which has been designed and is now being built by the John S. Metcalf Company for the Atchison, Topeka & Santa Fe Railroad Company at Argentine Station, Kansas City, Kansas, is to be equipped with a four unit Hess Drier which will have a capacity to dry and cool 60,000 bushels of grain a day. It will have the new dust collecting features lately devised by the Hess Company, and which have proved so successful in the Hess Driers installed for the Baltimore & Ohio Railroad at Baltimore.

The drier building at this new elevator will be placed above the track shed, thus giving sufficient elevation to spout direct to the drier legs in the elevator. Grain to be dried can be spouted from the hopper scales in the elevator, direct to the large supply bins placed over each drier unit. By means of these supply bins and the independent drier legs, the driers can be operated at any time, day and night, without the slightest interference with any work going on in the elevator.

The drier building will be of the "daylight" type, the walls being almost entirely composed of windows which flood the whole building with light. The entrance to the building is through the elevator, and every floor of the driers is reached by wide easy stairs. Ample space is provided all around the machines.

The elevator, which is the largest in the Kansas City market, is operated by the Grain Marketing Corporation.

MARKETING METHODS.

A national conference of representatives of cotton producers and of the cotton trade and textile industry in the U. S. has been called at Washington Feb. 24 by the Department of Agriculture.

The conference is for the purpose of reviewing the department's research work in cotton marketing and handling, with special reference to avoiding losses due to country damage, the so-called "city crop," tare irregularity and uneconomic methods of handling.

Investigations along these lines were undertaken by the department in 1913 under Congressional authority, and considerable progress has been made, notably in such matters as a standardization and warehousing. Representatives attending the conference will be invited to review the work already done and to assist in formulating a plan of action for the future.

The meeting will convene at 10 a. m., in room 411 of the Bieber Bldg., 1358 B street, S. W., and all interested are invited to attend.

In an effort to conciliate the agrarian parties, the German minister of finance is proposing to raise the duty on imported grain to 60 cents a hundred-weight for rye and 72 cents for wheat.

DOUBLES CROP YIELDS.

The average yields of corn, oats, wheat, and clover in four 10-acre fields at the Ohio Experiment Station are double the average yields of the state for the same decades as a result of a practical application of farm manure, lime, and fertilizer.

In the fall the clover sod is dressed with about ten tons of manure per acre, the manure having been protected from the weather and reinforced during accumulation with acid phosphate at the rate of 40 pounds per ton. This is plowed under in the spring and, as the Wooster soil is acid, one or two tons of ground limestone is stirred into the surface. The wheat receives about 300 pounds of acid phosphate and 50 pounds of muriate of potash per acre when seeded, with the addition of 50 to 75 pounds of nitrate of soda in April in the few years when the growth seemed below par. The oats and clover have not been fertilized.

Under this treatment the corn has averaged more than 70 bushels of shelled corn per acre, oats 62 bushels, wheat 34 bushels and clover hay 3 tons. The average yields for the last ten years of the period were greater than for the first ten years, showing that the soil is increasing in fertility as well as producing profitable crops under this practical treatment.

LARGER CANADIAN WINTER WHEAT AREA.

The area seeded to winter wheat in Canada up to Oct. 31 is reported by the Dominion Bureau of Statistics at 832,200 acres, compared with 767,200 acres on the same date last year, and with a harvested area of 773,945 acres in 1924. The condition of the crop is reported to be average. The winter rye acreage is reported at 758,116 compared with 770,416 harvested in 1924.

LORD'S TRUCK & WAGON DUMP.

The Lord's Universal Truck & Wagon Dump as shown at several recent grain conventions is now in production and deliveries can be made for new and rebuilt elevators. The offices of the company are at 322 Liberty Bldg., Des Moines, Ia. Among its important advantages are: Either "stationary" or "portable" installation at a very low cost. When truck or wagon is elevated, the worm gear used makes an absolute lock which makes it impossible for either truck or wagon to raise or lower without the operator's knowledge. Can be installed without motor, although motor can be attached at any time without changing the location of dump. Does away with mechanical trouble as no air is used. Will dump from any length of wagon or truck into a single dump door or into any number of dump doors. Can be adjusted to automatically stop at any desired height without the operator's attention.

LORD'S UNIVERSAL TRUCK & WAGON DUMP.

Legal, Traffic and Arbitration Decisions

TRANSPORTATION MATTERS

Rate and Route in Conflict.

Question: Philadelphia, Pa., Jan. 2, 1925. A shipper desires to transport a carload shipment taking a fifth-class rate between Philadelphia and Chicago. In route he indicates P. R. R.-C. M. & St. P. delivery at Chicago and on same bill of lading he also shows rate of 50½ cents, which is applicable only via rail and lake or ocean-and-rail traffic.

Carrier forwards the shipment as shown in route, namely all rail. Here arises the question. Is there any present ruling which clearly specifies carrier's liability to arrange service as to rate shown, or is railroad justified in applying all rail rate?

REPLY: The carrier's agent is lawfully obliged to refrain from executing a bill of lading which contains a provision that cannot be lawfully complied with or provisions which are contradictory and therefore impossible of execution. When the rate and the route are both given by the shipper in the shipping instructions, and the rate given does not apply via the route designated, it is the duty of the carrier's agent to ascertain from the shipper whether the rate or the route given in the shipping instructions shall be followed.

However, it must be remembered that where conflicting rates and routes are shown in the bill of lading by the shipper, the carrier is not obliged to turn the shipment over to a competitor, in order to insure the application of the rate indicated. Such was the holding of the Interstate Commerce Commission in *McLean Lumber Co. vs. L. & N. R. R. Co.* et al., 22 I. C. C. 349.

Again, where the rate shown by the shipper is not that which applies via a competing route or where the route is under unified control with the one shown in the bill of lading, the carrier will be held responsible for any damages which may result from its failure to follow the provisions laid down in Conference Ruling 474-C.—Trade and Transportation Bulletin.

New Classification Effective.

Consolidated Freight Classification No. 4, effective Feb. 10, is now being distributed, the price being \$2, and copies may be purchased from the chairman of either the Official, Southern, or Western Committees.

Suspends Tariff.

The Interstate Commerce Commission has suspended until June 30, tariffs filed by the C. M. & St. P., Great Northern and Northern Pacific railways, which proposed a milling in transit charge of 2½ cents on grain and grain products, milled at points in Montana, Oregon and Washington, destined to points in California.

Awards Reparation.

In the case of the Southwestern Milling Co., against the Washington & Old Dominion, the I. C. C., has just awarded reparation on shipments of bran in car loads, because notices of arrival did not show the numbers and initials of the cars, holding that demurrage did not start until proper notice had been given.

Recommends Dismissal.

Attorney-Examiner Mackley in a tentative report to the I. C. C., has recommended the dismissal of the complaint of the Railroad Commission of Montana

against the B. A. & P. and other railroads in which it was alleged that rates on grain and grain products, from points in Montana to Seattle, Minneapolis and other cities, were unreasonable.

Rejects Gooding Bill.

The Interstate Commerce Committee of the House of Representatives has rejected by a vote of 11 to 6, the so-called Gooding bill, which proposed to take from the Interstate Commerce Commission the authority it now has to permit the railways, under certain conditions, to charge more for a shorter than for a longer haul, in the same general direction.

ARBITRATION DECISION.

Sigmond Rothschild Company, Houston, Texas, vs. Transit Grain & Commission Company, Fort Worth, Texas.

—(When the middleman in a contract acts as a principal, he cannot plead lack of responsibility to the plaintiff because of the fact that his contract of purchase from the shipper was the same as his contract of sale to the buyer. Assumption of the role of principal to a contract carries with it assumption of responsibility.)

The arbitration in question grows out of the purchase by Sigmond Rothschild Company, Houston, Texas, from the Transit Grain & Commission Company, Ft. Worth, Texas, of one car of snapped corn loaded at Salina, Kansas, inspection "cool and sweet."

Both parties to this arbitration have clearly stated the facts in the case, and there is little difference in the claims set forth by either party, with the exception that the Transit Grain & Commission Company, Ft. Worth, Texas, assume that since they acted as middlemen and delivered on their sale what they took on a similar contract of purchase from someone else, that they as middlemen are not liable to the plaintiff.

The defendant forwarded to the plaintiff the papers that came to him from the shipper. There is no doubt in the minds of this committee, from the certificate furnished, that this car was not "cool and sweet corn" when it was applied on sale by the defendant, and as there was an inspection outstanding which should have accompanied his papers and was not forwarded to the plaintiff, the plaintiff should not be barred because he took in good faith the inspection certificate of October 25 and proceeded against the carrier. Nothing in the evidence shows who requested the second inspection. If the defendant was imposed on by someone with whom he traded, it was no fault of the plaintiff and the plaintiff should not stand a loss on account of such imposition.

We, therefore, feel that the plaintiff, acting in good faith and endeavoring to collect his loss from the carrier, believing that the certificate of October 25 was a correct basis of settlement with the defendant, is not barred from any rights that may have existed, and now enjoys any rights against the defendant that he had when the car was received at Piedmont, Texas.

The defendant pleads that he is a so-called middleman in this transaction, and that if he acted in good faith and furnished the documents that were fur-

nished him, he has complied with his contract. The committee does not agree with this conclusion, inasmuch as he was the seller of this car of corn and the obligation rested on him to furnish what he sold, regardless of what some other shipper may have delivered to him.

It is clear to this committee that a certificate of inspection on October 27, the date of the sale, must take precedence over a certificate of October 25.

We believe that the defendant acted in good faith, but we are convinced that the car of corn tendered did not fill the contract of sale and that the certificate of grade dated October 27 was the certificate of grade which should have governed this transaction.

We find for the plaintiff in the amount of \$200.25 and assess the defendant with the cost of arbitration.

COURT DECISIONS.

An elevator company entered into an agreement with a contractor to construct a grain elevator. The contract provided that the company was to pay all material and labor bills when they became due up to 90 per cent of the total cost. Under this contract, a material man was entitled to recover in his own name against the company for the value of materials furnished, since the material man in practical effect was a third party to the contract and one of the persons for whose benefit the contract was made. (*Weber Engine Co. v. Lehrach*, Court of Appeals of Mo., 262 S. W. Rep. 457.)

Must include demurrage charges in their tariff schedules; "Train Transportation." Under interstate commerce act and its amendments (Comp. St., sec. 8563 et seq.), train transportation embraces all services in connection with the shipment, including storage of goods after arrival at destination, and every common carrier subject to the act is required in its tariffs to state separately demurrage and other terminal charges and to adhere thereto, as to other parts of its tariff and schedule.—*Turner, Dennis & Lowry Lumber Co. v. C. M. & St. P. Ry. Co.*, Dist. Court W. D., Mo., 2 Fed. Rep. (2d) 291.

Court without jurisdiction of action for reparation except on finding of Interstate Commerce Commission. No action for reparation for exaction of unreasonable or discriminatory demurrage charges can be maintained in any court in the absence of an appropriate finding by the I. C. C.—*Ibid.*

Order of commission or regulation of carrier may be set aside by courts only for want of power to make it. In determining whether an order of the I. C. C. or a regulation of a carrier shall be suspended or set aside, power to make, and not the wisdom of the order or regulation, is the test.—*Ibid.*

Demurrage charge held within powers of carrier. A regulation made by the Director-General of Railroads during federal control and continued by a carrier as part of its tariff schedule after such control ceased, imposing an additional demurrage or storage charge in the nature of a penalty for detention of cars beyond a stated time, is not a penal law for punishment of an offense which comes within the purview of constitutional guaranties, but is within the powers of the carrier under interstate commerce act, subject to revision or abrogation by the I. C. C.—*Ibid.*

Publication of tariff is notice to all shippers. The published tariff schedule of an interstate carrier is due notice of its terms to all shippers.—*Ibid.*

BIDS FOR CANADIAN ELEVATOR.

The Canadian National Elevator at Halifax was opened for bids Jan. 8. It is a government property and is operated by the Department of Trade and Commerce.

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 9.....	68	5	10	44	47
Feb. 10.....	33	2	31	76	32
Feb. 11.....	50	5	23	22	45
Feb. 12.....	Holiday				
Feb. 13.....	78	7	16	51	61
Feb. 14.....	79		32	51	28
Total	308	19	112	244	213

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Feb. 9.....	\$1.00@1.05	Feb. 12....	Holiday
Feb. 10.....	.99@1.04	Feb. 13....	\$0.96@1.03
Feb. 11.....	.96@1.05	Feb. 14....	.96@1.00

Receipts of barley at Chicago for week ending Feb. 14, 1925, were 237,000 bus., compared with 237,000 bus. same week 1924; shipments, respectively, 117,000 bus. and 115,000 bus.

MILWAUKEE—Maltsters and shippers were only moderately active in the Milwaukee barley market during the past week. Offerings were fair and demand improved slightly at the close. Receipts were 213 cars as compared with 192 cars a week ago and 116 in 1924. Prices closed 2@3 cents lower for the period. Choice to fancy, 48 to 50 lb. test, quotable at \$1@1.01; fair to good, 44 to 47 lb. test, 95c@\$.1; light weight, 40 to 43 lb. test, 90@96c; feed, 88@93c. Iowa quoted 90c@\$.1.01, as to quality; Wisconsin, 90c@\$.1.01; Minnesota, 90c@\$.1.01; Dakota, 95@99c; feed and rejected, 87@93c.

FORT WORTH.—Receipts of barley have been very light with extremely slow demand, and there has been very little trading.

DULUTH.—Barley market was easy during the last week and business was light beyond a spurt on one or two days, when dealers covered their needs for the time being. Receipts for the week were 13 cars. Closing prices are from 1 to 3c off at from 80 to 92c.

CHICAGO—Offerings were moderate and demand was good. Germany and the east bought liberally with more than 250,000 bushels confirmed to seaboard. Receipts for week, 237,000 bu.; shipments, 117,000. Closing prices were: Malting quality, 96c@\$.1; feeding and mixing, 90@96c, and screenings, 50@82c.

MINNEAPOLIS—Feeders and maltsters came into the Minneapolis market at a time when it could have been no more opportune, taking upward of a quarter of a million bushels, relieving the cash market of the heavy pressure incident to the radical decline in the option. Understand that 200,000 bushels was sold for export, all rail shipment to the coast, during the past week. Tonight's closing range showed: 80@92c. Elevator stocks here show 2,200,648 bu. vs. 2,171,182 last week and 614,638 a year ago.

KANSAS CITY—Three cars comprised the total receipts of barley this week. They were absorbed by a limited shipping demand, mainly for poultry feed manufacture. As a reflex of the general weakness in coarse grains, barley declined 3@4c per bushel. No. 3 closed at 93@94c and No. 4 at 91@92c. Stocks fell off 2,000 bus. to 6,000, against 325,000 a year ago.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Feb. 14:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 9.....	3	38	5	5	11
Feb. 10.....	8	22	17	3	4
Feb. 11.....	8	20	11	4	7
Feb. 12.....	Holiday				
Feb. 13.....	10	27	11	7	12
Feb. 14.....	8	10	14	1	5
Total	37	117	58	20	39

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Feb. 14 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 9.....	\$1.52 1/4	\$1.56 1/2	\$1.61 3/4	\$1.60 1/2	\$1.60 1/2
Feb. 10.....	1.46	1.50 1/2	1.56 1/2	1.55 1/2	1.55
Feb. 11.....	1.40	1.44	1.55 1/2	1.48 1/2	1.52
Feb. 12.....	Holiday				
Feb. 13.....	1.42 1/2	1.47	1.51	1.51 1/4	1.46
Feb. 14.....	1.48 1/2	1.52 1/4	1.53 1/4	1.56 1/2

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Feb. 14:

	Feb.	May.	July.	Sept.
9.....	1.66 1/4 @ 1.70 1/4	1.41 1/2 @ 1.45 3/4	1.23	@ 1.24
10.....	1.60 1/2 @ 1.65 1/4	1.36 1/2 @ 1.41	1.20 1/2	@ 1.22 3/4
11.....	1.54 @ 1.62 1/2	1.31 1/4 @ 1.38	1.18	@ 1.22 3/4
12.....	Holiday			
13.....	1.54 @ 1.60	1.30 1/4 @ 1.34 1/2	1.16	@ 1.18
14.....	1.57 1/2 @ 1.62 1/2	1.34 @ 1.37 1/2	1.17	@ 1.19 1/2

Receipts of rye at Chicago for the week of Feb. 14, 1925, were 50,000 bus. vs. 77,000 bus. same week of 1924; shipments were 68,000 bus. vs. 4,000 bus. same week of 1924.

MILWAUKEE—Although the Milwaukee rye market showed an impressive revival of strength on Friday and Saturday prices closed 3@4c lower for the week. Shippers were steadily in the market throughout the period and most of the offerings were readily absorbed. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Considerable Wisconsin sold on a forward shipping basis. Dry and choice continued scarce and wanted. Receipts for the period were 39 cars as compared with 43 a week ago and 51 in 1924. Market closed \$1.51 1/4 @ 1.53 1/4 for No. 2, inside for Wisconsin, ranging at 8@10c under May price.

CHICAGO—Trading was in good volume and the market active throughout the week. Car lots were in good demand and due to an estimated export demand of 1,000,000 bushels, buying for export was persistent. Closing prices were: No. 2, \$1.53 1/2 @ 1.54; No. 3, \$1.51; No. 4, \$1.48 1/2.

MINNEAPOLIS—The first three days of the week, receipts were inclined to be light and the mills were after most of the offerings. Friday, however, they seemed to have their fill and backed away, with the result that discounts were heavier. Today they were back in the market and discounts were lowered. Closing quotations showed: No. 1 at 1/2 @ 1c under the May and No. 2, 2@3c under. Local elevator stocks totalled 1,165,656 bu. vs. 1,190,742 last week and 7,711,745 a year ago.

DULUTH.—Market in rye was active and reactionary during the last week, prices covering a range of 12 1/2 c. Trading was under the influence of the wheat market and its prices were dependent upon export buying. After a break to \$1.44 spot rye closed 2 1/4 c off at \$1.52 1/4. German buying of rye held at the seaboard was reported on the break.

NEW YORK.—The export demand for rye improved and sales for the week were estimated around three million bushels, mostly to Germany and Scandinavia. Cash rye premiums are somewhat firmer.

Beans and Potatoes

SOY BEAN GROWERS FORM POOL.

Growers of soy beans in Sussex County, Md., recently held a meeting to form a pool with the object of holding the beans for a higher price. Buyers at the present time are offering the growers \$3.00 a bushel for them.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Feb. 14:

Beans—Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice hand picked pea beans, \$7.25@7.50; fair to good, \$6.75@7; California small white, \$8.35@8.50; yellow

eyes, extras, \$7.25@7.50; red kidneys, \$11; California limas, \$14.50@15; native green peas, \$7.25@7.50; Canada, \$6@6.25; Jobbing prices, 25@50c above car lots.

Chicago—Supplies moderate and demand fair; market steady. Per 100 lbs.—Spot: navy beans, Mich., choice, \$6@6.50; fancy higher.

Minneapolis—Quotations in lbs., including sacks: Fancy hand picked navy, 6c; lima, Calif., 18c; brown, 5c. Peas—Green fancy, 8c; yellow fancy, 6c; marrowfat, 9c.

St. Louis — Quote choice hand picked Michigan white beans at \$7 and prime machine picked at \$6.75 per 100 lbs. Scotch peas, 7 1/2 c; green split peas, 9 1/2 c, and yellow, 7c per lb. Lima beans (choice Calif.), 15 1/2 c per lb.

San Francisco—(Per lb.): Whites, small, 8 1/4 c; do, large, 7c; pink, 8 1/2 c; limas, 14 1/2 c; cranberry, 8 1/2 c; kidney, 10 1/2 c; lentils, large, 9c; do, small, 8c; black eye, 10 1/2 c; Mexican reds, 8 1/2 c; speckled bayos, 9c; bayos, 8c. Peas (per lb.)—Split peas, yellow, 8c; green peas, 6 1/2 c.

New York — Trade continued dull and values about steady throughout. Pea beans easy and \$7.25 top, and that price was reported shaded 10c or more. Red kidneys moved fairly at unchanged prices. White kidneys dull, weak and lower. California limas held steady at \$15. Marrow, \$9.75@10.25; pea, choice, hand picked, \$7.15@7.25; pea, screened and prime, \$6.75@7; red kidney, \$10.75; white kidney, \$9.25@9.50; lima, Cal., \$15. Imported, 100 lbs.—Marrow, \$9.50@9.75; white kidney, \$8.50@8.75. Lima, mad.—1923-24, \$12.25@12.50; 1922-23, \$9.50. Lima, Europe—Large, \$11.75; medium, \$11.25; small, \$10.50.

Potatoes—

Chicago—Arrivals by cars, with comparisons, follow: This week, 424; last week, 395; last year, 360. Market steady. There was a fair trade for a week-end, although most of the transactions were of the ordinary grades. Local buyers were not very keen to purchase, being rather particular as to quality. Offerings were largely of the ordinary and poor quality and in some cases they proved rather slow to move. Fancy grades were scarce and will sell readily at quotations to a shade higher. Receipts were 66 cars and cars on track 178. Bulk, per 100 lbs., Wisconsin, \$1.10 @ 1.25; ordinary and poor, \$1@1.05; round white sacks, Wisconsin, \$1.10 @ 1.20; ordinary and poor, \$1@1.05; do, Minnesota, \$1.05@1.15; Idaho russets, \$2.50@2.65; early Ohio, sacks, Red Rivers, \$1.25@1.35. New Potatoes—Arrivals are light; demand slow at present. Hampers, Texas, \$2.50; boxes, Idaho, repacked, \$2.25. Sweet Potatoes—Arrivals moderate; fair demand noted; some Illinois Nancy Halls show decay. Bushels, Illinois, Jerseys, \$2.50@2.75; Ill., Nancy Halls, \$2.50; soft and poor, \$1.50; hampers, Tenn., Nancy Halls, \$2.75@2.90; Illinois, \$2.25; Jerseys, eastern, kiln dried, \$3.25; poor and wormy, \$2.25@2.50; Illinois, Jersey, large hampers, \$2.50; do, small hampers, \$2.

New York—Outside quotations ruled extreme on state and Maine potatoes under a dull demand; Long Islands in buyers' favor; Bermudas dragged heavily. Sweet potatoes dragged. Maine, bulk—180 lbs., \$3.20@3.60; carlots, cwt., \$1.55@1.75; 150-lb. sk., \$2.50@3. State, bulk—180 lbs., \$2.75@2.90; 165-lb. sk., \$2.65@2.75; 150-lb. sk., \$2.25@2.45. L. I. bulk—180 lbs., \$3.75@4; 165-lb. sk., \$3.25@3.50; 150-lb. sk., \$2@3.50; 3-bu. sacks, \$3@3.25. Bermuda, bbl.—No. 1, \$14@15.00; No. 2, \$12@12.50; No. 3, \$7.50 @ 8.50; Cuba, crt., \$3@3.25. Sweet Potatoes—Ky., bsk., 75c@\$.3.25; Del. and Md., bskt., 75c@\$.2.75. Yams—Del., bsk \$2.00. Cuban and Isle of Pines, \$2.50@4.50.

BEANS BRING HIGH PRICES.

Three-fourths of the dry bean crop has been moved from western New York. Of the 25 per cent remaining to meet demands until the 1925 crop comes on the market next September or October, it is estimated that about 10 per cent is in the hands of dealers and that farmers hold the other 15 per cent. The season's developments have been unusual, beginning with a considerable increase in acreage. For the state as a whole, plantings were 140,000 acres, against 130,000 in 1923, and 108,000 in 1922. Unfavorable weather reduced the yields and the crop was finally estimated at 1,820,000 bushels, about 130,000 more than the 1923 crop, which had proved generally unprofitable to operators. Expectations of a big crop indicated prospects for low prices, but early demand was keen. California, the second important bean-producing state,

GOOD HOUSE

TO SHIP YOUR POULTRY, VEAL, EGGS, BUTTER POTATOES

Write Us—COYNE BROTHERS 119 W. South Water St. CHICAGO

had a crop less than half as great as that of 1923 and far below the average size. Michigan, ranking first, also had a much lighter crop, and Colorado's production was severely cut by drouth. Idaho and one or two states of lesser importance showed increases, but the combined crop in all leading sections totaled 13,327,000 bushels, about 2,700,000 below 1923 production.

ARGENTINE POTATO CROP ESTABLISHES RECORD.

The largest production of potatoes in the history of the republic has just been harvested in Argentina and large quantities are available for export. According to a report to the Department of Commerce from Trade Commissioner George S. Brady, 959,980 metric tons of potatoes was the total output of the country. The large over-production has been the cause of a decline in prices, the farmer receiving only one-half cent per pound for his crop.

POOL FOR CERTIFIED POTATOES.

Certified seed potato growers of Washburn and Barron counties held a meeting in Brill, Wis., recently for the purpose of considering the marketing of their certified seed through the Certified Seed Potato Cooperative Ass'n. This organization is incorporated under the laws of the state of Wisconsin as a non-stock organization composed of growers of certified seed.

RUMANIAN CROP CONDITIONS.

According to Broomhall's, Rumanian correspondent reports from Braila under August 3 the crop prospects in Besarabia have undergone no appreciable improvement during the past six weeks. Estimates are that the barley crop will be under last year and that the oat crop will not exceed last year's crop. As to winter and spring wheat the yield is placed at from 65 per cent to 70 per cent of last year's outturn.

BUCKWHEAT MARKETS.

CHICAGO.—Per 100 lbs., buckwheat, fancy Jap \$2.50 and fancy silver hulled \$2.35@2.40, with dirty seed less.

MINNEAPOLIS.—Spot quotations follow: Japanese, spot, \$2.15@2.25; silver hull, spot, \$2.15; mixed, spot, \$2.15.

St. Louis.—Nominal at \$2.55 per 100.

MILWAUKEE.—Closing quotations for buckwheat, per 100 lb. bags, at Milwaukee on Saturday, Feb. 14, were: Silver hull, \$2.30@2.40; Japanese, \$2.45@2.50.

Crop Reports

Compiled by GEO. A. WELLS

OHIO.

Lima, Ohio (1): The winter condition is now favorable for the wintering of the winter wheat crop. Farmers in this vicinity have not much corn and oats left to be marketed. Farmers continue to market hogs light weight on account of high prices of feed.

Blanchester, Ohio (3): The winter condition is unfavorable for the wintering of the winter wheat crop. There is too much freezing and thawing. No corn or oats moving to speak of. Hogs are being marketed lighter than usual.

Springfield, Ohio (2): The winter condition is now favorable for the wintering of the winter wheat crop. Hogs are being marketed light weight.

Sidney, Ohio (2): The winter condition is now favorable for the wintering of the winter wheat crop. There is a light movement of both corn and oats on account of muddy roads. Look for free movement of oats and a fair run of corn as soon as weather and roads will permit. Most hogs are marketed under-weight.

INDIANA.

Kendallville, Ind. (7): The winter condition is now favorable for the wintering of the winter wheat crop. No corn or oats to move. Hogs are being marketed light weight.

Angola, Ind. (7): Winter wheat is in good condition. No damage to date. Snow and ice is all gone. Very little corn or oats moving. From now on hogs will go light as 1924 corn crop is practically exhausted and shipped in corn cannot be fed profitable.

Marion, Ind. (5): The winter condition is now unfavorable for the wintering of the winter wheat crop. Corn and oats movement is slow. Corn and oats are being marketed medium weight. The snow is all gone. No freezing for a few days. No corn in this locality for sale. Farmers are not selling oats.

Bloomington, Ind. (3): The winter condition is now favorable for the wintering of the winter wheat crop. There is a poor movement of corn and oats. Hogs are being marketed light weight. Very little corn or oats moving. Both good quality here.

Delphi, Ind. (1): The winter condition is now favorable for the wintering of the winter wheat crop. No corn or oats are moving. Hogs are being marketed light weight. Wheat is uncovered and tender. A severe freeze would do damage at this time. Farmers are holding tight to their corn for a big advance.

Rensselaer, Ind. (1): The winter condition is now favorable for the wintering of the winter wheat crop. Nothing is moving at present. Hogs are being marketed light weight. No snow on wheat and reports indicate heavy winter killing, generally handle $\frac{1}{2}$ to $\frac{3}{4}$ million bushel of corn. Won't handle this year to exceed 100,000 and this of poor quality.

Monticello, Ind. (1): The winter condition is now favorable for the wintering of the winter wheat crop. Very light movement of corn and oats. Hogs are being marketed light weight. Snow has all disappeared.

Decatur, Ind. (7): The winter condition is now unfavorable for the wintering of the winter wheat crop. No corn or oats moving here. Wheat movement is over. Hogs going in good shape.

Tipton, Ind. (5): The winter condition is now unfavorable for the wintering of the winter wheat crop. There is a slow movement of corn and oats. Hogs are being marketed light.

Lawrenceburg, Ind. (9): The winter condition is now unfavorable for the wintering of the winter wheat crop. Corn and oats are moving slowly. Most hogs are marketed light weight. Can tell more about wheat in two or three weeks.

Winamac, Ind. (1): The winter con-

dition is now favorable for the wintering of the winter wheat crop. There is a very light movement of corn and oats. Hogs are going to market light.

Winchester, Ind. (8): The winter condition is now unfavorable for the wintering of the winter wheat crop. The movement of corn and oats is very light. Hogs are being marketed about average weight. More heavy hogs going to market than early but farmers are losing money feeding hogs at present prices of corn and mill feeds.

Rushville, Ind. (8): The winter condition is now unfavorable for the wintering of the winter wheat crop. The movement of corn and oats is light. Hogs are going to market light.

ILLINOIS.

Mt. Carroll, Ill. (4): The winter condition is now favorable for the wintering of the winter wheat crop. No oats or corn moving. Hogs are going to market light weight.

Freeport, Ill. (4): The winter condition is now favorable for the wintering of the winter wheat crop. There is a very light movement of corn and oats. Hogs are going to market light weight.

Ashton, Ill. (4): Condition for winter wheat is unfavorable. Has been a free movement of corn and oats. Hogs marketed rather light.

Odell, Ill. (7): Roads are very bad. Very little grain will be marketed this month.

Wenona, Ill. (4): The winter condition is now favorable for the wintering of the winter wheat crop. There is no movement of corn or oats at present. Hogs are being marketed heavy.

Paris, Ill. (8): The winter condition is now favorable for the wintering of the winter wheat crop. Very little corn or oats moving. Hogs are being marketed light. The weather is very favorable for wheat.

Mt. Pulaski, Ill. (5): The winter condition is now favorable for the wintering of the winter wheat. Roads impassable. Hogs better weight. Very few left at this time.

Nashville, Ill. (3): Present outlook for wheat about as good as could be expected at this time. No movement of corn or oats. No hogs.

Eureka, Ill. (1): The condition of winter wheat is now favorable for the wintering of the winter wheat crop. There is a fair movement of corn and oats. Hogs are being marketed rather light.

Sparta, Ill. (1): The winter condition is now favorable for the wintering of the winter wheat crop. Movement of corn and oats is light. Hogs are being marketed light. Farmers are buying corn in this section.

Decatur, Ill. (5): The winter condition is now favorable for the wintering of the winter wheat crop. Hogs are being marketed light weight.

Rockport, Ill. (2): The winter condition is now favorable for the wintering of the winter wheat crop. Light movement of corn and oats. Hogs are being marketed light weight.

Lexington, Ill. (5): The winter condition is now favorable for the wintering of the winter wheat crop. There is a good movement of corn and oats. Hogs are being marketed light weight.

Highland, Ill. (6): The winter condition is now favorable for the wintering of the winter wheat crop. No surplus of corn or oats around here. Hogs are being marketed light here as most of them are being marketed or killed.

MISSOURI.

Sedalia, Mo. (5): The winter condition is now favorable for the wintering of the winter wheat. The marketing of corn and oats has been slow. Very few feed hogs being marketed as most of them are already sold. Drop in price of corn had tendency to stop farmers from delivery.

Lamar, Mo. (3): The winter condi-

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

tion is now favorable for the wintering of the winter wheat. The movement of corn and oats is light as the roads are in bad condition. Hogs are being marketed light.

Carrollton, Mo. (2): The winter condition is now favorable for the wintering of the winter wheat. There are no oats to move. Hogs are being marketed light. Wheat looks good.

Chillicothe, Mo. (1): The winter condition is now favorable for the wintering of the winter wheat. No corn or oats to sell. Hogs are being marketed light.

Springfield, Mo. (3): The winter condition is now favorable for the wintering of the winter wheat. 75 per cent of the corn is now marketed. Hogs are being sold light weight.

Marionville, Mo. (3): The winter condition is now favorable for the wintering of the winter wheat. 90 per cent of the corn and oats are moved. Hogs are being marketed light. There are but few hogs on feed.

Harrisonville, Mo. (1): The winter condition is now favorable for the wintering of the winter wheat. The movement of corn and oats is slow. Hogs are going to market light weight. We expect the corn to move soon.

Paris, Mo. (5): The winter condition is now favorable for the wintering of the winter wheat. The roads are impassable. Hogs being marketed average weight. Wheat is looking good after the December sleet and snow. Rain with 6 inches of snow yesterday. Roads almost impassable.

IOWA.

Tama, Iowa (5): Movement of corn and oats is very light. Hogs marketed light.

Marcus, Iowa (1): The winter condition is now favorable for the wintering of the winter wheat. The corn is about gone. Oats are being fed on account of the cheapness compared to corn as corn is about cleaned out of country. Hogs all been going to market light on account of scarcity of corn and high priced.

Indianola, Iowa (6): The winter condition is now favorable for the wintering of the winter wheat. The extreme dry weather does not make fall wheat look any too good. Hogs being marketed light weight.

Jefferson, Iowa (5): No wheat here. There is a light movement of corn and oats. Hogs are being marketed light.

Wall Lake, Iowa (2): Hard to tell at present how winter wheat will come through. Snow and ice just going off. No corn moving. Very little oats. Hogs are being marketed now at good average weight.

Onawa, Iowa (2): The winter condition is now favorable for the wintering

of the winter wheat. The movement of corn and oats is light. Hogs are going to market heavy.

Randolph, Iowa (3): Wheat is in favorable condition. No grain is moving on account of roads and slump in prices. Hogs are being shipped light. County is getting low on hogs.

Moulton, Iowa (6): The winter wheat is in a favorable condition. Corn brings \$1.00 to \$1.25 at the crib from one farmer to the other. Hogs are shipped out light. No grain to ship out.

Osceola, Iowa (6): The winter wheat is in a favorable condition. There is a fair movement of corn and oats. Hogs are being marketed light.

Whitten, Iowa (4): No wheat here. Corn and oats movement been fairly good considering the crop. Hogs are generally going out light.

Clemons, Iowa (5): The winter wheat is in a favorable condition. No corn or oats here. Hogs are being marketed light.

Wall Lake, Iowa (2): The winter wheat is covered with snow, and should be in good shape. Very little movement of corn and oats. Hogs are now being marketed as for weight.

Belmond, Iowa (4): There is a light movement of corn and oats. Hogs are being marketed light weight.

Hull, Iowa (1): There is no movement of corn and oats. Hogs are being marketed as soon as forced to on account of corn.

Coburg, Iowa (3): The winter wheat is favorable. There is a light movement of corn and oats. Hogs are being marketed light weight.

Corydon, Iowa (6): There is no wheat. Some corn is moving at \$1.10. No oats selling. Hogs are going to market light weight.

Arthur, Iowa (2): No movement of corn or oats. Hogs marketed very light.

Clarinda, Iowa (3): The winter condition is now favorable for the wintering of the winter wheat crop. The movement of corn and oats is fair. Hogs are being marketed light.

Guthrie Center, Iowa (2): The winter condition is now favorable for the wintering of the winter wheat crop. The movement for corn and oats from the farms is over. Hogs are improving in weight. No pigs offered now.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

Glidden, Iowa (2): Very little wheat raised here. Very little corn moving as the roads are bad. Hogs are being marketed light.

Ashley, Iowa (4): Oats are moving freely. No corn. Hogs are being marketed light weight.

Gilbert, Iowa (5): The winter condition is now unfavorable for the wintering of the winter wheat crop. The movement of corn and oats is slow. Hogs are being marketed light. Roads are impassable for farmers to move anything at the present time.

New Sharon, Iowa (5): The winter condition is now favorable for the wintering of the winter wheat crop. No movement of corn and oats. Hogs are being marketed light. There should not be a single bushel of corn shipped from this station.

Lowden, Iowa (8): The winter wheat is favorable at this time. Corn is being shipped in. No oats being offered. This section has shipped in \$60,000 worth of corn. May have to ship in oats.

South English, Iowa (9): The winter condition is now favorable for the wintering of the winter wheat crop. Corn and oats are moving in and not out. Hogs are being marketed light.

Oakville, Iowa (9): The winter condition is now favorable for the wintering of the winter wheat crop. Corn and oats are mostly all sold. Hogs are being marketed heavier now than two months ago.

Hamlin, Iowa (2): The winter condition is now favorable for the wintering of the winter wheat. Not much movement of corn and oats. Hogs being marketed light. Farmers hardly have enough grain for their own use.

MINNESOTA.

Eden Prairie, Minn. (6): No snow and no rain so it is hard for rye and winter wheat.

Hutchinson, Minn. (6): Condition of winter wheat is unfavorable now it is freezing and thawing but too early to tell the damage yet. Very little corn and oats sold at market price. Hogs are being sold medium to light at present.

Albert Lea, Minn. (6): Both winter wheat and rye conditions have been ideal. Farmers are storing oats. They don't want to sell under 50c and corn is mostly being feed up and sold among themselves. No good corn in this section. Hog receipts are letting up.

Donnelly, Minn. (2): Weather not very favorable for winter wheat. Corn practically all sold. Farmers are holding a good many oats. Hogs sold at an average of 210 to 225 pounds.

Warren, Minn. (1): Condition of winter wheat is unfavorable. Snow covering gone. Oats coming to market more freely. Hogs going to market light.

London, Minn. (6): Condition of winter wheat is favorable so far. Oats moved fair so far. No corn for sale here. Farmers have not enough corn to feed their hogs for market. Hogs are marketed light. Most of the hogs are sold from 150 to 200 pounds on account of having no corn.

NORTH DAKOTA.

Monango, N. D. (9): No winter wheat in this part of the country.

Fargo, N. D. (8): There is a normal movement of corn and oats. Hogs are being marketed medium weight.

Carrington, N. D. (5): No winter wheat raised here. No corn for sale. Oats pretty well all cleaned up by now. Hogs being marketed light weight.

Cavalier, N. D. (7): Winter favorable for wintering of winter wheat crop. Movement of oats light. Roads are bad. Hogs are being marketed all sizes.

Sheyenne, N. D. (5): No winter wheat here. 75 per cent of the corn and oats

have been moved. Hogs are being marketed light weight.

Lakota, N. D. (7): No winter wheat. No corn sold at elevators. Movement of oats, very light. Hogs are marketed heavy.

SOUTH DAKOTA.

Bridgewater, S. D. (8): Very little winter grain in this territory. Very little marketing of corn and oats at present. Hogs being marketed heavy.

Brookings, S. D. (8): Very little grain moving due particularly to poor roads. Hogs still moving to market freely and for most part light.

Flandreau, S. D. (8): Mild thawing weather past week has dissipated snow but with fields more or less covered with ice, which is not favorable for wheat. Oat and corn movement very slow and of light volume, due to bad roads, and disposition of holders. Marketing of hogs average medium weight.

Beresford, S. D. (9): The winter condition of winter wheat is favorable. Movement of corn and oats is both light. Hogs being marketed light to medium.

Elk Point, S. D. (9): The winter has been favorable so far for winter wheat. Movement of corn and oats is light, the bulk of it has been marketed. Hogs are being marketed a little on the light order.

NEBRASKA.

Central City, Neb. (9): So far as we can tell the winter condition of winter wheat is favorable. Marketing of corn and oats is rather light as the roads are bad in this country. Hogs are still being marketed light.

Beatrice, Neb. (9): The winter condition of the winter wheat is favorable and could not be better. Corn is moving freely. No oats are moving. Hogs are being marketed light weight.

Humboldt, Neb. (9): Too early to tell about the condition of winter wheat. Very little corn or oats for sale. Hogs being marketed light.

Oakland, Neb. (7): The winter condition of the winter wheat is favorable. There is just a little corn moving and no oats. Hogs are being marketed light weight.

Neligh, Neb. (7): The condition of winter wheat is favorable. The corn and oats movement is light. Hogs are being marketed light.

McCook, Neb. (6): Winter conditions have been favorable for wheat crop. Corn is moving freely as roads permit and hogs are being marketed light.

Superior, Neb. (9): Conditions are favorable for the winter wheat and prospects look good for a bumper crop. Very little corn and no oats moving in this immediate territory. Some inclination among the farmers to make their hogs heavier.

Superior, Neb. (9): Conditions are unfavorable for wheat. Farmers generally report wheat poor condition. A lot of it never came up. No oats moving, no local surplus. Some corn moving when can pay \$1.10 but movement stops below that figure. Movement locally nearly over until next fall. Some will be held until then. Hogs pretty well marketed. Be very few light from now on.

Winnetoan, Neb. (7): No winter wheat to amount to much. Weather condition is very bad. A heavy coating of ice covers the ground. Will be hard on alfalfa.

Swanton, Neb. (9): Wheat conditions favorable. Slow movement of corn on account of bad roads. Hogs going to market light weight.

Orleans, Neb. (6): Conditions are favorable for the winter wheat. Corn moving freely. Few heavy hogs to be had just light. Corn is coming in too freely for the good of the producers.

KANSAS.

Uniontown, Kans. (9): No wheat here. We hear of damage in bottoms from ice covering. Corn movement is mostly over. No oats. Hogs are heavier than they were.

Mahaska, Kans. (4): The wheat does not look very good here now although the weather is favorable. Quite a bit

We anticipate wheat will reach bottom within next ten days

Other grains should make their lows few days later. We expect to name approximately buying figures for all, as we did last June.

We also give the best possible service in Lard, Raw Sugar, Cotton, and Stocks: all for the same price. We believe it will be to the interest of all who are interested in the above to get in touch with us soon.

We bulled CIP from \$50 to \$245—it sold to \$250: a fair sample of our service.

MARKET CHART

O. D. WEAVER, Manager

309 So. La Salle St.

Chicago, Ill.

of corn is been marketed. Hogs are being marketed light.

Wellington, Kans. (6): As far as we can see the winter wheat is coming along in first class shape. It is a little too early yet to tell whether any real damage has been done or not, but weather conditions are very favorable at this time. There is very little corn left and the oat crop was too light for the farmers to sell any. Hogs are being marketed light.

Neodesha, Kans. (9): The winter wheat condition is favorable. Corn and wheat are moving. There are no oats. There are but few hogs marketed or on hand.

Hillsboro, Kans. (5): The winter wheat in this locality is favorable. Movement of corn and oats is fair. Very few hogs fattened in this vicinity.

Minneapolis, Kans. (4): The winter wheat condition is favorable. No movement of corn or oats. Marketed light to medium weight.

Concordia, Kans. (4): The winter wheat condition is favorable but can stand more moisture. Movement of corn is fair. Oats none to market. Crop consumed locally. Heavy movement of hogs.

Junction City, Kans. (7): Condition of winter wheat is excellent. Growing conditions are favorable. Corn is moving freely. Hogs being marketed very light.

Madison, Kans. (9): Condition of winter wheat is favorable. About 90 per cent of the corn and oats has been shipped out. Hogs are generally marketed light.

Wichita, Kans. (6): The condition is favorable for the wintering of winter wheat. Corn is moving a little more freely. Oats slow.

Logan, Kans. (4): Winter wheat conditions are very questionable. Part of the wheat did not sprout in the fall for lack of moisture and it is feared that much that did sprout, died for the same reason. We have had some snow in the past few weeks. These were helpful but the real conditions will not develop until spring. There is very little surplus corn in this vicinity and no surplus oats. Hogs are generally going out light weight.

Satanta, Kans. (3): The winter wheat condition is very favorable. 85 per cent of the corn crop has been marketed. Hogs are being marketed light.

Jetmore, Kans. (2): Winter wheat is in good shape. Very little corn moving. No oats. Hogs average well.

Lyons, Kans. (5): Winter condition generally considered favorable for winter wheat. Very little complaint to date. A little corn moving but no oats. Hogs being marketed below average weight.

Belle Plaine, Kans. (6): I would not give a dime to have winter condition improved for winter wheat in this section. The ground froze to a depth of 16 inches the past winter, which has not happened for years. Thereby putting the ground in fine shape for spring crops. The farmers seem to have a little more pep than ordinary.

OKLAHOMA.

Altus, Okla. (3): Weather is now quite favorable for growth of winter wheat. Some little complaint of dry top soil. No corn or oats nor hogs for market.

Enid, Okla. (4): The condition of the

winter wheat is favorable. Very little movement of corn and oats. The movement of hogs is light weight.

Geary, Okla. (2): The condition of the winter wheat is too dry. There is a normal movement of corn and oats. Hogs were sold out early. There are only a few left to move.

Marshall, Okla. (5): The weather is favorable for winter wheat. Very little corn moving except trading by farmers with each other. Oats moving slowly shipped some for seed purposes. Hogs moving to market light weight, very few in this section.

MISSOURI.

Bethany, Mo.: It is too early for report on wheat. Shipping in corn and oats. Hogs good weight now. All light hogs were shipped some time ago. Very few left.

KANSAS.

Wakeeney, Kans.: The winter condition of the winter wheat is favorable. Corn is moving freely. Hogs are being marketed light.

NEBRASKA.

Harvard, Neb.: Too much thawing and freezing weather the past thirty days to be beneficial. Farmers are expecting lots of damage. No oats here. Very little corn for sale except what will be taken by local feeders. Hogs are being shipped out as fast as finished, about the average weight.

Roseland, Neb.: Winter wheat appears all right at present. Could stand more moisture. Not much corn and oats moving. Hogs marketing not finished. Hogs are going light.

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.
Wheat	14,238,000	15,403,000	20,383,000
Oats	1,214,000	798,000	1,967,000
Rye	1,229,000	1,340,000
Barley	1,407,000	1,188,000	169,000

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 356,000 bus. last week, and barley 64,000 bus., while corn increased 264,000 bus., rye 369,000 bus., and oats 197,000 bus. Details follow, last three ciphers omitted except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	1,676	4,128	6,704,000	15,890,000
Corn	4,097	7,670	12,919,000	3,043,000
Oats	6,880	13,812	22,205,000	3,797,000
Rye	1,958	304	2,262,000	1,464,000
Barley	205	205,000	220,000

*Includes 900,000 bu. wheat, 1,152,000 bu. corn and 1,513,000 bu. oats afloat.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Jan. 31, 1925.	Jan. 24, 1925.	Feb. 2, 1924.
Wheat	31,801,000	30,631,000	53,726,000
Oats	17,464,000	16,807,000	9,505,000
Rye	2,028,000	1,906,000	2,047,000
Barley	6,257,000	5,877,000	1,650,000
Afloat—Wheat,	6,448,000 bus.;	oats, 1-004,000 bus.;	barley, 613,000 bus.;
.....	rye, 140,-000 bus.

Terminal Markets

MINNEAPOLIS.

H. A. Paul, Correspondent.

Chas. M. Case, president of the Kellogg Commission Co., was a Chicago visitor the latter part of the week.

Geo. H. Ledbetter, treasurer of the Minnesota Millers' Assn., and living at Franklin, Minn., died this week.

Clark L. Keator, sales manager for the H. H. King Milling Co., is convalescing from an operation for appendicitis.

C. C. Wyman, president of the C. C. Wyman Co., returned this week after an extensive vacation in California.

Wm. Dalrymple, of the William Dalrymple Co., left for Florida on Wednesday, where he will spend the next few weeks.

George Shannon, of the E. S. Woodworth Co., is hobbling around on crutches as a result of sustaining a broken bone in his ankle.

R. M. Calkins, vice-president in charge of traffic for the Milwaukee road, was a caller on the Minneapolis Exchange floor on Saturday.

P. B. Harding, vice-president of the E. S. Woodworth Co., called at Chicago and other eastern markets this week, returning Monday.

A postal card to one of the local commission houses recently reported that spring wheat planting was starting at Belle Fourche, S. D.

Cash Grain Markets.

WHEAT—An improvement in shipping directions for flour, augmented by lighter receipts all along the line, brought about a firmer situation in the local cash market during the week ending today. Low protein stuff continued in light request, but everything else was snapped up and in the face of a radically declining futures market, the premiums were relatively stronger. No. 1 hard spring, which started off on Monday at 1@41c over the May, was selling at 1@42c over today. No. 1 dark northern was quoted at 2c under to 40c over, and No. 1 northern at 4c under to 35c over the May. Durum was strong and unchanged mostly. Saturday's closing quotations showed No. 1 amber quoted at 5c under to 22c over Duluth May, and No. 1 mixed at 12c under to 21c over.

Country car loadings continue very light and judging by reports of conditions as made public by a number of line houses, we need not expect any material improvement for some time to come for the simple reason that the amount of grain already out of farmers' hands approximates some 85 per cent of the crop total.

Foreign interests seemed to be becoming interested in our flour and bids this week were advanced to a point at which some business could be profitably worked by local mills.

Local elevator stocks show the following figures: 13,844,944 bus. this week, as against 13,724,959 bus. a week ago and 15,251,100 a year ago.

Storage situation here shows little improvement. Shipping sales during the week seemed to hold under 50,000 bus. daily and the influx of new grain more than made up for room which was made by these shipments.

CORN—Continued mild weather made the high moisture content corn a serious problem. The market started off firm on Monday, slipped off on Tuesday, firmed Wednesday and Friday and then took another dip today. Feeding demand has been relatively light and the cash article continues under very heavy discounts below the option. Today's figures showed the following prices: No. 3 yellow, 12@15c under Chicago May; No. 4, 17@22c under; No. 5, 25@30c under; mixed No. 3, 18@20c under; No. 4, 23@27c under, and No. 5, 29@32c under. Local stocks were 921,871 bus., against 805,072 last week and 993,107 last year.

OATS—The outstanding feature of the local oats market during the past seven days has been the improvement in the shipping demand. There were at least 1,000,000 bus. worked out of here this week and quite possibly considerably more. But with local stocks in their present condi-

tion, they can stand a drain like this every week and still we would have more on hand when the new crop matures than was in store here last year at this time.

Receipts continued to be fairly liberal, but during most of the week fairly firm cash markets were the order of the day, due largely, of course, to the shipping demand.

Today's closing quotations showed the following: No. 3 whites, 2½@3c under May; No. 4 whites, 1½@2c under.

Minneapolis stocks were 22,423,218 bus., against 22,365,371 last week and 4,909,447 bus. a year ago.

TOLEDO.

S. M. Bender, Correspondent.

David Anderson and wife and daughter are spending several weeks at Palm Beach, Fla., after their return from Cuba and Panama.

Receipts of grain for the week were 154 cars of wheat, 64 cars of corn, 116 cars of oats, 5 cars of rye and 1 car of barley. Total, 340 cars.

Toledo flour production as reported by mills for the past week was 38,500 bbls., equal to 80 per cent of capacity. The week before it was 32,300 bbls. and a year ago last week was 35,000 bbls.

Corn and oats receipts have been unusually heavy for several weeks, with the demand rather slow. Now that the Chicago futures have worked nearer the cash, the demand should improve.

John Husted of C. A. King & Co. was in Chicago last week and reports that it is little wonder that ticker quotations are so far behind the market. Orders come so fast they cannot be relayed to the offices.

Kent Keilholtz and wife are expected home from their winter cruise to Cuba and Panama this week. They have been spending several days with Wade Holland, former Toledo baker, who is now president of the Consolidated Baking Corporation at New Rochelle, N. Y.

Among the visitors on the floor this week were: Rush Croninger, Grand Rapids, Ohio; Sam Rice, Metamora, Ohio; Frank and William Arbogast, Tiffin, Ohio; John Rupp, Elmira, Ohio; Frank Spengler, Elmira, Ohio; Del Lloyd, Waterville, Ohio, and Earl Vocke, Napoleon, Ohio.

Milling demand for wheat showed a decided improvement the latter part of this week. Soft wheat premiums continue to decline, but with some increase in sales they should soon do better. Flour sales have been fairly good considering the uncertainty of the market and wide range of prices. Feeds are meeting with a better trade and have held steady during the nervous markets. Millers are looking forward to a heavier trade in flour and feeds as soon as the wheat price becomes more settled.

MEMPHIS.

George Williamson, Correspondent.

Oscar B. Locke, of Columbus, Miss., was registered at the Merchants exchange on Wednesday.

C. E. Munn, of the Southwestern Wheat Growers' Association, of Enid, Okla., was a visitor here during the week. Charles G. Robinson introduced him on 'change.

R. W. McMurtry has bought the membership in the Merchants Exchange held by W. G. Manire, who has moved to Florida. Both are members of the cottonseed products trade.

General business is expected to pick up some about March 1, according to members of the grain and feed trade, but the matter of credit is going to continue a factor throughout the season. Buying now is just as small as it can be, but aggregates a fair volume, for so few people in the territory have any corn or grain. Everything points to an effort to grow more such during the coming season, and winter preparations in this territory are fairly well advanced, as recent weather has been favorable.

Receipts of corn for the past week dropped off somewhat, but local stocks are still very large and movement very slow. Receipts were 189 cars. Quotations are easier and buyers have been able to get concessions, as many consignees had piling up demurrage charges and willingly cut their prices. At the week's close track 3 white or 3 yellow was quoted at \$1.21 and 3 mixed at \$1.18. Oats came in less quantity than in some time, only 88 cars, but stocks are large and prices in buyer's favor. Track 3 white quotable at 56, but concessions not quite so large as for corn.

President Clark has named the follow-

ing standing committees for the Merchants exchange for 1925:

Appeals—S. T. Pease, W. E. Holt, J. R. Donelson, L. B. Lovitt, A. K. Burrow.

Arbitration—Grain and Hay—T. B. Andrews, W. P. Brown, Lee D. Jones, T. E. Jones, H. L. McGeorge. Arbitration—C. S. P.—J. H. DuBose, E. E. Clarke, C. G. Carter, R. Ruffin, Sam Hutchinson.

Alfalfa Meal—J. B. Eigar, E. W. Sommer, S. T. Pease, C. S. Kenney, A. W. Bosworth.

Call Board—T. B. Jones, F. W. Barr, W. H. Horton, C. G. Robinson, J. D. Mayes.

Finance—S. T. Pease, J. J. Wade, W. P. Battle.

Floor—E. E. Buxton, E. L. Luibel, Ferd Heckle.

Grain Sorghums—W. R. Smith-Vaniz, F. X. Murphy, E. W. Wyatt.

Hay Inspection—C. H. Mette, J. A. Flaniken, E. R. Gardner, R. N. Archer, A. C. Roberts.

Inspection Department—J. B. Edgar, C. S. Kenney, S. E. Rison.

Membership—J. B. Edgar, W. R. Smith-Vaniz, L. B. Lovitt.

Quotations—Grain and Hay—T. B. Jones, J. J. Wade, E. L. Sessum. Quotations—C. S. P.—R. N. Neal, W. B. Dashiell, R. Ruffin. Nominal—Quotations—C. S. Kenney, L. P. Cook, C. H. Mette.

Rules—C. S. P.—W. P. Battle, W. B. Dashiell, L. H. Fleming, C. H. Reynell, J. C. Roney. Rules—Grain and Hay—H. L. McGeorge, W. M. Browne, J. W. Fulghum, W. A. Hall, B. H. Williamson.

Traffic—L. P. Cook, W. R. Smith-Vaniz, J. M. Trenholm, S. E. Rison, E. E. Anderson.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

C. H. Chalmers, representing Horner & Wyatt of Kansas City, industrial architects and consulting engineers, called on the milling and grain trade in Oklahoma recently.

The Buffalo (Okla.) Farmers Elevator Co. recently in annual meeting elected John Sanders president, Ross Price vice-president, Earl Anderson secretary, and M. V. Braly manager.

In other words, during the latter season exports totaled 29,111,817 bus., while during the former they totaled 5,105,000 bus. The report shows that in December, 1924, 4,455,999 bus. were exported and in January 1,776,068 bus. January of 1924 had no wheat exports.

A bill is pending in the House that would repeal the law creating the office of State Grain Inspector. Representative M. M. Henderson of Pottawatomie County, author of the bill, contends that the office is unnecessary and has not accomplished purposes intended.

Representative members of the association say that outside influences will not be felt in this year's campaign as much as in former years, since the membership appears to have profited from this season's selling through the pool. Insurgency in the association also appears to have been quieted.

Flour millers were confining business nearly altogether to the spot needs of the trade. A few would accept no other kind, while others accepted bookings for delivery in not over 30 days. Hard wheat short patent flour sold at \$9.50 per bbl. Mill-feeds were 15@20c a bag under the market early in the month.

H. H. Johnson, a market gardener of Tulsa, and his son, Harry Johnson, have organized the Johnson & Son Seed Co. at Tulsa and established a store. Harry Johnson formerly was with the Leipher Bros. Seed Co. of Little Rock, and for two years was assistant secretary of the Oklahoma Marketing Commission.

C. F. Prouty, secretary of the Oklahoma Grain Dealers' Association, has called on members to urge passage of a bill in the legislature making an appropriation for the Corporation Commission to make an audit and appraisal of the Southwestern Bell Telephone Co., with a view of establishing reasonable rates. Rates are too high now, says Mr. Prouty, and it is reported the company will apply for a permit to increase them. He has submitted to members without comment copies of pending bills that increase the amount of personal injury damage that an employee may obtain and provide for a net income tax on all lines of business.

Farmer influence in the House of Representatives is said to have been responsible for the defeat recently of a bill introduced by Price Thompson of Canadian County, proposing a tax of 2 mills on the dollar on grain, cotton and other farm products in storage, in lieu of an ad valorem tax. The bill was recommended for passage by a committee and defeated, 53 to 40. Farmer members believed that the bill would have given elevator and warehouse owners an unfair advantage over growers.

An impressive idea of the enormity of the wheat movement from America to foreign countries during the present season may be had from figures recently com-

plied by the Galveston Grain Exchange and in possession of the Oklahoma City Grain Exchange. These show that during the seven months from July to February wheat exports from Galveston exceeded those of a corresponding period of the preceding season by 24,006,817 bus.

Coincident with preparations for holding "primaries" for the selection of candidates for membership on the board of directors of the Oklahoma Wheat Growers' Association, the present board has inaugurated a campaign for increasing membership and consequently the pool for wheat selling during the season 1925-26. Primaries are to be held in March and the election takes place in April.

BALTIMORE.

Robert C. Neu, Correspondent.

Frank Dudley, vice president of the Baltimore Chamber of Commerce, is a member of the Federal jury.

Charles England has been re-elected chairman of the Arbitration Committee of the Baltimore Chamber of Commerce for the ensuing year.

Total stocks of all grains in Baltimore elevators on February 12 were 11,134,400 bushels, out of which total rye constituted 7,000,000 bushels.

President A. W. Mears, of the Baltimore Chamber of Commerce, and Mrs. Mears will leave this city on February 21 for a month's fishing trip in Florida and the West Indies.

The following have been appointed as the Commission Rule Committee of the Baltimore Chamber of Commerce for the coming year: A. R. Dennis, John J. Snyder, and Edward Netre.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were R. E. Bowman, of Hagerstown, Md.; Geo. E. Pierce, of Buffalo, New York.

H. Frank Mellier, a member of the firm of Hayward & Co., flour and grain brokers of this market, who has been confined to his home for several weeks by stomach trouble, is convalescent.

The rooms of the Baltimore Chamber of Commerce were closed on February 12 along with similar closings by other leading boards of trade of the country in observance of the birthday anniversary of Lincoln.

At the regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce, held February 9, Morton M. Prentiss, president of the Merchants' National Bank of this city, was elected a member of the organization.

The annual meeting of the Baltimore Flour Club, of which J. Ross Myers is president, will be held on March 25 at the Hotel Rennett in connection with a dinner, to which the wives and daughters of the members will be invited. Preceding the dinner there will be a brief business session of the Club, at which officers for the ensuing year will be elected.

The flour and feed mill of the Malco Milling Company, at Hampstead, Maryland, erected in 1922 at a cost of \$142,000, and having a daily capacity of 300 barrels, will be sold at public auction on February 28, 1925, by the receivers for the company.

Henry A. Lederer, of Lederer, Bros. grain commission merchants of this market, who sailed from New York late in January on a four months' world cruise, arrived at Los Angeles last week.

Following the drastic break in wheat prices, quotations on all grades of flour have been reduced, and the trade has become demoralized. There is little disposition shown to make further purchases until the market becomes more settled, and business is dull in all directions. Quotations, per 98-lb. cotton or jute sacks, follow: Spring Patent, \$9.75@10.00; Spring Straight, \$9.50@9.75; Hard Winter Patent, \$9.50@9.75; Hard Winter Straight, \$9.25@9.50; Winter Patent, \$9.50@9.75; Winter Straight, \$8.75@9.00; Rye Flour, medium to white, \$7.75@8.75.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

W. S. Bird of Denton, Kansas, stated Saturday that the wheat crop in his territory was in excellent shape.

Wheat offerings have been becoming lighter, and a better class of demand is appearing; trade has been small in view of the uncertainty of prices. Corn demand has improved, and offerings have been moderately liberal; good inquiry in evidence at the close of the week. Oats demand also much improved Saturday; moderate receipts.

For the second time within a few years, C. L. Scholl, manager of the A. J. Elevators Co., was honored with the presidency of the St. Joseph grain exchange. He has been active for years in this market as buyer for the Aunt Jemima Mills which is a big job, and yet Mr. Scholl has always found time for association and exchange

affairs. The trade is strongly back of him in his administration.

The week of February 14th closed one of the most uncertain periods of prices sustained in months. While the trade in general probably has not changed its ideas as to the fundamental world's supply and requirements situation, confidence in grain values was not enhanced by this week's demonstration. The tendency in cash grain seems to buy on the advances. Net changes for wheat were five cents loss for hard winters, and 6 to 8 cents decline for soft, for the week. Cash corn has declined 8 to 10 cents net, during the week, and oats are seven cents down.

Visitors on the St. Joseph Grain Exchange during the week ending February 14th included: O. V. Perry, Clyde, Kansas; B. B. Fellows, Weston, Mo.; W. Owens, Maysville, Mo.; W. T. Crews, Craig, Mo.; Walter Rudolph, Amazonia, Mo.; J. B. Nicholson, Kansas City, Mo.; C. H. Whitton, Tarkio, Mo.; S. R. Washer, Atchison, Kansas; Robt. Stanton, King City, Mo.; E. C. Appleton, Hopkins, Mo.; Vern Chandler, Humboldt, Nebr.; J. T. Dodson, Mound City, Mo.; J. M. Cummings, Ford City, Mo.; A. R. Martin, Maryville, Mo.; L. Zalkner, Phillipsburg, Kansas; R. J. Wood, Oneida, Kansas; A. S. Trask, Oneida, Kansas.

FORT WORTH, TEXAS.

C. E. Blewett, Correspondent.

Weather in Texas the past 2 weeks has been very mild, with rather unusual high temperatures for this season, and the continued lack of moisture over the entire state, and complaints here becoming more numerous of the growth affecting the wheat, as well as delaying the spring work, but those who follow the situation closely believe that wheat can stand 3 or 4 weeks more without any serious damage resulting, but in most sections, especially in the black land belt of North Texas complaints are coming in of wheat dying and turning yellow.

There is no question but what a general rain is badly needed over the entire state, and it would do the growing crops a great deal of good, as well as add a stimulant to business, which at this time is sadly in need of help.

Business over the state the past 2 weeks has been rather draggy, with indifferent demands for wheat and corn and oats, and the decided decline in the premiums over the option the past 2 or 3 days has seen an improved condition in wheat with more interest shown by the mills.

Mills have reduced prices of flour to \$9.80 basis delivered, which to a certain extent discourages bookings for future shipments.

Most of the mills are complaining of lack of flour orders, and a great many of them are closing down, as bookings are running very close, and no new business coming in.

Wheat receipts, as well as shipments from the country continue very light, and the recent decline found most of the mills in a position to buy, which caused quite a reduction in elevator stocks at Fort Worth, and this demand also encouraged the premium over the options, and more satisfactory prices are being paid now, and based on the Feb. 14th market the following prices prevail here delivered Texas Common or Texas Group 3 points—Number 1 soft red winter wheat, \$2.08; Number 1 mixed, 80% soft, \$2.02; Number 1 dark hard, \$1.95; Number 1 hard, \$1.92. Mills do not seem to have a heavy stock of wheat, and a liberal buying must result as soon as future business materializes, and this possibility is encouraging to those having wheat stored here to hold for higher prices.

Receipts of corn have been extremely heavy the past 2 weeks, and offers from the country shipping points have also been heavy, and these facts together with the fact that the mills and elevators over the state bought very freely of corn in January, has caused a decided slump in the demand, and premiums have declined as much as 10 to 12 cents, for 2 or 3 weeks. Number 2 white corn was selling here at 7 to 8 over Chicago May option, while the last day or so it has been quoted at 1 to 2 under the option.

It is believed by those keeping in touch with the situation that this condition will change as soon as present heavy stocks are digested, for it is apparent that more corn will be needed, especially Number 2 white, as stocks of this commodity are not excessive, and there will be a large amount absorbed during the months of March and April, and inasmuch as bookings for forward shipment are exceedingly light. It is believed that there will be a large amount of business consummated later on.

On the Feb. 14th market the following values prevail, basis delivered Texas Group 1 points—Number 2 white corn, \$1.26; Number 2 yellow, \$1.27; Number 2 mixed, \$1.22, while Number 3 grades of 16% or less moisture would probably bring 2 cents less.

Fort Worth was honored this week with several out of town visitors, who all expressed satisfaction with the growth the market is making and the amount of business transacted.

Receipts of oats have been rather light, but the demand has been extremely slow, and premiums have declined with some distressed oats selling as low as 5½ over Chicago May option Group 1. It is noted, however, that most of these distressed oats are about cleaned up, and it is hoped that

FOR RESULTS

SERVICE PHILIP H. SCHIFFLIN & Co.
49 Board of Trade CHICAGO

better conditions will prevail in the near future, for there is some inclination on the part of our buyers to book these oats for deferred shipments at 7 over Chicago for March or 8 over for May.

Milo and kafir receipts have been very light, while shipments from the country stations have also been slow, but the demand has declined and values have fallen off in line with corn, and prices now show as much as 20 cents a hundred decline under those quoted 2 or 3 weeks ago, and today, Feb. 14th, values are as follows delivered Texas common or Texas group 3 points—Number 3 or better yellow milo, \$1.95; Number 3 or better kafir, \$1.85.

Cane seed has suffered an extremely sinking spell, and sales are very difficult to make, as receipts have been very heavy and demand absolutely dead, and good fertile red top is finding a slow sale at \$1.75 per hundred delivered Texas common or group 3 points.

J. Carver Strong, President of the Chicago Price Current-Grain Reporter, was here en route to the Pacific Coast, visiting friends here on the Exchange. Mr. Strong is an ardent supporter of Texas and Fort Worth, and believes that this market is destined to make still greater growth, and predicts a dominating future in the grain trade in this country.

Harry Gammage, president, Kansas City Board of Trade, and vice-president of Moore-Seaver Grain Company, Kansas City, spent several days with the Fort Worth office of Moore-Seaver Grain Company, and expressed himself as being very highly pleased with business as done by the Fort Worth office, and anticipates a still greater growth.

Oscar Cook, vice-president of the Wyandotte Elevator Company, Kansas City, was here this week calling on his Texas friends, and reports that his company anticipates an increased volume of business over the entire state.

Ben Fuqua, of Fuqua Grain Company, was here visiting the trade this week and renewing acquaintances with former friends.

T. L. Houston, of the Houston Grain Company, Crowell and Quanah, Texas, visited on the exchange floor this week, and reported that so far there was not any damage to wheat in that country, but that rain was badly needed. Mr. Houston advises very little wheat is left on the farms, as most of those holding wheat disposed of it some time ago.

Our dealers are inclined to feel friendly toward buying No. 3 grades of corn, as there is at this time quite a hazard attached to handling corn of high moisture.

SALT LAKE CITY, UTAH.

Fred L. W. Bennett, Correspondent.

The Ogden stockyards is also making great strides. The Union Stockyards, according to Manager Whitlock, made a substantial increase in January over the same month last year.

George D. Walker, 41 years of age, an employee of the Husler Milling Co., was instantly killed the other day when he fell headlong down an elevator shaft for a distance of five stories.

N. J. Thomas, manager of the Granite Grain and Seed Co. of Sugar House, has returned to his desk after a six weeks' visit to California. He said flour was selling at much higher prices than those demanded in Utah.

Salt Lake City is making big strides as a stockyards center. It is one of the most important points in this industry west of Denver. The total number of livestock received during 1924 was 1,121,000 head, an increase of nearly 375,000 over 1923 and nearly three times the total receipts of 1916, the year the new yards were established. Last year there were 452,911 hogs, 591,147 sheep, 74,471 head of cattle, and 2,478 head of horses and mules. The growth of the packing business is said to be the reason for the increase.

M. S. Winder of the Utah State Farm Bureau and a member of the Utah Senate has introduced a bill in the legislature providing for purity in seeds. It is known as the Pure Seed Bill, and would cover seeds of every description used for agricultural purposes. There are minute regulations for the labeling of seeds offered for sale. The Board of Agriculture is required under the bill to set up a laboratory for the purpose of testing seed offered for sale, and private firms may have the benefit of this laboratory on payment of a small fee. The Board, under the provisions of the bill, may prosecute any one violating the law and may apply for an injunction restraining them from offering seed for sale. The attorney general is required to institute proceedings.

The industrial outlook in Utah is regarded as unusually good. Many business men of prominence declare that 1925 will be the best for business in the history of the state. Every essential industry seems to be in good shape. The farmers will have

an abundance of water next summer as a result of the heavy snows of December which have frozen in the water sheds of the canyons and mountains; the livestock industry is in good shape, metal mining and smelting is showing increased activity; the steel industry of Utah County, started last year, is very promising; building operations are in a healthy condition; banks are prosperous in all parts of the state; railroading is, at least, normal, whilst the tourist business as a result of the Union Pacific System's campaign and the efforts of the Salt Lake Chamber of Commerce, which has a big fund for advertising the scenic and industrial resources of the state, should be larger, much larger, than ever before. "I can see no dark spots for 1925," one big banker told your correspondent recently.

The 8th Annual Intermountain Live Stock Show to be held in this city is scheduled for a week beginning March 31. Plans are under way to make the show larger than ever before.

J. J. Neville, manager of the Husler Flour Mills, has been elected a director of the Utah Manufacturers' Ass'n.

An early morning blaze of unknown origin did considerable damage to the Utah Cereals Products Co. of Ogden recently. It reached the headhouse and elevators and damaged 150,000 bushels of grain in all. The estimated loss was \$150,000. The fire appeared to have started in the timber work of the headhouse. Water as well as fire had a part in damaging the grain, it was stated. The grain was owned by the Globe Grain and Milling Co., which had leased the plant for the purpose of storing grain therein during the winter.

H. L. Fisher, 43 years of age and owner of the Fisher Sale and Feed Yard at 51 South Second West Street, was arrested recently on a charge of having received stolen goods. The property is alleged to have been taken from a private house. He was confined to jail in default of a \$2,000 bond.

The following prices f. o. b. Ogden or Salt Lake City were issued as of Feb. 1 by the Alford-Beckett Co., Atlas Bldg., for sacked grain. A reduction of 8 cents per hundred is made when furnished in bulk.

No. 3 mixed corn, cwt., sacked, \$2.55; No. 3 yellow corn, cwt., sacked, \$2.60; Idaho oats, 38-lb. or better, cwt., sacked, \$2.55; Montana oats, 40-lb. or better, cwt., sacked, \$2.65; whole barley, cwt., sacked, \$2.40; rolled barley, cwt., sacked, \$2.50; white feed wheat, cwt., sacked, \$3.50; mixed feed wheat, cwt., sacked, \$3.40; white millrun, cwt., sacked, \$2.25; blended millrun, cwt., sacked, \$2.15; red millrun, cwt., sacked, \$2.10; bright timothy hay, ton, \$23.00; first crop alfalfa hay, ton, \$18.00; second crop alfalfa hay, ton, \$17.00; milling wheat, on request; Darling's meat scraps, on request.

This company is paying \$1.95 a bushel for wheat in bulk, both No. 2 or better Turkey or white wheat. Growers of this section have but 5 per cent or thereabouts of their 1924 crop on hand, expecting a good spring wheat acreage this year in view of the price which prevails. There was a good demand for milling wheat in the mountain territory, also for coarse grains. Millers are quoting \$10.80 per barrel for flour with a small discount for cash. Mr. Beckett said he thought the price would keep high till the next crop comes in.

NEW ORLEANS.

M. L. Davis, Correspondent.

F. C. Glynn, Gulf Director of the Lloyd Royal Belge Line, has returned from a business visit to Tampa.

Captain C. E. Taylor, Terminal Superintendent of the Mississippi Warrior Service, is on a business visit to Memphis.

Stocks in Elevator as of today: Wheat, 1,322,000 bus.; Corn, 493,000 bus.; Oats, 263,000 bus.; Rye, 36,000 bus. Cars on track: Wheat, 6; Corn, 1; Oats, 1.

Standard Blackstrap Molasses is quoted at 14c per gallon, f.o.b. tank cars New Orleans; Light Blackstrap, 14½c for February shipment. For March through June Standard Blackstrap is quoted at 13c per gallon and Light at 14½c per gallon.

Edgar F. Luckenbach of New York, president of the Luckenbach SS. Lines, spent several days in New Orleans this week en route to Pacific Coast ports. Mr. Luckenbach is head of one of the largest steamship lines in the country flying the American flag.

DULUTH.

S. J. Schulte, Correspondent.

Trade in flour was quiet during the last week and prices eased 15c. Quotations per bbl. in carlots at mill follow: Family patents, jute, \$9.20; bakers' patents, jute, \$8.95; first clears, \$7; second clears, \$5.50.

With a marked falling off in the run of feed grains to the markets here some of the elevator companies are again encouraging a moderate movement in oats in which spot prices were not quoted for a short time.

Elevator storage room at the Head of the Lakes is largely monopolized by two houses that between them are estimated to have 5,000,000 bushels space available. One company is figured as having 4,000,000 bushels and the other 1,000,000 bushels room.

Movement of grain to this market since the opening of navigation up to Feb. 13 aggregated 173,301,238 bushels, as compared with 52,531,312 bushels up to the same period last year. Of that wheat accounted for 92,491,364 bushels; rye, 33,382,459 bushels; oats, 20,044,478 bushels; flaxseed, 14,976,765 bushels, and barley, 11,502,356 bushels.

Omaha, Neb.

durum experienced an active trade during the last week. The Barnes-Ames Co. is credited with having put through substantial sales of spring wheat and durum held at Buffalo and at the seaboard. Foreigners came in on the break. That house was also reported to have effected some trade in rye held in the East.

H. F. Salyards of Ely Salyards & Co. ex-

pressed himself as confident that this market would experience another good season's trade next fall provided the new crop season turns out to be a normal one. He looks forward to the acreage seeded to spring wheat and durum over the Northwest being increased next season by reason of the high prices realized by growers and their disposition to push their luck along. His information is that supplies of wheat and durum remaining in farmers' hands over the Northwest are small by reason of growers having marketed their grains as closely as possible as a rule during the fall months.

Some of the elevator men on the Duluth market take the view that reserve stocks of various grains still held over Minnesota, North Dakota and Montana are larger than has been generally estimated. A buyer for one of the elevator companies asserted in that connection that his house's

advices were that considerable grain remains to be marketed and that shipments will increase at times when prices harden. He had noted that shipping advices have invariably dried up this winter at times when the markets showed weakness. His information was also that considerable coarse remain in growers' hands over the territory but that they are not being encouraged to ship at present on account of the lack of elevator space at Duluth and Superior.

OMAHA.

Leigh Leslie, Correspondent.

There was no session of the Omaha Grain Exchange Thursday, February 12th, Lincoln's birthday.

There has been only a moderate movement of corn to this market in the last few weeks, and the market in this grain has been rather dull and draggy. The lower grades have been selling at a wide discount under the higher ones. According to the last report, there were 2,270,000 bushels of corn in Omaha elevators against 1,120,000 bushels a year ago. The shipping demand for corn is extremely dull.

Work will be begun immediately on an 800,000-bushel annex to the Rock Island elevator in Council Bluffs, which is under lease to and operated by the Trans-Mississippi Grain Company. The Rock Island elevator now has a capacity of 200,000 bushels. The completion of the annex will make it a 1,000,000-bushel house. The J. Rosenbaum Grain Company operated the elevator till it closed its Omaha office at the time of its absorption by the Grain Marketing Company. The annex will give Omaha an elevator capacity of around 12,000,000 bushels.

Frank J. Taylor, a former president of our exchange, has been given some little newspaper prominence recently in connection with his father's activity as a circus owner and Frank's early participation in the joys of the sawdust ring. It seems that he is again to be a circus man.

"You don't really want to be a circus man again, Frank?" his grain men friends would ask. "That's just what I want to do," Frank Taylor would reply, pointing to a framed picture on the wall of his grain office. "I'm this little fellow on horseback. And see the band wagon there?" He has eight white horses, and an assortment of kangaroos, bears and other animals, with lions and others on the way. It is almost impossible, Mr. Taylor says, to buy elephants outright; but they may be leased.

"Of course, I don't expect to be able to be with the circus all the time," said Mr. Taylor, "but I'll be there just as much as I can with the consent of my wife and daughter and my business. I've engaged my brother, Ray, to be with the show all the time."

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

S. A. Harmer, representing the Commander Flour Company in Hamburg, Germany, was on 'change during the week.

Exports of grain for the week ending February 13 were: Wheat, 794,056 bus.; corn, none; oats, 108,833 bus.; rye, 62,384 bus.

Receipts of flour and grain for the week ending February 14 were: Flour, 80,231 bbls.; wheat, 1,219,322 bus.; corn, 22,101 bus.; oats, 144,978 bus.; rye, 2,294 bus., and 450 tons of feed.

The following trade bodies have entered strong protest against the abolition of port differentials as suggested by the manager of the Ocean Traffic Bureau and which has been successfully upheld here for 38 years.

Willis C. MacNutt, an old flour merchant of this city, died suddenly. The deceased was formerly one of the firm of J. W. Supplee & Co., which in its day was one of the oldest and most prominent in that line of business. Mr. MacNutt was about 68 years of age.

Albert M. Warren, Philadelphia manager of the Quaker Oats Co., died suddenly last week. He lived with his family in Germantown. Mr. Warren was 65 years of age and a member of the Commercial and Grocers and Importers Exchanges, Manufacturers and other prominent clubs of this city.

The following out-of-town visitors were registered at the Commercial Exchange during the week. H. M. Smalley, Bridgeport, N. J.; Ralph M. Gregory, Petersburg, Pa.; Thomas Rhoades, Pittsburgh; A. A. Wilson, Bridgeport, N. J.; J. Lawspile, Chicago; Alfred B. Siesholtz, Pottstown, Pa.; A. E. Bowman, Hagerstown, Md.; C. E. Bachman, Swedesboro, N. J.; J. L. Stetser, Woodstown, N. J.

The following trade bodies of the city of Philadelphia, viz.: The Board of Trade, the Maritime Exchange, the Commercial Exchange, the Bourse, the Chamber of Commerce, the Commercial Traffic Managers' Association and the Manufacturers' Club, individually and jointly wish to file

a protest with Congress against the enactment of Senate Bill No. 3927, known as the Butler bill.

Flour receipts for the week just ended were 80,231 bbls. The market is dull and demoralized, reflecting the unsettled condition and violent fluctuations in wheat. Buyers lack confidence and are not disposed to operate, purchasing merely enough to satisfy immediate wants. Prices for the week have ruled about 50c per barrel lower, but at the close have recovered about 15c on choice brands. We quote, per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, Western, \$9.50@10.00; soft winter straight, nearby, \$9.25@9.75; hard winter straight, \$9.85@10.35; hard winter short patent, \$10.35@10.85; spring first clear, \$9.25@9.50; spring patent, \$9.60@10.10; spring short patent, \$10.35@10.60; fancy spring and city mills patent, family brands, \$10.80@11.65. Rye flour, \$9@9.50 per bbl. in sacks, as to quality. Buckwheat flour, \$4.25@4.50 per 98-lb. sack.

WINNIPEG.

Geo. H. Measham, Correspondent.

The week has been one of intense nervousness and excitement such as has never before been witnessed in Winnipeg grain trade circles. On Wednesday there was real panic and speculative holders of long wheat seemed to have only one idea, viz., to throw their holdings overboard. Much of the selling was forced by vanishing margins and in this regard the country holders suffered worse than their confreres in the city. They were caught without being able to do anything to protect their trades. The smash came in the last few minutes and wheat carried other grains with it. On Thursday wheat had steadied to some extent, but the liquidation in coarse grains was on an enormous scale. The mills were in the market and absorbed an enormous quantity of wheat against the big flour orders booked for soviet Russia.

In general the news on Friday was bullish in character. Both Liverpool and Argentine markets showed firmness and there was export business in progress in wheat, flour, barley and oats. European crop news was of a somewhat pessimistic character. Crop prospects in the Balkans, Germany and Russia appear to be below average, and whether with regards to immediate or future requirements, the statistical position of wheat can only be regarded as strong.

During the last few days there has been an extensive clean-up of the low grade wheat in the bay ports and seaboard terminals and a much improved tone to the spot market here. The cash grains generally are firmly held. The extreme nervousness and wide fluctuations in the futures have made it very difficult to do any cash business.

Summaries of the report of the Royal Grain Enquiry Commission have appeared in the press during the week. It is a very lengthy document. The report generally exonerates the grain trade of any unfair dealing or profiteering. The spread between street and track wheat is condemned as penalizing the small producer. It is pointed out that the elevator companies operate at a loss on storage and handling, and have in the past made their losses good out of the street wheat. The report recommends an export duty on wheat to the United States. It is pretty certain, however, that the Dominion government will not seriously attempt to pass any such legislation.

CINCINNATI.

George Mosbacher, Correspondent.

The jobbing demand for flour was reported slightly better, with local bakers making inquiries for moderate-sized lots.

Grain inspections for the week ending Saturday, February 14, were as follows: Wheat, 129 cars; corn, 102; oats, 25, and hay, 175 cars.

Standing committees appointed by President Frank L. Watkins of the Exchange for the year 1925 will hold their first meetings this week.

Jack Dorsel, who managed the hay department of the Dorsel Grain Co. until illness forced him to go to Asheville, N. C., for his health, informs his friends in the trade that he is steadily gaining weight and that he is much improved.

Stocks of grain held in Cincinnati elevators for the week ending Friday, Feb-

WHEAT CORN OATS

February 6, and previous week are as follows:

	Feb. 13, 1925	Feb. 6, 1925
Wheat	255,441	319,574
Corn	271,815	238,587
Oats	185,478	231,270
Rye	4,858	2,772

The radical fluctuations in wheat futures caused a practical suspension of local cash trading on several days and holders found it difficult to find buyers or to establish quotations with any degree of accuracy. Price reductions of about 15c per bushel failed to stimulate the demand for spot offerings, but a fair increase was reported from mills for deferred shipment, mostly for March. Receipts were fairly large.

No. 1 red winter, \$1.90½; No. 2 red winter, \$1.89½; No. 3 red winter, \$1.86½; No. 4 red winter, \$1.82½; No. 5 red winter, \$1.75½.

There was considerable weakness in corn on the setback in wheat, which became more pronounced on the inability of receivers to find buyers at satisfactory prices and owing to the congestion of wheat and oats at local elevators. Prices steadily declined and at the close showed losses of 7@10c per bushel from last week. Receipts were fairly large.

No. 3 white, \$1.17½; No. 4 white, \$1.14½; No. 5 white, \$1.10½; No. 6 white, \$1.02½; No. 3 yellow, \$1.17½; No. 4 yellow, \$1.14½; No. 5 yellow, \$1.10½; No. 6 yellow, \$1.02½; No. 3 mixed, \$1.15½; No. 4 mixed, \$1.12½; No. 5 mixed, \$1.08½; No. 6 mixed, \$1.00½; sample grade, 90c.

The demand for oats continued very disappointing and under the weakness of other grains the market declined around 4c per bushel. Receipts were light and elevator stocks show little reduction. No. 2 white, 55½c; No. 3 white, 53½c; No. 4 white, 52½c; No. 2 mixed, 50½c; No. 3 mixed, 49½c; No. 4 mixed, 47½c.

KANSAS CITY.

T. J. Tanner, Correspondent.

Roy E. Swenson, member of the Board of Trade and wheat buyer for the Washburn-Crosby Co., millers, will be married next Saturday to Miss Lucille Huff.

The twenty-eighth annual convention of the Kansas Grain Dealers' Association will be held in Wichita, May 21 and 22, with headquarters at the Broadview Hotel.

At the close of the citizens' military training camp, Fort Leavenworth, next August, the Kansas City Board of Trade will present a silver cup to the best rifle shot.

Grain future transactions on the Kansas City Board of Trade Friday were 7,735,000 bus., including 3,182,000 bus. of corn. New records were established for the local market in both the total and the corn trading.

Kenneth G. Irons has severed his connection with the Norris Grain Co. and will represent C. K. Davis, who is going to California on a vacation of several weeks in search of health.

Visitors at the Board of Trade this week included: J. A. Hallenbeck, Chicago; F. Lehman and Emil Summa, St. Louis; F. W. Dunlap, Des Moines, Ia.; C. W. Hart, Winnipeg, Man.; L. E. Howard, Topeka, Kan., and W. F. Webber and C. Mansfield, McCook, Neb.

At the regular meeting of the directors of the Board of Trade, Tuesday, C. W. Fershing was appointed assistant secretary to succeed W. H. Frazell, Jr., who will retire March 1. Mr. Frazell has decided to engage in the building business.

Mrs. E. W. Shields, widow of the former president of the Simonds-Shields-Lonsdale Grain Co., has sold one-half of her stock in the company to C. W. Lonsdale, F. C. Vincent and other members. The company is capitalized at \$350,000. It has surplus profits equal to the capital.

A. G. McReynolds, manager of the Farmers' Co-operative Commission Co. of Hutchinson, Kan., was fined \$500 and suspended indefinitely by the directorate of the Kansas City Board of Trade Tuesday. Mr. McReynolds was charged with accepting membership rates of commission, knowing that his membership in the exchange represented his firm and not himself personally.

After her trip to Washington and other eastern cities as an advertiser of Kansas wheat, Miss Vada Watson of Turon, Kan., spent Friday in Kansas City and visited the Board of Trade. The "wheat girl" was received enthusiastically by members of the exchange. Mounting a cash grain table in the trading hall, she tossed hundreds of tiny bags of the "best wheat in the world" to the crowd.

Max R. Orthwein of St. Louis, who was a Kansas City grain dealer 15 years ago as a member of C. F. Orthwein & Sons, has decided to return to this market. Mr. Orthwein, with his brother, Ralph, and George Haynes, will organize a firm to be known as Orthwein & Haynes, which will be a brokerage business, principally in futures. Having bought the membership of Harry L. Winters of Thomson & McKinnon, Chicago, Mr. Orthwein is an applicant for admittance to the Board of Trade. The

CORN OATS CHICKEN WHEAT
409 Merchants Ex., St. Louis, Mo.

membership sold for \$9,250, including the transfer fee.

The Kansas Grain Dealers' Association is sponsoring a bill before the Kansas legislature to revise the law governing the state grain inspection and weighing department, so as to prevent the use of fees for any purpose other than the maintenance of the bureau. Provision is made for automatic regulation of service charges. The annual salary of the chief inspector is to be advanced \$1,000 to a maximum of \$4,000, and other officers may be paid not exceeding \$2,400 a year. In advocating a higher salary for the chief inspector, the association cites figures showing that \$4,500 is paid for similar work in Missouri, \$5,000 in Illinois and \$7,500 in Minnesota.

Opposed to Freight Discrimination.

With the purpose of again emphasizing its protest against the prevailing discrimination in freight rates on coarse grains from Omaha and Des Moines to the Southeast, as against those from Kansas City, the Kansas City Board of Trade appeared as an intervenor at a hearing in Sioux City, Ia., this week. The Sioux City grain interests had asked the Interstate Commerce Commission to place their market on the same basis as Omaha and Des Moines. This would aggravate the situation and add to Kansas City's disadvantage of a differential of only 1 cent per cwt. Kansas City wants a new deal, which would give its shippers a better show in handling coarse grains southeastward.

Favors River Grain Shipments.

Frank G. Crowell, vice-president of the Hall-Baker Grain Co., gave testimony one day this week in behalf of maintaining the assets of the Kansas City-Missouri River Navigation Co. Mr. Crowell said the dissolution of the company would be a calamity to the Southwest.

"It would induce Congress to discontinue appropriations for Missouri River improvement," he continued. "The activities of the company have helped to hold down rail freight rates." In response to questions, Mr. Crowell predicted that Kansas City grain shippers would have 5c a bushel in freight charges when the river was made navigable. He said his company was saving 2c a bushel on wheat to New Orleans by using the Mississippi River from St. Louis and Cairo.

Cash Grain Markets.

Wheat—Receipts for the week, 577 cars, against 517 a week ago and 804 a year ago. Influenced by both advances and declines in futures, hard and dark wheat had a very irregular course, but the main tendency of prices was downward. Saturday proved one of the best buying days, with a sharp upturn from the bottom. Net losses for the week were 5@10c and final quotations were: No. 1, \$1.72@1.90; No. 2, \$1.72@1.90; No. 3, \$1.70@1.89; No. 4, \$1.69@1.88. As flour trade continued dull, millers were poor buyers most of the time and there was a little reselling of wheat held in store for outside mills. Exporters did some business at the Gulf ports. Shipments on old foreign sales helped to reduce local stocks. Soft wheat was in light supply and fair demand for milling account. Its fluctuations ended with a net recession of 4@8c on the upper grades, while No. 4 was off 14@15c. No. 1 closed at \$1.93@1.98, No. 2 at \$1.91@1.95, No. 3 at \$1.86@1.91, and No. 4 at \$1.76@1.80. In the aggregate the wheat stocks decreased 634,000 bus. to 10,059,000 bus., as compared with 11,660,000 bus. last year. Arrivals came largely from the western half of Kansas and points in Nebraska, where the only considerable surplus remains. Weather during the week was unusually mild for February, with slight precipitation of snow and rain. The growing crop was generally reported in good condition, with signs of greening up. Vigorous growth at this time is not desirable, owing to danger from later frosts.

Corn—Receipts, 498 cars, against 569 a week ago and 716 a year ago. Due to the large local accumulation and the slim consumptive demand, the market had the worst break witnessed in months. Elevator men were practically the only buyers until the bottom was reached, when some shipping sales were made to northern markets, where sound, dry corn is wanted for mixing purposes. Inquiry from Texas was also noted on the new basis established. Discounts on high-moisture samples from South Dakota were widened. Though the market closed with a recovery of 1@2c from the low level, it showed a net weekly decline of 8@11c, prices being as follows: No. 2 white, \$1.12@1.13½; No. 3, \$1.07½@1.10; No. 2 mixed, \$1.09@1.11; No. 3, \$1.04@1.08½; No. 2 yellow, \$1.13@1.14; No. 3, \$1.08@1.11. On the reduced price basis there may be a further restriction of receipts, as country feeding is likely to be stimulated. Local elevator stocks increased 381,-

000 bus. for the week to 6,325,000, against 1,349,000 bus. last year. They may reach 7,000,000 bus. before definitely turning downward.

Oats—Receipts, 178 cars, against 125 a week ago and 145 a year ago. Fully sympathizing with the weakness of corn, the oats market had a sharp recession, which was followed by a small recovery. White oats closed 5@7½c down and red seed showed a net loss of 13@14c. Final prices were: No. 2 white, 53c; No. 3, 50½c; No. 2 red, 52c; No. 3, 50c. The break improved the outside demand. Prior to this the elevator interests were the principal buyers. Stocks increased 144,000 bus. to 2,496,000, against 1,062,000 a year ago. Planting of the new crop is progressing

northward and will reach Kansas within another week if weather permits.

Kafir and Milo—Receipts, 169 cars, against 166 a week ago and 143 a year ago. Affected by the action of corn, the market for grain sorghums slumped badly, with buying only on breaks. At the close there was a firmer feeling, with indications that manufacturers would take hold. The net loss in kafir prices was 20@21c per cwt., while milo showed a recession of 11@16c. Final quotations were: No. 2 white kafir, \$1.65@1.68; No. 3, \$1.63@1.65; No. 4, \$1.60@1.62; No. 2 milo, \$1.88@1.91; No. 3, \$1.85@1.90; No. 4, \$1.82@1.85. There were liberal shipments on old sales. Stocks decreased 16,000 bus. to 324,000, as compared with 264,000 a year ago.

Milwaukee milling output last week consisted of 7,000 bbls. of wheat flour as compared with 6,700 the previous week and 3,800 last year. Receipts of flour at Milwaukee were 16,390 bbls. as compared with 28,320 during the same week of last year and shipments were 28,590 bbls. as compared with 14,520 in 1924.

Prices followed the downward trend of futures last week and wheat closed 3@6 cents lower for this period in the Milwaukee market, rye 3@4 cents, oats 5@6 cents, corn 5@9 cents, and barley 2@3 cents. Movement was fair and trade moderately active. Better feeling prevailed toward the close with sharp recovery in prices.

The far west was well represented among visitors at the Milwaukee Chamber of Commerce during the past week while there were no guests from points east of Chicago. Out of the state callers included A. M. Connors of Omaha, Neb.; A. J. Thiede of Spokane, Wash.; L. Kailer of Chicago; P. DeCesare of Chicago; Henry Klehr of Scobey, Mont.; and J. L. Gleason of Oakland, Cal.

A. E. Thomas of Cobb, Wis.; David Rosenheimer of Kewaskum, Wis.; G. E. Ingram of Eau Claire, Wis.; A. Straub of Lomira, Wis.; Manly Rudolph of Eau Claire, Wis.; Robert H. Jones of Cambria, Wis.; Walter Sprecher of Independence, Wis.; Alfred Meyer of South Milwaukee, Wis.; S. E. Marcott of De Pere, Wis.; Edward Pick of West Bend, Wis.; and O. W. Timm of Plymouth, Wis., were among Wisconsin residents who visited at the Milwaukee Chamber of Commerce last week.

Ernest F. A. Stolpe, one of the pioneer millers of Wisconsin, died at the Lincoln hospital at Merrill, Wis., on Friday, Feb. 6, of dropsy. Mr. Stolpe learned the milling trade in Prussia, where he was born, came to America in 1867 and worked in the flour mills of New York until he made enough money to come to Wisconsin and enter business here. During his lifetime he was interested in several mills, the last at Wausau, Rib Falls and Merrill. He retired from the industry in 1883 and since then has owned and managed several fine farms. Mr. Stolpe is survived by a daughter, ten grandchildren and two great grandchildren.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Mr. John Spaulding, representative of the La Junta Flour Mills, La Junta, Colorado, was a business visitor in the city this week and called on the Exchange Wednesday as a guest of the Sunset Milling & Grain Company.

Miss Nora Cremmens, of the Strauss & Company, who has been confined to her home the past two weeks account of illness, is reported to be much improved and expects to return to the office within the next 10 days.

Mr. I. I. Irwin, of the Irwin & Company, San Diego, Calif., was a visitor in the city this week. Mr. Irwin reports business conditions in the southern city as being very good and that his plant is running a full twelve-hour shift.

Another important step in the industrial progress of El Monte was taken with the completion of the modern plant of the Valley Dairy Company, manufacturers of Vallemaid ice cream and distributors of the milk products, is the word received from the El Monte Chamber of Commerce. The new plant represents an investment of over \$100,000 and so pronounced has been the success of the concern that they are considering the doubling of their present capacity.

Cash Markets.

Considerable caution has been used in all trading in this market during the past week owing to the radical fluctuations elsewhere. The arrivals have been normal with 226 carloads of hay by rail and 443 cars of grain and grain products by rail. The decline on the Chicago market has had effect on this market and No. 3 yellow corn is being offered at \$2.60 with \$2.56 bid. No. 2 white kafir corn, \$2.45 to \$2.50; Imperial milo, \$2.55 to \$2.60 for No. 2; No. 2 feed barley is easy quotable at \$2.40. These

prices are "per hundred pounds. Ground feeds have declined in most all cases, Kansas bran is selling at \$37.00 per ton while Utah-Idaho mill run is quotable at \$41.00. Alfalfa meals have shown strength and No. 1 medium ground is quoted today at \$31.00, while molasses-alfalfa mixed quoted at \$31.00 rolled barley has declined \$1.00 per ton and is now selling at \$56.00. Cottonseed meal remains firm at \$47.00 and Beet Pulp dry at \$40.65 per ton. There are but few cars on track at the week end; the demand seems to be equal to the supply. The hay market has been fairly active with the range of prices changed but little, alfalfa showing the only weakness, which is accounted for by the plentiful rains in the central and northern part of the state. No. 1 alfalfa is being quoted at the week end at \$28.00 to \$29.00 per ton and barley hay at \$29.00 with No. 1 oat hay steady at \$31. Dealers report a good demand for hay and the number of arrivals by rail indicate perhaps 75% of the amount received as many shipments arrive by motor transit of which this office has no record.

BOSTON.

The Boston Grain and Flour Exchange, under the direction of President Dean K. Webster, is progressing nicely.

H. N. Vaughn, chairman of the entertainment committee of the Flour and Grain Club, advises that plans for the annual Mid-winter dinner at the Boston City Club, on March 3rd, are nearing completion.

Business conditions were benefited last week by a break in the market as dealers demanded lower prices before making future commitments. It is believed that New England holdings are not heavy and that lower and reasonable prices will find considerable buying. Dealers through this locality are not desirous to advance further credit to the farmers as the latter are rather hard-up.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: J. P. Dold, of Buffalo; F. W. Dold, of Kansas City; R. W. Bell and R. E. Chapman, both of Chicago; E. J. Grimes and J. H. McMillan, Jr., both of Minneapolis, and C. Ritz, of Montreal.

There was a much better business in wheat for export during the latter part of the week and total sales in all positions approximated five to six million bushels. The business appeared general, with good sales of American winters, American spring wheats, durums and also Manitobas. In addition, there were heavy sales of flour made to Russia by Canadian mills.

Flour Situation.

New York, Feb. 14.—There were reductions of about 50c to \$1 per barrel established in the flour market this week, following the break of approximately 30c per bushel in wheat.

The feature of the market was the buying in Canada by Russia of about 1,350,000 bbls. of flour for February, March and April shipments. It was believed some of this flour would be ground by American mills in order to insure quick delivery.

Locally trade was quiet. Spring patents were quoted at \$9.10@9.75; soft winter straights, \$9.15@9.50; hard winter straights, \$8.90@9.15 per 196 lbs.

The Milwaukee Chamber of Commerce was closed all day on Thursday, Feb. 12, the anniversary of Lincoln's birthday.

Shipments of grain from Milwaukee last week were 163,298 bus. oats, 117,325 corn, 138,444 barley, 28,641 wheat, 6,040 rye; total, 443,658 bu., against 432,091 the preceding week and 701,345 a year ago.

Receipts of grain at Milwaukee for the past week were 213 cars barley, 208 corn, 181 oats, 38 wheat, 39 rye, 10 flax, 20 miscellaneous; total, 709 cars, against 735 the week before, 719 a year ago and 779 in 1923.

The following officers of the Tri-State Grain Shippers Association were elected at the annual meeting recently held in Minneapolis: S. E. Crandall, Mankato, president; E. A. Betts, Mitchell, S. D., first vice-president; Arthur Speltz, Albert Lea, second vice-president; S. O. Tellefson, Milton, N. D., third vice-president; E. H. Moreland, Luverne, Minn., secretary-treasurer. Directors elected: A. E. Anderson, Cottonwood, Minn.; T. F. Dahl, Minnesota, Minn.; H. R. Wollin, Marshall, Minn.; E. G. Christgau, Grand Meadow, Minn.; E. F. St. John, Worthington, Minn.; R. E. Jones, Wabasha, Minn.; E. H. Sexauer, Brookings, S. D.; T. M. Comer, Rustad, Minn.; August Evert, Kennedy, Minn.; V. D. Bascomb, Clark, S. D.; W. H. Richardson, Elgin, Minn., and E. R. Arneson, Irene, S. D.

PORTLAND, ORE.

The Portland Chamber of Commerce has put on a drive to increase its membership by 1,000. With a present membership of 3,650 Portland is said to rank fourth among the larger cities of the country on the basis of its population.

Reports from some sections of the state indicate wheat to have been badly winter killed, running in some cases as high as 90 per cent. Wheat for reseeding is arriving and farmers are paying from \$2.30 to \$2.60 a bushel for different varieties.

In accordance with the passage by the legislature of the Port of Portland commission bill, which places appointments with the legislature instead of continuing the appointive authority with the governor, the commission has been reorganized and subscribed to oaths of office.

The speedy action was necessary, as the measure was passed as an emergency and provides that the appointments become effective forthwith. In view of that, means must be provided to protect the functions of the organization against any interruptions and safeguard its transactions under the law.

In the measure passed Frank M. Warren, Colonel George H. Kelly, Phil Mettschan, H. A. Sargent and W. L. Thompson, whose terms would expire in June under former appointments, will hold office until June, 1929, while Robert H. Strong, Robert E. Smith, Andrew Porter and H. L. Corbett serve until June, 1927, as they would have under the appointments in force preceding the passage of the new act.

Terminal receipts in cars for the season to Feb. 11 were reported by the Merchants' Exchange as follows:

	Wht.	Bly.	Corn.	Oats.	Hay.

SIoux CITY.

An effort is being made to have the government dredge the Missouri river from this city to Kansas City, Kansas, so as to give a 7-foot channel between the two cities, a project in which grain men are greatly interested.

Representatives from Kansas City, Fort Worth, Dallas, St. Paul, Minneapolis, Duluth and other points have been in this city attending the hearing on grain rates from South Dak., Neb., and Minnesota, during the past week. An effort is being made to force the carriers to name Sioux City as a rate breaking point. The case for this city was handled by Freeman Bradford, traffic manager of the Grain Exchange and by H. C. Wilson, traffic commissioner of the Chamber of Commerce.

mand and receipts were placed at 1000 head.

Cattle and calves were generally steady with the week's market with the best veals selling at \$12 down. Receipts have been very light the past week.

F. B. Miles, president of the Miles Gr. Co., of this city, was elected president of the Peoria Chamber of Commerce at its annual meeting last week.

Other officers elected were H. H. Dewey, president pro tem.; John R. Lofgren, secretary, and W. E. Stone, treasurer; J. C. Luke, Louis Mueller and L. H. Murray were appointed to serve on the House Committee and members of the Finance Committee are F. L. Woods, E. R. Murphy and H. H. Dewey.

PEORIA.

L. L. Eckard, Correspondent.

Oats receipts were small and the demand for fresh offerings were not at all urgent, and no new business was reported.

Corn receipts at this market were only moderate with 57 cars. Saturday prices advanced 2 cents. However the market was slow. Local industries and driers were the best buyers and at the finish there was a good demand. No. 4 yellow, \$1.12 to \$1.12½; No. 5 yellow, \$1.07; sample mixed, \$1.06, which was 12¢ wheat.

Grain receipts and shipments at Peoria for week ending Saturday, Feb. 14th, as compared with same week last year as reported by the Secretary of Peoria Board of Trade:

	1925	1924
Receipts		
Wheat	14,400	31,200
Corn	414,350	668,150
Oats	234,600	232,200
Rye	1,200	37,800
Barley	44,800	
	708,150	970,550
Shipments		
Wheat	14,400	44,400
Corn	234,150	175,650
Oats	204,600	173,100
Barley	23,800	14,000
	476,950	407,150

Hogs at the local yards closed 10@15c higher with a top of \$11.30 paid for one load of choice 280-pound average, while the practical top was \$11.25. The bulk of sales were from \$11@11.25; packing sows sold \$10@10.25, with good lights at \$11@11.05. Trading was active with a good de-

CHICAGO.

The M. L. Vehon Co. has opened an office in the Granger building on South Schuyler Ave., Kankakee, Ill.

A. C. Rynders of the White Star Construction Co., Wichita, Kans., visited the Chicago trade this week.

A Board of Trade membership was sold last week at \$9,325, net to the buyer. The last sale made was at \$8,850.

Lowell, Hoit & Co. have established a branch office in Rensselaer, Ind., and will handle the grain of the elevators in that territory. Philip Kibler is in charge.

George Brenner, Jr., who has been a representative of Swift & Co. on the Chicago board of trade for thirty years, died on the 13th. Mr. Brenner was around the board of trade for nearly fifty years.

Trade Opinion.

The average daily range of fluctuation in the price of May wheat since the first of this month has been over 5 cents and on one day the range was 10 cents. During the past several months, speculative sentiment has been influential in advancing prices; the cash markets following the futures easily. Under such circumstances the supply and demand situation of cash wheat is more likely to dominate the futures market than futures dominate the cash, as in the past—Clement, Curtis & Co.

Naturally for the first six months of each crop season, the trade must proceed on theories, because both supplies and probable requirements are unknown quantities. With the exception of 1919, war time, the U. S. visible supply on Feb. 7, 75,709,000 bus., was the largest in 30 years.—Bartlett-Frazier Co.

A better feeling in the wheat market is noticeable which enabled it to respond to moderate buying. The motive behind the buying was reported as largely export, ac-

News of the Country Grain Trade

ARKANSAS.

Mena, Ark.—Walter C. Crosby has purchased the J. E. Woodson grocery and feed store and is now in charge.

Pine Bluff, Ark.—The Arkansas Mill & Supply Co., managed by L. T. Rucks, has increased its capital stock from \$66,000 to \$75,000.

CALIFORNIA.

Oakland, Cal.—The Wheat Treats Co. will erect a cereal plant here.

Los Angeles, Cal.—J. D. Hunter is manager of the Seaboard Grain Co. which has opened offices in the Financial Center building.

CANADA.

Sarnia, Ont.—A new terminal elevator is contemplated for erection here.

Vancouver, B. C.—The Vancouver Harbor Commission has asked for bids on sheet metal work for No. 3 elevator.

Regina, Sask.—The farmer bodies of this province will organize under the name of the United Farmers of Saskatchewan.

Prince Rupert, B. C.—The Northern Construction Co. was awarded the contract for the foundation work of the Prince Rupert grain elevator, which work will cost \$225,000.

COLORADO.

Crook, Colo.—The Leflang Grain Co. has installed a 6-bushel Richardson automatic scale.

Denver, Colo.—Adolph Zang, with a proposal of \$3,000 for the mills of the Alfalfa Milling Co. at Eastlake and Broomfield, was the only bidder at a public sale held by C. A. Bailey, trustee. The mills are valued at \$50,000 with a mortgage of about \$25,000. The bid is subject to Referee McLaughlin's confirmation.

DELAWARE.

Bridgeville, Del.—The Bridgeville Flour & Feed Mills has been incorporated with a capital of \$50,000. John W. Todd, Bridgeville. (Paul A. Brenner, Bridgeville.)

IDAHO.

Bonnors Ferry, Ida.—Additions and improvements will be made to the mill of the Bonnors Ferry Grain & Mfg. Co. this spring and its warehouse will be enlarged.

Pocatello, Ida.—It is reported that the properties of the Farmers Grain & Mfg. Co. in Idaho have been taken over by the Colorado Mlg. & Elevator Co.

ILLINOIS.

Moweaqua, Ill.—C. A. Stout is the new manager of a grain elevator here.

Rockford, Ill.—The plant of the Chicago Grain Products Co. has been temporarily closed.

Rooks Creek, Ill.—The Rooks Creek Grain Co. has installed a Howe wagon and motor truck scale.

Byron, Ill.—A. E. Clevidence, Mt. Morris, purchased the Farmers Grain Co. elevator, sold at auction, for \$5,000.

Leavert, Ill.—J. M. Hershberger will build a new elevator for the coming harvest to replace the present one.

Freeport, Ill.—The Rosensteel Co. has contracted to purchase a Lord's Universal truck and wagon dump (stationary type).

Mansfield, Ill.—T. F. Grady of Farmer City has purchased the James Mahan elevator here, which will be managed by Jake Swartz.

Kankakee, Ill.—The M. L. Vehon Co., Chicago grain dealers, have moved their offices to the Granger building on South Schuyler avenue.

Moline, Ill.—The purchasers of the old Montgomery elevator property have been disclosed as Hyman Lewis and William Morris of Rock Island.

Sharpsburg, Ill.—At the annual meeting of the Farmers Elevator Co. Dwight Hart and Dwight Mason were elected directors and Charles Potts re-elected.

Galva, Ill.—John S. Collinson, Grant Linton and H. G. Olson were re-elected directors at the annual meeting of the Galva Co-operative Grain & Supply Co.

Highland, Ill.—Julius Peinhart and M. Trollet were re-elected directors at the annual meeting of the F. M. B. A. Elevator Co. An increase in capital stock is contemplated.

Melvin, Ill.—Henry Falek and Adam Rupple were elected directors of the Melvin Farmers Grain Co. An 8 per cent dividend was declared and profit of more than \$10,790 was reported for last year.

Bement, Ill.—Thomas Lamb and John Morey were re-elected directors at a meet-

ing of the Bement Grain Co. The report shows 450,000 bushels of grain handled during 1924, an increase of 50,000 over 1923.

Bloomington, Ill.—At a recent meeting of the Randolph Co-operative Co., the retiring directors, D. W. Thompson, John Lunney and H. A. Stewart, were re-elected, also same officers. A 10 per cent dividend was declared.

Mendota, Ill.—At the annual meeting of the Wendel Grain Co. the following directors were elected: W. P. Gross, Gabriel Geuther and Henry Ehlers. Other directors are Geo. Stamberger, L. C. Bauer, W. J. Stamberger, H. O. Stamberger, Geo. Wendel and Harvey Utch. Henry Geuther is manager.

Fancy Prairie, Ill.—The Fancy Prairie Co-op. Co. will erect an elevator, plans furnished by the Stevens Engineering & Construction Co., for a 25,000-bu. concrete house. Specifications call for a 25-h.p. Fairbanks-Morse engine, Western cleaner, etc. Bids for construction will be requested this month.

Welland, Ill.—At the annual meeting of the Penrose Elevator Co., the following directors were re-elected: Conrad Schlesinger, John Stein, John Zimmermann, Geo. Schlesinger, Jr., John Kaufmann and George Yost. John H. Engelhardt was elected to succeed John Heiman. A 10 per cent dividend was declared.

INDIANA.

Owensville, Ind.—The Harmon-Wallace Milling Co. has filed certificate of dissolution.

Boswell, Ind.—The Boswell Grain Co. has increased its capital stock from \$14,000 to \$30,000.

Rensselaer, Ind.—The Lowell-Hoit grain commission firm of Chicago has established a branch office in this city.

Millersburg, Ind.—The Elkhart County Co-op. Ass'n grain and feed business has been taken over by Harry Green and B. F. Hartsough of Goshen.

St. Paul, Ind.—The Wm. Nading Grain Co. has installed a hammer type feed grinder with cyclone attachments which is run by a 40-h.p. motor.

Decatur, Ind.—Adams county farmers who held their wheat, disposed of more than 5,000 bushels within a few days when it passed the \$2 a bushel mark.

Poneto, Ind.—The Poneto Grain Dealers Co. purchased the Farmers Elevator for the sum of \$31,000, following dissolution proceedings by the latter company. The elevator will continue under the name of the Poneto Grain Dealers Elevator.

IOWA.

Bondurant, Ia.—The Clark Brown Grain Co. is erecting a new grain office here.

LeMars, Ia.—The Plymouth county co-operative elevator men will organize here.

Kellogg, Ia.—Fire caused slight damage to the Jasper Milling Co. building recently.

Leland, Ia.—The Leland Farmers Elevator Co. is planning on making repairs on its elevator.

Remsen, Ia.—On account of poor business, the local elevator of the Plymouth Mlg. Co. is closed.

Algona, Ia.—At the annual meeting of the Farmers Co-op. Society all officers were re-elected. C. J. Sherman, pres.

Humboldt, Ia.—George M. Hilton, county agricultural agent of Humboldt county, has been appointed sealer of the grainware act board.

Strahan, Ia.—The directors of the Farmers Elevator here held their annual meeting recently and declared a 10 per cent dividend.

Ames, Ia.—H. R. Richards and J. R. Richards of Swan, Ia., won the grand championships in the state corn and small grain show with their entries of corn.

KANSAS.

Zenda, Kans.—The Farmers Elevator Co. will erect a new 10,000-bu. elevator.

Wichita, Kans.—The Kansas State Grain Dealers' Ass'n will hold its annual convention here May 21 and 22.

Arkansas City, Kans.—The New Era Milling Co. is contemplating installing new equipment and remodeling.

Acres, Kans.—Mead & Gardiner have installed a Kewanee all-steel truck lift, standard model, single outfit.

Paxico, Kans.—The Dougans elevator was burned to the ground recently. Insurance partly covered the loss.

Manhattan, Kans.—Millers from the first and second districts of the national organization will meet here on May 9.

QUALITY and SERVICE

Kansas City, Missouri

MISSOURI.

Keytesville, Mo.—Roy S. Price has purchased the flour and feed business of D. S. Price.

Carrollton, Mo.—The state senate has confirmed Roy H. Monier as state grain and warehouse commissioner.

Harrisonville, Mo.—Mike Bradley and George M. Berkstresser were re-elected as directors of the Farmers' Co-op. Ass'n.

Troy, Mo.—A 40-h.p. motor was installed in the Troy mill to replace the large steam engine formerly used.

Atlanta, Mo.—The defunct Bealmer & Son firm has been succeeded by the Atlanta Elevator Co.

Republic, Mo.—The Billings Milling Co. has purchased the Republic custom mill from the Myers Milling Co. of Springfield and will take charge at once.

Centralia, Mo.—G. V. Proctor, manager of the Producers Grain Co., who recently resigned his position, has been prevailed upon to accept the position at an increased salary.

Mendon, Mo.—The Farmers Grain & Supply Co. will call a dissolution meeting in the near future when the transfer of property will be made to C. O. White, purchaser.

MONTANA.

Choteau, Mont.—The J. M. Barker Co. elevator was slightly damaged by a wind-storm.

NEBRASKA.

Oshkosh, Neb.—The Farmers Elevator Co. will install a 4-bu. Richardson automatic scale.

Bridgeport, Neb.—The Dalton Co-operative Society has taken over the elevator trackage and business of the Dalton Trading Co.

Oakdale, Neb.—The Torpin Grain Co. is erecting a new office building to replace the one burned last month.

Kearney, Neb.—The Kearney Mills is installing a Fairbanks truck scale, a Richardson automatic scale and a power shovel.

Hordville, Neb.—At the annual meeting of the Farmers Grain & Live Stock Ass'n the directors and officers were re-elected as follows: John Jones, president; George Reeb, vice-president; William Lindam, secretary; Birger Benson, treasurer; C. O. Rodine, manager. An 8 per cent dividend was declared.

NEW YORK.

Valley Falls, N. Y.—Fire destroyed the feed mill of Peter L. Stover.

New York, N. Y.—The Norfolk Grain Corp. has incorporated with capital, \$5,000 to \$15,000. (Corporation Trust Co. of America.)

Rochester, N. Y.—The J. G. Davis Co. plant will be sold to an electric power company. Business has been discontinued and machinery and equipment removed.

NORTH DAKOTA.

Walhalla, N. D.—Lee & Son has installed a 10-ton Howe truck scale in its elevator.

Cavalier, N. D.—The St. Anthony & Dakota Elevator Co. property was damaged by fire recently.

Grand Forks, N. D.—The federal seed loan office has closed here after collecting 70 per cent of the loans.

Lidgerwood, N. D.—Fire of undetermined origin destroyed the Lidgerwood flour mill, valued at \$70,000; insurance, \$10,500.

Lostwood, N. D.—A modern elevator will be erected by the Lostwood Farmers Elevator Co. as soon as work can begin in the spring.

KENTUCKY.

Lexington, Ky.—The City Feed Co. has been purchased by George C. Wilson.

Madisonville, Ky.—The newly organized Parks Mlg. Co. has purchased the Madison Mlg. Co. property here.

LOUISIANA.

Shreveport, La.—A \$500,000 elevator and mill are planned by Frank Davis, former president of the Marshall Mill & Elevator Co., and associates of Marshall, Tex.

MICHIGAN.

Grant, Mich.—The Grant Grain and the Grant Co-op. Ass'n has sold out for \$2,500.

Lake City, Mich.—Fire, caused by the backfire of a gasoline engine, damaged the Grice flour mill and caused a loss to wheat which was stored in the mill.

MINNESOTA.

Lake Elmo, Minn.—The Equity elevator is closed.

Baudette, Minn.—George Marvin of Warroad will erect a grain elevator here.

Dent, Minn.—Fire damaged the Dent Farmers elevator to the extent of \$200.

Worthington, Minn.—St. John Seed Co. has been incorporated with a capital stock of \$100,000 by John G. Dill, Sr., W. B. Well et al.

Lake City, Minn.—The Digest Products Co. has rented the Botsford elevator for the purpose of manufacturing a livestock mineral feed.

Detroit, Minn.—George Reichert and Frank L. Caye will carry on a seed and grain business under the firm name of Reichert & Caye.

Marshall, Minn.—C. E. Gies and D. M. Cruickshanks have purchased the mill elevator formerly operated by the Froedert Grain & Malting Co.

Traverse (P. O. St. Peter), Minn.—A meeting will be held by the Farmers Elevator Co. on Feb. 16 for the purpose of taking action on erecting a new elevator.

Grand Rapids, Minn.—Hagen & Son has purchased the brick warehouse on the Great Northern right of way and has moved its stock of feed, flour, hay, etc., into the building.

Houston, Minn.—The Farmers & Merchants Elevator Co. has incorporated with a capital stock of \$25,000; highest amount of liability, \$25,000. Incorporators: D. A. Tiffany of Wiscoy, Minn., B. E. Lilly, A. G. Dyer, A. J. Anderson et al.

MISSISSIPPI.

Biloxi, Miss.—Fenner & Beane, stock, cotton and grain brokers, have opened a branch here.

TENNESSEE.

Chaseley, N. D.—E. S. Curry is contemplating the installation of a new truck dump before another fall in the F. O. Klinger elevator.

Lisbon, N. D.—Fire, originating in one of the rolls, damaged the J. L. Byrne feed mill, causing a loss of \$8,000, partially covered by insurance.

Starkweather, N. D.—The railroad company has notified three grain elevators here that their houses must be moved to the opposite side of the track, which will cost the companies \$3,000 each.

OHIO.

Dawn, O.—Wm. F. Hiegel has sold his elevator to C. H. Ferguson who will take possession March 1.

Circleville, O.—H. M. Crites purchased the five elevators of the Dixie Mills for \$24,567 at public sale Jan. 29.

London, O.—The flour mill recently operated by Ed. Weisheimer has been taken over by the West Jefferson Elevator Co.

Rosewood, O.—On Feb. 21 the Rosewood Farmers Exchange Co. will be sold at public auction with its contents and equipment. It is appraised at \$7,400 and the stock scales at \$200.

Huron, O.—The following directors were elected at the annual meeting of the Shinnock Elevator & Supply Co.: H. P. Clark, Charles Conklin and James Limbird. A 6 per cent dividend was paid.

OKLAHOMA.

Lawton, Okla.—Bob McCoy has purchased a half interest in the Miller Feed Co.

Longdale, Okla.—A Kewanee all-steel truck lift, standard model, single outfit, has been installed by H. Ames.

Mulhall, Okla.—The Star Engineering Co. has secured the contract to rebuild the Farmers Elevator, recently burned.

Comanche, Okla.—The Comanche Wholesale Grocery & Elevator Co. has purchased the Comanche Grain & Elevator Co.

Tuttle, Okla.—The Chickasha Milling Co. has installed Kewanee all-steel truck lifts at Tuttle, Lawton, Hinton and Apache.

Chickasha, Okla.—W. C. Newcomb is now secretary-treasurer of the Linton Grain Co. in which he has purchased an interest.

Edmund, Okla.—The Eagle Milling Co. has awarded a contract for the construction of a 300,000-bu. fireproof elevator to be completed by July 1.

Tulsa, Okla.—The Binding-Stevens Seed Co. has purchased the building at 25 West First street and remodeled same into an up-to-date retail store.

PENNSYLVANIA.

Delabole, Pa.—The Grist mill of the Stofflet Milling Co. will be reopened.

Philadelphia, Pa.—Bids for the construction of a new \$3,000,000 export elevator will be asked for by March 1st by the Philadelphia & Reading Railway. Some equipment has been ordered as mentioned in previous issue of this paper.

SOUTH DAKOTA.

Lennox, S. D.—F. A. McMaster of Titonka has purchased the Flanley Grain Co.'s elevator.

Kennebec, S. D.—The elevator of the McVan Elevator Co. has been purchased by Claude Irwin, its former manager.

Brookings, S. D.—Geo. P. Sexauer & Son expect to install several truck dumps in their line elevators early in the summer.

IMPORTS OF ALFALFA SEED.

Figures from the United States Department of Agriculture show that for the 12 years from 1911 to 1922, inclusive, we imported on the average 4,764,000 pounds, or 79,405 bushels, of alfalfa seed. In other words we are importing each year into the United States about 1/5 of our annual needs. It is interesting and important to know where this imported seed comes from. In the first place there is the effect of this seed on the price of our local seed, and second there is the question as to the value and adaptability of this imported seed. The following table will show the average yearly importations into the United States from 1919 to 1923:

THE IMPORTATION OF SEED.

Country exporting—	Pounds.
Argentina	3,426,400
Canada	19,240
Chile	49,920
England	364,320
France	400,420
Germany	49,400
Italy	1,953,240
South Africa	87,880
Siberia	744,500
Turkey	34,740
Uruguay	32,900
Other countries.....	154,480

Total pounds.....7,317,440

Italian seed, Turkestan and Argentine seed especially is looked upon with considerable suspicion from the standpoint of being adapted to our conditions. At the present time it is somewhat a debatable question just how serious we should consider this imported seed, but there is little question but that home-grown seed is to be preferred. H. L. Westover of the Department, who recently spent some 6 months in Argentina, reports that the climate under which alfalfa seed is grown there is not such as would seem to produce hardy seed. For instance the most southern point at which seed is grown has a latitude of New York city, but has the temperature of Southern Texas. The ground rarely if ever freezes and the climate on the whole is mild. And yet you will notice from the table that Argentina is one of the heaviest alfalfa seed exporting countries into the United States. Recent reports show that importations for the last few years from Argentina have been even greater than the average figures in the table indicate.

Varieties and Strains.

It would seem from the present opinion of our Agricultural Experiment stations that it is quite necessary to obtain seed that is adapted to the particular region in which it is to be grown. Montana, Idaho, the Dakotas, Minnesota and the Dominion of Canada all are very emphatic in their alfalfa publications that the Grimm and Baltic varieties or other hardy varieties are much to be preferred over the southern grown seed.

BROOM CORN MARKETS.

Temperatures have been above the seasonal average throughout broom corn areas the past week and as there has been no precipitation of any consequence the field situation has been favorable for buying efforts and also deliveries on the part of growers.

Buyers are still numerous throughout the various districts being more numerous in the northwest part of the area as this section has a larger percentage of the crops holdings than the central and more southern districts. Field advices state and have stated for some time past that the holdings in the above districts were light and this is further confirmed by the report issued last Friday by the U. S. Bureau of Economics. It must, however, be taken into consideration that as this report was based on conditions existing Jan. 1 and that during the intervening period, buyers have been active and that the field supply today will show a perceptible reduction as compared to the date of the report. Taking into consideration the tonnage produced in 1923 and the estimated production of 1924, the supply in growers hands at the present time is comparatively light and is considered under the

MARKET FORECASTER CO.

Dept. P. TOPEKA, KANSAS

average for this season of the year, compared with the 1910 to 1914 period when good average sized crops were produced each year, the holdings on the farms at this time are estimated as under the amount usually carried at this period of the marketing season.

Activity is still noted in the various districts with interest centered mainly in New Mexico, western Kansas, and adjacent districts in Oklahoma and Colorado. Prices paid on the farms show no material change as bulk of corn obtained is secured at prices ranging from \$70 to \$100 to the grower, as has been the case heretofore, crops are secured under the general average but the amount obtained is negligible. Odd crops have been taken at \$110 and \$120, these instances also are only occasional as but little corn with real merit and quality is available.—Broom Corn Review.

TERMINAL MARKETS.

[Continued from page 25.]

cepted by many as being authentic because of the fact that the recent decline sent our prices to a discount under Argentine and to an approximate shipping basis with Liverpool. Corn and oats advanced in sympathy with wheat, but discounts are still too great for holders of futures to derive much comfort from the cash position.—Thompson & McKinnon.

Prices of wheat are now on a world parity basis again, which means that it is in a healthy condition. Everything considered, we believe the market at this level will find good support with world's conditions of a bullish sort again likely to find a bullish response. The rye market will follow wheat and that is about all that can be said. Bullish export trade developments were responsible for a good speculative demand, with light offerings.—Logan & Bryan.

It is believed that stop loss orders in wheat have been well cleaned out and sentiment as a whole is more friendly to the buying side. A narrowing down of cash corn discounts indicate more settled conditions. With a readjustment in corn and wheat prices, oats will naturally follow, but we feel favorable toward buying on sharp breaks for moderate profits.—J. J. Badenoch Co.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Feb. 14, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	530	676	461	325	403	319
Prev. wk.	457	391	311	227	195	781
1924.....	349	399	366	300	464	546
1924-25...	30,177	19,360	7,543	4,388	13,019	12,972
1923-24...	27,629	13,040	6,491	4,579	17,942	8,559
1922-23...	27,716	23,213	7,517	6,107	19,709	4,776

Timothy—Unchanged. Fair country run \$5.60@5.85 per 100 lbs.; good country run about \$6.00@6.15 and high grades at \$6.40@6.50.

Alfalfa Seed—Steady. Recleaned country lots \$21.00@23.00 per 100 lbs.

Clover Seed—Lower. No country seed offered. Country lots \$24.00@26.75 for 100 lbs., good \$27.25@28.25, choice \$28.75@29.75; fancy \$30.00@31.00 and Mammoth \$28.00@32.00.

Alsike—Steady. Average country lots \$20.25@21.00 per 100 lbs. Fair seed \$16.25@17.25 and poor at \$11.50@13.50.

Field and Grass Seeds

LOCKHART, TEX.—Antone Seed company, with capital stock of \$5,000, has been organized.

TWIN FALLS, IDAHO—Rogers Bros. Seed company has opened a new branch seed handling plant here.

LOS ANGELES, CAL.—An addition of 120 feet to the warehouse of the Los Angeles Seed company has been completed.

LOS ANGELES, CAL.—The California department of agriculture has proposed establishing a seed testing laboratory here for the convenience of southern California seed dealers, who now have to ship samples some 600 miles to Sacramento for testing. It is suggested that the branch laboratory could be supported by a special tax levied against the seed merchants.

ST. LOUIS SEED MARKET.

Quote timothy—bright clean seed at \$6.25, average country lots \$5.75 to \$6; low-grade and dark at \$2 to \$4.50; clover—fairly clean seed at \$27 to \$28 (high grade clean seed worth \$30); slightly weedy at \$24 to \$25; heavily weedy, \$12 to \$23; screenings and tailings, less; alsike at \$15 to \$20; alfalfa at \$16 to \$20; red-top at \$10 to \$11.50 for clean seed—chaffy at \$4 to \$8.50; German millet at \$3 to \$3.25; common millet at \$2.15 to \$2.25; hog millet at \$2.60 and early fortune at \$2.70 bulk basis.

Stock Peas—Quote nominally: sound whippoorwill at \$3.75 and mixed and new era at \$3.25 per bu.; yellow soy beans at \$1.85 and black at \$2.75.

KANSAS CITY SEED MARKET.

KANSAS CITY, Feb. 14.—The recent downward trend of grain prices has been reflected slightly in the seed market, with cane seed showing the principal effect. However, there was not as much recession this week as last. Dealers reported fewer offerings of cane from the country, but were still of the opinion that a large surplus remains to be threshed and marketed. Demand was fair and scattered well over the northern, eastern and southern states. Prices received by dealers for cleaned and sacked seed varied so much that nobody was willing to make quotations for publication. Bids to the country for carlots, per cwt., were: Red top, \$1.50@1.60; orange, \$1.50@1.60; black amber, \$1.40@1.50. Millet seed was in good request, with country offerings small. As from first hands, German was quoted a shade lower, at \$3.50@4 per cwt.; common, \$2.50@3; Siberian, \$2.30@2.75; hog, \$2@2.25. The Sudan market was quiet. Dealers paid \$3.50@4.25 for country-run seed.

Normal February interest was reported in the standard grass seeds, which are being sold at the following prices by local houses: Blue grass, per cwt., sacked, \$17@28; timothy, \$6@7; red clover, \$20@34; sweet clover, \$9@13; alfalfa, \$15@22; cow peas, per bus., \$4@5. Prices being paid to farmers for soy beans range from \$2.50@2.75 a bushel for Virginia to \$1.65@1.75 for Morse and Midwest yellow.

TOLEDO SEED MARKET.

TOLEDO, O., Feb. 16.—Clover seed was weaker this week due to increased selling pressure and hedges against the cash seed. Buying power was limited and trade throughout the week was light. Deliveries on February contracts were heavy and went into strong hands. Dealers report a falling off in the cash demand and inquiries lighter. Spring-like weather is needed to stimulate the cash trade and cause removal of hedges. The present market is entirely dependent upon the demand for

cash clover. If it is heavy and prolonged stocks will quickly fade away and cause an advance. Should it be disappointing clover might decline very rapidly. Prospects are for the usual trade lasting until well into April. Some Eastern dealers have been after seed this week and this may be the forerunner of a large trade. Commission houses were sellers this week some of the sales being for foreign accounts. Investment buying has been light but should show an increase as soon as the country starts to buy. October, the new crop future, is not receiving much attention at present but will become active as soon as crop reports are available.

Timothy and alsike were firm to lower with a light trade in both. Some cash demand for timothy is appearing and prices are steady. March timothy is thought to be cheap compared with other seeds and could easily work higher. Alsike is awaiting some cash trade to make a more active market.

DULUTH FLAXSEED MARKET.

DULUTH, Feb. 14.—Longs in the flaxseed market experienced a trying period during the last week. Prices ran off sharply under persistent selling pressure and lack of support from any quarter up till Saturday. On the net result of the five days' operations spot and February flax declined 7½ cents and the March, May and July futures from 5½ to 6½ cents. A reversal of form came on Saturday when prices gained 6 cents following strength at Winnipeg.

A bearish influence in the market came in the weak spot situation with heavy supplies in hand at Duluth, Minneapolis, Winnipeg and in interior elevators over the Canadian West. Current receipts at Minneapolis were ahead of crushers' requirements and considerable seed was offered to arrive. Receipts at Duluth were light, aggregating 38,775 bushels in the week and shipments amounted to 79,950,000 bushels, leaving stocks of 778,000 bushels in the elevators.

Specialists in the flaxseed trade claimed that the market appeared to be largely in the hands of speculators who had been attracted by predictions of \$3.50 seed and the argument that wide possibilities were offered in the prospective heavy domestic consumption by paint makers and purchases by the railroads of paints to carry through improvements that had been deferred while the systems were recovering from the effects of the war unsettlement.

Against that argument stress was laid, by the more conservative crowd, upon the recent heavy importations of Argentine seed and the probability that Eastern linseed crushers would supply themselves from that quarter to a great extent owing to the spreads between the markets being such that the imported seed is the cheaper.

Under that condition crushers have deemed it prudent to go slow as regards increasing their holdings, claiming that Western linseed oil manufacturers would be unable to absorb more than half of the stocks of flaxseed in hand and in sight up this way. Many of the buyers have therefore announced themselves as out of the market until the situation clears up, and they are able to get a better line upon where they stand.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year, were:

	Saturday.	Wk. ago.	Yr. ago.
Spot ...	\$2.98½-01½	\$3.06½-09¼	\$2.60½-64¼
To arr.	2.98½	3.06½	2.60½
Feb. ...	2.98½	2.06½	2.60½
March ...	2.99½	3.07
May ...	3.01	3.07	2.59½
July ...	2.99	3.04½	2.56½

Ed. F. Mangelsdorf & Bro.
First and Victor Sts. St. Louis, MO.**GROW MORE FLAXSEED.**

Prof. Arny of the Minnesota University farm believes that farmers of Minnesota should plan to grow more flax this year, either by increasing the acreage or by increasing the yield per acre on the present acreage. In discussing the outlook for the 1925 flax crop, he says:

"The United States produced in 1924 a record flax crop of 30,173,000 bushels on 3,289,000 acres, an average yield of 9.2 bushels. Deducting 3,000,000 bushels needed for sowing the 1925 crop, 27,000,000 bushels will be available for the crushers up to the time the next crop begins to move into the markets.

"The number of bushels of flaxseed used by crushers for the crop years 1921 to 1923 inclusive, with the estimated needs in 1924 and 1925, are as follows: 1921, 32,780,912 bushels; 1922, 35,746,405 bushels; 1923, 37,744,944 bushels; 1924 (estimated), 38,000,000 bushels; 1925 (estimated), 40,000,000 bushels.

"Thus, although the 1924 crop in the United States was the largest in history, it was more than 10,000,000 bushels short of supplying the domestic needs. With careful estimates of the needs for crushing purposes up to Sept. 30, 1926, at approximately 38,000,000 to 40,000,000 bushels, it is very evident that with the 1925 crop in the United States as large as the 1924 crop, or from 5,000,000 to 10,000,000 bushels larger, it will still be necessary to import several million bushels to meet the needs of the crushers."

MARKET 300,000 BUSHELS FLAX.

PIERRE, S. D.—Onida claims to have been the largest primary market for flax in the state this year. It is estimated that fully 300,000 bushels of flax was marketed this year and the average price ranged around \$2 a bushel.

GROWS 500,000 GRAINS FROM ONE WHEAT SEED.

Paris.—Making 500,000 grains of wheat grow from one in a year and a half was cited in debate of the Chamber of Deputies on agriculture recently as a laboratory accomplishment.

This scientific achievement was used by Deputy Compré-Moral to show how valuable science could be to the farmer.

France has a back-to-the-farm movement. Before the war more than half the population was rural, it was shown by various speakers, and now only a third of the people cultivate the soil. And meantime the wheat shortage is worrying economists and politicians for the reason that bread, the standard of the Frenchman for the cost of living, goes up in price constantly.

In comparing practice with possibility, M. Compré-Moral said the farmer, on an average, grew only 25 grains of wheat from one.

43rd and Robey Sts., Chicago, Ill.**Engineering Council Meets.**

The engineering council of the mill and elevator mutual insurance companies met for a two-day session in Chicago recently. The conference was held in the offices of the Mutual Fire Prevention Bureau and the range of discussion was broad, covering such angles of our trade as cob spouting, etc.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., Feb. 14.—The past week witnessed a fairly good demand for flax from crushing interests. Good quality seed was in good request at all times, but the poor stuff was a little inclined to be draggy during mid-week. Today's closing figures shows: No. 1, 3c under to 1c over May on track and 4c under to 1c over on the to arrive. Local stocks were 411,357 bu. vs. 410,623 last week and 353,267 a year ago.

NEW FEED BUSINESS.

Berend J. Burns, Inc., is the new firm name of an old established grain and feed merchant in this market. Mr. Burns has been prominently identified with the Buffalo trade for years, latterly with the Globe Elevator Co. He has continued to specialize in grain and feed ingredients and also handles a general line of jobbing trade.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Feb. 7, 1925 (000 omitted):

Articles and countries.	Week ending Feb. 7, 1925.	Feb. 9, 1925.	July 1, 1924, to Feb. 7, 1925.

Feedstuffs

J. M. Mott, Blytheville, Ark., has in-
stalled machinery for manufacturing
meal.

The Hall Feed & Produce Co. was re-
cently organized at Jackson, Miss., with
a capital of \$25,000.

The Sanner feed mill at Newton,
Kansas, is now in operation and is put-
ting out a complete line of dry mixed
feeds.

Applications to sell feeds in Oklaho-
ma have been made by the Washburn
Crosby Co., of Kansas City, and the
Middle States Milling Co., of Spring-
field, Mo.

The Woodstock Mills, Seymour, Ind.,
has been remodeled by the Blish Mill-
ing Co., as a plant to manufacture live
stock and chick feeds, all new ma-
chinery units being electrically operated.
Operations have begun.

Through recently added capacity, the
Pinnacle Mills, formerly known as the
Morristown Flour Mills, of Morristown,
Tenn., now has a daily capacity of 30
cars of flour, feed and corn meal, all of
which are put out under the brand
"Pinnacle."

An exceedingly valuable and attrac-
tive booklet, "Poultry Profits," has just
been put out by the Albert Dickinson
Co., of Chicago. A number of colored
plates and many photographs aid mate-
rially in telling the story of breeds,
culling, reproduction, feeding, housing,
diseases, etc.

The second unit of the Nicholson mill
at Henderson, Ky., has been started and
a third one is to be added at once. This
plant is manufacturing cereal
foods and as soon as the new buildings
have been completed will begin the
manufacture of horse, cattle, chicken
and hog feeds, with a daily output of 3
carloads.

The Miller-Rhodes Feed Mfg. Co. has
recently incorporated at McPherson,
Kan., with about fifteen stockholders.
Officers are: Pres. Lee Miller; Vice-
Pres. N. S. Rhodes; Sec'y-Treas. F. E.
Marchand; Plant manager, M. L. Mil-
ler. In connection with the Miller
Grain Co. elevator, a plant has been
built, containing two grinders, one a
new process mill, a mixer and a sifter,
which are operating steadily, turning
out daily five tons of six different
feeds.

NEW YORK, Feb. 14.—Both city and
western feeds were lower during the
week and there were reports of impor-
tant concessions being obtained by buy-
ers in purchases of distress stuff. Gen-
erally, trade was quiet.

City bran was quoted at \$34; mid-
dlings, \$37, and red dog, \$47, while west-
ern bran ruled at \$34.60; middlings,
\$38, and red dog, \$47.50 to \$48.50 per
ton.

COTTON SEED MEAL

KANSAS CITY, Feb. 14.—Weakness in
corn and millfeeds is reflected in the
cotton seed meal market. Trade has
dwindled and dealers call it dull. Fur-
ther recession is expected this month,
but a revival of buying is looked for
in March. Offerings are not heavy, ex-
cept from Arkansas. A few mills in
Texas have ground up their seed and
closed for the season. Next month the
Oklahoma and Arkansas mills will be-
gin to close. Prices asked by mills this

week were \$1 a ton lower. Texas of-
fered carlots at \$36; Oklahoma, \$38;
Arkansas, \$36.50@37.50. The Kansas
City carlot price was \$43 and ton lots
were held at \$47.

Linseed meal, also, exhibited further
weakness. While Minneapolis mill
asked \$46.50 a ton for carlots, resellers
made a price of \$45.75. Kansas City
brokers quoted meal in carlots at \$50
and ton lots at \$54. Demand was light.

In the case of tankage the manufac-
turers and distributors said new sales
were small. It appears that hog feeders
loaded up before the recent advance of
\$5 a ton and have not used up their
stocks. The carlot price, per ton, is
\$65. Ton lots are selling at \$70. Meat
scrap, for poultry, is unchanged, at \$70
and \$75, according to quantity. Trade
is only fair.

WEEKLY LINSEED REVIEW.

NEW YORK, Feb. 16.—United Kingdom:
The linseed situation in the United
Kingdom during the past week remained
generally quiet. The demand appeared
flat and there was only a limited busi-
ness passing. Crushers are holding
back.

Linseed oil declined in sympathy with
linseed and there were freer Continental
offers in evidence, but the market closed
steady.

Cotton oil was inactive and lower dur-
ing the week.

India: Shipments of linseed this week
amount to 112,000 bushels, compared
with 180,000 bushels last week. Strong
dry winds are reported in sections, but
generally the crop outlook is considered
satisfactory.

Argentina: Markets for linseed in
this country were nervous and irregu-
lar during the week, but closed steadier.
Clearances are gradually increasing.
Port stocks, however, still remain un-
changed at 2,400,000 bushels. There has
been moderate absorption of seed by
export interests. America received a
good proportion of this week's ship-
ments of linseed.

SOY BEANS FOR DAIRY ANI- MALS.

Soy beans make a valuable addition
to the feeds suitable for dairy cows,
finds C. H. Eckles, chief of the dairy
division at the University of Minnesota.
Feeding trials conducted at the uni-
versity farm last year showed ground
soy beans to be equal to linseed oil
meal in feeding value. The ration, for
cows milking up to 45 pounds daily
consisted of alfalfa hay, corn silage,
ground corn, barley, oats and ground
soy beans. Soy beans carry 33 per cent
protein compared with 30 per cent in
linseed oilmeal.

Soy bean hay proved a close second
to alfalfa. The ration, when soy bean
hay was used, consisted of soy bean
hay, silage, ground corn, barley and
oats. The beans were cut when slight-
ly more mature than usual for hay pur-
poses. While the beans make good
silage, Eckles thinks it better to make

them into hay. When used for silage, the general practice is to mix one load of beans with two of corn.

Soy bean hay is very palatable and carries a high percentage of mineral matter; one pound having practically the same amount as is found in 100 pounds of corn. Although the hay may seem rather coarse, cows eat it with relish and the coarse stems are usually cleaned up. In chemical composition, it ranks fully equal to alfalfa and carries digestible protein in quantities almost equal to wheat bran.

CHAPIN & CO. CHANGES.

Robert W. Chapin, who has been president and active head of Chapin & Company since the company has been engaged in the manufacture of mixed feed, has retired from the active management of the company. He retains his interest in the company and his place on the board of directors.

Chester W. Chapin, formerly secretary in charge of buying, is now vice-president and general manager in charge of sales, and Roy Hall, formerly treasurer, is now secretary-treasurer.

He is succeeded as president by Geo. M. Chapin, who has been the vice-president of the company for the past several years.

LIME IN POULTRY RATION.

The value of lime in the poultry ration is so generally recognized that it is hardly necessary to emphasize the advantages. There are a number of sources from which the lime element may be obtained, however, most of which have a great deal of merit, but there are some that have qualities which the others do not have. Pearl Grit, made by the Ohio Marble Co., 187 Ash street, Piqua, Ohio, in addition to supplying the calcium carbonate requirements also serve the purpose of a digestive grit, so essential to the proper utilization of feed given poultry.

VITAMINS IN MOLASSES.

Special interest surrounds a paper published in the February issue of the *Journal of Industrial & Engineering Chemistry* on vitamins in molasses. Feed trade superintendents and chemists will be well repaid covering the paper thoroughly if they have not already done so. The matter is of special interest now in view of the critical molasses situation, and the discussion mentioned treats in an authoritative manner of the vitamins in cane molasses, their necessity and value, and the fact that such vitamins are not found in best molasses.

THE FEED MARKETS.

BALTIMORE.

Baltimore, Feb. 14.—The general wheat feed situation is lower and dull, cheaper offers of feed "to arrive" having made the trade indifferent about stocking up at present spot prices. Hominy feed also easier. Although prices on gluten feed have recently declined \$2 per ton, the movement of this line is slow. Alfalfa meal steady as heretofore quoted. Dried beet pulp unchanged. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$34.50@35; Western middlings, per ton, 100-lb. sacks, \$36.50@37; city mills middlings, per ton, 100-lb. sacks, \$40@41; hominy feed, per ton, \$51@52; gluten feed, per ton, \$44@45; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38@40.

MILWAUKEE.

Milwaukee, Feb. 14.—Prices on bran and middlings crashed downward \$2@5 in the Milwaukee market during the past week and the feeds are now selling at but little more than half the peak prices of the season. There was practically no demand for millfeeds at any price and for the first time this year selling pressure was in evidence in the market. Some of the local dealers are now predicting that the bottom has been reached and after a slight pause at the present level the market will begin to show renewed strength. Current quotations are: Winter bran, \$25@26; spring bran, \$26@26.50; standard middlings, \$27@27.50; flour middlings, \$31.50@33; red dog, \$33@39; rye feed, \$26.50@27; linseed oil meal, \$46@47.50; cottonseed meal, \$39@43.50; hominy feed, \$43@44; reground oat feed, \$11@12; gluten feed, 30 days, \$35.80; in 100-lb. sacks, carlots, f. o. b. Milwaukee.

DULUTH.

Duluth, Feb. 14.—Breaks extending all the way from \$2.50@7 were set in the feeds market during the last week. Ground oats suffered the worst, breaking \$6 in one day. Ground feeds were the weakest items. Weakness in feeds was prompted by an accumulating of supplies and limited buying by jobbers. Closing prices per ton follow: Bran, \$26; shorts, \$28; red dog, \$39.50; Boston mixed, \$28.50; flour middlings, \$35; ground oats, \$30; No. 1 ground feed, \$40; No. 2 ground feed, \$37.75; No. 3 ground feed, \$35; cracked corn, \$45; coarse corn meal, \$45.

PHILADELPHIA.

Philadelphia, Feb. 13.—Feedstuffs are dull and prices are weak and very unsettled, with increased pressure to realize. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$34.50; winter middlings, \$36.20; spring bran, Western shipment, \$32; standard wheat middlings, W. S., \$33.50; flour middlings, W. S., \$41.50; red dog, W. S., \$44.50; low grade flour, W. S., \$59@60; rye middlings, W. S., \$39; reground oats feed, \$16; fine yellow hominy, W. S., \$47; fine white hominy, W. S., \$48; cottonseed meal, 36% protein, W. S., \$42.50@43; cottonseed meal, 41% protein, W. S., \$44@44.50.

MEMPHIS.

Memphis, Feb. 14.—Millfeed had gone to pieces badly during the week, due to very limited demand and to accumulated stocks, much of the latter on track and with accumulating demurrage. Wheat bran sold here Friday as low as \$25, but gray shorts were still held at \$32 and \$32.50. Mills have been asking for bids, but the lowest prices result from distressed offerings. Alfalfa meal is very quiet, but price holds up fairly well. No. 1 being quotable at \$28.50@29.50. Cottonseed meal continues easy and has declined some. Track 36 per cent quotable at \$33.50 and 41 per cent at \$35.75@36 and 43 at \$37.75@38, while loose hulls are slow at \$7.50. Other millfeeds have also weakened appreciably.

CINCINNATI.

Cincinnati, Feb. 14.—The dullness of the millfeed market reported for the past two weeks became more pronounced and further reductions of \$3 for bran and standards and \$1.50 per ton for soft and hard middlings were recorded at the close of the week. The inability of receivers to dispose of the arrivals, causing some congestion of tracks, and the reports of dealers that they had no sale for present stocks created an unusual situation, which the sharply lower prices failed to improve. Dairy interests remained practically out of the market and there was little or no demand from other sources. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$29.50@30; hard winter wheat bran, \$29@29.50; standard middlings, \$33@33.50; soft wheat middlings, \$36.50@37; gray hard middlings, \$36@36.50; mixed feed, \$33.50@34; No. 1 alfalfa meal, \$30; hominy feed, \$46@46.50.

MINNEAPOLIS.

Minneapolis, Feb. 14.—The Local feed market has been a weird affair during the past week. Local mills claim to be able to place a good part of their offerings in mixed car lots at fair prices but country mills are putting a heavy load on the market by offering both track and transit stuff at figures way below local asking prices. Then too, Buffalo has been offering feed at a figure delivered Boston, which makes it almost impossible for any consistent amount of feed to be worked out of this market. The situation was very weak and unsettled all through the week until today, when for some miraculous reason it firmed up and local jobbers were asking \$24 for standard bran, \$24.50 for pure; \$25.50@26 for shorts; \$29.50@31 for flour midds and \$40@41 for red dog.

Oil meal, while quoted nominally unchanged, is showing little life. Local crushers say that they are well sold ahead but re-sellers seem to be willing to offer more or less freely on the basis of present quotations or lower.

Weekly shipments show the following figures: Millfeed, this week, 11,463 tons vs. 14,704 last week and 13,943 a year ago; oil meal, 5,381,918 lbs. this week vs. 7,476,715 last week and 3,508,860 a year ago.

FEED STUFF SITUATION.

Outside of spasmodic spurts of showing a little strength, feed stuffs, insofar as price is concerned, are really unchanged from a week ago and from the buyer's standpoint, sentimentally, the market is virtually weaker, although from the standpoint of production there are many phases that are potentially stronger. Nevertheless, the demand in all probability will govern prices on feed stuffs for the balance of the first

six months of 1925 regardless of the production.

MINNEAPOLIS.—Bran, \$23.50; standard middlings, \$25; flour middlings, \$29 to \$30; red dog, \$37 to \$39.

CHICAGO.—Bran, \$26.10; standard middlings, \$27.60; flour middlings, \$31.60 to \$32.60; red dog, \$39.60 to \$41.60.

KANSAS CITY.—Bran, \$22.75; gray shorts, \$29.

St. Louis.—Bran, \$25.15; gray shorts, \$31.40.

Alfalfa Meal.

The demand equal to the supply, although the production is not heavy at this time. There is no particular selling pressure outside of a few scattered cars here and there. Nominally quoted second-hand bag basis, choice, \$28.50; No. 1, \$27.50; No. 2, \$24.50. Fine ground grades, \$3 to \$4 per ton more. In new bags, 50c additional for all grades.

REGROUND OAT FEED.—The supply is in excess of the demand. Much more selling pressure. Prices are lower. For immediate prompt 30-day shipment, mills are discounting very much under a week ago. Nominally quoted reground, \$10 to \$10.50; unground, \$11 to \$11.50.

HOMINY FEED.—The supply in excess of the demand. Not sufficient trading in hominy feed to establish a market. Nominally quoted white sack basis, \$41; yellow, \$39.50. In bulk where available, \$1 to \$2 a ton less.

LINSEED OIL MEAL.—This commodity is also marking time with very little demand. Slightly easier feeling with possibilities of lower prices unless demand develops. Some meal purchased in excess of users' requirements offered on the market. Nominally quoted sack basis, \$44.50; in bulk, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory. Quotations are as follows: Creamery in carlots at 6½¢ per lb. and L. C. L. up to 7½¢.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop with resulting heavy production of seed and surplus stocks are the main influences in the market. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Eastern demand is still light, but the drop in prices should stimulate buying. Other sections of the country, however, report a better business. Mixed feed manufacturers have not ordered beyond February shipment, and are only taking the product as it is required. Quotations follow: Gluten feed in bulk \$30 a ton, sacked \$32.80, gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is improving and at the lowered prices all packers' products are expected to move in increasing volume. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35@50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

Much wheat is being reseeded due to poor winter conditions in the State of Washington. It is stated that the cost in one county will exceed a half a million dollars.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Feb. 14.—Quoting unchanged prices again this week, alfalfa meal manufacturers asserted that trade continued good. The largest local concern reported its output well sold up to Apr. 1, with some bookings running into May. In view of weakness in grains and hay, the possibility of a temporary check in demand for meal was admitted. The Colorado mills advised that their output was sold ahead. Kansas City prices of carlots, per ton, were quoted as follows: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22.50@23; No. 3, \$22@22.50.

Thus far the slumping of grain and millfeeds has not materially reduced sales of molasses-grain feeds, though manufacturers are fearful of such a result. Good sales of horse, dairy and poultry feeds were reported this week. There was some irregularity in prices. Dairy feeds were 50c to \$2 a ton lower and cattle feeds were unchanged to \$2 up. Hog feeds were quoted \$1.50 to \$3 higher. Horse and mule feeds were 50c higher to \$1 lower. Scratch poultry feeds fell \$1@1.50. Carlot prices, per ton, were given as follows: Dairy feeds, \$37@48; cattle feeds, \$39@46; hog feeds, \$48@55; pig meal, \$73; horse and mule feeds, \$34@47, alfalfa-molasses feeds, \$26.50@34; scratch poultry feeds, \$51@57.50; mash poultry feeds, \$54@81.

ALFALFA IN IOWA.

From all indications Jackson county, Iowa, farmers, will sow an immense acreage of alfalfa this spring. With high priced red clover seed and some difficulty in securing a good stand there is an increasing tendency to give alfalfa a trial. Inquiries at the Farm Bureau office concerning the crop are of almost daily occurrence.

Past experience has proven that not all varieties are adapted to this section of the county. Northern grown seed, and especially strains like the Grimm and South Dakota No. 12 have given excellent results in this county. Seed from non-irrigated districts has also given better results than that raised in irrigated sections. The best grade of seed that can be secured will probably prove the cheapest in the end, oftentimes making the difference between a good and a poor stand of the crop.

The cost of sowing an acre of alfalfa is an item in which every prospective grower is interested. Aside from the labor involved, the actual money outlay will figure about as follows:

Limestone—2 tons per acre at \$2.00 per ton.....	\$4.00
Alfalfa seed—15 pounds per acre at 15c per lb.....	4.50
Inoculating material per acre.....	.15
Total	\$8.65

The above costs should, of course, only be taken as approximate. Some fields need very little limestone, others may require up to 4 or 5 tons per acre. Limestone also varies in price in different localities, but an average cost of nine dollars per acre, money outlay, is probably not far off.

MORE ALFALFA ADVISED.

KANSAS CITY, Feb. 14.—Alfalfa acreage in Kansas must be restored to the pre-war area, which was the greatest in the United States. So argued J. C. Mohler, secretary of the Kansas State Board of Agriculture, before the Kansas Crop Improvement Association, in Manhattan, recently.

"Alfalfa is the most valuable crop that can be grown in Kansas," continued Mr. Mohler. "Yet we are losing his legume from our fields at the rate of 49,000 acres a year. In the last de-

cade the total decrease has been 486,000 acres. In 1915 we had 1,360,000 acres; today we have 884,000. The reduction is attributable to the war demand for bread grains, the collapse of the beef industry, the weather, the insects, the shortage of labor and the reduction of lime and phosphorus elements in the soil. Old fields were allowed to stand too long, becoming weakened.

"The foresighted farmer will resume planting alfalfa. Every farm should include a moderate acreage of this perennial."

ALFALFA IN BLUEGRASS STATE.

With a view to eliminating some of central Kentucky's big feed bill and at the same time building up the soil, and incidentally stimulating stockraising, the College of Agriculture is planning an intensive campaign to encourage alfalfa growing in 18 central counties in the state.

In spite of the fact that alfalfa thrives, and often sells for \$20 to \$30 a ton, there are less than 5,000 acres in the bluegrass section. Five years ago, census figures show that these 18 counties were spending \$3,500,000 annually for stock feed, most of which could have been supplied through alfalfa. In addition, \$300,000 annually was being spent for fertilizers to maintain and build up the soil.

Enough alfalfa is being grown in the state to prove its adaptability to Kentucky soil and climate conditions. On the Experiment Farm, near Lexington, the yield has averaged 5 tons to the acre for several years. Sold at the high time almost any winter, the crop would have cashed for \$100 and \$150 an acre.

ALFALFA IN NEW MEXICO.

The alfalfa hay situation is unique. In ten years we have never seen grain and other feed stuffs so high and hay declining as it has within the past two weeks. It appears to us to be the result of too much storage hay being offered at once and we are of the opinion that inside of a month the market will stiffen considerably. We are led to this opinion from the fact that there is not any more stored hay than usual, that more than the normal quantities will be used locally or within our state on account of large cotton acreage being prepared, and that our largest hay consuming section is just now beginning to use hay in large quantities for their spring work. Then there is just now a supply of timothy hay going on to the markets that usually take our alfalfa hay, which will soon cease and cause buyers to look in alfalfa direction again.

Choice is selling around \$22.50, No. 1 \$21, standard, \$19, f. o. b. cars here. However, there seems to be a greater difference of prices from different localities than usual and the market is unsettled.—Artesia Alfalfa Growers' Association, W. R. Hornbaker, Mgr., Artesia, N. M.

FEED MARKET OFF.

KANSAS CITY, Feb. 14.—The feed decline we have had the last ten days has been very sensational, when you stop to consider that last year at this time our wheat mixtures were costing 35 cents a barrel less than this year and feed at the same period was selling for \$4 to \$5 a ton over what we are able to get now. In our estimation, there will be a reaction soon and the market will start to advance in a much similar fashion as the recent declines we have had.

It has been reported that interior Kansas mills are offering immediate shipment bran as low as \$22 and fancy gray shorts at \$27.50 to \$28. Most mills in this territory are in bad shape, more

or less of them having track supplies, and that in itself has a very depressing effect upon the market. We are asking for pure bran \$23 per ton; gray shorts, \$28, and red dog \$41, and sales are very hard to make at this basis.—The Kansas Flour Mills Co., D. C. Cunningham, Dist. Sales Mgr.

PROTEST MISSOURI FEED BILL.

A feed bill now before the Missouri legislature provides a tax of 10c a ton on all feeds sold within the state excepting poultry feeds. On poultry feeds the bill proposed a tax of \$1 a year per brand.

The bill, known as House Bill No. 483 and Senate Bill No. 241, should be protested, according to the Southwestern Millers' League in a bulletin which discusses it.

At present no charge is made for feed registrations in Missouri. The tax of 10c a ton proposed, excepting poultry feeds, would make the bill a revenue measure at the expense of consumers of feed.

"Consumers," it points out, "should not be taxed beyond the amount necessary to properly administer the law. All feeds should be taxed alike either on a ton basis or by brands. A tax of 10c per ton will produce a revenue double the amount necessary to conduct the feed department. This has been demonstrated in Kansas and Oklahoma. A bill now pending in the Kansas legislature provides for a reduction in the fee to 10c a ton."

Missouri millers and feed interests should wire the state senator and representative of their districts protesting the bill as now framed and urging that it be amended to provide a tax fee of 5c a ton. Also provision should be made for taxing all feeds alike. Those wiring protests are advised to follow up these communications with letters of explanation.

NEW PATENT.

Patent No. 1524909 was issued Feb. 3 to William P. Buchan of Minneapolis on a grain separator. His long, practical trade experience has been worked into the improvement covered by the patent.

RELIABLE STANDARD INCUBATOR

50 to 1100 Eggs

Both Hot Air and Hot Water Heating Systems Used

Automatic Ventilation, Moisture and Heating Regulation. RELIABLE dealers find the Reliable Incubators most satisfactory and profitable to sell for several reasons: 1: Our complete line of various sizes, both heating systems, to meet every need. 2: Best materials, construction and workmanship. 3: Ease of operation and possessing every convenience of modern incubation. 4: Maintains a positive uniformity of temperature with a constant even circulation of pure, fresh air. 5: Correct heating and hatching temperature and moisture in all climates. 6: Double enclosure heating system utilizes heat from lamp in two ways—an absolute guarantee against sudden chills. 7: Has an abundant nursery space.

Various Sizes The Best Yet

RELIABLE Standard Blue Flame Hover

The Leader of them all. A wickless, oil heated Colony Hover. 1925 pattern made to meet every demand of poultrymen—large or small. Fully explained in the Reliable Sales book. An unusual seller.

RELIABLE Standard Coal Burner Colony Brooder

Brooder Stove

using our own brooder stove with improved feed pouch, increasing coal capacity. Burns both hard and soft coal with equal success. Accurate and dependable heating regulation. Self cleaning. No clogging. Self ventilating canopy, maintaining pure, fresh, warm air, insuring healthy chicks. The Dealer's Favorite.

Our RELIABLE Incubators, Brooders, Hovers, Poultry Appliances and Fixtures are backed by our positive guarantee.

44 years at it

GOOD DEALERS PROPOSITION.

Hay Department

OHIO HAY SITUATION.

In our opinion over 50 per cent of the hay from 1924 crop has been forwarded to the market and we find in our travels through the country that there is a great deal more hay being fed on the farms on account of shortage of corn fodder, so that the volume to be moved from now on would perhaps be reduced very materially.

The hay remaining to be shipped, we believe, is of the better quality, running No. 2 timothy and better, and also most of the heavy mixed and clover grades have been moved, there being very little of these grades remaining to be shipped.

While the demand for hay at the present writing is rather light, there seems to be sufficient orders to take care of immediate loading and we believe that prices now are as low as they will be for the balance of the season.—*The Irvin T. Fangboner Co., by Clayton W. Jenkins, Mgr. Hay & Grain Dept., Bellevue, Ohio.*

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Alfalfa hay coming from Wyoming is said to be of extra good quality.

While there is room for improvement in the demand for prairie hay, dealers report fair sales to the South and in other directions. Local stock yards interests are the best buyers, as usual.

Floyd Wilson, head of the Denver Al-

falfa Milling Co., was in Kansas City Tuesday. As an evidence that the Colorado mills have a good demand for meal, or had sold short, Mr. Wilson bought several thousand tons of meal from Kansas City mills.

Prior to the advance of 5c per 100 lbs. in freight rates to New Orleans territory, effective Feb. 12, dealers in that territory bought considerable amounts of timothy and alfalfa hay. A letter received by J. A. Brubaker & Co. from New Orleans says buyers are well supplied for the present.

A member of North & Co. expressed the belief this week that the Southeast had not bought alfalfa hay as freely during the winter as the lower Mississippi River territory. "I think there is a lot of buying to be done in Alabama, Florida, and Georgia," he said.

"There is so much alfalfa hay to move from Nebraska and other states," said N. C. Campbell one day this week, "that I don't see anything to stop it except low prices. The condition of hay arriving lately shows improvement, owing to drier weather. If farmers would hold their hay until March, I believe they could secure better prices. March usually is a good month for trade in alfalfa."

"In all of my experience in the hay business," said D. B. Tilson of Dyer & Co., Wednesday, "I never saw hay show the peculiar effects of frost that were shown during last month's run from Nebraska. Alfalfa was frozen. In some cases it was heavy with ice. In others the frost could not be detected by inspectors, but it showed when the hay

Receivers—Shippers
Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

reached the warm climate of the southern states. Complaints came from buyers all the way down to the Gulf and many adjustments were necessary."

With a loss on building and contents estimated at \$35,000, the warehouse of the Phil E. Drought Hay Co., Meyers avenue and Ewing street, Kansas City, Kan., was destroyed by fire Thursday night, Feb. 14. Office records were saved. The cause of the blaze has not been determined, as the fire had gained headway when discovered by a watchman. All kinds of hay were in the barn, but no figures on the stock have been given out. The warehouse had a capacity of 1,200 tons. Insurance covered both hay and plant. Rebuilding will begin immediately. A brick wall between the hay barn and the adjoining warehouse of the Miller-McConnel Grain Co. prevented any damage to the property of the grain concern.

HAY MARKET REVIEW.

The hay market ruled weaker during the week ending Feb. 14, states the Department of Agriculture in its weekly hay market review. Receipts were moderate but the demand was slack, as mild weather restricted consumption while dealers' stocks were large. Top grades were scarce and sold readily but low grades were not wanted and moved only at sharply reduced prices.

Timothy prices averaged \$4.50 lower than a year ago and only \$1.50 higher than two years ago when the heavy crop of 1922 was moving to market, while alfalfa prices have declined \$1.50 below the level of a year ago. Prairie is lower than at this time in either 1923 or 1924. Although the prairie crop was short the liberal offerings of fair quality timothy at low prices prevent a higher level for this hay. Farmers are pressing this year's bumper hay crop upon the markets more rapidly than it can be readily absorbed.

The timothy market held about steady. The Boston market continued draggy with receivers making confessions to move the ordinary and lower grades. Demand improved at New York and the market closed steady. Timothy was draggy at Cincinnati where receipts were heavy with a large percentage of medium and low grades. The Chicago market was firmer with light offerings.

Alfalfa was lower at most markets. Arrivals increased at Minneapolis and St. Paul and heavier offerings, largely low grade hay, caused lower prices at Omaha where prices of damaged hay declined more sharply than the higher grades. The demand at Kansas City improved slightly but the bulk of the hay arriving was in poor condition, while only good quality hay was wanted. Wet and damaged hay was hard to move even at heavy discounts. Mills and dairies were active buyers and the Southern demand was of a fair volume.

Trade in alfalfa in Southern markets was slow and prices declined slightly. The market at Atlanta was glutted with some cars running up demurrage charges. California markets were draggy, with dairies holding off on account of good pastures and low prices of dairy products.

Prairie was draggy at Chicago but was higher at St. Louis, and the Minneapolis and St. Paul markets held steady. Prairie declined at Omaha with liberal offerings of low grade and damaged prairie. Good quality prairie held steady at Kansas City with the stock yards in the market and local transfer and retail companies taking a few cars, while there was some demand from warehouses.

HAY MARKETS.

BALTIMORE.

Feb. 14.—Demand for hay is centered on the better grades of timothy and choice light clover mixed, of which sorts there is no surplus offering. Market firm on good hay. Low grade and inferior hay is dull and of uncertain value. Straw of all kinds holds its own in price under light receipts, small stocks and a fair jobbing demand. Quotations follow: Timothy—No. 2, \$20.50 @21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. Straw—No. 1 straight rye, \$19@20; No. 1 wheat, \$16@17; No. 1 oat, \$16@17.

NEW YORK.

Feb. 12.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons	633	17
Receipts last week	264	11
Receipts from Sept. 1	29,962	424

The range of values remains practically unchanged as the market closes, with the tone barely steady and the feeling a shade easier.

Demand during the week has been of sufficient volume to keep the moderate receipts well sold up at full quotations. Toward the close, however, trading has slackened, buyers apparently limiting their purchases to pressing needs.

Offerings at all terminal markets are light and consist of about an average assortment of qualities and sizes, with the exception of 33rd street, where the medium or small bales are in greater proportion at this writing.

Warmer weather has cleared the streets of snow and ice and trucking conditions are again normal.

Rye straw in light receipt and slow demand, with prices nominal.

New invoices light to moderate.

Federal grade quotations for large bales: Timothy—No. 1, \$26@27; No. 2, \$24@25; No. 3, \$21@22. Light clover mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Medium clover mixed—No. 1, \$21@22; No. 2, \$18@19. Light grass mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Heavy grass mixed, \$18@19. Rye straw, \$19@20.

KANSAS CITY.

Feb. 14.—Under fine weather conditions for baling and shipping the receipts of hay increased 52 cars this week to a total of 795. All varieties showed gains. A year ago 783 cars arrived.

Alfalfa offerings gained only 15 cars, but there were 566 in the receipts. The market was demoralized early in the week, with an inadequate demand, especially for hay showing winter stack damage. Prices broke \$1 to \$2 a ton. The upper grades then met fair buying, but poor quality hay continued draggy. The percentage of wet hay received was reduced.

Prairie arrivals were 166 cars. This total was 33 more than a week ago. Only the fair to good qualities were well taken and these were hammered down 50c a ton in some cases. There was a slightly better shipping demand and the stock yards people were buyers of kinds that suited requirements.

All other varieties of hay in the receipts aggregated 63 cars, or 4 in excess of the previous week's movement. Timothy led in volume. The market was quiet and steady, with no quotable price changes.

There was an increase of 9 cars in the straw receipts, which amounted to 13 cars. Sales on Tuesday showed an advance of 50c, but the closing nominal price range was the same as a week ago. Demand was fair.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$22.50@24; choice, \$20.50@22; No. 1, \$19@20; standard, \$15@18.50; No. 2, \$12.50@14.50; No. 3, \$8.50@12. Prairie—No. 1, \$10.50@12; No. 2, \$9.50@10; No. 3, \$7.50@9; packing, \$6@7. Timothy—No. 1, \$16@17; standard, \$15@15.50; No. 2, \$13.50@14.50; No. 3, \$12@13. Clover mixed—Light, \$16@16.50; No. 1, \$14.50@15.50; No. 2, \$12@14. Clover—No. 1, \$15@17; No. 2, \$11@14.50. Straw—Wheat, \$7@7.50.

TOLEDO.

Feb. 16.—The hay market continues dull, as it has been for several weeks. Receipts are light and shipments small. Dealers expect the trade to be below normal this year because of the large and excellent quality crop raised last season. Prices remain unchanged from the week before. Farmers may bring some hay to market before spring work starts in this section and this may bring lower prices. Prices per ton for the past week were: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13; No. 1 heavy clover mixed, \$12; No. 1 clear clover, \$12; No. 1 first cutting alfalfa, \$16; No. 1 second cutting alfalfa, \$22; No. 1 sound dry wheat straw, \$9; No. 1 sound dry oats straw, \$9.50; f. o. b. Toledo.

MEMPHIS.

Feb. 14.—Receipts of hay for the week were 106 cars, the largest of any week in months. The oversupply is such that naming of quotations is difficult, as demand is very light and warehouses and tracks are all full. They have been shaded once or twice during the week, but it is difficult to move anything because buyers are looking for further easiness. Quote: Timothy—No. 1, \$21.50; standard, \$20; No. 2, \$18.50@19. Alfalfa—Choice, \$28; No. 1, \$26; standard, \$23; No. 2, \$18.50@19.

PHILADELPHIA.

Feb. 14.—Trading in hay is light and with increased supplies the market is weak and lower. Qualities grading No. 2 timothy and better are scarce and wanted, but there were plenty of the lower grades that dragged slowly at inside quotations. Straw is in small supply and firm at the late advance. Hay (Federal grades): Timothy—No. 1, nominal; No. 2, \$20@21; No. 3, \$17@18; sample, \$10@12. Light clover mixed—No. 1, \$19@20; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$14@15. Heavy clover mixed—No. 1, \$16@17. Light grass mixed—No. 1, \$18@19. Straw—No. 1 straight rye, \$17@17.50; No. 2, \$15.50@16.50; wheat, \$17@17.50; oat, \$17@17.50.

PITTSBURGH, PA.

Feb. 14.—Receipts and shipments are again very moderate considering the season of the year; arrivals are much less than in February last year, when we failed to get the icy roads and snows of the usual winter.

Prices are better than they were two weeks ago and unless receipts very materially increase, values will not change for the worse during the short month of February.

The yards keep cleaned up for the most part and arrivals are moving at prices quoted, except that the clovers drag if the quality is poor; dairy hay to sell profitably must be greenly cured, with good milk producing qualities.

Hay receipts, 75 cars; straw receipts, 8 cars.

Quotations: Timothy—No. 1, \$20.50@21; standard, \$19@19.50; No. 2, \$16.50@17.50; No. 3, \$14@15. No. 1 L. C. mixed, \$17.50@18. No. 1 H. C. mixed, \$18.50@19. Clover mixed—No. 1, \$18.50@19; No. 2, \$13@15. Clover—No. 1, \$18@18.50; No. 2, \$12@15. Receipts of straw continue equal to the light demand. Mostly oat straw arriving. Better demand for good long wheat straw. Quotations: No. 1 wheat straw, \$12@12.50; No. 2, \$11.50@12; No. 1 oat straw, \$11.50@12; No. 2, \$11@11.50; No. 1 rye straw, \$13@13.50; No. 2, \$12@12.50.

DULUTH.

Feb. 14.—Trade was moderate in the hay market during the last week and was confined mostly to the better grades. The off-grades were not wanted to any extent. Prices are firm and unchanged per ton, as follows: Timothy—No. 1, \$16@17; No. 2, \$15. Mixed timothy—No. 1, \$14; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$11; No. 2, \$9. Straw—Rye, \$9; oat, \$8.50.

MILWAUKEE.

Feb. 14.—The Milwaukee hay market continued its merely nominal status during the past week. Predictions now are that little hay will move through the market all season. Dealers formerly were holding out for cold weather, but now with spring out a month off we have already had most of a month of warmth. Current quotations are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 1 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

Minneapolis.

Feb. 14.—Receipts locally showed some decrease, although those of the markets further south showed a slight increase for the week. The thaw during the week to some extent retarded the movement by putting country roads in poor condition, but the warmer weather also to some extent decreased consumption. Top grades are in lighter supply and advanced for the week, but prairie hay was rather quiet.

Timothy, No. 1, \$17; No. 2, \$16. Mixed, different grasses, No. 1, \$16; No. 2, \$15. Clover, mixed, No. 1, \$15.50; No. 2, \$12.50. Upland, No. 1, \$16; No. 2, \$15. Midland, No. 1, \$13; No. 2, \$11. Packing hay, \$9. Straw, Rye, \$8.50; oat, \$8.50; wheat, \$8. Alfalfa, No. 1, \$22; Standard, \$18; No. 2, \$15. Receipts of hay today, 16 cars.

Portland, Ore.

Feb. 11.—Buying prices, f.o.b. Portland: Alfalfa, \$19.50@20 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$16.50@17.50; oat, \$19@20; oat and etch hay, \$18.50@19.50; straw, \$7.50@8.

Cincinnati.

Feb. 14.—The demand for hay hardly qualified the supply during the week, and as a result the market weakened and slightly lower prices were recorded for virtually the entire list. Buying seemed more conservative with an object of securing only hay of good quality, as dealers and consumers generally appeared well supplied with low-grade stuff from the recent heavy receipts. The demand for Southern and interior shipment, however, was fairly active, but receipts, in spite of the lower

prices, continued surprisingly large indicating that farmers were anxious to dispose of the big country surplus because of the lateness of the season, and the uncertainty of future prices. Timothy and light mixed was in best demand, and heavy mixed, clover, alfalfa and straw sold slowly. The suspended trading on Lincoln's Birthday added to the track accumulation, but a good part of the supply consisted of cars to be shipped on orders and there was no congestion.

Timothy, No. 1, \$18@19; No. 2, \$16.50@17.50; No. 3, \$14@15; threshed, \$10@12; no grade, \$10@12. Clover, mixed, No. 1 heavy, \$16@16.50; No. 1 light, \$17@17.50; No. 1, \$16@17; No. 2, \$14@15; no grade, \$10@12. Clover, No. 1, \$17@18; No. 2, \$13.50@14.50; no grade, \$10@12. Alfalfa, No. 1 second cutting, \$21@22; No. 2, \$18@20; No. 1 first cutting, \$15@16; No. 2, \$13@15. Sound sample grassy hay, \$12@14. Straw, Wheat, \$10@11; Oat, \$8.50@9.50; Rye, \$13@14.

Omaha.

Feb. 12.—Prairie Hay: Receipts fair. Demand slow. Prices declining for lower grades. Care should be taken to keep snow and ice out of bales when baling. Considerable wet stuff arriving.

Alfalfa Hay: Receipts fair. Arrivals mostly fair and poor grades. Shipping demand light. Considerable alfalfa showing baled with snow and ice, and will not sell except at heavy discount. Market lower for off grades alfalfa.

Prices below are for carload lots. Upland Prairie, No. 1, \$11@12; No. 2, \$9@10; No. 3, \$7@8. Midland Prairie, No. 1, \$10@11; No. 2, \$8@9; No. 3, \$6.50@7.50. Lowland Prairie, No. 1, \$8@9; No. 2, \$6@7. Choice Alfalfa, \$19@20; No. 1, \$16@18; Standard, \$13@15; No. 2, \$11@12; No. 3, \$9.50@11. Straw, Oat, \$7.50@8; Wheat, \$7@7.50.

CHICAGO HAY NOTES.

The trade here is now asking for good timothy or good light mixed. Very little such hay here of late and some dealers are badly in need of some. Market undoubtedly due for an upturn, but only good hay should be shipped just now.—Albert Miller & Co.

No. 2 and better grades of hay in good demand, but we advise shippers to keep their poor hay off the market for the present. Prairie hay, both feeding and packing, is dull. Straw arrivals are light, but is moving slowly at prices which mean a loss to the shipper.—Walter Brothers.

Light receipts have brought improvement to the hay market, which is now cleaned up and country loading continues below normal. There is some inquiry for southwestern prairie and a fair inquiry for alfalfa as well as for rye straw, while oat and wheat straw are dull.—Bridge & Leonard.

The inquiry for all hay grading No. 2 or better has increased and the market is firm with an excellent call for No. 1 timothy. Heavy grass, clover mixed and all clover hay, however, is still hard to sell.—Van Wie & Moorhead.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

LATE FIRES.

MILWAUKEE, WIS.—Kneisler Bros. elevator burned. Approximately 320,000 bu. grain burned.

DENT, MINN.—An elevator of the Dent Elevator Company was slightly damaged by fire on Feb. 3.

KINGMAN, OHIO—A chokeup in an attrition mill in the elevator of H. W. Smith and Company resulted in a small loss recently.

SUGAR CREEK, OHIO — An overheated bearing on a receiving separator in the mill of the Sugar Creek Milling Company did slight damage on Feb. 5.

HINTON, OKLA.—Fire, which originated in the garage of the Zobisch Grain Company on Feb. 1 when coal oil became ignited by a lantern, communicated to an adjoining warehouse. The loss was small.

SHERMAN, TEX.—Fire started in the head house of the Diamond Mill and Elevator Company on Feb. 2. The motor and remaining contents were destroyed.

COMING CONVENTIONS.

Mar. 25-27. North Dakota Farmers' Grain Dealers' Assn., Bismarck, N. D.

May 6-8—American Feed Manufacturers' Ass'n, New Orleans, La., Roosevelt Hotel.

May 12-13.—Illinois Grain Dealers' Ass'n, Peoria, Ill.

May 21-22. Kansas Grain Dealers' Association, Wichita, Kans.

June 9-11.—Am. Seed Trade Ass'n, Los Angeles.

June 22 and 23.—Wholesale Grass Seed Dealers Ass'n, Drake Hotel, Chicago.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

CATTLE ON FEED JAN. 1.

"There were only about 82 per cent as many cattle on feed Jan. 1, 1925, as on the same date last year in the eleven corn belt states, according to the final winter feeding estimates of the Department of Agriculture. The number on feed in the states east of the Mississippi River was 87 per cent of last year, and in the states west of the river it was 81 per cent. In Iowa and Nebraska, which ordinarily feed about one-fifth each of the total cattle fed, the estimated numbers on feed as a per cent of the numbers a year ago were 74 and 82 respectively. The next most important states, Kansas and Illinois, show 90 and 88 per cent; Ohio and Indiana each show 80 per cent; South Dakota shows 65 per cent; and the three states of minor feeding operations, Wisconsin, Minnesota and Michigan, show 95 per cent each.

COTTON STATISTICS.

Creation of a joint commission of inquiry on cotton statistics to investigate the preparation of cotton statistics by the Census Bureau is proposed in a Senate joint resolution presented Tuesday by Senator Smith of South Carolina with the backing of all of the senators from the cotton producing states.

The commission would consist of two senators appointed by the president pro tempore of the House for the members-elect of the House for the next Congress to be appointed by the speaker, all to come from the cotton belt states. The commission, under the terms of the resolution, would be authorized and directed (1) to make a complete examination and audit of cotton statistics in the Census Bureau, showing the carry-over, the production, the consumption and distribution each year, and the correct amount on cotton now on hand; and (2) to make a report to the Congress as to its findings, together with recommendations for legislation, if any be thought necessary.

COTTON CONJECTURES.

At just about this time every year cotton producers go into a condition of hysteria because of the unsatisfactory nature of the government's report on production and the changes which they want to have made in order to obtain a more accurate showing. This year they are working through Representative Oldfield of Alabama, Senator Smith of South Carolina and various others, and once again there is a call for elimination of "guesswork" and the use only of authentic information.

How childish and unreasonable the cotton growing interests are is a matter of familiar comment, yet one would think that it should be evident that if they want conjecture and insist upon early figures what they will get will be

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

necessarily conjectural. They want to be assured of crop conditions that are likely to bring them the most money, and the government on the whole has been very complaisant and disposed to do just what they want. Unfortunately every year it is necessary to "check up" and correct errors or eliminate guesses and mistakes, otherwise the government's figures would so soon be completely out of line that they would cease to have any effect upon the market.

We do not hesitate to say that last year's crop reporting efforts, although based on semi-monthly statistics and accompanied by a greater outlay than for a long time past, were undoubtedly the most erroneous and least satisfactory that have ever been published. It is not strange therefore that the growers are coming to realize the losses and injuries which they suffer from these erroneous reports.—New York Journal of Commerce.

LIVERPOOL STOPS TRADING IN
COTTON FUTURES.

There will be no trading in Liverpool, England, in contracts for future delivery of American cotton beyond July, 1925, according to a notice received by the New York Cotton Exchange. This action is said to be the result of dissatisfaction in Great Britain with the standards which the United States Department of Agriculture insists shall govern trading in the American markets. The question in no particular has to do with any dissatisfaction with the methods of hedging on the New York Cotton Exchange.

Provisions, Etc.

WEEKLY AVERAGE PRICES.

Weekly average prices at Chicago for good beef cattle, hogs, aged sheep and lambs, as compiled by the Chicago Drovers' Journal:

	Cattle.	Hogs.	Sheep.	Lambs.
Past week.....	\$ 9.05	\$10.90	\$ 8.40	\$17.65
Previous week.....	9.25	10.60	8.75	18.20
1924.....	9.30	7.05	8.60	14.30
1923.....	8.85	8.05	7.65	13.90
1922.....	7.55	9.90	7.70	14.85
1921.....	8.35	9.25	4.50	8.35
1920.....	12.90	14.30	13.25	20.40
Av. 1920-1924.....	\$ 9.40	\$ 9.70	\$ 8.35	\$14.35

CHICAGO PROVISION REVIEW.

CHICAGO, Feb. 16.—Liquidation in lard caused by the break in corn and other grains and by a slow cash demand and a continued liberal output by the packing houses carried prices down sharply with packers aiding the selling. Pressure on short ribs and bellies was lighter than on lard and their values were less affected. At the close of the week lard prices were off 57½ to 60c after a break of more than \$1.00, and short ribs showed a loss of 20 to 22½c, while bellies were 2½c lower to 15c higher.

Packers report little demand for lard, either for domestic or export accounts, while the demand for bellies and meats is good. Shipments of meats from Chi-

cago last week were 15,973,000 lbs., a small decrease from the previous week and a good sized reduction from last year. Lard shipments were 4,815,000 lbs., a reduction of around 4,000,000 lbs. from the previous week and compared with 11,418,000 lbs. last year. Packers are reporting a moderate demand for hams and say that foreigners are taking bellies at a good rate and that stocks are not accumulating to any extent.

Hog supplies were smaller than the previous week, but ample for all requirements. Quality is running somewhat better and there is enough for all the trade. Prices for the week follow:

	High.	Low.	Feb. 14, 1925.	Feb. 7, 1925.	Feb. 16, 1924.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk. 238,000	883,000	250,000	1,371,000
Wk. ago. 229,000	1,011,000	295,000	1,535,000
1924	219,000	1,010,000	253,000	1,482,000
1923	231,000	793,000	268,000	1,292,000
1922	221,000	730,000	253,000	1,204,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the Drovers' Journal:

	Cattle.	Hogs.	Sheep.	All kinds.
1925	1,579,000	6,640,000	1,651,000	9,870,000
1924	1,639,000	6,961,000	1,807,000	10,407,000

DECEMBER 1, 1924, PIG SURVEY.

A hog production in 1925 probably as small as in any year in the last ten, and an acute shortage of hog products in 1926 are indicated in the December 1, pig survey made by the Department of Agriculture, in cooperation with the Post Office Department, through the rural carriers.

The reduction of 23.4 percent in the fall crop in the corn belt follows the reduction of over 17 per cent in the spring crop shown by the survey of last June. The total number of pigs raised in the corn belt in 1924 was probably fully 19 per cent less than in 1923. Quantitatively, this represents a reduction from 1923 of between 11,000,000 and 12,000,000 head; around 7,000,000 in the spring crop and 4,500,000 in the fall crop. In spite of the large reduction in numbers born, the market movement to January 1, of the 1924 spring crop of the corn belt hogs has been almost as large as the movement to the same date of the 1923 spring crop. December marketings and slaughter in 1924 were the largest ever recorded. The reduction in sows bred this fall for spring farrow compared to a year ago is indicated at around 2,000,000 head in the corn belt. These will go to increase the winter market supply and to decrease the marketings next summer and fall, thus mak-

ing the decreased supplies of the marketing year the more marked in the second half of the year.

MOVEMENT OF CATTLE.

Built for Severe Service Type "S" Auto Truck Scale

The Type "S" scale was built for severe service. It was first developed for railroad track use—perhaps the most strenuous service known. The loads are tremendous and the scale is exposed to all sorts of weather and subject to the jar and jerk of placing the car. Certainly here is a real test for heavy-duty scales. And the results obtained with Type "S" prove its unquestioned superiority.

The next field conquered by Type "S" was in large grain hopper scales, where the closest accuracy is demanded. The regular inspection

given these scales has proved Type "S" performance. Another thing, installation was easier and operation simplified.

A large volume business and the world's most modern factory made it possible to extend the Type "S" design to the next size—the Auto Truck Scale. Thousands of these scales in use today prove the increased accuracy—the greater economy. A competent scale expert will be glad to show you why Type "S" has made such a remarkable showing.

*If you Buy
or Sell Grain*

A grain dealer today cannot afford to take chances with a wagon scale. He has to weigh auto trucks. Their loads are unusually heavy and the load is concentrated on the rear wheels. Type "S" Auto Truck Scales are built for this severe service. Get the full details in the interesting booklet, "A Talk on Scales."

FAIRBANKS SCALES

And all small sizes.
These engines are in first class condition and operate on a low grade oil. Write for prices today. A. H. McDONALD, 543 W. Monroe St., Chicago.

SEEDS—Six best varieties championship strain corn. Everything in soy beans, grass and field seeds. Low price. Write today.
HOMWOOD SEED FARM, Sacred Heart, Minn.

ELEVATORS FOR SALE.

FOR SALE—Iron clad elevator, 40,000-bu. capacity; only one competitor; good grain territory; a 400-car station doing good profitable business; electrically equipped, in good running order; storage for 10 cars of hay, 10,000 bu. of ear corn; located on best shipping R. R. in Ohio. Good reason for selling. Address H. G. POLLOCK, Middle Point, Ohio.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. ALLIN GRAIN CO., Coffeyville, Kans.

PLANT FOR RENT.

FOR RENT—Our plant which we operated as a feed store for 40 years and until October 1, 1924. 1923 sales \$175,000.00.
CONKLIN AND CUMMINGS, Goshen, N. Y.

CHANCE OF LIFETIME for right man—Fifty-barrel mill and coal yard for sale in best agricultural district in northeast Indiana. Ample storage for grain and flour. Private side track on main line of Wabash Railroad. Mill running every day on flour or feed. Custom grinding and exchange. Established flour trade in surrounding towns. Located in good town; churches and school. Good reasons for selling. Investigate if you are looking for a good thing; deal direct with owner. THE ASHLEY MILLS, Ashley, Ind.

MILL FOR SALE—The best 300-bbl. mill in the Southwest; in perfect condition and running every day; on 10 lines of railroads—the main line of the Rock Island—making an ideal location; experienced selling manager wanted to take interest and share part of load with present manager, who is half owner; any part or all of stock can be bought or entire plant will be sold. Address Box 824, Enid, Okla.

SITUATION WANTED.

WANTED—Somebody needs this man. Peculiar conditions have made his services available. Many years' experience as branch manager for grain brokers, both cash and futures. Fine all around business experience and knowledge, good secretarial knowledge, executive ability, well educated, fine references. Capable and willing to learn your business. Starting salary no object if other things worth while. Seeking permanent connection only. Now employed in other business in Illinois. Am also an efficient telegrapher. Married, age 38. Don't hesitate to answer this if you can use a man of this kind. Address Office, Box 34, care Price Current-Grain Reporter, 309 So. LaSalle St., Chicago, Ill.

BUSINESS AND TRADE CONDITIONS

SENTIMENT throughout the West where agricultural interests govern the status of general business to a considerable degree is optimistic. There is not, however, such unbounded faith in the future as existed around the first of the year. This may be just as well because a feeling prevailed then that an inflationary period was budding, and yet the country recalled with considerable regret the dire results of a similar period only a short time previously.

Undoubtedly, the best feature of today's business situation is its stability or steadiness, avoiding the false complacency of unwarranted "booms" which would very likely have been followed with severe penalties during the succeeding "lulls." The census bureau has just published delayed figures for the year 1923 showing that the manufactured product of our factories was turned out in good volume, but not large enough to be classed as unusual. The figures are somewhat surprising in showing that the money value of such products was only slightly less than for the "boom year of 1919."

A comparable situation, as regarding a sensible and yet progressive plan of action exists today with much good sense being displayed in the restricted volume of manufactured goods and merchandise being produced, and in this the precautions of last Fall were very wise indeed. It is not likely that the marked improvement of affairs in the grain states of the West will lead to uncontrolled optimism in the production schedules of industries located in such states. Such contagion, in our opinion, will not be catching" and for this reason to a great extent the continuation of good business seems assured.

East and West.

Today, the steel mills are booking substantial orders and their plants in the West are running stronger than at any other steel center. Oil is likewise looking up, stimulated by the recent price advances. The railroads are ordering considerable new equipment, and increasing bank clearings speak for the volume of general business that is being transacted. In textiles, leather, rubber and other allied lines, business is good but, as above suggested, not as important as was diagnosed during the early Winter. The fact seems to be that purchases after the Jan. 1st inventory period have not been as brisk as had been anticipated and although large orders may later show up, it is the impression of the West that they will be spread over a longer period than was expected. An angle to this situation which meets with general approval but the wisdom of which we are not quite sure, is the vigorous advances in wholesale prices. From a sales standpoint, business is "setting pretty" with good, sharp competition and keen selling effort, so that trade should expand along broad lines with ample funds and credit to accommodate all commitments.

In Eastern financial districts, tremendous sales of securities since the first of the year have distributed a steady stream of stocks and bonds over the country. An interesting phase of such business has been the large purchases of country banks, probably mainly for the account of their customers. A particularly healthy detail of the stock market is found in the investment demand for listed bank stocks: Typical comparisons show Illinois Trust Company of Chicago selling recently for \$480 a share as compared with \$400 a few months back. Two other Chicago banks showed the following advances: First National from

\$450 to \$505; Continental and Commercial National from \$304 to \$332.

Finances.

The rather unexpected high volume of American loans to foreigners continues unabated. The exportation of gold likewise continues large and this is a favorable factor. Taking the latter into consideration with the capital requirements needed to finance the expanding business of our own country, we may soon expect a stiffening of both large and long time money rates. As money is needed in the expansion and operation of business, interest rates advance, and it is not customary to long continue

WHEAT EXPORTS

THERE is a suspicion, among many wheat traders, that the amount of wheat needed in Europe has been very materially overestimated.

It is said that there have been stored in Baltimore elevators, for more than 60 days, between six and seven million bushels and those who are watching grain shipments, point to that fact as indicating no very insistent wheat demand from overseas.

Within about 17 weeks, the new crop will begin to move; the visible is much larger than a year ago; stocks afloat are larger and world shipments very heavy, all of which point to a lessened demand for U. S. grain.

Some of the shrewdest traders, however, maintain that the above facts, while important, fail to reflect the true condition and that our exports will practically clean up our exportable surplus.

large stock market operations during periods of advancing interest rates.

Washington Affairs.

A signal accomplishment of the President's agricultural commission was the gathering together of the Presidents of our four rural organizations—The American Farm Bureau Federation, The Farmers Union, The National Grange and The American National Live Stock Association. It is to be expected and hoped that the calm, judicious atmosphere of their conferences will result in recommendations of a constructive sort, certainly better than the daily demands of some frenzied congressmen that "something must be done for the farmer."

Following the present deliberations and through using the good judgment and long experience of present and former cabinet officials, bank presidents, and authorities on rural economics, definite recommendations will shortly be made. So far, the more important suggestions that have been submitted include the organization of a Federal co-operative board; the re-adjustment of freight rates and a plan to permit live stock grazing on public lands and in the national forests.

Congress will lose no time in an effort to enact the first of the above recommendations into law, and to

this end the Haugen Bill is scheduled for early passage by the house, having the favorable report of the House Agricultural Committee. It calls for an appropriation of one half million dollars to set up the proposed board of five members who shall be appointed by the President. The Secretary of Agriculture shall be an ex-officio member. The Capper bill which was also designed to further the recommendations of the President's agricultural conference is now before the Senate committee but without action to date.

Back of the entire program appears the consistent attitude of the Coolidge administration for economy.

Secretary Hughes Commends Elihu Root.

One of the outstanding figures among the many strong statesmen who have grown up in American politics is Elihu Root. Having reached the mature age of eighty years, and as the recipient of most of the honors it is possible to confer upon one individual, Mr. Root well earned the eulogy of Secretary of State Hughes, expressed last week. In his opinion, the crowning glory of all of Mr. Root's accomplishments was the work leading up to making possible the establishment of a world court. It is only natural that foreign governments have conferred many decorations upon Mr. Root and thought exceedingly well of his ability and of his sincerity of purpose.

With this foreground, it seems to us particularly helpful to have the following public statement from Mr. Root relative to the present state of the nation: "Unless the whole principal of Democratic free government is wrong, America is on the right road. With all the deficiencies and wrong moves, there is far greater understanding among the people of the United States of the proper performance of the duties of citizenship than when I first entered public life."

During these months of settling down, a real work surely devolves on the individual, and if he does not keep on the straight path, big business, national enterprises and governmental activities will suffer.

Railway Earnings.

Scrutiny of the earnings of class one railroads for the year 1924 as just tabulated, is interesting and vital. Their properties have been efficiently managed for that year. A combination of favorable factors, including the weather, must be recognized in contemplating the carriers' financial statements, but in spite of such advantages their net return for the year was only 4.35 per cent on the value of their property. The figures further show that western roads, depending so largely in their earnings on agricultural products indicate the least satisfactory profits. It may be that the unexpectedly high grain markets will temper the ardor of the farming interests' leaders, whose efforts smack of a political stripe, in their demands for lower freight rates. There are admitted inequalities in the freight structure on grain and grain products, but sweeping horizontal freight reductions do not jibe with the best interests of the country, dependent as it is to such a large degree on well equipped and properly operated railroads.

President on Tax Adjustments.

President Coolidge in a public address before the National Tax Association's inheritance and state tax conference again stated his position of economy as applied to the income from taxation as well as on the out-go of government funds. He decried the "competition between states to reach in inheritance taxes not only the property of its own citizens but the property of citizens of other states."

"If we are to adopt socialism, it should be presented to the people of this country as socialism, and not under the guise of a law to collect revenue," he said.

"The people are quite able to determine for themselves the desirability of a particular public policy and do not ask to have such policies forced upon them by indirection."

"Differing from income taxes, which are deductions from what a taxpayer makes each year, and payment for which presumably can be made without hardship, inheritance and estate taxes are capital taxes; they take a part of the accumulated capital of the nation."

It is gratifying to the nation to note the application of true business principles in the affairs of government under the leadership of Calvin Coolidge.

SECRETARY JARDINE

THE appointment by President Coolidge of Dr. Wm. M. Jardine of Kansas as Secretary of Agriculture should please those who demanded a Western man. Born in Idaho, noted for his research work in dry farming, and head of the Kansas College of Agriculture, Mr. Jardine should surely radiate western environment, and know how to represent western interests in his conduct of the agriculture bureau.

Those who desire sanity to reign in the agricultural department should not be disappointed in Mr. Jardine, judging from his past experience.

While he has been an outspoken advocate of the farmers' interests, in public speeches he has declared that only 10 per cent of the troubles of the farmer can be remedied by legislation, that the other 90 per cent must be solved by the farmers themselves and their immediate associates, the business men of their agricultural communities.

He gained considerable attention when in the spring of 1924 he voiced opposition to the McNary-Haugen price-fixing bill, which was a pet hobby of the late Secretary Wallace., viewing the plan as based on unsound economic theory and saying that what the farmer wanted was to be let alone.

Once a cowpuncher, a broncho-buster, rail-cutter and ranchhand, he has a comprehension of farm problems based on intimate experience. He is said to be the best authority in the country on dry farming and the growing of wheat and grain sorghums. Besides learning stock-raising, he worked his way through college.

Mr. Jardine was an instructor in the Department of Agronomy, Agricultural College of Utah, from 1904 to 1906, assistant United States cerealist in charge of dry land grain investigations, 1907-1910, and began his connection with the Kansas State Agriculture College in 1910. He served as dean of agriculture in that college from 1913 to 1918 when he was made president.

He is the author of numerous papers and bulletins on crop production. During the war he was chairman of a Kansas state commission on agricultural production.

THE PULLMAN SURCHARGE

THE decision of the Interstate Commerce Commission, finding that the surcharge on Pullman fares was not unreasonable, seems to have started afresh the stream of invective which has more or less constantly been directed at that department of the government and to have led to the renewed agitation in Congress concerning the bill which aims to override the commission's decision and do away with the surcharge.

It is always unfortunate when a decision of the Interstate Commerce Commission or of the United States Supreme Court is only a majority opinion, and it is particularly unfortunate in this particular case, for that doubtless was what led to the present discussion concerning the bill above referred to, thus in a measure discrediting the commission in the minds of a great many people and especially those

who frequently ride in Pullman cars and are forced to pay the surcharge.

As we see it, the principle of the surcharge is correct. That money, as is well known, goes to the railway as added compensation for the great increase in dead weight per passenger carried in the Pullman over the dead weight per passenger carried in the regular coach.

Whether the amount of the surcharge is proper or not is an altogether different problem, but it is one which apparently does not cut very much figure, for but few people will purchase an upper when a lower berth may still be had. We want the best there is and are willing to pay what is asked, so long as we do not feel that we are being robbed, and we are wondering if we would not all feel less inclined to resent the extra cost if it were figured as a part of the railway fare instead of a surcharge on the Pullman ticket.

SPENDING OUR MONEY

IT HAS not been so many years since a campaign slogan of one of the major parties was that the preceeding Congress, which was of the other political faith, was "a billion-dollar Congress."

Conditions have changed rapidly, however, and with a national wealth which has been estimated by the Department of Commerce at \$320,000,000,000 we see no reason for denying money where it will render real service. We do feel, nevertheless, that the time has come when riotous spending by city, county, state and nation must stop and the burden of taxation lightened.

It should not be forgotten that this country was founded on the principle that it was "of the people, for the people, and by the people," and money which is raised by general taxation should only be spent when it will benefit the majority of the people.

We, of course, do not mean by that statement that the United States government, for example, should not spend money for a new postoffice building in Jacksonville, Florida, or in Augusta, Maine, or Portland, Oregon, if one were needed at either of these places. Neither do we mean that a county should not build a bridge on a road used by but few of its people, for an altogether different principle is involved in cases of that character.

What we do mean and what we contend for is, first, that money raised by general taxation must be wisely spent, even for projects like the ones just cited, and, second, that money so raised should not be spent just to add to the profit of one industry or one class of our people at the expense and to the detriment of another industry or another class.

THE SILO A SIDE LINE

IN THE January number of the *Wisconsin Crop and Live Stock Reporter* we find a statement to the effect that within a year 4,370 new silos were built, making the total for the state 104,430.

Wisconsin being a great dairying state, the number is, of course, much larger than would otherwise be the case, but no one will question their value to the farmer who feeds stock, and our message to the country elevator man in connection with the story is just this: Are you sold on the idea of a farm silo, and if so can you sell the proposition to enough of your farmer friends to make it a profitable side line for you?

WORKING TOGETHER

CHAMBERS of Commerce or similar organizations, in many sections of the country are exceedingly active in their effort to locate new industries, the incentive, for the most part, being "what it will mean for our city."

There are unquestionably in the country contiguous to each of these organizations a number of associations of farmers, fruit shippers, or stock raisers, who are very vitally interested in enlarged home markets.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Feb. 21, 1925.	Feb. 14, 1925.	Feb. 23, 1924.

There is, therefore, such a mutuality of interest and might readily lend itself to some co-operative effort and certainly enough of common interest to warrant an occasional "get together" meeting.

Round table discussion of common problems is sure to prove profitable and then, an important by-product of such gatherings is the opportunity for making new friendships.

THE man who studies the figures of farm crop values for 1924 is prone to wonder whether or not he needs all of the help some of his law making friends are planning to give him.

For example: the value of the crops in the great agricultural states of Minnesota, North Dakota, South Dakota and Iowa reached the stupendous total of \$1,139,000,000; for Wisconsin the figure is \$249,301,000 and for Indiana \$258,711,000.

By way of contrast, it might be pointed out that the business failures in the United States, for the first two weeks in February, numbered 924.

WITH the near approach of March fourth, when the present session of Congress will end, increasing pressure is being brought to bear upon our national legislators, looking to the passage of many bills, and while perhaps a few of them have been sufficiently studied by our lawmakers, the most of them have not, and the frenzied rush of the next few days is sure to give us some ill conceived and ill advised laws.

It would seem that the proper time for our congressmen to become real busy, would be in the early days of the session, rather than the closing ones.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, FEBRUARY 25, 1925

GRAIN TRADE REVIEW

World's wheat situation shows but little change with heavy exports continuing from the southern hemisphere, and the demand for North American grain the past week only fair, aside from fairly liberal purchases made by several continental countries. At the present time the market is regarded as in a position where the news is likely to be more two sided and this condition may continue for a short while longer, but there is a growing disposition to take the buying side on the dips, especially in quarters that have been right on the market for sometime past. The statistical situation presents many interesting facts, and the past week the American trade was considerably upset by various sets of figures showing everything from a very strong position, to a liberal carryover. There is a disposition to make the figures fit the market position of some interests, regardless of how accurate they are. As near as can be estimated North America on February 1 had around 150,000,000 bus. wheat available for export after allowing for a normal carryover in the United States, but it remains to be seen whether all of this grain is shipped or not. The foreign takings during the last half of the crop year promise to be heavier than they were during the first half, and it is hardly to be expected, despite the relatively high prices, that the demand will fall off to any great extent. During the period when the southern hemisphere is shipping heavily the market usually is more or less subject to sharp sinking spells and his season promises to be no exception. If there is any scarcity of wheat the world over it seldom if ever commences to develop before March 1, and it is frequently after the first of that month before the market starts to respond. There is little or no probability of the southern hemisphere shipping all of its surplus before the end of the crop year, although it is also very probable in view of the relatively low price for new crop wheat in the United States as compared with May that there will be a strong effort made to hold back supplies. The transportation situation at home and abroad is normal, and if exporters desire to ship there is nothing to hinder them from so doing. The domestic visible supply promises to decrease comparatively rapidly from now on as the movement in the interior has fallen off

considerably and mills must draw more freely on terminal markets for supplies.

The outlook for the new winter wheat crop at home and abroad will shortly be the dominating influence in the market. Unless rains come in the southwest in the next two weeks, a dry weather scare is regarded as very likely as there are some sections of Texas, Oklahoma, Kansas, and Nebraska that would be greatly benefitted by moisture, although outside of sections of Texas there has been no damage so far. Growing weather will be needed to determine whether there was any winter killing of consequence, but the latest returns suggest that the losses have been relatively small. Some wheat is being pastured in parts of Kansas and Oklahoma, but some weeks must elapse before the weather warms up sufficiently to make this general. In Europe the outlook is spotted. Russia seems to be headed toward another small crop in 1925, judging from the various cables received from that country of late. In Italy the wheat acreage is the largest in four years showing a fair increase over the previous season. Some parts of Europe need rain and others need dry weather. On an average there is nothing alarming at the moment, but with the possibility of a close adjustment of supplies to demand at the end of the old crop season the situation is one that demands the closest attention. Spain is the latest country to announce that it will import wheat. Foreign demand for American rye has been slow despite the relatively low price as compared with wheat. This is rather surprising in view of the lack of supplies obtainable from other countries.

Coarse Grains.

Corn market has been decidedly unsettled and while the movement of cash corn from interior points to terminal has fallen off and is now far below the arrivals at this time last year there has been no improvement in the eastern cash demand and low grades in the sample market have shown no improvement as compared with the May and continue to sell at a big discount, while the eastern demand is distinctly poor. There has been, however, a decidedly more bullish feeling developing in some quarters on the theory that with the opening of navigation the east will come in as a big buyer, and that the period of accumulating supplies at primary points is about over. Readjustment between cash corn and futures is inevitable between now and May 1, but the thought that bothers many traders is whether the readjustment will take place in an advance in cash grain prices or a decline in the May. There is no prospect of export business in domestic corn this season in view of the lower prices for Argentine and South African grain and the relatively large surplus in the southern hemisphere. Plowing is getting under way in Oklahoma and Kansas and indications are that there will be an increased acreage with favorable weather. Oats demand has improved slightly, but not sufficiently to be a strong market influence. Some seeding is under way in Oklahoma.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Feb. 21, 1925.	Feb. 14, 1925.	Feb. 23, 1924.
Wheat	4,343,000	4,772,000	4,449,000
Corn	4,401,000	5,320,000	10,967,000
Oats	2,620,000	4,282,000	4,030,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	11,364,000	19,446,000
Preceding week	14,314,000	19,700,000
Since July 1	833,170,000	760,882,000

Wheat market fluctuated in a moderate manner the past week, and while breaking sharply several times, closed well toward the top on the May, with a net gain of $\frac{3}{8}$ c, the highest close in several weeks, while the deferred deliveries were $\frac{1}{8}$ c lower. As usual at

this season the market is expected to show considerable irregularity for a while, but the situation is regarded as developing much faster than many of the leading bulls believed. There was a fair export demand in the closing days of the week. Weakness in the deferred deliveries was on selling induced by generally favorable crop reports, but the dry weather in the Southwest remained unrelieved at the end of the week.

Corn was under pressure a good part of the week, but showed stubborn resistance to pressure and at the close the nearby deliveries were $1\frac{1}{8}$ c, while September was unchanged, the latter going to a discount under the May. Eastern cash demand remains slow, and a fair increase was shown in the visible supply for the week. Country offerings are limited, partly due to a breaking up of country roads, and supplies in interior elevators are small.

Scattered liquidation was on in oats and the market dropped rather sharply, closing well toward the low point, with net losses of $1\frac{3}{8}$ @ $2\frac{1}{4}$ c, with July leading. There was considerable bear pressure in addition to selling out by local longs, and with a slow cash demand, the decline was easily attained. Rye was $1\frac{3}{8}$ @ $1\frac{1}{2}$ c lower for the week, with foreign demand generally slow. Range of prices the past week follows:

	Close	Feb. 21, 1925.	Feb. 14, 1925.	Feb. 23, 1924.
Wheat—	High. Low.	1.87 $\frac{1}{2}$	1.79 $\frac{1}{2}$	1.86 $\frac{1}{2}$
May		1.87 $\frac{1}{2}$	1.79 $\frac{1}{2}$	1.86 $\frac{1}{2}$
July		1.58 $\frac{1}{2}$	1.51	1.57 $\frac{1}{2}$

Season	...	67,500,000	65,765,000

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Feb. 21, 1925.	Feb. 14, 1925.	Feb. 23, 1924.
Wheat	37,212,000	38,249,000	58,071,000
Oats	18,404,000	18,468,000	9,286,000
Rye	2,201,000	2,168,000	2,111,000
Barley	7,121,000	6,870,000	1,855,000
Afloat—Wheat	5,354,000 bus.; oats, 818,000 bus.; rye, 140,000 bus.; barley, 613,000 bus.		

MARKETING LAW

Extracts From An Address by Joseph N. Moonan, a Minnesota Lawyer of Some Standing on the Co-operative Marketing Law—Says Parts of It Are Clearly Unconstitutional.

The co-operative marketing act, chapter 264 of the Minnesota Session Laws for 1923, took effect April 16, 1923. The act is quite lengthy, covering 16 printed pages of the statutes. A considerable portion is directed to the matter of the organization and management of co-operative marketing associations."

After quoting from various sections to show declaration of policy and purposes as well as its powers, the speaker told of the organization of the Minnesota Wheat Growers Co-operative Marketing Association, of its contract with farmers, of its promises to them and of its practice of mailing to all independent dealers, lists showing who its members were, these lists containing several hundred names.

Mr. Moonan then quoted Section 27 of the act, the part of special interest to persons not members, expressing the opinion that it was clearly unconstitutional and giving his reasons for this opinion, in part as follows:

"It is the claim of the co-operative marketing associations that under Sections 26 and 27 of the Act, any person who purchases or buys from a member of the pool the products owned by such member and which have been pooled under a marketing contract, with knowledge of the fact that such products have been pooled, become liable by reason of such purchase for the penalty of five hundred dollars and the attorney's fee. Under this section suits for penalties and injuries have been instituted by the Minnesota Wheat Growers' Co-operative Marketing Association and are now pending in court.

Illegal Under Common Law.

"It has not been seriously questioned that at both common law and under the statutes enforced prior to the passage of the act the method of business pursued by the co-operative marketing associations would be illegal. At common law a combination to fix the price of an article of necessity was a criminal conspiracy, and such combinations are illegal under the anti-trust laws of most of the states. Necessity or beneficent purpose or effect has never been held to be a justification for raising the price of any commodity. Neither does the fact that the price actually fixed has been reasonable constitute a defense. The scope of the contract and not the possible self-restraint of the parties to it has always been the test. The courts have generally held to be illegal and void any pool or combination between competitive producers to fix the price of any product, particularly those of necessity, whereby the parties agree to restrain from competing and to divide the profits from their respective businesses in certain fixed proportions. The motives which prompt an illegal combination have never furnished a reason for sustaining such combinations.

"The U. S. Supreme Court has said with reference to the prohibitions of the anti-trust law: 'Nor can they be evaded by good motives. The law is its own measure of right and wrong, of what it permits or forbids, and the judgment of the courts cannot be set up against it in a supposed accommodation of its policy with the good intention of parties, and, it may be, of some good results.'

"Combinations which operate to thwart the usual operation of the laws of supply and demand, to withdraw the commodity from the normal current of trade, to enhance the price artificially, to hamper users and consumers in satisfying their needs, have generally been held to be void and illegal and as being in restraint of trade. Agreements among competing producers controlling a large portion of the output of any product either generally or in a given locality to market their output through a common and exclusive sales agent, individ-

ual or corporation have been held to be unlawful combinations in restraint of trade tending toward monopoly when the purpose and intent is to limit production, fix and maintain prices or pool profits. Under these rules of law which were enforced prior to the passage of the co-operative marketing act, organizations such as these co-operative marketing associations, would constitute illegal combinations which would not be permitted to operate.

"Prior to the litigation instituted in this state there appears to be only one case wherein an action was instituted by a co-operative marketing association against a dealer. This was a case in Wisconsin and in that case it was recognized that the practices were such as would have been of questionable validity prior to the passage of the co-operative marketing act but that because of a provision in the Wisconsin law similar to Section 28 of our law the practices were legalized."

The Wisconsin court said: "This legislation providing for the organization of co-operative associations manifests a clear purpose on the part of the Legislature, not only to authorize but to encourage co-operative effort along the lines to which the legislation is made applicable, and to legalize practices which no doubt were of questionable validity prior to the enactment of such legislation."

"The proponents evidently had in mind that the associations formed thereunder proposed to do things and commit acts which had prior to the passage of the act been deemed illegal under the laws prohibiting monopolies so the following section was incorporated: 'No association organized hereunder shall be deemed to be a combination in restraint of trade or an illegal monopoly; or an attempt to lessen competition or fix prices arbitrarily; nor shall the marketing contracts or agreements between the association and its members or any agreement authorized in this act be considered illegal or in unlawful restraint of trade or as a part of a conspiracy or combination to accomplish an improper or illegal purpose.'

"It is the claim of the co-operative marketing association in this state that the law and their practices thereunder can be sustained because of the provisions which attempt to exempt co-operative marketing associations from the laws prohibiting monopolies.

"Those opposed contend that Section 28 violates both the State and Federal Constitutions. In Minnesota we have constitutional provisions different from those in the several states where the co-operative marketing laws have been sustained.

"Section 35, Article 4 of the Constitution of Minnesota reads as follows:

'Any combination of persons either as individuals or as members or officers of any corporation, to monopolize the markets for food products in this state, or to interfere with, or restrict the freedom of such markets, is hereby declared to be a criminal conspiracy and shall be punished in such manner as the legislature may provide.'

'If the reasoning in the Wisconsin case sustaining the co-operative marketing act be followed and if it is sought to sustain the act in this state on the theory on which the Wisconsin court sustained it, then the defenders meet what appears to be an insuperable obstacle in the way of sustaining it; that is the constitutional provision just quoted, because, while the legislature may change the policy of the statutory law and by a provision similar to Section 28 might change the statutory policy in existence, it is without authority to change the policy of the state as laid down in the State Constitution and it is the contention of those opposed to the co-operative marketing act that Section 35, Article 4, of the Constitution prohibits the passage of a law of this character and that Section 28 which attempts to give such a law validity, violates the provisions just quoted.'

Monopolistic Combinations.

"The opponents of the co-operative marketing law contend that the associations organized thereunder are combinations to monopolize the market for food products and to interfere with and restrain the freedom of such market and that the act attempts to permit them to do what Section 35, Article 4, prohibits.

"There is another reason why it is claimed that the Act in question and especially Section 28 thereof is unconstitutional.

Section 8973, General Statutes for 1913 provides:

'No person or association of persons shall enter into any pool, trust, agreement, combination, or understanding whatsoever with any other person or association, corporate or otherwise, in restraint of trade, within this State, or between the people of this or of any other State or country, or which tends in any way or degree to limit, fix, control, maintain or regulate the price of any article of trade, manufacture, or use bought and sold within the state, or which limits or tends to limit the production of any such article or which prevents or limits competition in the purchase and sale thereof, or which tends or is designed so to do. Every person violating any provision of this

section, or assisting in such violation shall be guilty of a felony, and upon conviction thereof shall be punished by a fine of not less than five hundred dollars nor more than five thousand dollars, or by imprisonment in the State prison for not less than three nor more than five years.'

"Chapter 114, Laws of 1923, provides:

'It shall be unlawful for any person, firm or corporation engaged in the buying, selling, or handling of grain in any public local grain warehouse in this state, or for the local agent in charge of such warehouse, or any other agent of the person, firm or corporation operating the same, to enter into any contract, agreement, combination or understanding with any other person, firm or corporation, owning or operating any other public local grain warehouse at any railway station, their agent or agents, whereby the amount of grain to be received or handled by said warehouses, at such station, shall be equalized or pooled between said warehouses, or whereby the profits or earnings derived from said warehouses shall be divided or pooled, or apportioned in any manner, or whereby the price to be paid for any kind of grain at such station shall be fixed or in any manner affected, and each day of the continuance of any such agreement, contract or understanding shall constitute a separate offense.'

"It will be noted that Section 28 attempts to render legal, acts done by co-operative marketing associations which, if done by any other person or corporation would be criminal and it is claimed that because of this discrimination in favor of corporations organized under the co-operative marketing act the law contravenes the Fourteenth Amendment to the Federal Constitution in that it denies equal protection of the laws to those not included in the exempted class.

"U. S. Constitution declares that: 'No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.'

"Construing this amendment, the U. S. Supreme Court has said: 'Equal protection and security should be given to all under like circumstances, in the enjoyment of their personal and civil rights; that all persons should be equally entitled to pursue happiness and acquire and enjoy property; that they should have like access to the courts of the country for the protection of their persons and property, the prevention and redress of wrongs, and the enforcement of contracts; that no impediment should be interposed to the pursuits of anyone except as applied to the same pursuits by others under like circumstances; that no greater burdens should be laid upon one than are laid upon others in the same calling and conditions and that in the administration of criminal justice no different or higher punishment should be imposed upon one than such as prescribed to all for like offenses.'

Anti-Trust Laws Apply to All.

"An anti-trust law like others must apply alike to all persons in the same class. Otherwise it violates this provision.

"A number of times attempts have been made to exempt the agricultural industry from the provisions of anti-trust laws and these provisions have generally been held to be unconstitutional. The courts are generally opposed to a recognition of farmers and persons engaged in agricultural pursuits as forming a separate class within the limits allowed by the Federal Constitution securing to all the equal protection of the law. The State of Illinois passed an anti-trust statute and it contained the following provision: 'The provisions of this act shall not apply to agricultural products or live stock while in the hands of the producer or raiser.'

"This provision was considered by the

Copyright by Underwood & Underwood.

The above photograph shows Frederick D. Richey, agronomist, in charge of corn investigations of the United States Department of Agriculture, with samples of corn discovered growing in the Andean highlands of South America and which matures in seventy days. This corn grows very near the soil and can stand low temperatures. These discoveries will undoubtedly lead to crossed varieties by which the corn belt can be extended much further North.

U. S. Supreme Court and because of it the law was declared unconstitutional. "The case of Connelly v. Union Sewer Pipe Co., in which this question was considered, contains the strongest argument that can be raised against the constitutionality of the cooperative marketing act.

"It says: To declare that some of the class engaged in domestic trade or commerce shall be deemed criminals if they violate the regulations prescribed by the state for the purpose of protecting the public against illegal combinations formed to destroy competition and to control prices and that others of the same class shall not be bound to regard these regulations but may combine their capital, skill or acts to destroy competition and to control prices for their special benefit, is so manifestly a denial of the equal protection of the laws that further or extended argument to establish that position would seem to be unnecessary."

Violates Both State and Federal Constitutions.

"Under the rules of constitutional law it is the claim of those opposed to the cooperative marketing act that the law in question violates the State and Federal Constitutions insofar as it attempts to exempt from the general anti-trust statutes cooperative marketing associations. It is also the contention of those opposed to the cooperative marketing act that it violates the Sherman Act and the Clayton Act. They also contend that the act is in restraint of interstate commerce and invalid for that reason.

"Another point is raised with reference to the validity of the penalty clauses. It is attempted by the penalty clauses in Sections 26 and 27 to make every person who "receives for sale" pooled grain or other pooled products liable to a penalty of \$500.

"It is the contention of those opposing the law that this penalty clause is invalid and violates the Fourteenth Amendment to the Federal Constitution and that portion of the amendment guaranteeing to every citizen the equal protection of the law. It is the claim that this law selects a certain class of people and gives them a special penalty to protect them from breach of contracts while other people whose contracts are broken are not given such penalty. In other words persons who induce violation of contracts made with cooperative marketing associations are subject to these penalties while persons who induce persons having contracts for agricultural products with other associations are not liable. The cooperative marketing associations have the benefit of these penalties while other dealers in grain and people who receive grain for sale do not have this protection.

"A violation by the independent dealers subjects him to the penalty and subjects him to the payment of attorney's fees but no relief is given to the independent dealer who prevails in the action.

"The opponents of the law contend that these penalty clauses are obnoxious to the Federal Constitution and point to the fact that similar penalty provisions have been held unconstitutional in a long line of decisions rendered by the U. S. Supreme Court and various state and federal courts."

The speaker here quoted the decision of Judge Beckhoefer, in further substantiation of his contention and made the point that the Minnesota law did not prohibit mere buying, supporting his views as follows:

Does Not Prohibit Mere Buying.

"In the cases brought by the Minnesota Wheat Growers' Cooperative Marketing Associations we have contended that Section 27 does not apply to persons who buy pooled grain from a pool member without prior solicitation.

"We contend that Section 27 does not prohibit mere buying. Section 27 makes any dealer or prospective purchaser receiving such member's products for sale, or for auction or for display for sale,

LLOYD A. DELLINGER,
BLOOMVILLE, OHIO

AMONG those in the great state of Ohio with a host of friends, a good business and assurance of its continuance is Lloyd A. Dellinger of Bloomville. He has been prominently identified with the hay trade, both throughout the state and in national circles for years. He comes of a family that has given valuable service in the interests of the trade. It is men like Dellinger and firms like Dellinger & Sons Co. on whom rests great responsibility these days. Although it is somewhat doubtful how much credence is

given by the Government to their long standing valued experience, it is everywhere admitted in the trade that these old time firms whose records show a merchandising trade that has gone through many ups and downs are best fitted to confer with Government representatives now preparing further hay grades. We hope to sincerely and practically prove the importance of most of the present trade practices and the foolishness of radicalism that enters so strongly into other practices that are being foisted upon us.

liable to the penalty of \$500 for each offense.

"It is clear that one who buys grain does not receive it for auction or for display for sale and if a mere buyer is to be subjected to the penalty it must be under the provision prohibiting "receiving such member's products for sale."

"It is the position of those representing the elevator companies in the pending litigation that these words mean just what they say and apply only to persons receiving the wheat for sale, for auction or for display for sale for the owner and not to a person who buys from the owner. There is a class of business to which this could apply; that is, the commission firms who receive wheat for sale.

"It is clear that this act is penal. A rule of statutory construction is that penal statutes must be strictly construed. The statute does not use the words "buy" or "purchase." It uses the words "receive for sale." There is a well defined class of business in the grain business that does "receive for sale." Many thousands of cars of grain are annually shipped to commission merchants and received for sale. That is what the business of the cooperative marketing association is, to "receive for sale," and it is the contention of those opposing the construction of the law contended for by the cooperative marketing associations, that the mere buyer, that is, the person who without solicitation when a member of the pool tenders pooled wheat to him, buys it, is not prohibited from so buying and is not liable to the statutory penalty.

Many Industries Affected.

"The provisions of Section 27 affect a great many industries in this state. They affect every elevator. They affect every country meat market. They affect every country store. They place every country storekeeper who is taking in eggs in trade, in continual danger of a \$500 penalty. Heretofore it has always been the law that when two persons make a contract, responsibility for carrying the same out and liability for the breach, rested on the parties to the contract. This cooperative marketing

law provides for the contract between the association and the members of the pool and then imposes on the other industries of the state the burden of seeing that the members carry out their contract.

"It is a physical impossibility for every country storekeeper and every elevator man to remember all the names on the extensive lists that are sent to him through the mail. It imposes onerous duties and expensive loss of time for him and his clerks to go and study over this list every time a customer comes in.

"The law imposes extensive burdens on independent dealers and does not give them any benefits. Looking at the law as a whole it would seem that no more palpable scheme to violate the constitutional provisions guaranteeing to every person equal protection of the law could be devised."

ARGENTINE WHEAT PROSPECTS.

Harvesting of wheat in the northern wheat producing regions of Argentina is now proceeding under favorable conditions due to dry weather. In the southern districts temperatures below normal favor the filling of the grain.

The southern parts of the wheat regions of Chile, which usually suffer from excessive moisture, were benefited by the restricted rainfall during the current season. Heavier production in this region will partly compensate for losses from drought in the northern and central sections.

Australian wheat harvest has begun and returns to date indicate average yields, according to an unofficial report. A private estimate of the area reserved for grain during the 1924-25 season, compiled largely from reports of the agricultural departments of the Australian states, is 10,775,000 acres against 9,498,000 harvested last year, an increase of 13 per cent. Should all of the acreage reserved for grain be harvested under favorable conditions this would result in a yield for the current season considerably above that of last year when the production amounted to 125,000,000 bushels.

MINNESOTA FARMERS' ELEVATOR MEN MEET

More Than a Thousand Attend Convention
—Many Important Problems Considered—Change in Marketing Law Advocated.

When President John F. Gustafson, president of the Farmers' Grain Dealers' Association of Minnesota, called the eighteenth annual convention to order more than 500 members had already registered and before the convention was over the registration numbered well over a thousand.

The morning session was given over to the annual address of the president, the report of Secretary A. F. Nelson, an address of welcome in behalf of the Grain Commission Merchants' Association by B. F. Benson and a talk on traffic by A. L. James, general counsel of the Great Northern railway.

C. D. Morris of Chicago, assistant chairman of the public relations committee of the American Railway Association, delivered the main address Tuesday afternoon, taking for his subject "The Transportation Problem."

Co-operation between grain shippers and railways is essential, if farmers are to reap the full benefit of their harvests by marketing them promptly and thus taking advantage of favorable price conditions, Mr. Morris pointed out. He traced the 1924 grain movement, when the biggest volume of grain ever handled in an equal number of months was hauled to terminals without a hitch or hint of a car shortage. This afforded a perfect example of traffic co-operation, according to Mr. Morris.

Other speakers Tuesday included C. H. Preston, auditor of the association, who submitted figures of the past year's business and outlined modern systems of elevator accounting. He urged standardization and greater efficiency in book-keeping methods at farmers' elevators, asserting that thousands of dollars are lost yearly through slipshod accounting.

State Legislators Attend.

Three members of a state legislative committee, appointed by the Minnesota house of representatives, sat through the Tuesday meetings, to learn the ideas of the farmer grain dealers on the subject of the co-operative marketing laws, which are to be subjected to attack at the present session of the legislature by persons who wish their amendment. These committeemen were H. J. Farmer of Arlie, August Smith of Litchfield and Louis Enstrom of Rosseau.

The legislative warehouse act of 1923, which set up today's regulations for the expeditious marketing of Minnesota grain, insures a square deal for farmers and farmers' elevator companies, when its provisions are obeyed. J. T. Probstfield, executive of the state warehouse department, told the members at the afternoon session.

Mr. Probstfield presented a detailed analysis of the law, with official interpretations of the more important clauses dealing with co-operative marketing of crops. He also explained the manner in which members of wheat pool organizations can benefit by the act in profitable marketing of their holdings.

Other speakers of the Wednesday session were O. P. B. Jacobson, chairman of the Minnesota railroad and warehouse commission; G. H. Tunell, chief Minneapolis grain inspector, who told of the difficulties in grading and classifying grains which attended the handling of the 1924 crop, and V. Anderson, assistant attorney general of Minnesota, who explained existing laws dealing with grain marketing and the operations of farmers' co-operative elevators.

J. W. Shorthill, co-operative marketing expert of Omaha, explained the organization of the Grain Marketing Co. of Chicago and its contract with the five terminal elevator concerns whose properties and businesses it took over last July. Mr. Shorthill told the elevator

(Continued on page 19.)

Terminal Markets

DULUTH.

S. J. Schulte, Correspondent.

F. S. Lewis & Co. has been admitted to corporate membership on the Duluth Board of Trade.

Charles T. Mears of the Itasca Elevator Co. and Ray Newell left during the week for winter resort points in Florida, where they will remain for a month.

A lot of 42,000 bushels of durum was loaded out of the Itasca elevator here at the beginning of the week for shipment, all-rail, to the seaboard to complete an export order, on account of the Barnes-Ames Co.

H. Fergens, Frank E. Pierce, J. M. Erickson, E. M. Harris, W. W. Bradbury, A. R. Beck and M. M. McCabe represented the Duluth market at the eighteenth annual convention of the Farmers Grain Dealers' Association, held at Minneapolis during the last week. They were impressed with the optimistic feeling shown on all sides at the gathering regarding the trade outlook for the coming season.

With the falling off in the movement from the country to the terminals lately it is thought that the elevators at Duluth and Superior will not experience any difficulty in taking care of the receipts up till the opening of navigation. The elevator interests have, however, instructed the houses at points over Minnesota and North Dakota to carry grain in store in them as far as possible in order to eliminate the danger of serious congestion at the terminals here.

More than 100,000 bushels of durum were loaded out of elevators here at the end of the week for shipment to Minneapolis millers. As indicating the strong demand from millers for the best grades of durum, the basis on No. 1 amber was advanced to 25c over May. The best grades of spot spring wheat are also in demand from millers, with the light receipts and the small stocks being carried in the elevators. The premium on No. 1 dark northern has been advanced to 40c over the Minneapolis May price.

Flour Trade Quiet.

Flour trade has been quiet on this market lately, with jobbers doing little in the way of placing future orders. Prices were advanced 15 cents during the week. Quotations in carlots at mill follow: Family patents, jute, \$9.35; bakers' patents, jute, \$9.10; first clears, \$7; second clears, \$5.50.

MILWAUKEE.

D. K. Steenberg, Correspondent.

The Milwaukee Chamber of Commerce was closed all day on Monday, Feb. 23.

I. C. Lyman, associated with Kneisler Bros. at Milwaukee, is now enroute to Havana, Cuba, where he will spend a two weeks' vacation.

A. E. Anderson, manager of the Algona, Ia., branch of the W. M. Bell Co., visited the company's headquarters at Milwaukee during the early part of last week.

Receipts of grain at Milwaukee for the first five days of last week were 34 cars wheat, 125 corn, 73 oats, 133 barley, rye 15 and miscellaneous 19; a total of 380 cars for the period, as compared with 709 cars the preceding week.

The seed firm of Whitmore & Burg has recently commenced operations at Wausau, Wis., maintaining a warehouse in part of the old Mathie brewery and offices in C. S. Dernbach's store. Members of the firm are Edward L. Whitmore and O. M. Burg, both experienced pedigreed seed growers.

Prices stiffened slightly during the past week in the Milwaukee market and corn closed 1@3c higher for the first five days period, oats 1½c, spring wheat 1c and durum 3c. Hard and soft winter wheat declined 1c, and the lower grades of rye and barley both 1c. Movement was small and trade moderately active.

A farmer in Kenosha county, Wis., plowed 19 acres of his land last week. He used a tractor and said that the going was easy due to the prolonged thaw of the past few weeks. It was probably the first time any plowing had been done in February in

that part of the state in more than a score of years.

The Clintonville Mercantile Co., which operates an elevator and general store at Clintonville, Wis., recently held its annual meeting of stockholders. Reports showed that during the past year the company made a profit of \$5,203.13, which was regarded as highly satisfactory in view of the business depression of the period.

Burglars broke into the Iderson grain elevator at New Holstein, Wis., recently and escaped with loot valued at \$200, consisting of six large bags of clover seed. Entrance was gained by unlocking a padlocked door. A neighbor reported having heard an automobile stop at the elevator between midnight and 1 a. m., but paid little attention to the disturbance as he felt that it was Mr. Iderson.

E. L. Patterson, secretary of the Receivers' Association of the Milwaukee Chamber of Commerce, represented the Milwaukee market at the Minnesota Grain Dealers' Association convention which was held last week at Minneapolis, Minn. Mr. Patterson distributed the now familiar and much sought after Milwaukee souvenir thermometers. Frank Bell was the only other Milwaukee grain man who attended, although several representatives of Milwaukee firms were present.

Kurt Richardson of Oconomowoc, Wis.; William Schissler of Sheboygan, Wis.; George Duvall of Kewaunee, Wis.; Joseph Straub of Lomira, Wis.; Thomas and Edward Carlson of Hartland, Wis.; David Rosenheimer of Kewaskum, Wis.; Clarence Moll of South Milwaukee; J. H. Johnson of Waterloo, Wis.; Robert H. Jones of Cambria, Wis.; C. A. Olson of De Pere, Wis.; D. W. McMillen of Fort Wayne, Ind.; T. H. and Jack Cochrane of Portage, Wis.; A. Port of Horicon, Wis.; S. C. Northrop of Watertown, Wis.; Joseph Klemish of Maribel, Wis.; Charles Mann of Mayville, Wis.; A. Leper of Menomonee Falls, Wis.; and A. H. Mintzloff of Grafton, Wis., were included among visitors at the Milwaukee Chamber of Commerce during the past week.

TOLEDO, OHIO.

S. M. Bender, Correspondent.

W. E. Savage, president of the Imperial Grain & Milling Co. and his wife and son Bill, Jr., are spending several weeks at Palm Beach, Fla.

Dave Anderson of the National Milling Co. reports his first tarpon since arriving in Florida. Dave always takes this means of steadying his nerve for another season with the flour trade.

Kent Keilholtz of Southworth & Co. is back after a six weeks' cruise to the sunny climes. He brought back some of the sunshine in the form of tan though some of the boys won't believe it. They think he has copied off Andy Gump's recipe of walnut juice.

Our apologies are due Bill Cummings of J. F. Zahm & Co. We neglected to record his excellent work at the piano during the annual membership dinner last month. Bill is always ready to tickle the ivories for anyone, anywhere and any time, and adds a darn good grin for full measure. Bill and Ben are the musical kids on the floor and with drummer Jaeger are really out of their sphere in the grain business.

Grain in store at Toledo the week ending Feb. 14: Wheat, 1,655,483 bus., week ago 1,610,285 bus., year ago 1,466,102 bus. Domestic afloat today, 807,000 bus., and bonded afloat, 549,000 bus. Corn in store 334,720 bus., week ago 300,134 bus., year ago 121,600 bus. Oats in store 672,621 bus., week ago 611,234 bus., year ago 271,618 bus. Rye 87,848 bus., week ago 83,471 bus., year ago 29,640 bus.

Country reports indicate that farmers are holding the balance of their wheat for the two-dollar mark again. Very little of the corn and oats of last year's crop is in farm bins. The new wheat is coming along fine and should spring weather be favorable Ohio will have an excellent crop. Flour trade is rather quiet since the market turned firm and buyers are only buying as their needs dictate. Millfeeds have suffered a severe decline and should be ready to respond to any fresh buying power.

John C. Husted, president of C. A. King & Co., resigned on Feb. 17. Mr. Husted has been with the firm for twenty-seven years and is still one of the youngest members of the Exchange. He has actively directed the affairs of the company since the death of Frank I. King in 1921, and written the market letter which won Frank King the title of "Our Boy Solomon." It is understood that the company will be managed by Raymond P. Lipe and the personnel of his own company, which is to be

dissolved on March 1. The present clerical force of C. A. King & Co. will remain with the firm. The future plans of Mr. Husted are not known at the present time, although it is thought probable he will associate himself with a firm in the line of business with which he is familiar.

The Farmers' Grain Dealers' Association of Ohio met at the Boddy House, Toledo, O., on Tuesday and Wednesday, Feb. 24 and 25. An excellent program was arranged and speakers of national prominence secured to talk to the managers. Gray Silver, president of the Grain Marketing Co., Chicago; Charles Adkins, Congressman-elect of Decatur, Ill.; J. F. Gustafson, president of the National and Minnesota Farmers' Grain Dealers' Association, and E. G. McCullom, president of the Indiana Association, were among those listed to speak. The Toledo Produce Exchange was host to the visitors and threw their offices open as well as entertained the delegates at a banquet Wednesday evening. J. D. Hurlbut, president of the Exchange, was toastmaster, and F. O. Paddock, oldest active member of the Exchange was the principal speaker at the banquet. Others who were heard were Phil Sayles, grain dealer of Columbus, O.; E. G. McConnell, Buffalo, and C. W. Palmer, Defiance, O. Del Lloyd of Waterville, O., presided at all the sessions.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Visitors on the St. Joseph Grain Exchange during the week ending Feb. 20th included: L. G. Denton, Helena, Mo.; F. H. Maugher, Savannah; Henry Grove, Plattsburgh, Mo.; W. C. Elliott, City; L. P. Grundy, Falls City, Nebr.; A. Magrath, Corning, Iowa; C. Patterson, Nodaway, Mo.; J. H. Ross, Bethany, Mo.; J. F. Brant, Robinson, Kans.; E. D. Davis, Easton, Mo.; J. B. Eavly, Coffey, Mo.; John Nolte, Baileyville, Kans.; Edw. Byergo, Barnard, Mo.; J. C. McKee, Superior, Nebr.; Dr. J. J. Comer, Willis, Kans.; Oscar Thorson, Willis, Kans.

Prices for all varieties of wheat have held practically steady during the week ending Feb. 20. Receipts have had a sharp falling off, the condition which has been reflected in the primary movement. Mill demand is improved for protein samples, and there is some elevator absorption, although the shipping demand is reported somewhat slow. At the close of this week No. 1 hard was quotable around \$1.73@1.75 for ordinary, and No. 1 red, \$1.93@1.96. The situation in corn has shown a great change, being at this time a complete reversal of conditions a week ago. The country movement has shrunk greatly and from the fairly generous supplies of earlier in the month, arrivals now are unequal to the demand; prices are about 7@8c higher for the week and the demand has been good at advances. Oats show a condition similar to corn. Arrivals are small, asking prices often based on the immediate requirements and scarcity of supplies. No. 3 white sold here Feb. 20 at 54c, or 3c over the preceding Saturday.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Feb. 19 were 1,647,937 bushels of wheat.

Washington's birthday, a national holiday, falling on Sunday, was observed on Monday, the day following, when all the exchanges, banks, etc., were closed all day.

Receipts for the week ending Feb. 20 were 59,365 barrels of flour, 1,454,199 bushels wheat, 28,007 bus. of corn, 50,635 bus. of oats, 1,698 bus. of rye and 570 tons of feed.

The Flour Club of Philadelphia held its seventh annual meeting on Tuesday evening, Feb. 18, in the Benjamin Franklin hotel, this city, when there were about 250 members and their invited guests present.

Sydney Anderson, president of the Millers' National Federation, was present and in addressing the meeting urged closer cooperation between millers' interests and flour brokers. A. Mears, president of the Federated Clubs of America, also spoke.

Notice has been given that at its stated meeting held Feb. 10, 1925, the Grain Committee resolved that the charge for sampling bonded grain be 75c per 1,000 bushels, and in accordance with Rule III, Section 5, of the Grain Rules, the same will become effective 30 days from this date, on Thursday, March 12, 1925.

William D. Edson, produce merchant and head of the firm of Edson Bros., one of the oldest and most prominent of its kind in Philadelphia, died on Wednesday, Feb. 18, in the 64th year of his age. Death was caused by heart disease, with which he had suffered for more than a year past.

We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$9.50@10; do, nearby, \$9@9.75; hard winter straight, \$9.60@10.10; do, short patent, \$10.10@10.60; spring first clear, \$9.25@9.50; do patent, \$9.70@10.20; do short patent,

\$10.45@10.70; fancy spring and city mills patent family brands, \$10.80@11.65.

The flour market continues weak and unsettled owing to the sharp fluctuations in wheat and outside quotations are harder to obtain. The mills, however, are disposed to hold out for full prices rather than force business at the cost of concessions. Buyers for local trade are operating cautiously and mostly for current wants. Export demand is slow and the market is more or less irregular. Receipts for the week ending Feb. 20 were 59,365 barrels; export, 1,383,929 lbs. domestic, in sacks.

The following out of town visitors registered at the Commercial Exchange during the week: M. M. Campbell, Harrisburg, Pa.; E. M. Mounts, Reading, Pa.; D. J. Kennedy, New York City; J. C. Stetser, Woodstown, N. J.; H. P. Bell, Denver, Colo.; Arthur F. Stone, Detroit, Mich.; J. L. Seiple, Chicago; W. F. Houserman, Swatara, Pa.; J. F. Baldwin, Arkansas City, Ark.; S. L. Smith, Salem, N. J.; D. R. Jones, Penzance, England; R. W. Goodell, Minneapolis; R. A. Luby, C. E. Mounts and Samuel Lees, Williamsport, Pa.; W. B. Scott, Woodbury, N. J.; A. Kirby, Medford, N. J.; H. M. Meech, Redwing, Minn., and Thos. Rhoades.

KANSAS CITY.

T. J. Tanner, Correspondent.

The annual convention of the Missouri Farmer Grain Dealers' Association was held in the Coates House, Kansas City, Feb. 23 and 24.

Bison, Kans., reports Hessian fly infestation of wheat fields ranging from four per cent in late sown to 90 per cent in sowings made Sept. 13.

The Kansas City plant of the Corn Products Refining Co. may not resume activity this spring or summer, according to advices received by the local managers.

R. L. Thompson, former sales manager for the Southwestern Milling Co., and later an independent flour broker in Kansas City, died recently in Arizona.

Nearly \$750 has been subscribed by Kansas City grain men toward the purchase of a bronze tablet to contain the names of all members of the Board of Trade who served in the world war.

Visitors at the Board of Trade this week included F. D. Farr, Chicago; R. H. Goddard, St. Louis; Charles Geiger, St. Joseph, Mo.; L. B. Grubb, Topeka, Kans.; E. A. Duff, Nebraska City, Nebr.; L. O. Street, Woodward, Okla., and F. K. Hutchinson, Lawrenceburg, Ind.

Among the exhibitors at the local pure food show this week were the Ismert-Hincke Milling Co., the Larrabee Flour Mills Corporation, the Rosedale Milling Co. the Washburn-Crosby Co. and the Aunt Jemima Mills Co. of St. Joseph. Exhibits were made by each of the large baking companies. The Kansas City Macaroni & Importing Co. also had a booth.

Orthwein-Haynes, Inc., has filed articles of incorporation to do business in Kansas City, dealing in grain and grain products. The firm, incorporated for \$30,000, is composed of Max R. Orthwein, George D. Haynes and Ralph H. Orthwein.

Against the Rail Merger.

In the proposed merger of the Frisco, Katy and Kansas City Southern railroads a new danger to Kansas City grain shipping interests is seen by local exporters and shippers. One who was prompt in voicing a protest was C. W. Lonsdale, former president of the Board of Trade, and present head of the Simonds-Shields-Lonsdale Grain Co.

"Such a combination," said Mr. Lonsdale Saturday, "would eliminate competition in railroad transportation southward and southeastward from Kansas City. It would mean that there would be no competitive rates. Accommodations would be a secondary consideration. Shippers would have to assume the burden of switching charges. Competitive development of the Southwest territory would cease."

When the railroad merger hearing was held in Kansas City in March and April, 1923, Mr. Lonsdale opposed the consolidation scheme as it was outlined. The same roads were grouped, with the exception of the Kansas City Southern.

Cash Grain Markets.

Wheat.—Receipts for the week, 472 cars, as compared with 577 a week ago and 859 a year ago. Hard and dark wheat, which comprised the bulk of offerings, as usual, had a sharp recession at the outset, due to slow flour trade and light mill buying. However, as futures developed more strength and export sales increased, the market gradually recovered and the close showed a net weekly advance of 1@3c, with No. 1 on a range of \$1.74@1.92, No. 2 at \$1.74@1.92, No. 3 at \$1.73@1.91 and No. 4 at \$1.71@1.89. There were very heavy shipments to New Orleans by one large exporting house. The supply of soft wheat, while not large, was in excess of the demand and this variety ruled comparatively weak. Final quotations were 4c lower to

ACCOUNTS SOLICITED

2c higher, as follows: No. 1, \$1.89@1.96; No. 2, \$1.89@1.96; No. 3, \$1.83@1.91; No. 4, \$1.76@1.82. Stocks of wheat in the elevators decreased 700,000 bus. to 9,359,000, against 11,720,000 last year at the corresponding date. Among the good crop reports received from Kansas and other states there were a few indicating failure to germinate and injury from drouth. February has been warmer than common, with little rain or snow. Wheat is turning green everywhere.

Corn.—Receipts, 402 cars, against 498 a week ago and 625 a year ago. The market opened and closed weak, but it displayed pronounced strength during mid-week. There were net gains of 2½¢@6¢ in prices, with mixed up most. Storage interests were the best buyers, but feeding orders showed some increase, attributed to strength in the hog market. There was not much shipping interest for either Texas or northern account. Closing prices were: No. 2 white, \$1.16@1.17; No. 3, \$1.13@1.14; No. 2 mixed, \$1.14½@1.15; No. 3, \$1.10@1.15; No. 2 yellow, \$1.16½@1.17½; No. 3, \$1.10½@1.14½. High moisture samples continued to sell at big discounts under dry corn, but the basis relative to the May future was improved. Local stocks increased 618,000 bus. to 6,943,000, as compared with 1,655,000 last year. Kansas City's territory westward and northward still has a liberal surplus to move.

Oats.—Receipts, 63 cars, against 178 a week ago and 102 a year ago. Price movements were irregular, as in the case of corn, but mainly weak. White oats closed ¼¢ lower, with No. 2 at 52¢ and No. 3 at 50½¢@51¢. Offerings showed a sharp reduction, because the market had fallen out of line with Omaha prices. Some local and shipping demand was noted, but the buying was chiefly for account of elevator people. Favorable weather for sowing caused a better request for red seed oats, which sold as high as 58¢ for No. 2. Local stocks of oats increased 81,000 bus. to 2,577,000 bus., against 1,000,000 a year ago.

Kafir and Milo.—Receipts, 113 cars, against 169 a week ago and 126 a year ago. Manufacturing demand was of the hand-to-mouth character and mostly for silo, but the market responded to corn strength. Top prices were not maintained, but net gains of 6¢@7¢ in kafir and 8¢@11¢ in milo were scored. The closing prices per cwt. were: No. 2 white kafir, \$1.72@1.74; No. 3, \$1.70@1.71; No. 4, \$1.65@1.67; No. 2 milo, \$1.97@1.99; No. 3, \$1.96@1.98; No. 4, \$1.90@1.93. Stocks increased 12,000 bus. to 336,000, against 352,000 a year ago.

BALTIMORE.

Robert C. Neu, Correspondent.

Hay Inspector C. R. Melcher of the Baltimore Chamber of Commerce is confined to his home by illness.

Total stocks of all grains in Baltimore elevators on Feb. 19 were somewhat over 11,000,000 bushels and rye comprised 7,100,000 bushels of this amount.

The name of Frederick W. Senning, steamship agent, is posted on the official bulletin board of the Baltimore Chamber of Commerce as an applicant for membership.

The Swedish steamship "Olson" cleared from Baltimore last week with a full cargo of 50,335 barrels of flour for the Soviet Government of Russia, shipped by the Maple Leaf Milling Co., Ltd., of Toronto, Canada, under the personal supervision of J. George Oehrl, forwarding agent of this city.

The C. A. Gambrill Manufacturing Co., Inc., proprietor of the Patapsco Flouring Mills, Ellicott City, Md., the oldest milling concern in Maryland, is liquidating its affairs, and the mill will be closed as soon as the stock on hand of flour, etc., is disposed of. Morris Shapiro is president of the company.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were N. C. Lindau of Bedford, Mass.; T. T. Perry of Charlestown, W. Va.; F. W. Edstrom of Pittsburgh, Pa.; R. G. Russell of Malinta, O.; J. F. Menges of York, Pa.; Carl Kielsing, grain broker, of Bremen, Germany; H. C. Mergenthaler, New York City.

Baltimore grain interests are naturally highly elated over the decision handed down Feb. 14 by the Interstate Commerce Commission at Washington declaring this port to be entitled to differential freight rates on export and import traffic, both all rail and ex-lake, the reasonableness of which had been attacked by various commercial and civic bodies of Boston and other New England ports, naming Baltimore, Philadelphia and Norfolk as unduly preferred by the class and commodity rates between that part of central territory known as the differential territory. This case represents the seventh direct and indirect attack on Baltimore's differential made by New York and New England interests which, since 1877, have periodically petitioned the Interstate Commerce Commission to wipe out the existing relationship of port differentials. This latest decision, upholding Baltimore's right to the differential, is expected to exert considerable bearing and influence upon the bills recently introduced in the United States Senate by Senator Butler of Massachusetts and in the House by Congressman Garber of Oklahoma, and designed to abolish all port differentials. It is felt here that since the Interstate Commerce Commission is the creature of Congress the latter is hardly likely to pass a bill dealing with a detail of freight rates which is in

direct conflict with a decision of this Commission. The rate on import and export traffic between Baltimore and central freight classification territory is 3 cents per 100 pounds lower than the corresponding rates between New York and Boston and the same freight classification territory. Baltimore's rate is also 1 cent per 100 pounds lower than that of Philadelphia.

"RUDY"—The Mascot of Superintendent J. A. Peterson, of the Western Maryland Railroad.

No, this is not an automatic car unloader, but a picture of "Rudy," first aid to the grain samplers and grain inspectors stationed at the Western Maryland Elevator, Port Covington, Baltimore, Md., and used to carry the numerous grain sample bags from the railroad yards to the elevator laboratory. The bags can be plainly seen hanging astride "Rudy's" back and although this donkey shows every evidence of being well fed, Manager J. A. Peterson of the Western Maryland Elevator vouches for the truth of the statement that "Rudy" has never devoured a single grain sample, having been trained early in the importance of "preserving identity." His only fault is that he is whistle-shy.

The general flour market is quiet, with the trade holding off until forced by urgent needs to make purchases. Under these circumstances there is no volume to the business passing. Prices unsettled. Quotations per 98-lb. cotton or jute sacks follow: Spring patent, \$10@10.25; spring straight, \$9.75@10; hard winter patent, \$9.50@9.75; hard winter straight, \$9.25@9.50; winter patent, \$9.50@9.75; winter straight, \$8.75@9; rye flour, medium to white, \$7.50@9.

MEMPHIS.

George Williamson, Correspondent.

Ed Adams, of the Miller Cereal Mill, of Omaha, Neb., was a visitor at the Merchants Exchange during the week.

E. B. Daniel, of the local branch of the Consolidated Flour Mills, of Hutchinson, Kans., is back from a visit to the home office.

W. L. Robinson, credit man for the local branch of the Southwestern Milling Co., addressed the Memphis Retail Credit Men's Association on Thursday.

Hughie Hughes, associated with the A. L. Goetzman Co., Minneapolis, Minn., was mingling with his friends in the grain trade Thursday, stopping off while touring the south.

Relative scarcity of white corn has caused it to go to a premium compared with other grades, and cash quotations at the week's close were \$1.26 for 3 white, while 3 mixed was \$1.22 and 3 yellow \$1.23. Oats have not been coming so freely and the oversupply is dwindling somewhat. Cash 3 white is quotable at 57½¢@58¢, but buyers are taking only requirements. Cash 3 white kafir is quoted at \$1.80 and 3 yellow milo at \$1.95.

The weather has been favorable for farming operations during the past week, but progress has been confined largely to preliminary work. Plans are being made for increasing acreage to corn and other feed crops, but financial conditions are such that buying of supplies will be only as needed. The large stocks of grain and feed stuffs and the restricted demand causes a feeling of pessimism to pervade trading circles, but it is recognized that business must improve soon as there is so little stuff held.

FORT WORTH.

R. C. Ayres of the Ayres Milling & Grain Co., Plainview, will engage in the grain business here.

The Gateway Grain Co. was chartered with small capital stock by John Davitte, R. C. Ayers and W. L. Goodwin.

The C. M. Carter Grain Co. has incorporated with a capital of \$25,000 by C. M. Carter, Leslie Jenisen and M. D. Johnston, Ft. Worth.

Capitalized at \$25,000, the C. M. Carter Grain Co. has been incorporated at Fort Worth. C. M. Carter, Leslie Jenisen and M. D. Johnston are interested.

The warehouses occupied by Smith Bros. Grain Co. and the Panther City Grain Co. were damaged by fire recently, the loss amounting to approximately \$15,000.

PORTLAND, ORE.

Wilford W. Phillips of this city has been elected secretary of the Hillsboro (Ore.) Chamber of Commerce.

Seed loan money for eastern Oregon farmers is now available for distribution and application blanks are in the hands of depository banks.

As a result of the Chamber of Commerce membership drive 221 applications were received and that organization now has 146 more members than at any previous time in its history.

Portland dealers in oats, through the Merchants' Exchange, have declared their opposition to the proposed changes in the official grain standards of the United States for oats on the ground that the suggested changes would be cumbersome and detrimental to the fine variety of oats raised in the Pacific Northwest.

There was a public hearing at the exchange, presided over by B. W. Whitlock, who is in charge of United States grain supervision on the Pacific coast, and assisted by A. F. Nelson, United States supervisor for the Oregon district.

It was the opinion of the grain dealers here that the changes would tend to open up the grades and permit the delivery of oats inferior to those allowed by the present standards. It was pointed out that western buyers realize the conditions east of the Rocky mountains are different and if the department accepts the proposed alterations and makes them a part of the standard grades, in fairness to the farmers and the trade in general in the Pacific Northwest recognition should be given by designating a class to cover oats grown in this section.

It was recommended that oats should be designated by increased weights per bushel, on extra heavy oats 38 pounds and heavy oats 36 pounds; that the minimum of sound and cultivated oats be increased 2 per cent on Nos. 1 and 2 grades, 3 per cent on No. 3, and 5 per cent on No. 4; that there should be a general lowering of heat damage, wild oats, foreign material and other colored oats, and that if a grade is allowed for western oats only natural oats should come under the classification.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to Feb. 18 as follows:

Portland—	Wht.	Bar.	Flr.	Crn.	Ots.	Hay
1924-25.....	13,304	486	1,250	489	514	1,479

MINNEAPOLIS.

H. A. Paul, Correspondent.

F. B. Stubbs has returned from a business trip in the east.

George Marble, well known Milwaukee grain man, was in Minneapolis Wednesday.

George Cathcart of Winnipeg called on the Minneapolis Exchange floor on Thursday.

B. Loosemore of the Quinn-Shepherdson Co. is back after several weeks spent in Florida.

Walter Foster of the Atwood-Larson Co. suffered a broken arm while cranking his car Wednesday morning.

J. R. Morris of the International Milling Co. leaves this week for the Pacific Coast. He will stop over at Vancouver.

Among the recent visitors in Philadelphia were B. J. Loague, A. J. Oberg, Philip Little, L. C. Groff and M. D. Smith.

E. J. Grimes of the Cargill Company has just returned from a trip through eastern markets, calling at New York and Baltimore.

Benj. H. Woodworth of the Woodworth Elevator Co., of St. Paul, has been elected president of the Minneapolis Civic & Commerce Association.

Joseph Borden and Harry Flow, representing the Fraser-Smith Co. at Granite Falls and Windom, Minn., respectively, were in Minneapolis for the grain dealers' convention this week.

B. L. Simmons has been appointed manager of the grain receiving department of the Quinn-Shepherdson Co. He was formerly manager of the North Dakota State Mill & Elevator at Grand Forks, N. D.

The eighteenth annual convention of the Minnesota Farmers' Grain Dealers' Association was held here on the 17th to 19th, inclusive, at the West Hotel. At its conclusion the Minneapolis Grain Commission Merchants' Association tendered the visiting delegates, who numbered some 500, a banquet at Donaldson's Tea Rooms.

Herman Wernli, well known Minneapolis grain man, has severed his connection with the Grain Marketing Company and has organized the H. A. Wernli & Co. Mr. Wernli is president of the new corporation, which was organized under the laws of the state of Minnesota. Their business will be

principally futures trading and export of barley and durum wheat. Their headquarters are at 56 Chamber of Commerce, Minneapolis, and they are now arranging for eastern offices.

Cash Markets.

Wheat—Continued light receipts still feature the local cash wheat market. Advices from the country do not hold out much of any hope for immediate improvement, and besides this, it will not be long now until the country roads begin to break up and deliveries from first hands will be still further reduced. Good milling wheat was in good demand throughout the week, but elevator quality was rather inclined to be slow sale. Today there were only 87 cars on the tables and mill buyers were anxious for protein content of 12% or better, but had no use for the low protein content. On Thursday there was reported an inquiry from Baltimore for a round lot of No. 1 northern spring at a figure which was within 1 cent of being workable. This sounds encouraging and may mean the start of some real export business out of

this terminal. Local elevator stocks show an estimated decrease of 125,000 bushels for the week. Offerings of durum continue light, even much more so than the spring wheat, and demand is good. Reported that a large lot was worked for export by a local house during the past few days. Premiums for No. 1 hard spring were 2 cents higher on the top of the range since Monday. Today's closing showed: No. 1 hard spring, 1@43c over the May; No. 1 dark northern, 1c under to 41c over; No. 1 northern, 3c under to 35c over; No. 1 amber durum quoted at 5c under to 24c over Duluth May and No. 1 durum at 8c under to 18c over.

Corn—A perusal of the market during the past week shows that there was a steady betterment in the request for lower grade corn. Receivers seem surprised at the continued good run and say that their country connections report the corn as shelling much easier than it did some time

ago. Possibly the cold snap we had some time ago took out enough of the moisture to help matters in this respect. Stocks show an estimated increase of 10,000 bushels since last Saturday. Today's closing figures were as follows: No. 3 yellow, 8@14c under Chicago May; mixed, 16@20c under; No. 4 yellow, 24@27c under; mixed, 24@27c under; No. 5 yellow, 22@27c under; mixed, 27@29c under; No. 6 yellow, 30@32c under, and mixed, 33@38c under.

Oats—Offerings of oats were rather moderate and with a good shipping demand the market was firm to strong right through the week. This shipping demand came from various sections of the country, some being worked into western territory as well. Today's closing figures showed: No. 3 white, 1@1½c under May and No. 4 white, 2@3½c under. Local stocks show estimated decrease of 85,000 bushels since last Saturday.

WINNIPEG.

George H. Meacham, Correspondent.

Trading during the week has been largely professional in character. There has been good buying at times by export interests and the millers, while the selling has been mostly in the way of spreading operations, Saturday's evening up trade left the market little changed. The close was strong on short covering.

Little is heard of the wheat pool these days, but rumor is current that a payment on account will be made in the middle of March, and the amount 40 cents a bushel. If this is the case, a large sum in hard cash will go into the hands of western farmers and general business should benefit.

The statistical position of wheat is convincingly strong. There is a wide difference of opinion as to what is left in farmers' hands to market. The Sanford-Evans statistical service puts the quantity as low as 7,000,000 bushels, while one of those prominent in the Alberta pool estimates that double that quantity is available. Receipts from day to day are light compared with the average at this time and are steadily decreasing.

Some of the big men in the export trade returned during the week from business trips to the east and generally their views are moderately bullish as regards the prices that will be paid for the balance of the old crop. There is, however, considerable difference of opinion. Holders appear confident, and though there is no lack of inquiry for wheat for the opening of navigation, very few contracts have been made. Those who have the wheat look for a premium.

There is much talk of increased wheat acreage in the Canadian west this year. This however is problematical, as very little fall plowing was accomplished. With an early spring and by stubbing in a lot of wheat an increase might be possible. With a late spring the percentage of stubble sown wheat would be very large and the corresponding disappointment in yields large also.

One effect of the high prices will undoubtedly be a lot of bad farming. The ground gained in improved methods during the last two years will all be lost and the reaction will come in the blaming of the seasons for poor crops and the grain trade for falling prices. The farmers' friends who have been silent during the six months' bull market must by this time be impatient to take up their task of saving the country.

Coarse grains have been weak and sloppy during the week. There is a very indifferent demand for oats and the large visible stocks keep buyers cautious. Barley demand has fallen off temporarily. Flax is quiet, but the narrowing of the spread between the cash price and the May indicates a somewhat better consumptive demand. Many predict a bull market for flax in the near future.

LOS ANGELES.

C. G. White, Correspondent.

California has been favored with copious rains the past week and the farmers are all feeling somewhat optimistic and are expecting a good crop.

Arthur Jones, flour salesman of the Sunset Milling & Grain Co., has resigned to accept a similar position with the Los Angeles office of the Washburn-Crosby Co.

Miss Gertrude Rew, of Smith & Scott, Inc., left this week on a vacation, touring the East. Miss Rew will visit Chicago, Minneapolis and Kansas City while in the East.

Miss G. Pettis of the Atlas Milling Co. has been confined to her home the past week with a very severe case of pneumonia. From late reports her condition is very good and we hope to see her in the near future back on the job.

The rains have fallen all around Kings County and the northern part of the country is in excellent condition, remarked Jas. Vandiver, while visiting friends at the stock yards, but the southern portion of the county has been "out of luck" until the past week. Feed is only fair, he says.

Henry L. Goemann, of Mansfield, O., and chairman of the traffic committee of the National Grain Dealers' Association, was a visitor on the floor of the Exchange one day last week. Mr. Goemann is spending the winter at Pasadena and expects to remain in southern California until about the 15th of March before returning home.

Cotton planting in Tulare County this year will total around 2,000 acres, it is believed. Among the first areas to be planted are 200 acres on the W. J. Fulgham ranch, who has leased the ground to experienced cotton growers. They are anticipating a yield of at least two bales to the acre.

The market conditions at this terminal are very unsatisfactory, affected largely by the radical changes on the eastern markets. There is a great uncertainty among the dealers in placing orders for eastern shipments. While the arrivals have been fairly good, it is predicted that there will be a falling off until a more settled condition exists in the middle west. There has been considerable decline in nearly all the grain commodities and No. 3 corn is being quoted at \$2.44 per hundred. No. 2 yellow milo is offered at \$2.40 with no bids and at present is a very slow seller. No. 2 bulk kafir today was quoted at \$2.11 bid and \$2.17½ asked. 45-pound barley is being offered at \$2.35 for spot, while April barley is quoted today at \$2.07½. Utah-

Idaho millrun, \$40 per ton; Kansas bran, \$34; alfalfa meal, medium ground and of good green color, is selling at \$34. Molasses, mixed, \$31. Cottonseed meal remains steady at \$47, while rolled barley has declined \$2 per ton and is selling at \$54. Beet pulp, dried, \$40.65.

SIoux CITY.

Word comes from over the line in South Dakota that grain thieves are busy in that section.

Evidence proffered by the South Dakota railroad commission was submitted Friday afternoon. Direct presentation of evidence by the plaintiffs in the case was completed Friday afternoon and the railroads opened their case on Saturday.

Presentation of the Kansas City evidence by H. Scott, traffic manager of the Kansas City Board of Trade, at the grain rate hearing before Examiner H. J. Markley of the Interstate Commerce Commission was completed Friday morning.

Iowa again comes to the front, this time through the invention of a combined corn picker and husker. The machine may be attached to any tractor and two men can operate it. The inventors are the Mackey Bros. of Odebolt, J. V. Barnard and Dr. T. J. Andre of Schaller.

Dan Kelly of the South Dakota Railroad Commission made a talk to the Columbia Club last Thursday on the subject of this city's freight rates and he said a great many Dakota shippers would send their grain here if freight rates were made reasonable.

PEORIA.

L. L. Eckard, Correspondent.

Oats receipts and offerings were too light to make a market, there being only two cars and no sales reported.

Cattle prices were unchanged with the week's market with grade veal calves selling at \$13.25 down. Receipts were moderate.

Hog prices at the local yards were quoted 10@15c higher with a top of \$11.45 paid for choice heavy hogs. This is the highest price paid for several months at the local yards, which covered two loads weighing 306 pounds average. Light hogs, \$10.25@11.15; mediums, \$11.20@11.35; heavies, \$11.25@11.45; packers, \$10@10.35.

Cash corn at Peoria somewhat draggy and irregular the past week. Receipts have been only moderate, the most of which were from the northwest territory. With 36 cars prices were quoted 1c lower to 1c higher. There was a fair demand to the extent of the limited offerings. Very little Illinois corn is finding its way to Peoria at the present time. No. 4 yellow, \$1.14½; No. 5 yellow, \$1.11@1.13; No. 6 mixed, \$1.08; No. 4 mixed, \$1.12@1.14½.

The new livestock yards at Springfield, Ill., are expected to open about the first of March, according to Ross Strain, member of Strain-Canterbury Co., who have been in the live stock commission business at Peoria for the past 21 years, and will also conduct a commission office at Springfield in addition to their Peoria business. Mr. Strain, who was instrumental in the building of the new yards, states that the business outlook for the new yards is very bright and order buyers and packing house representatives will be permanently located there.

CINCINNATI, OHIO.

George Mosbacher, Correspondent.

W. D. Hopkins of the Mutual Commission Co. visited friends at Milan, Ind., over the holiday.

Charles S. Custer of the Currus Grain Co. spent Washington's birthday at his former home, Indianapolis, Ind.

Charles F. Rice, 76 years old, long identified with the local live stock and retail feed business, died at his home, Norwood, Ohio, Sunday, Feb. 15. Mr. Rice had many friends in the grain trade who mourn his loss.

The oats market was fractionally higher on light receipts and option strength, and the demand limited for ordinary feeding grain, but urgent for heavy weight white, suitable for seed, for which premiums of 2c per bushel were easily obtainable.

The pronounced falling off in the receipts of corn gave the market independent strength and prices ruled from 5@6c higher than a week ago. The demand, though, was slow, and excepting an occasional car of white and yellow to mills, there was little buying for outside account. Industries were practically out of the market and track congestion restricted the demand to some extent from elevators.

Wheat was firm and higher during the past week, but relatively much lower than competing markets, which accounted for the very moderate receipts of 40 cars. The demand was slow for spot offerings and from mills, but some business developed for shipment to terminal markets, principally

cipally to St. Louis, where it was reported an acute scarcity existed. At the close of the week No. 1 red sold at \$1.94 and No. 2, \$1.93 per bushel.

VANCOUVER, B. C.
Morwood Clark, Correspondent.

Grain stocks are piling up here and amount to 3,876,012 bus. against 1,210,966 same time last year.

The Harbor Commissioners have given public notice that they intend to take action under the section dealing with screenings of their by-law No. 135 and dispose of any or all screenings which may have been in storage for more than 45 days.

J. E. Hall, head of the grain section of the Merchants' Exchange, says that the establishment of a cash grain market here is nearing actuality. A meeting of the council of the Exchange will shortly be held and with the advent of a few more representatives of Winnipeg houses it is hoped that something tangible will accrue.

Two new elevators are assured for Vancouver this year. Sites have been purchased on the south shore from private owners, just outside the jurisdiction of the Harbor Board Commissioners. British capital is behind both ventures. Each elevator will be of approximately 1,500,000 bus. capacity; one is for a firm of Glasgow wheat importers, while the other will be under the control of a Liverpool firm. Architects are in the city preparing the plans and the work is expected to start in April or May.

The McMillan Grain Company of Winnipeg has opened local offices in the Exchange building. This is the second large firm to engage quarters within the last few days in Vancouver. Messrs. Stevens & Co., also with head offices in Winnipeg, having previously entered into possession of another suite of offices in the same building. This firm has also opened offices in Regina and Calgary. D. N. Stevens expresses himself as well pleased with the development going on here and expects to be able to make definite announcements in connection with the Vancouver grain market. He stated that a number of other large Winnipeg grain firms are taking an active interest in this port and thinks that several of them will shortly open branch offices here.

After an extended period of idleness the elevator previously known as Woodward's will be operated by the Harbor Commissioners from now on, because the British and Oriental Grain Co. have declined to accept the lease as proposed by the commissioners. While the elevator itself has been capable of accepting grain for months the provision of a marine jetty for berthing ships was a bone of contention between the parties ever since Woodward's discovered that such had not been provided for in the plan of affairs. This has now been constructed by the commissioners and the building will in future be known as No. 3 Government Elevator. It is only a small frame building with 150,000 bus. capacity and at present has 120,000 bus. in store.

Screenings touched \$25 per ton here as compared with \$7 at Fort William. Prairie farmers using the Vancouver route to the world's grain markets receive about \$80 a car more for their grain than they do by sending it via the lakes. On top of the bigger price for screenings is the 4c premium over Winnipeg wheat, which has been set as Vancouver's standard, so that in actual cash the farmer favoring this port has a considerable advantage provided always that his railway haul is not too great. Taking 1,500 bus. as the average car load, with a 10 per cent dockage this means 9,000 lbs. of screenings worth \$112.50 while the same quantity at Fort William would be worth only \$150. About 600 tons of grain screenings are being shipped from Vancouver every week to Messrs. Fry & Company in Seattle.

The high ocean rates out of Vancouver have stultified any benefit which might be derived from the slight reduction in the rail rates and the announcement that the Canadian Government was negotiating a subsidy for certain Atlantic shipping firms and that such subsidy was also to apply to the government's own ships, threw quite a scare to the grain shippers via this port. However, a cable has just been received from Ottawa that certain private shipping firms doing business out of Vancouver and the Canadian government mercantile marine boats sailing from here will be granted subsidies all the way from 12 to 30 per cent. Now on the edge of this there would appear the noise of the government to compel the "wicked shipping combine" to reduce their rates; but such is not the case. The real reason why the government is taking a hand in the game is because while the ships of the shipping combine are securing full cargoes the Canadian government mercantile marine boats sail away with plenty of space available.

Huge deficits appear each year in the balance sheet of the government's mercantile marine accounts and as the shipping combine are likely to sweep the government's boats off the routes, hence the necessity to take a "crack" at the shipping combine, from which the managers of the government owned ships withdrew their moral support; there was a tacit agreement to charge the same rates as the shipping combine—and now the fight is on. In any case, the Canadian taxpayer will have to foot the bill, "subsidy" or "deficit"; but let us hope that the members of the grain trade will benefit by this "storm in a teacup."

ST. LOUIS.

W. F. Lehman was a visitor on the Kansas City Board of Trade last week.

Two cargoes of approximately 500,000 bushels of wheat for export via the gulf were reported from this city last week.

The membership of George H. Capen, of George D. Capen & Co., in the Merchants Exchange has been posted for purchase and cancellation.

A meeting of millers and grain dealers was held in St. Louis last week to consider the proposed general readjustment of freight rates in southeastern territory.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

J. L. Robison has succeeded O. D. Foote as agent at Newkirk for the Arkansas City Milling Co., the latter being transferred to Arkansas City. Mr. Robison has been representative in Newkirk of the Perry Mill & Elevator Co.

E. V. Mashburn, manager of the grain department of the Shawnee Milling Co., has been elected vice-president in charge of training of the Pottawatomie County Council of Boy Scouts.

Work of constructing bins that will increase storage over 200,000 bus. has been started by the Acme Milling Co. This will make the total storage between 400,000 and 500,000 bus. The Eagle Milling Co. at Edmond also has storage under construction that will increase the capacity 125,000 bus.

Among applications received recently by the State Board of Agriculture for permits to sell milled feeds in Oklahoma were the Edgar Morgan Co., Memphis, Tenn.; the Finch Products Co., Kansas City, and the Stewart Milling & Grain Co., Durant; the Baxter Mill & Elevator Co., Vinita; C. D. Campbell, Cyril; Pyles & Miller, Pauls Valley, and the B. & M. Grain Co., Okmulgee, Okla.

A bill has been introduced in the Oklahoma Legislature by Representatives Boyer and Miller of Tulsa forbidding the operation of bucket shops, providing for the licensing of brokers in stocks, bonds, other securities and farm products features, and creating the office of supervisor of brokers. It provides for strict and detailed examination of applicants for brokerage permits and for operation of foreign brokers under State supervision and with the supervisor of brokers as their attorney in fact. The supervisor would conduct examinations of applicants and issue permits and permit the use of wire and radio reports only on approval of the State Banking Department. Permits would be for one year and would bear the words "Under State Supervision." A permit fee of \$100 is fixed and the filing fee of each man-

ager, agent or solicitor would be \$50. A gross production tax of 10 per cent on the business is provided. Four subdivisions of brokerage are made: stocks, bonds and securities, grain and provision futures, cotton future and coffee and sugar futures, each division being assessed \$600 a year as an operating fee.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week, the following gentlemen visited the floor of the New York Produce Exchange: R. G. Cargill of Minneapolis; Sidney T. Smith and Harold Smith, both of Winnipeg; S. J. Mulqueen and T. K. Morrow, both of Toronto; M. Mennel of Toledo; E. M. Walsh, W. Hiss and T. J. Bolger, all of Chicago; and W. A. Rowell of Boston.

It is interesting to note that the Steamer Wynburn sailed from New York to Novorossisk, Russia, with 85,000 sacks of flour, and the Steamer Benrose sailed from Philadelphia for Odessa with 93,000 sacks of flour this week. The Steamer Olson cleared from Baltimore with 70,000 sacks of flour for Novorossisk. This is a total of 248,000 sacks of flour in one week (nearly a million bushels of wheat).

Export business in wheat during the week was not especially brisk, but there was a scattered business in Manitobas, Durums and some American Winter and Spring wheat which in the aggregate amounted to about three to four million bushels in all positions.

Flour Situation.

Decidedly narrow price movements occurred in the flour market this week and accompanying this were small trade operations for local account. While prices were

steady, there were reports of resale operations at from fifty cents to one dollar below mill prices.

The feature was in the export trade, especially to Russia. Buying by these interests was not only in Canadian markets but also in Germany and in the Argentine as well.

Spring Patents were quoted at \$9.25@9.50; Soft Winter Straights, \$9.10@9.50, and Hard Winter Straights, \$9@9.25 per 196 lbs.

NEW ORLEANS.

M. L. Davis, Correspondent.

N. O. Pedrick, general manager of the Mississippi Shipping Co., has returned from a business visit to New York and Washington.

W. B. Goltra of St. Louis is spending several days in New Orleans this week looking after the local end of the Goltra Barge Line.

Stocks in elevator as of today are: Wheat, 1,369,000 bushels; corn, 474,000 bushels; oats, 257,000 bushels; rye, 36,000 bushels. Cars on track: Wheat, 35; corn, 4.

Oscar Cook of the Wyandotte Elevator Company, Kansas City accompanied by Mrs. Cook and Mrs. Gus Stewart, are visitors to New Orleans for the Mardi Gras festivities.

Standard blackstrap molasses is firm at 13c per gallon f.o.b. tank cars New Orleans; light blackstrap is quoted at 14c.

J. W. Mooney, general agent of the Mississippi Warrior Service, has issued a notice calling attention to the resumption of the regular schedule on towns operating from St. Louis and Cairo. Tows will depart from St. Louis the 4th.

throp & Co., A. R. Frank of E. Lowitz &
Co., and W. J. Farrell of Jackson Bros. &
Co.**TRADE OPINION.**American exports of wheat are still far
from our exportable surplus of approxi-
mately 250,000,000 bushels and foreigners
continue to buy with an unusual degree of
discrimination. The market for corn has
been relatively weaker than wheat, in
spite of the fact that primary receipts are
materially smaller than they were last year
at this time.—Bartlett, Frazier & Co.If we were to export 120,000,000 bushels
of wheat from Jan. 1 to July 1 it would
cut our carryover to an amount below 50-
000,000 bushels and would probably justify
\$2 wheat. But clearances since Jan. 1 do
not suggest exports at any such rate. In
fact do not suggest any more than normal
exports, which would run about 60,000,000
bushels for six months, and unless in-**THOMSON & McKINNON**

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITYcreased above that figure we shall not re-
duce our carryover as compared with last
year.—Lamson Bros. & Co.Statistics issued by close observers in-
dicate that supplies of wheat will be am-
ple until the new crop, but a very close
adjustment is possible, dependent upon the
requirements from the other side. Figur-
ing on a U. S. carryover of 50,000,000 bush-
els, there should still be around 50,000,000
bushels in excess of the world's require-
ments on the 31st of July.—J. J. Badenoeh
Co.Foreign crop news, especially from
Russia and Poland, is bullish. The com-
ing month there will be the usual crop
alarms and at current discounts under the
May, July and September do not look
high, especially with no positive assurance
that foreign crops will be good.—Logan &
Bryan.The all-important wheat factor is, how
fast Europe will take the load on this side
and how much will be left for a carryover.
—Pope & Eckhardt Co.A feature of the domestic statistical sit-
uation is the rather sharp falling off in
primary receipts of wheat during the past
week. The visible corn increased 1,548,000
bushels last week, compared with an in-
crease of 1,676,000 bushels a year ago. The
visible normally increases rapidly in Feb-
ruary and reaches its maximum in April.
The visible supply of oats, 75,000,000 bush-
els, is the largest on record, and the rela-
tively light consumption, in comparison
with the supply, is a heavy load on the
market.—Clement, Curtis & Co.**EXPORTS OF HOG PRODUCTS.**The past week's clearance of hog

BOLL WEEVIL WAR.

Col. Harvie Jordan, managing director of the boll weevil control campaign of the American Cotton Association, says that early indications point to an unusually large infestation of weevil in the 1925 cotton crop. The association this year plans to greatly enlarge the scope of its activities against this and other cotton pests in all of the cotton-raising states. "We are preparing for one of the most destructive years in the history of the boll weevil," says Col. Jordan. "Although 1924 was an off weevil year, the pest went into hibernation in larger numbers this winter than ever before, according to the reports which reached the association.

"It is a matter of history that the weevil always has worked the greatest damage to the cotton crop in the year directly succeeding a year when the infestation was light, as it was last year. The high prices of cotton goods for the past several years may be attributed directly to the ravages of the weevil.

"We hope to raise from \$100,000 to \$150,000 in New York to help carry on the fight against this pest and every dollar contributed is an investment which will be returned a hundred fold in the economic saving which results from the efforts to control the weevil."

CLEANING UP GARLICKY WHEAT.

Illinois has been engaged in a campaign for some time to remove the menace of wild garlic and onions in wheat fields. Some of the agencies which have been at work in this campaign include the Department of Agriculture, University of Illinois, and Illinois Millers' Ass'n. A heavy loss is sustained by farmers who have garlic in their wheat as it must be sold at a sharp discount under wheat free from this weed.

NEW FINANCING FOR BUFFALO ELEVATOR.

It is generally believed that an important development in the terminal elevator situation at Buffalo, N. Y., will arise out of the new financing undertaken by the Dakota Elevator Corporation. A one million dollar first-mortgage bond issue has been offered the public. The present structure of this company is a steel and concrete elevator, electrically operated, and has a storage capacity of 1,200,000 bus., and is capable of handling 25,000,000 bus. annually.

THE LIBERTY OAT.

A hullless variety of oat named Liberty, originated at the Central Experimental Farm, Ottawa, Canada, has been used for four years in experimental work carried on by Agricultural and Experimental Union, Dr. C. A. Zavitz, in his report of the Union for last year, states that the Liberty gave good satisfaction in the experiments throughout the province and also on the college plots. The average yield during the past two years was 34.14 bushels to the acre, standing in fourth position in the varieties tested. The Liberty oat being without hull is particularly suited to the feeding of poultry, especially young birds, and when ground is excellent feed for young pigs. It is a stiff-strawed variety, yield an average of about one and one-third tons to the acre.

AUSTRALIAN WHEAT CROP.

The Australian wheat harvest is nearing completion and the forecast of 162,000,000 bushels received by the Department of Agriculture from the International Institute of Agriculture at Rome, is the highest production recorded in history with the exception of the year 1915-16 when the crop amounted to 179,000,000 bushels.

On the basis of the acreage reported as reserved for grain a production of 162,000,000 bushels indicates a yield of 15 bushels per acre. This is well above the average of 11 bushels for the preceding 10 years, but it does not reach the yield of 16 bushels per acre reported for the year 1920-21.

Present high prices prevailing in the world's wheat markets make it seem probable that exports from Australia during the crop season Jan. 1 to Dec. 31, 1925, will show an increase corresponding to the increase in crop production, the department says. From a crop of 125,000,000 bushels produced in 1923-24, about 76,000,000 bushels were exported during the year ending Dec. 31, 1924.

With an increase of 37,000,000 bushels in production this year over last the actual exports during the year 1925 may exceed 110,000,000 bushels.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER

CHEAP HOG GAINS.

Although corn costing one dollar a bushel was used in the feeding operations, a prominent Missouri feeder reported that with the use of pasture, shorts, and tankage the feed cost of pork gains this season was kept down to \$5.98 a 100 lbs. The results show that by proper feeding methods with healthy hogs a 100 lbs. of gain can be made for approximately six bushels of corn, a saving of four bushels of corn as compared with less scientific methods.

Price-Current Grain Reporter: Mr. J. K. Mullen, president of the Colorado Milling and Elevator Co., Denver, Colorado, suggests that every new elevator constructed should have an opening about eight inches square on the outside of each outside bin and about five or six feet from the ground and similar holes in each bin discharging to a tunnel or basement. His idea is that a very large salvage may be obtained on grain if the base of the elevator is surrounded and the tunnel of the elevator filled with grain, and he is perfectly right in his position. Fire will not burn down into the top of the pile more than a few inches and if water is kept off from the wheat the salvage is very valuable.

Elevators not provided with such slides should keep an axe for the purpose of cutting such holes and the operator should determine in advance what bins will be opened and how.

Mr. Mullen bases his suggestion on the Salvage obtained from the elevator which burned in Farmers Spur, Colorado. When the manager heard of the fire he hired a fleet of motor trucks and a crew and cut holes in the sides of the elevator permitting the wheat to flow out into the motor trucks thus saving a large part of the wheat. Even though they had not had the trucks available the salvage would have been very much greater.—*Mutual Fire Prevention Bureau, Eugene Arms, Mgr.*

Feb. 20.....	38	7	9	43	10
Feb. 21.....	40	2	17	21	23
Total	250	26	103	248	156

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Feb. 16....\$0.96@1.03	Feb. 19....\$0.94@1.02
Feb. 17.... .95@1.00	Feb. 20.... .95@1.02
Feb. 18.... .95@1.02	Feb. 21.... .95@1.02

Receipts of barley at Chicago for week ending Feb. 21, 1925, were 222,000 bus., compared with 278,000 bus. same week 1924; shipments, respectively, 94,000 bus. and 94,000 bus.

BARLEY MARKETS.

MILWAUKEE.—Demand for barley was slow in the Milwaukee market during the five days including Friday, Feb. 20, and quotations closed from unchanged for the better grades to 1 cent down for the low. Low grades, including black oats mixtures, tended to be dull and neglected but with receipts light all offerings were absorbed by the shippers and maltsters. Receipts for the five days were 133 cars as compared with 213 the previous week, which contained only five active days. Choice to fancy, 48 to 50 lb. test, quotable at 99c @ \$1.01; fair to good, 44 to 47 lb. test, 94@99c; light weight, 40 to 43 lb. test, 90@95c; feed, 85@93c. Iowa quoted 90c @ \$1.01, as to quality; Wisconsin, 90c @ \$1.01; Minnesota, 90c @ \$1.01; Dakota, 90c @ \$1.00; feed and rejected, 85@93c.

KANSAS CITY — Barley receipts this week were 3 cars; the same as a week ago. There was a very light shipping demand, as reported by handlers. Most of the grain went to store, which fact is reflected by an increase of 3,000 bus. in local stocks. Prices advanced 1@3c per bushel. No. 3 closed at 94@97c and No. 4 at 92@93c. The grain was in sympathy with strength of corn and kafirs. Elevators hold 9,000 bus., against 318,000 a year ago. The sowing of barley begun, according to an official report.

CHICAGO—Offerings light and demand good. Feeling firm and prices unchanged compared with the sales of yesterday. Local receipts for week, 222,000 bu.; last year, 278,000 bu.; shipments, 94,000 bu.; last year, 94,000 bu. Seaboard had offers from United Kingdom on barley, which were in line. London cables confidence being restored, due to our steadiness, and good buying expected soon. Malting quotably 95c @ \$1.02, with fancy mellow higher; feeding and mixing, 90@94c. Local inspection, 14 cars; shipping sale, 5,000 bus.

DULUTH.—Trading was slow in the barley market here during the last week. Some demand came for small lots by elevators to cover orders, but apart from that little was done. Receipts were 12 cars and prices closed unchanged to 1c up at from 80c to 93c.

MINNEAPOLIS BARLEY.

Trade early in the week was inclined to be rather featureless, but during the closing days a renewal in the demand for malting quality spruced things up considerably and there was a noticeable improvement all along the line. Feeding quality, while not showing the strength of the other, was in fair request. Bulk of today's sales were made on the following basis: 83@95c.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Feb. 21:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 16.....	14	31	7	1	6
Feb. 17.....	6	9	10	7	6
Feb. 18.....	4	12	7	4	1
Feb. 19.....	4	11	..	1	1
Feb. 20.....	2	12	6	4	1
Feb. 21.....	6	5	4	2	2
Total	36	80	34	19	17

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Feb. 21 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 16\$1.47½	\$1.51½	\$1.56½	\$1.56½	\$1.53½	
Feb. 17 1.46%	1.50%	1.53	1.55½	1.50	
Feb. 18 1.46%	1.50%	1.53	1.55½	1.51	
Feb. 19 1.46%	1.52	1.55½	1.55½	1.54½	
Feb. 20 1.51½	1.57%	1.62	1.60%	1.49½	
Feb. 21 1.50½	1.56½	1.60%	1.60%	1.49½	

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Feb. 21:

	Feb.	May.	July.	Sept.
16 1.58½	@1.64	1.35	@1.39½	1.17 @1.20
17 1.55%	@1.59%	1.31½	@1.34%	1.15½ @1.17½
18 1.57½	@1.60%	1.33%	@1.35½	1.15½ @1.17½
19 1.59½	@1.61%	1.35½	@1.37½	1.18 @1.18½
20 1.59	@1.62	1.35	@1.39	1.17 @1.19
21 1.57%	@1.60%	1.34	@1.36½	1.17 @1.18½

Receipts of rye at Chicago for the week of Feb. 21, 1925, were 54,000 bus. vs. 47,000 bus. same week of 1924; shipments were 5,000 bus. vs. 3,000 bus. same week of 1924.

RYE MARKETS.

MILWAUKEE.—The Milwaukee rye market continued comparatively weak throughout the first five days of last week, although as receipts were light all offerings were quickly absorbed. Quotations for the period closed from unchanged to 1 cent lower. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Considerable Wisconsin sold on a forward shipping basis. Choice and dry was scarce and in request. Receipts were 15 cars for the first five days as compared with 39 cars the previous week, which incidentally contained but five active trading days. Market closed at \$1.51½ @1.52½ for No. 2, inside for Wisconsin, ranging at 7@8c under May price.

DULUTH.—The rye market was an uncertain proposition here during the last week as prices flowed and ebbed with the price tendency generally downward in sympathy with the course in the wheat markets. Receipts from the country showed a falling off and no export trade was claimed to have been put through here. Spot No. 1 rye closed 2½c off at \$1.50½.

Rye—Good demand from milling sources, coupled with rather light receipts, made a firm market for good quality rye this week. Poor stuff was in light request, however. Rye stocks show a slight decrease of some 10,000 bushels for the week. Tonight's closing prices were: ½c to ¼c under the May for No. 1 and ½c to 2c under for No. 2.

PHILADELPHIA—Rye flour, \$8.75@9.25 per bbl. in sacks, as to quality.

CHICAGO.—Trade was moderate and market less active. There was a fairly good class of buying at times, influenced in the main by the strength in wheat, also covering by local "shorts." Selling scattered. Seaboard reported export demand was better and that Russia was seeking offers. Car lots were in good demand at 6c under May for No. 2. Offerings light. Local inspection, 4 cars. Seaboard clearances, 200,000 bu.

NEW YORK.—The foreign demand for rye was not keen and total sales of rye for the week probably did not exceed one million bushels in all positions.

DISEASE-RESISTANT RYE.

A new strain of rye, resistant to three of the worst grain crop diseases, has been developed by Dr. E. B. Mains of the Purdue agricultural experiment station. Some difficulty was experienced at first in securing a resistant strain that would also breed true, but after four years' work the new variety is not only constant in its breeding, but re-

sists leaf rust, stem rust, and powdery mildew.

CANADIAN RYE YIELDS HEAVY.

Although the acreage of rye in Canada is only about 3 per cent that of wheat, this crop has done exceptionally well the past season. It yielded well, is grading high, and it has made the largest percentage advance in price. Wheat has been running about 50 per cent above last year's price, oats about the same, barley somewhat better, and rye is selling about double last year's figures.

Beans and Potatoes

LIMA BEAN MARKET HIGHER.

At the present time there still remains of the limas available for shipment only about 200 cars unsold of the California Lima Bean Growers' Assn. stocks, which is an unusually low figure for this time of the year. Jobbers will probably be out of limas and baby limas by the first of the year, and buying will have to be renewed on a large scale at that time.

WESTERN POTATO CROP SHORT.

In the nine large shipping states west of the Mississippi river, the potato crop is only 110,388,000 bus. compared with 113,337,000 bus. last year, and 140,791,000 bus. in 1922, according to the final crop estimates of the Department of Agriculture. For all states, New York is in the lead with an estimated production of 46,620,000 bus. The figures in general increase the crop east of the Mississippi river and reduced the supply west of the river. The total 1924 crop is given at 454,784,000 bus., as compared with 412,392,000 bus. last year.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Feb. 21:

Beans—New York—Dull trade again in all varieties and market in a lifeless condition with values showing no material change, most stocks being held at the outside quotations, though in instances to force sales quotations were shaded, especially on pea beans. California limas held steady. Domestic—Marrow, \$9.75@10.25; pea, choice, hand picked, \$7.15@7.25; pea, screened and prime, \$6.75@7; red kidney, \$10.75; white kidney, \$9.25@9.50; lima, Cal., \$15. Imported, 100 lbs.—Marrow, \$9.25@9.50; white kidney, \$8.50@8.75; lima, mad., 1924-25, \$12.75; 1923-24, \$12.25@12.50; 1922-23, \$9.50. Lima, Europe—Large, \$11.75; medium, \$11.25; small, \$10.50. Peas: Domestic, 100 lbs.—Black eye, \$11; yellow split, \$6.25@6.50; green split, \$8@8.25. Imported, 100 lbs.—Green, Japan, \$6.50@6.75; Holland, \$5.50@5.75; yellow split, \$5.50@6; green split, \$8@8.25. Chick, Mex.—Imperial, \$12@12.50; monster, \$11@11.50; large, \$9.50@10; small, \$7.50. Chick, Alg.—Large, \$7.50@8.

Chicago — Supplies light and demand good; market firm. Per 100 lbs.—Spot navy beans, Mich., choice, \$6.50. Fancy higher.

Minneapolis—Nominal quotations follow: Large white, cwt., \$7; small white, cwt., \$8.25; pink, cwt., \$8.50; limas, \$14.50; blackeye, \$10.50; Mexican red, cwt., \$8.75; red kidney, cwt., \$10.50; Bayo, cwt., \$8; cranberry, cwt., \$8.25.

Potatoes—New York — Maine and state potatoes about demoralized with prices ruling weak; Long Islands barely sustained; Bermudas steady to firm; Cuban sold as quoted. Jersey basket sweets fairly active. Delawares about steady. Me., bulk—180 lbs., \$2.50@3; carlots, cwt., \$1.15@1.30; 150 lb. sk., \$2@2.40. State, bulk—180 lbs., \$2@2.35; 165 lb. sk., \$1.80@1.95; 150 lb. sk., \$1.50@1.75. L. I., bulk—180 lbs., \$3.25@3.50; 150 lb. sk.,

GOOD HOUSE
TO SHIP YOUR
POULTRY, VEAL, EGGS, BUTTER
POTATOES
Write Us—**COYNE BROTHERS**
119 W. South Water St. CHICAGO

\$1.50@3; 3 bu. sks., \$2.75@3; Jy., bsk., \$1.25@1.50. Bermuda, bbl.—No. 1, \$14@15; No. 2, \$12@13; No. 3, \$8@9. Cuba—Crate, \$3@3.25. Sweet—Jy., bsk., \$1@3.50; Del. and Md., bsk., \$1@2.65. Yams—S. C., bbl., \$5.50.

Chicago—Market steady to 5c lower. The trade was somewhat slow, due to milder weather, and most of the regular buyers were inclined to hold off. Demand was largely confined to buying to fill some urgent orders and price concessions were necessary to effect sales. Receipts for week were 341 cars, against 424 last week and 341 last year. Bulk, per 100 lbs., Wis., \$1.20@1.40; ordinary and poor, \$1.10@1.15; round white, sacks, Wis., \$1.20@1.30; ordinary and poor, \$1.10@1.15; do, Minnesota, \$1.10@1.25; Idaho russets, \$2.50@2.60; early Ohio, sacks, Red Rivers, \$1.40@1.50.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

News of the Country Grain Trade

CALIFORNIA.

Esquon, Cal.—A rice warehouse collapsed recently, account of faulty foundation.
Los Angeles, Cal.—The Farmers Grain & Mfg. Co. has repaired or replaced its building and machinery following its \$5,000 loss by fire, which was fully covered by insurance.

CANADA.

Winnipeg, Man.—The Canada Malting Co. will add 500,000 bus. to its present local plant.
Holdfast, Sask.—It is expected that the Province Grain Co., Ltd., will rebuild its elevator.
New Westminster, B. C.—Penfold & Ryan has installed complete cleaning and drying equipment in its new "hospital elevator" which is nearing completion.
Halifax, N. S.—The E. G. M. Cape Co. has been awarded the contract for the erection of the new government elevator, the cost of which is estimated at \$600,000.

COLORADO.

Logan, Colo.—The Western Wheat Co., Sterling, Colo., has purchased the elevator formerly owned by the Farmers Grain & Supply Co.
Lamar, Colo.—The Denver Alfalfa Milling & Produce Co. has exercised an option to buy properties of the Superior Milling Co. in northern Colorado.
Colorado Springs, Colo.—The Robinson Grain Co. has completed its 12,000-bu. bean recleaning elevator, which has 100,000 bus. storage capacity and cost \$20,000.

IDAHO.

Oakley, Ida.—The Oakley Milling & Elevator Co. has increased its capital stock from \$15,000 to \$75,000.
Rathdrum, Ida.—Rathdrum Grain & Supply Co. has increased its paid up capital stock by selling \$4,600 of stock at par value of \$100 per share.

ILLINOIS.

Speer, Ill.—W. D. Bradley has taken over the Speer elevator.
Bartlett, Ill.—Herman Fenz has sold the Bartlett Feed & Lumber Co.
Schrodt (Mt. Carmel p. o.), Ill.—A 10-ton Howe scale has been installed by E. R. Snyder.
Highland, Ill.—N. L. Malan succeeds Bert Gruenfelder as manager of the F. M. B. A. Elevator Co.
Holcomb, Ill.—Robert P. Sheaff has recently improved his elevator through installing a new electric motor.
Littleton, Ill.—Paul Applegate was again appointed manager of the Farmers Grain & Supply Co. following its reorganization.
Sullivan, Ill.—A branch private wire office has been opened here by the Beach-Wickham Grain Co., managed by H. Ledbetter.
Owaneco, Ill.—A 30,000-bushel cribbed elevator will be erected for the Farmers Elevator Co. and the contract will soon be placed.

Decatur, Ill.—Lloyd W. Snerly has been elected president and treasurer of the Decatur Terminal Elevator Co. following the resignation of Robert I. Hunt.
Alta, Ill.—Geo. Saathof has secured the contract for the Farmers Elevator here, a 25,000-bushel house with up-to-date machinery including a Richardson scale.
Bridgeport, Ill.—A. P. Cooper of the Cooper Commission Co. was recently declared bankrupt. His business has included feeds, seeds, coal, salt and farm implements.
Springfield, Ill.—A tax on grain futures in Illinois has been introduced by Senator Harold C. Kessinger of Aurora. The proceeds would go to the common school fund of the state.
Delavan, Ill.—The Farmers Elevator Co. has incorporated with a capital of \$30,000 to handle grain, coal, lumber, building materials, etc. Incorporators: R. B. Orndorn, Harry M. Wood, Henry W. Pawson, Conrad W. Tammeus, Patrick Murphy and W. H. Baldwin.

Foosland, Ill.—The following officers were re-elected by the Foosland Grain Co. at their annual meeting: President, W. S. Hinton; vice-president, P. R. Anderson; secretary, H. A. Beasley; treasurer, S. F. Gibbens. Directors re-elected: Chris Warsaw, William Shields, E. W. Bright, W. S. Hinton, H. A. Beasley and P. R. Anderson. A 5 per cent dividend was declared.

INDIANA.

Charlottesville, Ind.—A new hammer type feed grinder has been installed by the Reeves Grain & Fuel Co.

Mitchell, Ind.—Heise Bros. & Co., dealer in flour, feed, hay and grain, has enjoyed a good trade this spring.

Bedford, Ind.—Chas. Ragsdale & Co., handling feed, seeds and flour, reports a good business in both retail and jobbing trade.

Morristown, Ind.—A 10-ton truck scale has been installed by the Morristown Elevator Co., also electric motors and other new machinery.

Fairland, Ind.—The Wm. Nading Grain Co. has installed a large hammer type feed grinder with cyclone attachments, operated by a 40-h.p. motor.

Flora, Ind.—The new name for the McCorkle Bros. & Riley grain elevator is Hugh McCorkle & Co. Hugh McCorkle is now the sole owner.

Poneto, Ind.—The Poneto Grain Co. has organized with \$31,000 capital, of which \$16,000 is common stock; J. U. Osborn, W. A. Huffman, E. N. Cassell, Ed Terhune and J. F. Minnich.

Francisville, Ind.—Rep. M. P. Hill has been appointed vice chairman of the grain committee for Illinois and Indiana of the Midwest Regional Advisory Board, an organization of grain dealers.

IOWA.

Montour, Ia.—L. J. Branson will carry on a produce, feed and flour business.
Council Bluffs, Ia.—Additional storage for 800,000 bus. will be added to the Chicago, Rock Island & Pacific R. R. plant.

Hinton, Ia.—At the annual meeting of the Hinton Co-op. Elevator Co., Directors G. E. Held and Julius Muecke were re-elected.

Payne, Ia.—Fire destroyed the Good Bros. elevator causing a loss between \$13,000 and \$14,000, also destroying 800 bus. of oats, 700 bus. of wheat, and 200 bus. of corn.

Clinton, Ia.—H. J. Bergman of the Bergman Millfeed, Inc., Minneapolis, will reside here and given personal attention to the Hawkeye Feed Co., Inc., of which he is president.

Fairfax, Ia.—Bids for the purchase of the Farmers Grain Co. elevator and equipment will be accepted on or before Feb. 28, same to be mailed to the Farmers Grain Co., Inc., Fairfax. The building is located on leased land.

KANSAS.

Salina, Kans.—The Baber grain elevator was slightly damaged by fire.

Ashland, Kans.—Wallingford Bros. has installed a Kewanee all-steel truck lift.

Mineola, Kan.—The Security Elevator Co. has installed a Kewanee all-steel truck lift.

Mitchell, Kans.—Charles O'Neill now owns and operates both elevators at this place.

Great Bend, Kans.—F. C. Wegener, a former grain man of Winona and Rock Creek, died at the age of 64.

Satanta, Kans.—The Satanta Elev. Co. has installed a Kewanee all-steel truck lift, standard model, single outfit.

Anthony, Kans.—A. B. Minschall, age 50, prominent grain buyer, killed himself at his home here. No reason is given for the act.

Clayton, Kans.—The Robinson Mfg. Co. has installed Kewanee all-steel truck lifts, standard model, single outfit, at Clayton, Park and Bogue.

Turon, Kans.—The Raines Grain Co. has a two-year lease on the Farmers Elevator here and also has a lease on the South Elevator at Turon.

Manhattan, Kans.—Dr. C. O. Swanson, head of the department of milling industry at the college, has planned the remodeling of the college mill.

Pittsburg, Kans.—O. Q. Marsh and Willis Pereaue will have charge of an elevator and agency of the Newton Milling & Elevator Co. which is being built at this place.

Hutchinson, Kans.—Work will begin shortly on the proposed addition of eight new concrete storage tanks at Mill B of the Wm. Kelly Flour Mills Co. Its wheat storing facilities will be increased by 250,000 bus.

Harper, Kans.—Officers of the Harper Milling Co. were elected as follows: C. M. Jackman, president; S. D. Jackman, first vice-president; W. F. McCullough, second vice-president; R. W. Magill, secretary; W. M. Stillwell, treasurer. These men were also elected directors together with C. A. Jordan and J. E. Leathercock.

Members: Grain Dealers' Nat'l Assn., Kansas City Board of Trade.
KANSAS CITY, MO.

KENTUCKY.

Olive Hill, Ky.—Fire completely destroyed the Olive Hill Milling Co.'s plant, owned by F. R. Fultz, at a loss of about \$10,000.

MAINE.

Portland, Me.—The Essex Grain Co. has incorporated with capital of 3,000 shares common stock of no par value and \$50,000 preferred. Officers: Charles M. Drummond, president; R. B. Buzzell, treasurer, and Wadleigh B. Drummond, clerk.

MICHIGAN.

Chesaning, Mich.—The Chesaning Elevator Co. has incorporated with a capital of \$40,000.

Lansing, Mich.—Fire, caused by a hot bearing on a double horizontal scourer caused a small loss to the Thoman Milling Co. mill.

Fowler, Mich.—The Fowler Co-op. Elevator enjoyed a large volume of business last year and its indebtedness has been reduced materially. Officers were elected as follows: Theodore Bengel, president; Wm. Simmon, vice-president; Joseph Felspausch, secretary-treasurer.

MINNESOTA.

Brownsville, Minn.—N. Blissen and F. W. Bullmahn, grain dealers, will build a new elevator.

Woodstock, Minn.—Fire, due to a defective chimney, slightly damaged the elevator of John Hoog.

Chokio, Minn.—The Independent Elevator Co., owned by L. E. Eddy, was damaged by fire recently.

Kanaranzi, Minn.—Martin C. Elcan is succeeded by Henry Untiedt, Jr., as manager of the Davenport Elevator.

Farmington, Minn.—The Farmington Feed Mill is remodeling its feed mill. A new attrition feed mill is being installed.

Milan, Minn.—Edward Hagen has been elected president of the Minnesota Wheat Growers Co-op. Marketing Ass'n, succeeding Jorgen Eide.

Kenyon, Minn.—Plans are being made by the Kenyon Commercial Club and the Goodhue County Farm Bureau for the annual South Central Minnesota Corn Show, March 27, 28. E. C. Gates, president.

MISSOURI.

Hamilton, Mo.—On March 1, J. R. Hemry will succeed O. C. Dunlap as manager of the Farmers Produce & Grain Co.

Centertown, Mo.—Plans are under way to rebuild the Mahan milling and elevator building, recently destroyed by fire.

Palmyra, Mo.—The bankrupt People's Mfg. Co. is expected to be taken over by the Knollenberg Mfg. Co. of Quincy, Ill.

MONTANA.

Forsyth, Mont.—Rosebud county produced a surplus of seed corn in 1924. Lists giving the kinds and quantity of corn for sale will be sent to every county in the state and adjoining states.

NEBRASKA.

Trenton, Neb.—The new grain elevator is nearing completion.

Diller, Neb.—The Diller Farmers Grain Co. is contemplating the construction of a new elevator.

Knox, Neb.—The Co-operative Grain Co. has incorporated with \$25,000 common stock at \$100 per share.

Wynot, Neb.—A. H. Hillis, owner of the elevator and stockyards here and those in several other towns on the M. & Q. R. R. will make his headquarters here instead of at Ponca as formerly.

Simonds-Shields-Lonsdale Grain Co.

QUALITY and SERVICE

Kansas City, Missouri

NEW YORK.

Buffalo, N. Y.—Eugene P. Tayntor Grain Co. has incorporated with a capital of \$5,000. Incorporators: P. E. Wolff and C. D. Tayntor. (Attorney, W. C. White, Buffalo.)

NORTH DAKOTA.

Wahpeton, N. D.—Adams Bros. & Co. are repairing and enlarging their elevator.

Stanley, N. D.—The farmers of this community met recently to discuss the forming of a farmers' elevator company and building an elevator.

Bottineau, N. D.—The elevator of J. H. Schreiner has been sold to Carl Gorder, who has been operating an elevator at Crosby. He will take possession April 1.

OHIO.

Oldtown, O.—Fire of unknown cause damaged the DeWine Milling Co. elevator.

Prairie Depot, O.—A McMillin combination wagon and truck dump with a 10 foot extension has been installed by the Prairie Farmers Co-op. Co.

Lima, O.—Farmers in this locality seeded 6½ per cent more wheat this past fall than in the fall of 1923, due largely to Canada's shortage and reduced yields of other countries.

OKLAHOMA.

Imo, Okla.—H. Ames has installed Kewanee all-steel truck lifts at Imo, Lahoma and Kingfisher.

Newkirk, Okla.—J. W. Abbott will erect a 50x140 building for carrying on a poultry and feed business.

Fairview, Okla.—Marvin Burke has bought the interests of G. Thompson in the Fairview Feed & Grain Co.

Minco, Okla.—The El Reno M. & E. Co. has installed a Kewanee all-steel truck lift, standard model, double outfit.

Frederick, Okla.—At a recent sheriff's sale, the Billingslea elevator here sold for \$10,000 and the Burt's Spur elevator brought \$5,000.

Cordell, Okla.—The Oklahoma City M. & E. Co. and the Nelson Grain Co. have installed Kewanee all-steel truck lifts, standard model, single outfit.

OREGON.

Silverton, Ore.—The W. E. Loughmiller feed and flour mill has enlarged its plant.

Medford, Ore.—Morton & Sons of Grants Pass will erect a modern flour mill. Work will begin immediately.

Portland, Ore.—The following officers and directors were elected by the Portland Merchants Exchange: Frank Shull, president; C. E. Dant, vice-president; J. C. Settle, secretary; R. B. Wilcox, treasurer.

SOUTH DAKOTA.

Keldron, S. D.—The Keldron Equity Exchange has installed a set of stock scales.

Madison, S. D.—The Madison Farmers Elevator Co. has built a modern office in its elevator.

Yankton, S. D.—Unless financial aid is given to the farmers, their elevator, recently gutted by fire, will close down.

Sioux Falls, S. D.—The Queen Bee mill, owned by Larabee Co. and valued at more than \$400,000, is being offered at a great sacrifice.

Elk Point, S. D.—The following officers were elected at the annual meeting of the Farmers Union Elevator: John DeBuhr, president; Henry Hanson, vice-president; Andrew Martin, secretary; John Walsh, treasurer.

WISCONSIN.
Kenosha, Wis.—Peter Jacobs & Co. has opened a flour, feed and grain warehouse.
Trade River, Wis.—Fire recently destroyed the Wm. Lindgren feed and saw mill.

Wausau, Wis.—Edward L. Whitmore and O. M. Burg have organized the seed firm of Whitmore & Burg.
Barron, Wis.—The Farmers, Inc., has organized to manufacture flour and feed with capital of \$20,000, by Christ Holmen, A. B. Hoff and Fred M. Arndt.
Mineral Point, Wis.—Albert Johnson, owner of the Martin calf feed factory and store, was killed when he was drawn into one of the machines at the plant.
Bruce, Wis.—Officers of the Bruce Farmers Exchange, incorporated with \$10,000, to operate the Equity warehouse, are: C. A. Swenson, president; B. A. Pinney, vice-president; B. W. Eke, secretary and treasurer; Earl Goff and L. Mattison, directors.

Minnesota Farmer Elev. Men Meet.
(Continued from page 9.)

men that the agreement between the two groups leaves the former owners of the property actually in control of the company's management. In addition, they are in position to resume possession of the terminal properties, now leased to the marketing organization, in case the latter fails to execute its contract in full.

Round Table Discussion.
A feature of the afternoon session was a round table discussion on the question "Shall the farmers' elevator pay a high price at the scale or in annual dividends?" A score of elevator managers took part in the debate, which was spirited and brought out conflicting views, with opinion about evenly divided.

Pool Violates Law.
If the farmers of the state combine in a pool to market a majority of the wheat raised, as the Sapiro co-operative marketing law permits, a new "trust" will be established with a corner on the market, contrary to state anti-trust laws, Thomas J. Mangan told the members.

Mr. Mangan is attorney for William Huggins, Jr., of East Grand Forks, a member of the Minnesota Wheat Growers' Marketing Association, against whom the association brought action on a charge of contract breaking. Mr. Mangan argued the case before the Minnesota Supreme Court, and the decision is expected to determine the relations of the association and its members in all co-operative associations.

Provisions of the marketing law are unconstitutional, Mr. Mangan argued.

Change Association's Name.
John F. Gustafson was re-elected president at the final session on Thursday after the name of the association was changed, by a unanimous vote, from the Farmers' Grain Dealers' Association to the Farmers' Elevator Association.

H. J. Farmer of Arlie was elected vice president after a contest, in which the other candidates were M. H. Rath of Avoca and B. N. Leines of Willmar. Adam Brin of Stewartville was returned to office as treasurer without opposition. Three members of the board of directors, whose terms expired Thursday, were re-elected unanimously. They were President, John F. Gustafson; treasurer, Adam Brin, and S. S. Beach of Hutchinson.

At the final business meeting the delegates adopted, after an hour of debate, a resolution placing the association on record as urging repeal of the clause of the 1923 co-operative marketing act, which makes violation of a grain storage contract a misdemeanor and renders both the farmer who breaks his contract by selling pooled grain and the elevator man who buys it, liable for a fine and damages.

The convention also went on record as favoring enactment by the Minnesota legislature of the bill for state regulation of motor busses and bus traffic. Hearty indorsement of Governor Christianson's program for economy in state government and administration was voted in another resolution.

The United States will be an exporter of agricultural products for years to come, but the American farmer cannot build excessive hopes on increased foreign sales, Dean W. C. Coffey of the college of agriculture, University of Minnesota, said Thursday night in an address at the annual dinner of the association, given by the Minneapolis Grain Commission Merchants' Association at Donaldson's tea room.

"The American farmer is readjusting his program of production," said Mr. Coffey, a member of the president's agricultural conference. "The farmers of the Northwest are improving their situation."

Farmers more and more are turning away from growing products for their own use, he said. For the sake of good living, he said, people on the farms should have their gardens and raise small fruits.

Wyman Welcomes Dealers.
J. C. Wyman of McDonald & Wyman Co., and president of the Minneapolis Grain Commission Merchants' Association, welcomed the grain dealers.

"The farmer elevator company," he said, "is the only type of co-operative marketing that has proved a success over a period of years."

Mr. Gustafson and W. I. Nolan, lieutenant governor of Minnesota, were other speakers.

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Aug. 1 to Feb. 21 (final 000 omitted):

NATIONAL DISTRIBUTION CONFERENCE.

More than two hundred delegates, representing various trade associations and manufacturing and merchandizing activities, together with economists and government officials attended the initial meeting of the National Distribution Conference which was held in Washington last week, and considered at length some of the more complex problems relating to distributions that are now confronting this country.

The tentative program then mapped out includes: (1) The collection of business figures as a means toward accomplishing economies in distribution; (2) trade relations; (3) market analysis; (4) expenses of doing business; (5) methods of distribution; (6) general conditions affecting distribution.

The plan is to give each of these divisions to a separate committee for handling and when all of them have prepared reports, another meeting of the conference will be called.

Some of the men interested in this movement are Secretary of Commerce Hoover, A. L. Filene of Boston, Stanley Resor of Chicago, Robert Ellis of Memphis, Dr. Melvin T. Copeland of Harvard University and Sidney Anderson.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges of the Pacific Coast as of Feb. 21, are as follows:

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Feb. 21, and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.		Shipments.	
	Clov.	Als.	Tim.	Clov.
This wk.....	1,063	192	441	1,681
This sea.....	11,990	5,480	16,279	11,214
Last sea.....	21,135	9,145	9,466	21,196

Stocks in Toledo Feb. 21—Red clover 9,927 bags, alsike 7,976 bags, timothy 17,102 bags. Imports, red clover, 3,670 bags. Exports, timothy, 2,610 bags.

	Clover.	Alsike.	Timothy.
This week.....	300	450	10,073
This season.....	5,650	7,400	6,636
Last season.....	11,800		

ST. LOUIS SEED MARKET.

Quote Timothy—Good country run seed at \$5.80 to \$6; low grade and dark, \$2 to \$4.50. Clover—fairly clean seed at \$25 to \$26 (high grade clean seed worth \$28); slightly weedy at \$22 to \$24; heavily weedy, \$14 to \$20—screenings and tailings less; alsike at \$15 to \$20; alfalfa at \$16 to \$20; red-top at \$10 to \$11.50 for clean seed—chaffy at \$4 to \$8.50; German millet at \$3.75; hog millet at \$2.60, and early fortune at \$2.70 bulk basis.

Stock Peas—Quote whippoorwill nominally at \$4 and new era at \$3.50 per bu.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Feb. 21, pre-

Field and Grass Seeds

TOLEDO SEED MARKET.

TOLEDO, O., Feb. 21.—The clover seed market has been weak again this week. Buying support appears to be lacking and hedges against the cash seed are heavy. The market is in a position to respond very quickly to any cash demand. This same trade will be starting soon and dealers are already making preparations to handle a large volume. Deliveries were not so large on February contracts this week and prime seed has been fairly bought. Old prime is receiving some attention with numerous inquiries from widely separated points. Receipts and shipments were light. The trend from now on is really a cash affair. If the spring trade is up to expectations there is no reason why clover should not advance. Stocks here while fairly liberal could be easily reduced with an active demand. Some buying orders are coming in on the decline and may prevent any further break.

Alsike and timothy are both quiet with a light trade. These two seeds are lower in sympathy with clover but are ready to move upward with some active buying support. Dealers anticipate a good demand for both when the spring season opens up. Some buying of cash alsike this week with off-grade holding steady.

MINNEAPOLIS FLAX.

There was sharp competition for choice flaxseed in this market this week while the poor quality was slow sale. Crushing interests were anxious to get the kind that they needed and were paying up for it. As compared with Monday, when sales were made on the basis of 1c over to 3c under May for No. 1 seed and 1c over to 4c under for "to arrive," today's sales were 3c over at 2c under May for the spot and 2c over at 3c under for the "to arrive."

DULUTH FLAXSEED.

DULUTH, Feb. 20.—Trading was dull and it came within a narrow range in the flaxseed market here during the last week. Operators played closely to the boards in view of the crushers' light buying, and seeming lack of interest on the part of traders who had been prominent on the long side up till the last three or four weeks. On the net result of the five days' operation spot and February seed sold off 1½ cents and the March, May and July futures from ¼ to 1½ cents.

Specialists in the market reported that the weak spot situation is exercising a restraining influence upon trading in futures. It was reported that Winnipeg operators are preparing to shift their holdings offer here after the opening of navigation as shown in their market operations during the last ten days. Stocks at the Canadian head of the lakes and in their elevators over the West aggregate more than 4,500,000 bushels, of which it is expected that the great bulk will seek a market over here.

Specialists also drew attention to the unsatisfactory situation in the Argentine market. The crop down there is now estimated at 50,000,000 bushels, and figures show that European takings of their seed have been only a fraction of wheat what they were a year ago so far this season. Unless marked improvement in European buying of flaxseed develops in the near future, it is being assumed that Buenos Aires prices will be shaded in order to promote the attraction of export trade. On the basis of present prices, it figures out that Argentine flaxseed can be laid down at New York and at other Atlantic seaboard points considerably under the Duluth and Winnipeg basis. The Duluth market however holds the advantage in making shipments to Buffalo and its territory. The shaping up of events in

vious week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	503	778	391	442	338	579
Prev. wk.	530	676	461	325	403	319
1924	352	285	187	243	408	291
1924-25...	30,680	20,138	7,934	4,830	13,357	13,551
1923-24...	27,981	13,325	6,678	4,822	18,350	8,850
1922-23...	27,886	23,653	7,709	6,290	20,281	5,005

Timothy—Quiet and easy. Fair demand exists and offerings light. Fair country run \$5.60@5.85 per 100 lbs., good country run about \$6.00@6.15 and high grades at \$6.40@6.50.

Alsike Seed—Dull. Recleaned country lots \$21.00@23.00 per 100 lbs.

Clover Seed—Firm. Wanted at top prices. Country lots \$24.00@26.75 for 100 lbs., good \$27.50@28.50, choice \$29.00@30.00, fancy \$31.00@32.00 and Mammoth \$27.00@31.00, according to quality.

Alsike—Firm. Average country lots \$20.25@21.00 per 100 lbs. Fair seed \$16.25@17.25 and poor at \$11.50@13.50.

KANSAS CITY SEED MARKET.

KANSAS CITY, Feb. 21.—Seed trade this week was featured by pronounced weakness in cane seed. There were liberal offerings, while demand was limited to mixers, who took the red seed for mixture with milo. At the close all kinds of cane seed were selling at about \$1.40 per cwt., as against \$1.40@1.60 a week ago. Retail prices on cleaned and tested seed for planting were 25@50c above the quotations for country-run seed. Cane seed threshing is not completed. Some farmers are threatening to leave their seed in the head and feed it if prices show a further decline. Planters are showing less desire for seed than a few weeks ago, when the available supply was small. Evidently they are awaiting the bottom level.

Interest in millet seed is fair, but country offerings are light. Carlots, as from first hands, are fetching the following prices, per cwt.: German, \$3.50@4; common, \$2.50@3; Siberian, \$2.30@2.75; hog, \$2@2.25. Resellers ask 50c to \$1 more for cleaned and tested seed.

Sudan grass seed is in fair supply, while demand is slow. It is believed that an ample quantity exists for the season, with a fair percentage still in farmers' hands, especially in Texas. Incoming seed is quoted at \$3.50@4.25 per cwt., but when cleaned it resells for \$5.50@6.

Notwithstanding the high prices, farmers are taking red clover seed freely, as this legume is the quickest and best rejuvenator of worn-out soils. Dealers have little native seed to offer. Retail prices range from \$20 to \$34 per cwt., according to quality. Sweet clover acreage in Kansas is being increased. The seed is offered by Kansas City houses at \$9@13.

Spring-like weather lately has stimulated interest in leading bluegrass seed dealers to believe there will be a good demand. Stocks are liberal. Seed is offered at \$17@28 per cwt.

Timothy seed is slow, with a plentiful supply in the hands of dealers. Seed is offered at \$6@7 per cwt.

Alfalfa seed has a good undertone, with fair carlot buying. The small distributing business will come later. Authorities in Kansas are advising a big increase in acreage. Occasional offers of seed from the country are reported, though it was thought the farmers had sold out. Recleaned seed is selling here at \$15@23 per cwt.

Trade in cow peas and soy beans has not reached the stage of activity, as these articles are not due for planting before laying-by of the new corn crop. Dealers are asking \$4@5 per bushel for cow peas. They are bidding the farmers \$1.65@2.75 for soy beans, with the best figures on Virginia and Black Wilson.

the flaxseed market is being awaited with interest. In the meantime dealers are playing a waiting game.

Receipts of flaxseed at Duluth during five days this week were 19,508 bushels, and shipments were 53,878 bushels, leaving stocks of 719,000 bushels in the elevators.

Closing prices on flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year were:

Legal, Traffic and Arbitration Decisions

NEW COMPLAINTS.

The Board of Trade of the city of Chicago, the Chamber of Commerce of the city of Milwaukee and the Minneapolis Traffic Association have been permitted to intervene in the complaint of the Sioux City Grain Exchange of Sioux City, Ia., against the Ahnapee & Western et al. alleging violation of sections 1 and 3 of the Interstate Commerce Act, on grain and grain products from points in Neb., Minn., and So. Dak., to Sioux City, in discriminating against that city and in favor of Omaha, Council Bluffs, Des Moines, Atchison, St. Joseph, St. Louis, Minneapolis, Chicago, and Kansas City to points in Ark., Tex., Okla., and other states.

COURT DECISIONS.

Receipt conclusive as to Party issuing same. Receipt or storage ticket is prima facie evidence of matter specified therein, and not only prima facie when issued by a warehouseman, but conclusive as to party issuing same, under Rev. Code 1919, §§ 9753, 9759.

Receipts conclusive as to receipts of grain shown thereon. Inaction against surety on bonds of warehouseman to recover value of grain stored in its warehouses, that separate bonds were given on separate buildings did not necessitate a showing which of the bonds covered tickets for grain or which building grain was stored in; receipts being conclusive that warehouseman received grain, in view of Rev. Code 1919, §§ 9753, 9759.

Storage tickets admissible without showing grain was deposited in certain warehouse. In action to recover value of grain stored with warehouseman operating two warehouses, plaintiff's storage tickets were admissible in evidence without a showing that grain was delivered and deposited in a certain one of buildings; it being warehouseman's duty to designate on storage ticket, if warehouses were separate, and neither it nor its bonded security being able to take advantage of its neglect to perform a duty that business placed on it.

Plaintiff can waive tort and sue for money had and received. In conversion, plaintiff can waive the tort and sue for money had and received.

Appellate court must presume corrections of lower court's findings. Appellate court must presume correctness of lower court's findings until its errors are pointed out.

Storage ticket holders, though stockholders of warehouse corporation, may recover for conversion. In action to recover value of grain stored with warehouseman, recovery of holders of storage tickets would not be denied because they were stockholders in warehouse corporation, where there was no evidence or finding that they ever took part in or had knowledge of the shipping of grain by warehouseman out of the state and in converting proceeds.

Bondsman liable for noncompliance with statute. Rev. Code, 1919 §§ 9753, 9759, relating to duties of warehousemen, define their obligations, and, if conditions are not complied with, bondsman is liable. (Supreme Court S. D., Dec. 31, 1924, N. W. Rep. 201-718.)

Additional warranty that feed grinders would grind grain other than that stated in written warranty not implied. Where both buyer and seller were in possession of same information as to work done by feed grinders, and written warranty in connection with advertising matter plainly stated grains that machines would successfully grind, and written warranty undertook to cover all grains that machines would properly

the facts of the case, although the elevator company had the right under the statute to replace the stored grain with other like grain within a limited period.

Storage of grain with agreement to return equal amount in kind constitutes bailment and not sale; elevator cannot pass good title, even to bona fide purchaser, to grain in elevator in less amount than stored grain. Under the statute the storage of grain with an agreement to return an equal amount in kind constitutes a bailment and not a sale; and the elevator cannot pass good title, even to a bona fide purchaser, to grain in the elevator when it is less in amount than the stored grain.

Evidence held not to require finding owners of stored grain consented to sale. The evidence did not require a finding that the owners of the stored grain consented to the sale so that a good title passed.

Emptying of elevator held not to affect right of recovery for conversion of grain. The elevator was emptied of grain before the sale to the defendants. This fact does not affect the right of recovery for a conversion of grain stored before.—(Sup. Court of Minn., Jan. 9, 1925. N. W. Rep. 201-615.)

Feedstuffs

While the feed trade is at present quite badly demoralized prices have now reached the point where the feeders can afford to use millfeed. Undoubtedly the high prices that prevailed for some time forced the farmers to dispose of considerable live stock and we do not believe that demand will be as keen as it otherwise would be.

Country roads are in bad condition but as they dry out a little farmers will begin to buy more freely from their dealers and it is our opinion that as soon as the retail dealers note an improvement in the consumptive demand they will regain confidence and buy for quick and prompt shipment quite freely, but we are inclined to believe that they will hesitate to buy futures.

Our mills are operating very heavily, yet we are finding it possible to keep our production of Palmo midds moving. —*Newsome Feed & Grain Co., E. J. Dougherty, Pittsburgh, Pa.*

DAIRY LEA SOLD TO BORDENS.

An important transaction was closed on the 1st of February covering the sale to the Borden Condensed Milk Co. of the Dairy Lea brand of milk. This is the brand sold for several years through the Dairy League of New York covering territory as far West as Cleveland but mainly through New England and the near South.

It is understood that the Borden Co. contemplate continuing the distribution of Dairy Lea brands where they have been sold and possibly in mixed cars with their own brand "Eagle." It is Borden's policy to push their own brand and the trade feels the Dairy Lea brand will not be actively urged.

KANSAS CITY FEED MARKET.

KANSAS CITY, Feb. 21.—Though dealers expect a good demand for cottonseed meal and cake in March and April, they agree in the statement that present buying is light. There is no doubt that large amounts are being fed as an economic measure against high-priced corn, but many feeders have stocks which were bought earlier in the season, mostly at higher levels than now prevail. Meal and cake are \$1 to \$2 a ton lower than a year ago and \$8 to \$9 below last season's top, while corn is about 40c a bushel higher than in February, 1924. Arkansas and Oklahoma are offering freely, but the Texas mills seem to be well sold up and are also filling export orders. Mill prices are generally 50c a ton lower than a week ago, with even a greater concession in Arkansas. The Texas price is \$35.50, while Oklahoma offers at \$37.50 and Arkansas at \$36. Kansas City handlers have taken off 40c from their carlot quotations and are selling at \$42.60, with ton lots \$4 more.

Linseed meal continues on the downgrade, with a poor feeding demand. Minneapolis mills were said to have offered product this week at \$45 a ton, while resellers quoted \$44.50. These figures are \$1.25@1.50 lower than were asked a week ago. The Kansas City price is \$49 for carlots and \$53 for tons, showing \$1 decline. There is said to be plenty of meal available. It has to compete with cheap wheat feeds, gluten feeds and cottonseed meal.

The recent advance of \$5 a ton in prices of tankage and meat scrap ap-

pears to have been an unpopular move. It cut off the buying to such an extent that manufacturers have resorted to an opposite course in order to stimulate the demand. This week a reduction of \$10 a ton in each product was announced. Now tankage is offered at \$55 in carlots, while ton lots are selling at \$60. The carlot price of meat scrap is \$60 and ton lots are offered at \$65. Reaction of buyers to these cuts is awaited.

In the face of a further decline in hay early this week, alfalfa meal manufacturers reduced prices of the two lower grades of their product 50c a ton, but the upper grades were held firm. Carlot quotations are: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22@22.50; No. 3 or brown, \$21.50@22. Inquiry was limited to April and May deliveries. The larger mills had little to offer for prompt shipment, as they claim to be sold ahead to April 1. According to advices from Colorado, there is no big surplus to move from that region beyond what is under contract.

The local molasses-grain feed mills were employed chiefly in filling orders for horse, mule and poultry feeds. The demand for horse and mule feeds is coming mainly from the South, and it is expected to continue through March and April. Dairy and hog feeds were quiet. There was a reduction of 50c@1.50 a ton in horse and mule feeds. Alfalfa-molasses feeds were unchanged to \$1.50 higher. Poultry feeds were reduced \$1 @2. Carlot prices, per ton, were reported as follows: Dairy feeds, \$37@48; cattle feeds, \$39@46; hog feeds, \$48 @55; pig meal, \$73; horse and mule feeds, \$33.50@45; alfalfa-molasses feeds, \$28@34; scratch poultry feeds, \$50@56.50; mash poultry feeds, \$52@80.

The Kansas City Flour and Feed Club at its annual meeting last week, re-elected the old officers, including Frank M. Cole as president. Mr. Cole has headed the organization for five years. He is manager of the Radial Warehouse Co. and in charge of the Kansas City office of W. P. Tanner-Gross & Co., New York.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, Feb. 21.—The flax market has been influenced by the fluctuations in the price of wheat and other grains, although it has not much in common with them. The violent price changes are disturbing to both crusher and consumer of linseed oil, causing uncertainty in regard to future commitments. The statistical position of flax is unusually strong.

Very little oil has been bought for spring and summer. Stocks of flax in crushers' hands and in terminal markets are being reduced rapidly. Students of business conditions are confident that the future will bring increased activity. If the crushers expect to operate their plants, especially in the West, they must arrange ahead for supplies of flax for the next seven or eight months.

We cannot depend on much help from the U. S. but will probably secure about

three million bushels from Canada. Unless market values change, however, the balance of the Canadian crop will probably go to the Lake Erie mills, and further east. We would not be surprised to see a somewhat similar situation to that which existed last spring and summer, namely, the country relying on the Eastern mills for their supplies of oil and the capacities of these mills were not adequate to meet the demand.

Linseed meal and cake have declined with other cattle foods, and this adds to the cost of oil.

Shipments of flax from the Argentine totaled 776,000 bushels last week, and we are advised there is a better European inquiry in that market.—Archer-Daniels-Midland Company.

CANADIAN FEED MARKET.

TORONTO, CAN.—Greater demand during the past two weeks tended to stabilize feed prices. The hay market is easier.

THE FEED MARKETS.

CINCINNATI.

Cincinnati, Feb. 21.—There was practically no improvement in the mill feed situation here the past week and while considerable bran and middlings were urged on the market at further reductions of \$1.50 for bran and \$2.50 for middlings, buyers showed little inclination to acquire supplies beyond that which was absolutely necessary, and as a result there were many cars unsold from day to day. Mill feeds, however, were not alone to suffer sharp breaks in prices and linseed meal, gluten feed and hominy all registered severe losses. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$28.50@29; hard winter wheat bran, \$28@28.50; standard middlings, \$30@31; soft wheat middlings, \$33.50@34.50; gray hard middlings, \$33.50@34.50; mixed feed, \$31@31.50; No. 1 alfalfa meal, \$30; hominy feed, \$44@44.50.

DULUTH.

Duluth.—Downward revisions in quotations running from \$1 to \$3 came in feeds on this market during the last week. Demand was light with jobbers continuing to buy to cover their immediate needs only. Closing prices per ton follow: Bran, \$23; shorts, \$24; Boston mixed, \$25; red dog, \$37; flour middlings, \$31; No. 1 ground feed, \$39; No. 2 ground feed, \$36.75; No. 3 ground feed, \$34.50; cracked corn, \$43.50; coarse cornmeal, \$43.50; ground oats, \$30.

MEMPHIS.

Memphis, Feb. 21.—Activity continues limited in feeds of all kinds, but the trade feels that prices for some items have reached about the bottom. Cottonseed meal is steadier, but not any higher. Cash 36 per cent is quoted at \$33.50, while 41 per cent is about \$35.50@35.75 and 43 per cent at \$37.75. Hulls are quiet at \$7.50. Alfalfa meal is still nominally \$28@29, but demand is slow. Mill feed is just a shade better than the recent bottom, with wheat bran quotable at \$26 and gray shorts at \$30.50@31.

BALTIMORE.

Baltimore, Feb. 21.—The general wheat feed situation is easier and demand for both wheat and corn feeds is very limited. Gluten feed and hominy feed lower. Alfalfa meal holds its own in price. Dried beet pulp steady. Quotations follow: Spring wheat bran, per ton, 100 lb. sacks, \$33.50@34; Western middlings, per ton, 100-lb. sacks, \$34.50@35; hominy feed, per ton, \$44.50@45; gluten feed, per ton, \$39@39.50; alfalfa meal, per ton, \$32@33; dried beet pulp, per ton, \$38.

PHILADELPHIA.

Philadelphia, Feb. 21.—Supplies of feed-stuffs were moderate but fully ample for trade wants and with liberal offerings of low Canadian bran there is increased pressure to sell and prices are weak and unsettled. We quote carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$33.50@34; winter middlings, \$35@36; spring bran, Western shipment, \$32@33; standard wheat middlings, W. S., \$33@33.50; flour middlings, W. S., \$37@40; red dog, W. S., \$44.50@46.50; low grade flour, W. S., \$56@57; rye middlings, W. S., \$32@33; reground oats feed, \$16@17; fine yellow hominy, W. S., \$44.50@45; fine white hominy, W. S., \$45@45.50; cottonseed meal, 36% protein, W. S., \$42.50@43; cottonseed meal, 41% protein, W. S., \$44@44.50.

MINNEAPOLIS.

Minneapolis, Feb. 21.—The situation here as regards mill offal shows no material change from that of a week ago. The break in coarse grains, the slow but steady progress toward green grass, slight improvement in the matter of flour sales; all of these things have been a depressing influence on the local feed market. Bids from the east are coming in but are so far out of line with the ideas here that it is almost impossible to work any sizeable amount of feed. Buffalo seems to have the call right now and local mills and jobbers cannot meet their figures. Yesterday, however, there came a slight rift in the clouds and handlers were reporting an improved tone to the market. Jobbers are asking around \$22 for standard bran, \$22.50@23 for pure, \$23 for shorts, \$28@29 for flour midds and red dog is quoted in a wide range of \$39@42. Oil meal is noticeably weaker. Crushers who claimed to be well sold ahead a couple of weeks ago were looking for outlets for their product this week and the market broke sharply to \$43.50@45 in carlots.

MILWAUKEE.

Milwaukee.—There was a general decline in feed prices during the first five days of last week as compared to closing quotations on the previous Saturday. Cottonseed meal alone, of those quoted herewith, continued firm and unchanged. Bran showed a decline of 80c@1; middlings, \$1@1.50; linseed oil meal, \$1.50@2; hominy feed, \$4.50@6, and gluten feed, \$3. Closing quotations on Friday, Feb. 20, were: Winter bran, \$25.20; spring bran, \$24@25.50; standard middlings, \$25.50@26; flour middlings, \$30@31.50; red dog, \$37@38; rye feed, \$26@27; linseed oil meal, \$44@46; cottonseed meal, \$39@43.50; hominy feed, \$37@38.50; oat feed, \$10.50@11; gluten feed, 30 days, \$52.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

NEW YORK.

New York, Feb. 21.—Weakness featured millfeed with sharp declines in both western and city. The demand was very small and purchases made by the consumers for shipment from the mills during March at from \$2 to \$3 per ton over current levels apparently has filled their requirements for the present time.

City bran was quoted at \$32; middlings, \$33, and red dog, \$46; while western bran ruled at \$32; middlings, \$33.50, and red dog, \$47 per ton.

OKLAHOMA CITY.

Oklahoma City, Feb. 21.—Millfeeds were in light demand over this territory and many mills have an oversupply on hand. Corn feeds and meal declined in price. Shorts held up normal. Millrun bran sold at \$1.50@1.60; straight bran, \$1.40@1.50; shorts, \$1.70@1.90, and corn chop, \$2.40@2.55. Corn meal brought 78@80c in 25-lb. bags. Flour mills operated at 70 per cent of capacity, largely on filling former orders and export business. Hard wheat short patent flours sold at \$9.50@9.80.

1925 FEED OUTLOOK.

When he was recently asked to express his views concerning the 1925 business outlook, M. L. Barbeau, of S. Howes Co., Inc., Silver Creek, N. Y., spoke very optimistically. Mr. Barbeau, a milling engineer, is considered well posted on all matters pertaining to the feed industry. He says: "Business is sure to be more prosperous than during the past year. Orders for 'Eureka' machinery are being placed freely. We have, too, closed contracts for a number of plant enlargements, made necessary in most cases through trade expansion, but the most pleasing indication of the better business ahead of us is the number of new mills which have been planned to be built this spring. This shows that the owners themselves have faith in the feed industry. Whereas a year ago the feed business was slow in some parts of the country, today we are receiving inquiries for milling equip-

by taking over still another successful concern during the past week. (Public announcement concerning this recent purchase will be forthcoming in our next issue.—Editor.) In less than a year we have made plant investments aggregating more than a quarter of a million dollars, which in itself is the best possible proof that the Howes organization first, last and all the time believes in the milling and feed industries of the United States."

WORLD'S AGRICULTURAL CENSUS.

L. E. Estabrook, of the Agriculture Department, has been selected by the International Institute of Agriculture at Rome to make the world census of agriculture, which is to be undertaken in 1930. This is to be the first attempt at a world survey of agriculture and it is expected that valuable information will be obtained which will enable the principal agricultural countries of the world to adjust production more nearly to consumptive needs.

COLLIS PROCESS PURE DRIED BUTTERMILK

SHOULD BE A PART OF ALL POULTRY MASH FEEDS

Feed Manufacturers who keep in touch with the experimental work conducted by the Agricultural Colleges and Poultry Feeding Experts in the scientific feeding of poultry, realize what a prominent place Dried Buttermilk has taken as part of all Mash Feeds fed.

If you are manufacturing mash feeds for growing, developing baby chicks, egg production in hens and pullets, and for fattening without **Collis Process Pure Dried Buttermilk**, you are doing so contrary to all present day teachings.

Buy your requirements now from the largest producers of Dried Buttermilk in the world.

Buttermilk dried by the Collis Process retains all feeding value and Lactic Acid found in fresh churned pasteurized buttermilk.

Homewood, Ill.

LINSEED REVIEW.

United Kingdom.—The situation in linseed in the United Kingdom during the past week has been rather quiet. The quantities on passage are small and Shippers' offers continue to be firmly held.

Linseed oil has displayed a steady tone. Consumers are still holding-off but their holdings are considered light, and therefore, an improved demand is expected soon. Holland is still offering, but the quantities are smaller.

Cotton oil remains quiet with the consumptive demand rather poor.

India.—Shipments of linseed this week amounted to only 60,000 bushels compared with 112,000 bushels last week. The agricultural outlook is unchanged.

Argentina.—Clearances continue moderate around ¼ million bushels weekly compared with two million bushels at this time a year ago. However, Port Stocks are gradually increasing and now amount to 2,800,000 bushels as compared with 2,400,000 bushels last week, but last year at this time there were about 5¼ million bushels in the stocks at the Ports. Markets generally rule firm with country offers not pressing.

FEEDSTUFF SITUATION.

At this writing mill feeds appear to be a little stronger and prices quoted a little higher than the previous four or five business days. This, no doubt, is due to the fact that the Western mills are on a competitive basis with Buffalo and Canadian mills for shipment into the Eastern territories. Flour shipments out of Minneapolis are averaging a little less than they were a week ago. The consuming demand for mill feeds apparently is unchanged although prices are working to low points that would make one conclude that mill feeds should prove to be a good property for the Spring feeding season at present prices.

MINNEAPOLIS.—Bran, \$23; standard middlings, \$24; flour middlings, \$28; red dog, \$38.50 to \$40.50.

CHICAGO.—Bran, \$25.60; standard middlings, \$26.60; flour middlings, \$30.60; red dog, \$41.10 to \$43.10.

KANSAS CITY.—Bran, \$23; gray shorts, \$28.

ST. LOUIS.—Bran, \$25.40; gray shorts, \$30.40.

ALFALFA MEAL.—Demand unchanged. Supply a little in excess of buyers' interest. Second-hand bag basis, choice, \$28; No. 1, \$26.50; No. 2, \$23.25, Chicago. New bags, 50c a ton more. Fine ground grades \$3 to \$4 per ton premium.

REGROUND OAT FEED.—Considerable sellers' interest for nearby shipment where directions are needed. Many mills discounting nominal prices in order to move a little tonnage. Nominally quoted, reground, \$9 to \$9.50; unground, \$10 to \$10.50; for prompt 30 days. Slight premium of 50c a ton asked for each succeeding month.

HOMINY FEED.—Slightly in excess of the demand. Nominally quoted, white, \$40 to \$40.50; yellow, \$39.50 to \$40. In bulk where available, \$1 to \$2 per ton less.

LINSEED OIL MEAL.—Tone is easier. Demand slight. Nominally quoted sack basis, \$41 to \$42. In bulk, \$2 to \$2.50 a ton less. All Chicago basis.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory. Quotations are as follows: Creamery in carlots at 6½c per lb. and L. C. L. up to 7½c.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop with resulting heavy production of seed and surplus stocks are

the main influences in the market. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Eastern demand is still light, but the drop in prices should stimulate buying. Other sections of the country, however, report a better business. Mixed feed manufacturers have not ordered beyond February shipment, and are only taking the product as it is required. Quotations follow: Gluten feed in bulk \$30 a ton, sacked \$32.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slower but at the lowered prices all packers products should move in increasing volume. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

PLEASURE AND PROFIT FROM RADIO.

Starting but a few short years ago more as a plaything than anything else, the radio has come to be looked upon, by thousands of business men and by many more thousands of farmers as an absolute necessity.

Many of the radio sets first put on the market were somewhat experimental and crude, others were cumbersome and hard to keep in order, while still others were not sufficiently selective, but in spite of all of these drawbacks, and in spite also of the fact that many predicted an early cessation of broadcasting, the number of installations increased at an almost unbelievable rate until at the present time there are tens of thousands of sets in use and broadcasting stations are scattered from one end of the country to the other.

To the average layman there is something almost uncanny in radio.

The turn of a dial brings him the voice of President Coolidge, of Secretary of State Hughes or of some other noted person. Another turn, and he gets a talk by some famous traveler, some expert on health or farming or business economics, while still another turn gives him a sermon by some of our best known ministers.

Music by artists of world-wide fame, and to suit every taste, including "jazz," grand opera, pipe organ, orchestra, quartette, solos and choruses, weather reports, sports, talks on sewing, cooking, marketing, chicken raising and many other things equally interesting and entertaining, help to make a program of sufficient variety to suit every taste, and the remarkable thing about it all is that no smutty stories are ever told, no profanity used and no songs sung that would offend the most fastidious.

To the farmer, perhaps most of all, the radio is of greatest benefit, for by it he is kept in constant touch with the markets of the world, he is given the weather reports and he is furnished a wealth of other information as well as entertainment and amusement, which makes it easier to keep the children on the farm, market all of his crops to better advantage and protect crops, stock, etc., from storms and blizzards.

One of the simplest and yet one of the best and most practical popular priced sets ever put on the market is manufactured by F. A. Holmes & Co., of Waterloo, Iowa.

It is easily installed, easily maintained and so compactly arranged that it can be carried from the house to the office, or the home of a friend, thus combining pleasure with business and giving to young and old such an outlook on life as will be a constant inspiration and delight.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Alfalfa Department

The Price Current-Grain Reporter
There is very little change in the alfalfa hay situation in Southern California. The demand has been very light. Prices have ranged around \$30 per ton f. o. b. cars here.
Recent heavy rains throughout the central portion of the state had the effect of throwing considerable hay upon the market which is now arriving and the demand is light. Consequently, prices have dropped off about \$1.00 per ton, No. 1 hay now being offered at \$29.
Considerable Arizona hay is also arriving. We do not look for higher prices as the new crop from Arizona and Imperial Valley will be ready to market in the next thirty to sixty days.—*Nicholls Grain & Milling Co., A. M. Thayer, Hay and Grain Manager, Los Angeles, Cal.*

Evergreen Farm of Homewood, Ill., noted for the particularly high quality of alfalfa raised, has now gone into the alfalfa milling business. "Jay Bee" alfalfa grinders are operating on choice alfalfa hay and turning out an especially high quality grade of choice fine ground pea-green alfalfa meal. Ample storage is provided and shipping facilities arranged. Inquiries from poultry feed manufacturers and others in the market for particularly choice meal will be promptly taken care of.

QUARANTINE MODIFIED.

Modification of the quarantine law by the California department of agriculture, to permit shipment of alfalfa meal from infested territory of Idaho to California, provided the meal is manufactured in a mill which has been accepted and accredited by the Idaho department of agriculture and accepted as such by the California department, has been announced.

Opposition was made by the alfalfa interests of California by trying to prevent the change, and the California department sent D. B. Maskie, entomologist, and A. C. Fleury, supervising quarantine officer, into Nevada, Utah, Oregon and Idaho to make careful investigation of the conditions.

These men spent several days looking over the mills in Idaho and eastern Oregon and secured a quantity of live alfalfa weevil and put them through mills at several points—demonstrating it was impossible for a weevil to pass through the machine and come out alive.

All meal, to be shipped into California, must be ground, sacked and shipped between November 1 and March 31, which is the dormant period of the weevil. All such meal must be certified and a copy of the certificate mailed to the California office of agriculture at Sacramento. The Idaho department of agriculture will, upon notice from owners, to have their mills accredited, examine and advise the necessary requirements.

INCREASED FACILITIES AT ANTWERP.

The city council of Antwerp has recently appointed a technical commission to consider the ways in which grain handling facilities at the port may be extended. It is understood that new floating elevators will be purchased and that arrangements will be made whereby elevators may be worked day and night, thus relieving to a large extent the congestion which occurs during the heavy grain importing season.

MUCH OHIO GRAIN REMAINS ON FARMS.

Approximately 25 per cent of the 1924 wheat crop and 41 per cent of the 1924 oats crop of Ohio remains on the farms, according to a report by the Ohio Farm Bureau Service Co. The information was obtained from a questionnaire addressed to 400 elevators over the state. No satisfactory estimate could be made of the amount of corn that would move in December.

FARMERS HOLDING HAY.

From fifty to sixty per cent of the hay in Southern Indiana and Southern Illinois is still in the hands of the farmers, the demand is unusually light. Farmers have up to this time been holding their hay for more money than the terminal markets would pay. In last ten days farmers have indicated they would like to sell but at prices from \$1.00 to \$2.00 a ton above what the terminal markets would justify. I do not look for the demand to absorb above ten per cent of the hay in the farmers hands at this time.—*Independent Hay & Grain Co., Evansville, Ind., Jno. K. Jennings, President.*

MONTANA HAY TRADE ACTIVE.

Ranchers in central Montana put up an exceptionally large amount of No. 1 hay this past season, and doubtless this winter will see many carloads shipped from points in the vicinity of Lewistown to western Montana and states to the west where the hay crop has been very short. The Great Falls Hay and Grain Commission Co. expects to open a branch office at Lewistown for the purpose of purchasing hay from the local producers for shipment to other points.

HAY MARKET REVIEW.

The hay market ruled weaker during the week ending February 21 with the moderate receipts fully equal to current needs, states the Department of Agriculture in its weekly hay market review. Mild weather restricted hay consumption and dealers' stocks have been large from the big January run. Markets in consuming sections were reducing their oversupply of hay but trade was only fair. Top grades continued in light supply and found ready buyers but markets generally have been glutted with the lower grades which have been hard

to move even at wide discounts. Prices of poor hay in many markets left a very small return to shippers after deducting the expenses of baling and shipping. With a large percentage of the lower grades in this year's record crop a dull market for this kind of hay was to be expected and farmers should make sure of their market before going to the expense of baling and shipping poor hay.

Timothy was easier at most markets. Receipts at Boston and Cincinnati were ample and the market ruled dull while prices declined \$1 at New York. Timothy was steady at Pittsburgh on light offerings and a more active demand absorbed the increased arrivals at Chicago. Good timothy was wanted at St. Louis, but the market at Kansas City and Minneapolis was barely steady.

Alfalfa continued weaker. Offerings were liberal at Minneapolis and St. Paul. Low grades made up the bulk of receipts at Omaha and prices declined with wet and heating alfalfa selling at wide discounts. Only good quality dry hay was wanted at Kansas City and the lighter offerings were fully equal to current needs. Mills, dairies, and feeders were in the market with Southern markets taking for immediate needs only.

Stocks at some Southern points were reduced with a fair volume of trade. Alfalfa was quiet in California markets with a fair demand. Green feed was growing rapidly and consumers were buying sparingly while holders of alfalfa were making price concessions. The demand for prairie was light at Omaha and prices declined slightly. The market was dull at Chicago and weaker at Minneapolis and St. Paul, although good quality prairie was firm at St. Louis. The stock yards reduced their takings at Kansas City and many cars stood on the tracks without bids. Warehouses bought some hay and the shipping demand held steady but prices worked lower.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

The committee charged with making arrangements for the annual banquet of the Kansas City Hay Dealers' Association will announce the plans and date for the feast at the regular meeting of the directors next Tuesday.

Recent reports as to the probable increase of boll weevil infestation in the Southern cotton fields next summer are a source of uneasiness to some of the Kansas City hay dealers. Others say it is too early to become alarmed. The scare originated in the discovery by experts of an unusual number of live weevils in moss hibernating grounds of Mississippi.

A report from Topeka, based on advices received by the Kansas State Board of Agriculture, says the Kansas alfalfa fields came through the winter in good shape and are showing green. There were few instances of winter damage. Some counties will double their sweet clover acreage, the report says.

Assuming that water transportation is the surest way to hold railroad freight rates down, the Kansas City Hay Dealers' Association is not in favor of dissolving the Kansas City-Missouri River Navigation Co., N. C. Campbell, president of the association, announced this week.

"I believe the declines of this week uncovered the bottom on both alfalfa and prairie hay," said J. A. Brubaker Wednesday. "In both kinds of hay the levels reached meant losses to producers. This will automatically restrict the receipts. Alfalfa made some recovery from the low basis. I expect it to do better from now on, as March and April usually bring a good demand. Prairie is on such a level that it can go but one way, and that is upward."

Prairie hay sold at the lowest level in Kansas City this week since the windrow marketing period. It was so neglected that many cars suffered demurrage. The stock yards' demand was curtailed by inadequate receipts. Cattle and shipping orders were disappointing. This variety of hay is feeling the loss of the old livery-stable demand, which was destroyed by the automobile. The South refuses to learn that prairie is a good substitute for timothy and much cheaper. Unless there is a change in the situation the production of wild hay will become a negligible industry, according to the view of several Kansas City dealers.

Kansas City dealers are becoming better acquainted with the cause of excessive amounts of wet alfalfa hay, which arrived in January and early February, resulting in heavy rejection of shipments to Southern states. Of course, the main reason was defective stacking, which permitted melting snow to leak in. Farmers were wrong in baling this hay before it was dried. There is, at least, one instance of "doping" hay with water in order to increase its weight. This is reported by the Carlisle Commission Co., which bought 12 or 15 cars from a shipper at Delphos, Kan., paying therefor \$20 a ton. The hay passed inspection and was sent South, where it proved to be full of moisture and arrived in a heating condition. This week the company received a letter stating that 25 witnesses would swear they saw the shipper pour two and one-half tanks of water on each stack before the hay was baled. The company has referred the matter to federal authorities and will try to make a case of violation of the pure food and drug act against the shipper. It is thought, also, that the shipper can be prosecuted for using the mails in negotiating the sale of adulterated hay.

CHICAGO HAY NOTES.

There was a good demand throughout the week for good timothy and light mixed, but hay that is stained and damaged is still hard to dispose of.

Albert Miller & Co., say that now is the time to ship in some good hay, as receipts are light and buyers willing to pay top quotations for good hay.

Bridge & Leonard advise that there is an active market for hay of good quality, with some demand for alfalfa and packing hay.

Van Wie & Moorhead report that there is a demand for hay grading good No. 2, timothy or better, but say that receipts must run light for at least a week before there is a real market here.

Walters Brothers state that the demand for good hay is more urgent, with some demand for bedding and packing hay.

HAY MARKETS.

PORTLAND, ORE.

Feb. 18.—Buying prices f. o. b. Portland: Alfalfa, \$19@19.50 ton; valley timothy, \$19 @20; eastern Oregon timothy, \$22@22.50; clover, \$16@16.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

BALTIMORE.

Feb. 21.—On top grades of timothy and choice light clover mixed hay the market is steady, but generally speaking the receipts of hay are ample for all present trade wants and the poorer qualities are hard to move at any price. Straw of all descriptions in limited supply and firm as quoted. The quotations follow: Timothy—No. 2, \$20.50@21.50; No. 3, \$17@19. No. 1 light clover mixed, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. No. 1 clover, \$19@19.50. Straw—No. 1 straight rye, \$19@20; No. 1 wheat, \$16@17; No. 1 oat, \$17@17.50.

KANSAS CITY.

Feb. 21.—A sharp reduction in receipts of alfalfa, a big increase in the prairie movement and a general slump in prices were the features of the week's trade in hay. Total arrivals of hay were 675 cars, or 120 less than a week ago. The receipts were 81 cars larger than a year ago.

The offerings of alfalfa dropped 229 cars and were 337, as against 455 a year ago. At the outset there was a plentiful supply and prices declined 50c@\$.1, with trade slow, especially on the low grades and damaged hay. The situation improved later and on Wednesday there was a recovery of 50c on some grades. A steady market prevailed thereafter. Closing prices were unchanged to \$1 lower than on the previous Saturday.

Prairie hay shippers were unfortunate in dumping 287 cars on the market at a time when demand was poor for any kind except the best quality. The supply exceeded that of the previous week by 121 cars. Prices began to yield on the first day and several recessions followed. A state of demoralization was reached by Saturday, when many cars were carried over unsold and paying demurrage. The week's decline was \$1.50@2.50 a ton, placing the hay on a basis showing certain loss to the country. A let-up in receipts is expected and it is necessary to permit handlers to clear the tracks.

Fifty-one cars of timothy, clover mixed and clover arrived, showing a decrease of 12 from the preceding week's total. Dullness in trade and weakness of prices were evident. The market felt the influence of breaks in prairie and alfalfa. Timothy lost 50c@\$.1 a ton. Clover mixed fell 50c, but clover was unchanged.

The straw offerings were 9 cars, exceeding the demand. Sales at the close were 50c lower than at the beginning of the week and practically that much under the previous week's level.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$21.50@23; choice, \$20@21; No. 1, \$18.50@19.50; standard, \$15 @17.50; No. 2, 12@14.50; No. 3, \$8.50@11.50. Prairie—No. 1, \$8.50@10; No. 2, \$7@8; No. 3, \$5@6.50; packing, \$4.50@5. Timothy—No. 1, \$15@16; standard \$14.50 @15; No. 2, \$13@14; No. 3, \$11@12.50. Clover mixed—Light, \$15.50@16; No. 1, \$14@15; No. 2, \$11.50@13.50. Clover—No. 1, \$15@17; No. 2, \$11@14.50. Straw—Wheat, \$7.

PHILADELPHIA.

Feb. 20.—The market for hay is dull and weak, with former outside prices hard to realize. Offerings are moderate, but fully ample for trade wants. Straw is dull and lower. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$20; No. 3, \$17@18; sample, \$10@15. Light clover mixed—No. 1, \$19@20; No. 2, \$17@18; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$14@15. Heavy clover mixed—No. 1, \$16

MILWAUKEE.

The Milwaukee hay market continued dormant during the past five days. There was no demand and little movement. Current quotations are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

NEW YORK.

Feb. 19.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons	1,292	10
Receipts last week	633	17
Receipts from Sept. 1	31,254	434

Market has ruled about steady throughout the week, with tone a shade easier as new arrivals show an increase toward the close.

Notwithstanding the slow and irregular trading that prevailed, values were inclined to hold fairly well, receivers making slight concessions in instances where circumstances seemed to necessitate.

The bulk of the arrivals at 33rd St., Manhattan, consisted of small bales, a large proportion of which is Canadian, and the increase in offerings on this size has had its effect on small bale values.

Canadian hay, because of its heavier press, is meeting with secondary consideration by the buyers.

At Brooklyn points receipts have been moderate, but the demand there has likewise been very restricted.

Top quotations of \$27, as shown in the table, is very extreme and reached only in an exceptional way for strictly fancy stock.

Straw in light supply, slow call, with prices nominal.

New invoices reported light to moderate.

Federal Grade quotations for large bales: Timothy—No. 1, \$26@27; No. 2, \$24@25; No. 3, \$21@22. Light clover mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Medium clover mixed—No. 1, \$21@22; No. 2, \$18@19. Light grass mixed—No. 1, \$24@25; No. 2, \$21@22; No. 3, \$18@19. Heavy grass mixed—No. 1, \$18@19.

TOLEDO.

Toledo, O., Feb. 21.—The hay trade remains quiet with little demand account of the large amounts on the farm and in dealers' hands. Dealers here are not anticipating any large trade very soon, but predict lower prices unless the crop this year should fall short. Prices have so far held well in face of the dullness and this is regarded as favorable to the trade.

Prices for the past week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13; No. 1 heavy clover mixed, \$12; No. 1 clear clover, \$12; No. 1 first cutting alfalfa, \$16; No. 1 second cutting alfalfa, \$22; No. 1 sound dry wheat straw, \$9; sound dry oats straw, \$9.50, f. o. b. Toledo.

CINCINNATI.

Feb. 21.—There was absolutely no improvement in the hay situation; in fact, the dullness of the past four weeks was more pronounced, and further reductions were recorded for almost the entire list. Shipping interests especially complained of a very poor outlet, due to the inability of dealers in the South and interior to dispose of hay owing to the mild and pleasant weather conditions and anticipated early spring and pasturage. Receipts continue large and offerings, including holdovers, filled the yards to capacity on all days. All descriptions sold slowly regardless of quality, with clover especially dull and sharply lower. Poor stuff of all kinds was unsalable.

Timothy—No. 1, \$17@18.50; No. 2, \$16@16.50; No. 3, \$13@15; threshed, \$10@12; no grade, \$10@12. No. 1 heavy clover mixed, \$15.50@16.50. No. 1 light clover mixed, \$16@17. Clover mixed—No. 1, \$15@16; No. 2, \$13@14.50; no grade, \$10@12. Clover—No. 1, \$15@15.50; No. 2, \$13@14; no grade, \$10@12. Second cutting alfalfa—No. 1, \$23@24; No. 2, \$19@21. First cutting alfalfa—No. 1, \$16@17; No. 2, \$14@16. Sound sample grassy hay, \$12@14. Straw—Wheat, \$10@11; oats, \$8.50@9.50; rye, \$13@14.

BOSTON.

Feb. 21.—Timothy—No. 1, \$28@28.50; No. 2, \$25@26; No. 3, \$18@20; eastern, \$16@28; clover mixed, \$20@24. Straw—Rye, \$21@21.50; oat, \$13@15; wheat, none offering.

PITTSBURGH, PA.

Feb. 23.—The receipts of hay for the last week were not excessive, the demand absorbing most of the offerings of graded hay promptly and there is no accumulation on the tracks and the larger consumers are drawing on their storage, the heavier feeding continues and prices fluctuate with the receipts. Nearby hay is less in evidence as we go to press than at any time in recent months. Timothy—No. 1, \$20@20.50; standard, \$18@19; No. 2, \$15.50@16.50. No. 1 light clover mixed, \$17@17.50. No. 1 heavy clover mixed, \$18@19. Clover mixed—No. 1, \$18@19; No. 2, \$13@14. Clover—No. 1, \$17.50@18; No. 2, \$12@14. Straw—No. 1 wheat straw, \$12.50@13; No. 2, \$12@12.50; No. 1 oat, \$11.50@12; No. 2, \$11@11.50; No. 1 rye, \$13@13.50; No. 2, \$12@12.50. Receipts of hay, 127 cars; receipts of straw, 8 cars.

MINNEAPOLIS.

There has not been a great deal of change in the hay situation here during

the past week. On the basis of today's trades: No. 1 timothy sold at \$17; No. 2 at \$16; No. 1 upland, \$16; No. 2, \$14.50; No. 1 midland, \$12; No. 2, \$9.50; No. 1 alfalfa, \$21; No. 2, \$14.

MEMPHIS.

Feb. 21.—The hay situation continues very unsatisfactory and prices have continued to ease as a result of the limited demand and the large stocks on hand. Prices are more or less nominal because of so much being on track. The committee at the Merchants Exchange quote: Timothy—No. 1, \$20@21; standard, \$19@20; No. 2, \$17@18. Alfalfa—No. 1, \$27; standard, \$21@22; No. 2, \$18@19.

DULUTH.

Feb. 20.—Demand for hay continued below par with call mainly for the better grades. The off-grades were found difficult to place. Prices were marked down \$1 in timothy, mixed timothy and midlands. Prices per ton follow: Timothy, No. 1, \$15@16; No. 2, \$13@14; No. 1 mixed timothy, \$14@15; No. 2, \$11@12. Prairie, No. 1, \$15@16; No. 2, \$13@14; No. 3, \$11@12. Midland, No. 1, \$9@10; No. 2, \$8; rye straw, \$9; oat straw, \$8.50.

LOS ANGELES.

Feb. 18.—The hay market has remained firm throughout the week with a strong advance on No. 1 oat hay, locally grown. No. 1 alfalfa is selling at \$28@29, No. 2 at \$2 less. No. 1 barley hay steady at \$29, No. 1 oat hay \$34. There has been a normal receipt of hay during the week and dealers report tracks fairly well clear.

When writing advertisers please mention THE PRICE CURRENT-GRAIN REPORTER.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

MEYERCORD "DUPLEX" TRANSFER WINDOW SIGNS

READ FROM
BOTH SIDES

FRONT

Meyercord Duplex Transfer Window Sign as seen from outside the store carrying the Manufacturer's message to the customer as he enters or passes the store.

Double Duty
from a
Single Sign

WE APPRECIATE
YOUR PATRONAGE
CALL AGAIN

BACK

Above is shown the reverse side of the Meyercord Duplex Transfer Window Sign carrying a good-will message from the dealer as seen from inside the store. This sign is designed to catch the eye of the customer as he leaves the store.

DEALERS GIVE THEM
The Most Prominent Positions

Here is a sign that instantly wins the dealer's favor. It reads from both sides—your advertisement on the outside—the dealer's good-will message on the inside. This double duty feature insures it a prominent spot on the door or window—valuable advertising space without cost.

Any design or trademark can be faithfully reproduced in any colors on the front and any desired message on the back. Non-fading oil paint colors are used.

Anybody can put them up, and once applied, they remain permanently for a long time.

These signs tie up with all forms of advertising, identify the store that handles your goods and command attention at the point of purchase. They have every advantage, beauty, long life, large audience and low cost.

Our Service Department and staff of artists will originate new designs, or assist in carrying out your ideas.

Send for samples, sketches and prices without any obligation on your part.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk. 210,000	882,000	272,000	1,364,000	
Wk. ago. 235,000	871,000	256,000	1,362,000	
1924 ... 223,000	1,079,000	273,000	1,575,000	
1923 ... 229,000	953,000	273,000	1,455,000	
1922 ... 224,000	674,000	246,000	1,144,000	

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925 ... 1,786,000	7,510,000	1,929,000	11,225,000	
1924 ... 1,862,000	8,040,000	2,080,000	11,982,000	

CHICAGO PROVISION REVIEW.

CHICAGO, Feb. 23.—The provision trade is unsatisfactory and shows several important changes within the last few weeks. Speculative buying of product is liberal and there has been liquidation by longs with heavy selling by packers and a fairly wide range of prices for the week. It is the impression of the trade that prices of product are out of line as compared with hogs and that product is at least \$1.50 too low, so there is a manufacturing loss. Closing prices as compared with the previous week show lard 2½ to 7½c higher, ribs 60 to 65c higher, and bellies 42½c higher.

Stocks of lard continue to pile up, not only from the make by local packers but also from the outside, as receipts of lard for the past week were larger than shipments, the latter being 5,352,000 lbs., compared with 10,752,000 lbs. last year. Meat shipments of 16,195,000 lbs., compared with 21,187,000 lbs. last year. Stocks of lard on February 15 were

71,622,000 lbs., compared with 49,746,000 lbs. February 1, and 18,270,000 lbs. on February 15 last year. The piling up of these stocks placed the supplies in the show windows at Chicago and the trade is in a position to supply all requirements from every quarter. There is an active call for dry salted bellies and they are not accumulating to any extent. Hams are also moving out well.

"Europe has light stocks of lard," says a packer. Last year they bought too much early in the season, and this year they have taken very little, so that their stocks abroad are small and they are expected to buy more freely from now on.

While prices are high, there are a few packers who take a friendly view of the situation.

Hog receipts have fallen off, but are ample for all requirements. There has been a surplus of pork loins which have been selling very low, packers say, lower in fact than they should be. Prices for the week, with comparisons, follow:

	High.	Low.	Feb. 21, 1925.	Feb. 22, 1925.	Feb. 23, 1925.

Safe, Simple, Practical!

The Strong-Scott Dump works under instant and absolute control at all times. It raises to the full height desired and stays there.

No complicated frame. The extra large cylinder and piston insure rigidity. Working parts shipped completely assembled.

Strong-Scott Pneumatic Dump

Lowest Installation Cost. No expensive concrete foundation required. Hangs directly from scale or may be suspended from drive way timbers. Write for additional information.

QUEHL Grate Door

Replace your old, heavy trap door with this strong steel grate. Easily operated, weather tight, keeps out mud and snow, holds the heaviest loads. Hundreds in use. Simple to install. Write for full information and prices.

WATERLOO, IOWA

THIRD-CUTTING ENDANGERS ALFALFA CROP.

In the northern and middle-western states alfalfa should not be cut the third time, according to L. F. Graber, alfalfa specialist of the University of Wisconsin. Cutting alfalfa later than September 1 is apt to be extremely disastrous, and may result in winter killing. After a late fall cutting there are no leaves and stems to hold the snows of the winter. Because of the weather this year, about two good cuttings are all that could be expected. Although the yield of these

has been better than any in former years, the cutting of the fall alfalfa crop would endanger the next year's production.

EFFECT OF POULTRY EMBARGO

The National Poultry Ass'n met in Chicago Thursday and Friday of last week. Among the matters under discussion was the present difficulty and embargo against poultry shipments. This has made an important difference in the volume of poultry feeds sold for feeding in transit.

Let us carry your Temperature Burdens and Worries

Temperatures too high or too low, caused by human carelessness, work, dreaming and forgetfulness, are causing trouble and can be easily eliminated by Powers Regulators.

Here's what we have done for

For 33 years we have specialized in making and controlling the temperature of AIR, GAS OR LIQUIDS.

1 The president of one of Chicago's largest Bakeries, The Livingston Baking Co., says: "Every important step in the baking of our bread and pastry is automatically controlled by Powers regulators, and we credit the maintenance of our high standard in baking largely to their use."

Only automatic thermostatic control can be relied upon to give uniform results, Day in and Day out.

Headaches from too good a time the night before—girls on the brain—worries over illness at home—none of these things affect a Powers Regulator, but we all know that they do affect workmen.

2 The William Carter Underwear Co., of Springfield, Mass., one of the largest in America, making underwear of wool, silk, cotton and mixtures, had great difficulty in sustaining in their bleaching process the even temperature which is absolutely necessary to maintain quality. Too high temperature would so deteriorate the fabrics that in a single batch of fine quality goods a loss of \$1,000 could easily occur. To avoid this many men were constantly watching temperatures, but even then "seconds" frequently

resulted, cutting seriously into profits. Powers engineers showed them how automatic heat control would remove these losses. The first installation resulted in their equipping the balance of their bleach tubs with Powers regulators.

3 For years a large Fur Dressing and Dyeing firm, C. & E. Chapal Freres & Cie, of Brooklyn, N. Y., lost an average of over \$4,000 a year in furs, because temperature in the drying room would sometimes get too high. Powers engineers analyzed the situation, put in a regulator with compressed air control of steam valves, and such losses disappeared. The regulator pays for itself six times over, every year.

4 By investing \$685 in 6 Powers Temperature Regulators, Lyon & Healy, of Chicago, have increased their profits \$13,173 annually. These regulators are used in lumber dry kilns. Drying time has been reduced 135 days a year; coal saving amounts to \$3,942 a year; \$8,748 loss in spoiled product is eliminated; and there is a sizable saving in labor. These regulators have required no repairs in 8 years.

These are only a few of the hundreds of cases we can cite. We shall be glad to give further particulars to anyone interested.

Nowhere else can such breadth of experience in automatic heat control be found as in the Powers organization. It is real engineering experience, plus an honest desire to solve any problem presented—not by trying to adapt one regulator to fit all conditions, but to supply the machine designed for any particular condition. If one of the 50 already perfected and proved out will not accomplish what is wanted, a new one will be made that will do it.

Make a Month's Trial

Tell us where you think heat control might be a help to you, and we will give you full particulars of our Free Trial Offer, together with prices. If you are not satisfied, after a trial, you will not be asked to buy.

GREAT ACTIVITY AT VANCOUVER.

The past year has been one of great activity in Vancouver, B. C., with a heavy grain movement, numerous elevator projects under construction and contemplated, and the large capital investments made by the Spillers Milling & Associated Industries, Ltd., in Canadian enterprises. A large amount of money has been invested by the Spillers interests in new elevators, and the purchase of existing grain companies. Organization of the new subsidiary company has been announced with the formation of the Vancouver Mills Ltd., with a capital of \$1,486,500, which will include the assets of the old Vancouver Milling & Grain Co. Sir William Edgar Nicholls is chairman of the board of directors, with William Spiller Allen as vice-president, and J. E. Hall is president of the new company.

RURAL ELECTRIFICATION PROJECT.

A typical farm community in Iowa has been selected for a study of the adaptation of electricity for power and light uses on the farm. This community is in the vicinity of Garner, and includes 63 farms. The work will be carried on under the auspices of the state committee on the relation of electricity to agriculture, which in turn is working under a national committee. Similar projects have been started in many states. Members of the state committee include C. E. Hearst, Des Moines, president of the Iowa Farm Bureau Federation; Arthur Huntington, Cedar Rapids, Iowa section, National Electric Light Assn.; Ed Quintus, Garner, representing the Farmers' Cooperative Electric Co.; and Prof. Davidson.

Why a Monarch Is a Profitable Investment

Ovid Roller Mills

Flour, Feed and Coal

THOS. H. HYSLOP, Proprietor
Ovid, Mich.

Sprout, Waldron & Co.,
Muncy, Pa.

Gentlemen:

We have used one of your 20" Monarch Ball Bearing Attrition Mills since September 1911, and during that length of time we have never had occasion to put a wrench on it for making adjustments. The only time it is opened is to change plates. There is no lost motion in the bearings, and we can see no reason whatever why the mill will not last ten years longer. I surely wish that every machine we are running would give us the satisfaction which we are getting from the Monarch Ball Bearing Attrition Mill.

Very truly,

Thos H Hyslop

BUSINESS AND TRADE CONDITIONS

FROM present indications, it appears that President Coolidge will appeal directly to the public after the fourth of March on a definite program now being formulated. The reaction which it receives will afford an interesting test of the President's personal strength as opposed to the individual position of Congressmen and also compared with the combined strength of Congress.

The country is agog in contemplating just what the President will submit, presuming it will be independent of died-in-the-wool party plans. It has been known that he desired a party machine which should be patterned to his own liking, but it is decidedly unusual to submit for popular approval anything of this sort outside of pre-election days and after the people have already chosen their representatives in Congress.

The President has not disappointed those who elected him on the theory (which has proven correct) that he was singly free from irregularities and because he was blessed with an honest, straightforward personality which promised much in public life. Surmise and conjecture may be entirely wrong but it is believed that the President considers his personal strength is worth an attempt to step out to a considerable extent from under the shadow of party control. In this he is admitted to be a politician of the shrewdest and soundest type and it is reasonably safe to expect him to endeavor to retain all that is good in the Republican machine and to cast off its hampering influences.

A week or so back, it seemed that we were to be favored with a post-session of Congress after the fourth of March but this now seems unlikely, for which we are duly thankful.

Advancing Business Not Up to Expectations

The Guaranty Trust Co. of New York, in their business survey just issued, speaks of a perceptible pause in the buying movement as compared with the marked stimulus to business during the first two months following the election. The survey continues:

"There remain, however, ample reasons for the belief that 1925 will be a good year for business generally, even if the high hopes which many have entertained are not fully realized.

"In some important industries prices of finished goods have not been brought into harmony with the costs of materials and labor. These weaker spots restrict very noticeably the progress of general business. In view of the marked revival since last midyear, it appears that the maintenance of sound conditions would be furthered by bringing laggard branches of industry up to the levels of the more prosperous, rather than by further stimulation of those industries which are already operating at the most satisfactory rates.

"Considerable progress has been made in recent months in the reduction of stocks of commodities which for various reasons had grown unduly large. In the copper, coal, petroleum, hide and leather industries, for example, the gradual consumption of excess stocks has resulted in a more stable basis of continuing activity."

Western bank reviews take an even more optimistic view of today's outlook.

Cutting the National Budget

Associated in the news of the day with the salary increases of Congress, now awaiting the President's approval, we read of an effort being made to reduce Governmental expenditures in at least one of the departments, called the "War Frauds Section of the Department of Justice." Senator McKellar of Tennessee has proposed an amendment that would cut the appropriation of this snug but costly bureau for

the fiscal year of 1926 from \$1,000,000 to \$500,000. The war frauds section asked for \$1,750,000.

Commenting on it, the senator said:

"We have employed twenty-six lawyers, most of them high priced, innumerable accountants, one of them getting \$18,000 a year, and we have collected, with all this vast force of lawyers and this array of accountants, \$157,000 in round figures, by way of compromise, and the twenty-six lawyers have tried only three lawsuits, getting judgments of a little more than \$14,000."

All of this reminds us of comment made here a month or so ago relative to the difficulty of reducing

MAY WHEAT AGAIN TOPS \$2.00

WITH another strong wave of public buying, the grain market is again flirting with high record prices. The situation is healthy with just enough difference of opinion to prevent a run-away market.

Snow, Murray and Cromwell issued bullish farm reserve figures on Monday. Snow's indicated only 52,000,000 wheat left for export and carry over, suggesting that we are even now on a domestic basis. Murray's growing wheat figures of 79% of normal compares with an average year of 83%.

Certain rampant bulls on wheat estimate possible advances to extremely high figures. If their expectations are realized, outside trading in large volume will continue and the full grain list, corn, oats, rye, and barley, will be sympathetically carried forward to new "highs."

that part of the National budget which defrays the expenses of special bureaus, commissions or what not.

State Governmental Administrative Costs

It is very generally admitted that few industries or business corporations of any sort can stand on their feet when the same disregard for economy that is shown in most of our state governments exists. The state of South Dakota is to be commended for the present effort towards the consolidation of several departments and bureaus. The population of this state is 637,000, which is no larger than many of our cities, and it is quite apparent that administration duties and employees of other states with a much larger population can be materially cut in such states as South Dakota. The "Business Manager Plan," so successfully conducted in many cities, has equal opportunity for success in state governments, particularly those in many states of the West where the population is small.

Investments

In these days of cheap money there is a tendency to stock the public up with securities of doubtful value. The circulars offering them may appear to be and usually are entirely honest, basing their sales talk upon former earnings, but the buyers all too often fail to diagnose the future of the industry in which the stock contemplated is listed. There are many excellent financial houses unwittingly spon-

soring stocks of this class. The past performance of stocks which have always been large producers does not necessarily promise equal returns in the future—take pianos, victrolas, farm wagons and such like. We often hear the statement made that stocks of any sort can now be marketed in large volume on short order and this is very generally true, but the buyer should beware that his investment is not in the "has-been" class.

Last week's stock market showed continued strength, particularly in leading standard issues. It was surprising that the advance in the Federal Reserve re-discount rate had little, if any, effect on the even course of the market's progress. The firming-up of money has retarded bond sales. Sterling has almost reached par figures of \$4.8648; French and Belgian francs are a trifle over 5c against par at \$0.193, and current foreign exchange for other countries is mainly improving.

Surprising as it may seem at first thought, in French financial circles opinions are divided on the question of restoring the franc to the above mentioned gold value. While no one knows how many partisans each of the two solutions could muster, it is certain that quite a few economists, bankers and manufacturers favor a "devalorization" of the French monetary unit. In their opinion the fluctuations of the franc since the war have been intolerable. On the other hand, the partisans of rehabilitation abhor the thought of legalizing what would virtually amount to a national bankruptcy. Both arguments merit careful consideration.

\$500,000 of Free Advice to Farmers

Another wave of un-asked-for free advice is being spread over the farm belt, suggesting that the future farm leader will be he who is able to show agriculture how to take advantage of industrial needs rather than to continue in the old beaten paths in producing feeds and food stuffs. The implication is that increased production of cotton, flax, hemp and similar products is desirable instead of so much grain, fruits and livestock, all of which brings up certain basic considerations. Our Southern friends, for example, have discovered through sad experience that diversified farming is not always profitable, because unfortunately corn grown in the South has a close affinity to the grain weevil. Cotton grown in localities where the boll weevil has been particularly rampant is likely to disappear over night.

As a matter of fact, real farm students understand full well that diversification has a definite and narrow limitation. The progressive farmer should, and to an increasing extent is, diversifying his grain crops but he is very unwise to attempt cotton production in the North, for instance. Too much "County-Agenting," Congressional farm advice and mis-named leadership should be changed to a natural sane view of every day farm economics, and this should be left to the farmer.

Dickinson Co-operative Marketing Bill

As one of the critics of the Dickinson Bill, which has passed the house, said: "It merely provides for \$500,000 worth of free advice." Its provisions contemplate an appropriation of this sum, to be expended by a board of four members at \$10,000 each and the Secretary of Agriculture as an ex-officio member. Representative Dickinson of Iowa offered his bill as an amendment to the Haugen Bill and the presumed rejection of the measure in the Senate is predicted. This "Dickinson Amendment" is not to be confused

with the Haugen Export Corporation Bill, which is also in the throes of Congressional discussion.

Impending Farm Legislation

Because we may have been fortunate in avoiding actual harmful farm legislation in the present Congress, grain and allied trades should be even more alert during the Summer and in anticipation of Congressional activities next December. It has been out of a similar care-free if not actually careless attitude of mind in the past that much of our legislative ills have arisen.

It is understood that the President is urging prompt action on the report of his Agricultural Conference, thus reversing his presumed easier going former plan. It is believed that Senator Norris and his "ilk" will not find the proposal sufficiently radical, but there is no telling what the outgrowth of this situation will develop by the time of the December assembly. The swing of the pendulum at the moment seems to be opposed to radical farm legislation, in which connection it is reported that Walter Petet, secretary of the National Council of Co-operative Associations, referring to the Dickinson Bill, said that the co-operatives wanted to be let alone and preferred that no legislation at all be passed.

The denunciation by Senator Borah of such representative marketing legislation as the Dickinson Bill is significant. He said it is "indigestible" and affords the farmers no definite relief. In effect, the Dickinson Bill eliminates Governmental supervision and control as was provided in the original Haugen draft, apparently intending that the farmers' co-operative plan shall be the governing motif.

STUDYING OVERHEAD

THE University of Wisconsin, through F. H. Elwell, professor of accounting, has begun a survey to determine the cost of doing business in the retail implement trade, in Wisconsin, and announcement is made that while no one but the experts handling the survey will ever see the original reports, a public report will be made showing total sales, average sales, average overhead and average profit, etc.

Figures very frequently tell an interesting and many times a vital story as is evidenced by the statistical tables printed in this paper, and we are wondering if a similar survey for the elevator trade not only in Wisconsin, but in all of the other grain states as well, might not prove of great value.

There is certainly no other line of business in the country which depends more on statistical data and none that would be more ready to appropriate such as could be used to advantage. Arrangements could unquestionably be made for their compilation, in much the same way as has been followed by the Wisconsin implement dealers.

CONGRESSMEN AT \$10,000

INCREASING the pay of members of Congress may be a wise move, and it will be, if it results in an improvement of the personnel of the legislative department of the government.

That, however, is a matter which is squarely up to the voters. If enough of them are willing to pass by the professional politician, the demagogue and the man who may be popular but who lacks in the necessary qualifications and shall insist that only high grade, level headed, clear thinking men of executive ability be elected to represent them, Congress will become more of a meeting of our board of directors, so to speak, and less of a place for political fireworks, procrastination, obstruction and wire pulling.

From a purely financial standpoint and in contemplating the small percentage of our total budget, the salary increase under discussion is a small matter. This angle of the situation is lost sight of by the country constituents of members, anyone of whom is classed as a plutocrat if said constituent's income reaches \$10,000. On the same basis of reasoning, the

country voter recalls the days when his congressman was "one of us" and unless the chosen representative has indicated outstanding ability to justify the contemplated salary increase, there will be war in camp.

A CLEAN UP MONTH

WITHIN a very short time the country elevators will, for the most part, be practically empty, thus affording the best opportunity for the extermination of rats and other vermin as well as for a thorough cleaning of the premises.

There are, of course, many elevators that are rat proof and there are many more where constant vigilance has meant freedom from this pest, but there are still others, particularly those of wood construction, where rats take heavy toll, and where energetic methods are necessary if losses, just through this one source, do not wipe out all of the profit from elevator operation.

A good cat or a rat terrier dog, is of course, of very great value under such conditions, but frequently the task is too great for either of these and the prudent elevator man will not hesitate to take drastic measures to kill the rats simply through fear that by so doing, the cat or the dog would become lazy or worthless.

Why wouldn't it be a good idea to make May a "clean up" month, in every elevator throughout the land?

SYSTEMATIC FARM WORK

AS a result of a recent conference at Nowata, Oklahoma, a crop program for the entire county has been formulated, the county has been divided up into zones or communities, each in charge of an active committee, and all farm work is to be carried out on a systematic basis.

There are, of course, many other counties similarly organized, but there are many more that are not, and while the program is a big one, and its success depends largely upon the spirit of co-operation manifested by those who will be aided, the greatest difficulty will unquestionably arise through lack of real leadership.

No program of any kind, no matter how carefully thought out it may be, will work automatically, and here, it seems to us, is an unusual opportunity for helpful assistance by some of our country elevator friends.

It will take a lot of time and a lot of hard work, as well as a lot of diplomacy to make that kind of a program successful, but if it does succeed, as it may, the results will repay, in ample measure, every bit of time and thought and money put into it.

INTERESTING THE BOYS AND GIRLS

BOYS from 47 counties to the the total number of 441 were enrolled as Minnesota corn club members last year, and a 14-year-old lad won the first prize with an average yield of 81.4 bushels of dry corn on his 5-acre patch, while another youngster raised 84.6 bushels on a single acre.

Boys' Clubs and Girls' Clubs, as is well known, have been organized in every section of the United States, within recent years, and the results that have been obtained have really been astounding.

Clubs have been organized not only for the growing of grain, but also for all kinds of farm fruits and produce as well as poultry and stock, and the results, without exception, have been quite as remarkable as in the Minnesota case above referred to.

Assistance in the organization of these clubs and in offering suitable prizes has come from a wide variety of sources such as Chambers of Commerce, Boards of Trade, Bankers' Associations, and other organizations of business men, while in many cases the help has come from perhaps just one or two public spirited men, who have been impressed with the importance of the results previously obtained.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

Realizing perhaps only in part what the ultimate outcome of this kind of work will be, a national association was formed some time ago by a group of prominent men, an executive secretary was put in charge and a campaign is now under way to enroll 100,000 boys and girls for the work this year.

There are no membership dues or assessments and the only obligation is that the standard specifications for the specific line of work shall be followed and the necessary records as to work and results properly authenticated.

Opportunities for the development of the idea are practically unlimited and if any of our readers are interested and want to sponsor the organization of some local club and are not thoroughly conversant with the method of procedure, this paper will gladly secure and send them without charge, the necessary information.

In writing us, however, be sure to advise us what kind of a club you would like to help organize.

EDITORIELETTE

La Follette, Brookhart, Frazier and Ladd will be in politics "on their own" after March 4, with no party affiliation to annoy them. Norris and Wheeler are just as deserving of divorce so far as utter disloyalty to party principles is concerned, but their necks have been saved by an unusual consideration of their colleagues.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, MARCH 4, 1925.

GRAIN TRADE REVIEW

Wheat values were on the upgrade the past week, and at the top showed around 19c over the recent low point and May at the top was within about 10c of the best figure of the season. A revival in the foreign demand for hard winter wheat via the Gulf had considerable influence on sentiment, as did a belief that private reports on farm reserves would make a decidedly bullish showing. Numerous estimates were made during the week as to the amount of wheat the United States had for export, the figures ranging from 20,000,000 to over 50,000,000 bus. after allowing for a normal carryover, but during the past few years the figures as of March 1 have not checked out closely with the actual results, the tendency as a rule being for them to show a larger holding at the end of the season than they suggested on March 1. This is undoubtedly due to the amount of wheat in transit, and the supplies of flour which are usually heavier at this season than they are around the end of the crop season. So far foreign markets have made a relatively poor response to the heavy shipments of southern hemisphere wheat, clearings averaging over 10,000,000 bus. per week, and stocks on ocean passage are a near record. In the face of this there has been a good demand for hard winters via the Gulf, and the bulk of the Kansas City low protein grain has now been disposed of, while mills have been taking the choice kinds. Should the grain at Kansas City and Omaha be moved out, it would materially reduce the quantities that would be available for delivery on May contracts at Chicago, should anything arise that would necessitate heavy quantities of the cash grain being put out. The wheat at the Atlantic seaboard cannot be brought back on account of the freight rates. Europe has commenced to take new crop hard winters for July, August and September shipment, which suggests that there is some apprehension over the supply situation at the end of the old crop season.

Premium on July.
The big premium prevailing for July wheat in Liverpool as compared with the same delivery in Chicago and Kansas City has attracted much attention, and the July here has been showing more strength than the May, with a few unfavorable crop reports from various

parts of Texas, Oklahoma, Kansas and Nebraska a factor, although a private report issued during the week made condition in Kansas 81 against 76 last December. Rains would be very beneficial in some sections, but taken as a whole it is still early to talk about plowing up winter wheat when there has been little or no growing weather. July has been quite a popular short sale for sometime past and the short interest has undoubtedly been large. The average wheat trader is inclined to be decidedly bullish with the world's situation the main influence. So far the bears have been on the defensive for months, and the bulls have had but little opposition owing to the shortage in the yield in practically all exporting countries except the United States. Late cables indicate drought in parts of India which may have some effect on the quantity of new crop wheat that country will have to export during the last two months of the 1924-25 crop year. The persistent purchases of wheat and flour by Russia are also a factor, especially as crop reports from that country remain rather pessimistic, and in some quarters the belief prevails that it may again be an importer in 1925-26. The outlook for the new crop in Europe is decidedly spotted. Highly beneficial rains have fallen in North Africa and offerings of new crop wheat for deferred shipment are reported as increasing. The domestic visible supply has started to decrease rather rapidly, and stocks will probably continue to vanish on a fairly liberal scale from now on, especially as soon as the heavy shipments out of Kansas City get under way to the Gulf and to mills. Very little business has been done out of Chicago so far.

Coarse Grains.
Eastern demand for cash corn and oats has remained decidedly slow, due in part to the relatively low price of feeds in that section. Gluten feed has declined over \$8 per ton in about a month, and is slow sale even at the decline. The visible supply of corn has continued to accumulate even though the movement from the interior has fallen materially short of last year's. Futures, however, have averaged higher with sentiment more favorable to the buying side than for sometime past, and there is a feeling in some quarters that the cash situation is about as bad as it will be and that any change must be for the better. Private reports on farm reserves were construed as bullish, although the figures suggest that the disappearance, since the new crop started to move, was materially less than during the same period last year, which is not surprising in view of the difference in the size of the crops, and the highly unprofitable spread between corn and hog prices. A sharp upturn in the latter came the past week, which put the price to the best figure since November, 1920. The difference is now such that feeding of low grade corn can be done at a profit. There are so many cash oats in store at primary markets that it will take a continued aggressive cash demand to cut down the stocks to normal proportions, and until there is a change in the general situation the market is expected to follow the action of corn.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Feb. 28, 1925.	Feb. 21, 1925.	March 1, 1924.
Wheat	3,800,000	4,343,000	5,100,000
Corn	5,541,000	4,401,000	11,758,000
Oats	2,545,000	2,620,000	5,364,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	11,896,000	22,222,000
Preceding week	11,364,000	19,446,000
Since July 1	845,066,000	783,104,000

Wheat values moved up in a fairly violently manner the past week with May within 6c, and July 1 1/4c of the

best prices of the season, the close being at net gains of 13 1/4c on May, 16 1/2c on July and 10 1/4c on September. Foreigners came in toward the last as free buyers of the July, which helped to close its discount as compared with the May, and the bulk of the new speculative business is going into the deferred delivery. Foreign news generally remains favorable to holders, and unless rains come in the American Southwest in the immediate future a good sized crop scare is likely to get under way.

Corn showed preactivity and while lower early, closed about the top with net gains of 5 1/4c @ 6 1/4c, with May showing the least advance. A good part of the trade was of a local character with the Eastern cash demand showing no improvement. Receipts are expected to increase somewhat as the result of the upturn in futures, but spring field work is getting under way and the movement is not likely to last long.

Strength in oats came largely from sympathy with other grains. The cash demand is still very slow, and the market showed no signs of getting out of the rut in which it has been for some time despite speculative efforts to advance prices. Net gains for the week were 1 1/2c @ 2 1/2c, with September showing the least gain. Rye was dull, and the export demand has fallen off while the grain is not clearing as rapidly as would normally be expected. Range of prices the past week follows:

	High.	Low.	Close Feb. 28, 1925.	Close Feb. 21, 1925.	Mar. 1, 1924.
Wheat—					
May	\$1.99 1/2	\$1.86 3/4	\$1.99 1/2	\$1.86 1/2	\$1.11 1/4
July	1.72 1/2	1.55 3/4	1.72 1/2	1.56	1.11 1/2
Sept.	1.54	1.43 1/2	1.53 1/2	1.43 1/2	1.11 1/2
Corn—

July	1.37 1/4	1.30	1.37	1.30 3/4	.82
Sept.	1.35 3/4	1.28 3/4	1.35 3/4	1.28 3/4	.82 1/2
Oats—					
May	.55 1/2	.52 1/2	.55 1/2	.52 1/2	.48 3/4
July	.56 1/2	.54 1/2	.56 1/2	.54 1/2	.46 3/4
Sept.	.55	.53 1/2	.54 1/2	.53 1/2	.43 1/2
Rye—					
May	1.69 1/4	1.60 1/4	1.69 1/4	1.60 1/4	.71 3/4
July	1.45 1/2	1.35	1.45 1/2	1.36	.73 1/2
Sept.	1.28 1/2	1.19	1.28 1/2	1.18 1/2

WHEAT STOCKS AND CONSUMPTION.

Statement of the movement of wheat and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at Nov. 1	30,500,000	23,278,000	10,790,000
Receipts to Feb. 28	443,401,000	285,669,000	353,307,000
Shipments to Feb. 28	317,760,000	145,625,000	214,340,000
Stocks on Feb. 28	48,178,000	56,654,000	38,023,000
Consumption to Feb. 28	107,963,000	106,668,000	111,733,000

CORN STOCKS AND CONSUMPTION.

Statement of the movement of corn, and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at Nov. 1	5,473,000	782,000	5,340,000
Receipts to Feb. 28	105,385,000	138,657,000	138,130,000
Shipments to Feb. 28	44,926,000	72,472,000	68,365,000
Stocks on Feb. 28	28,318,000	17,175,000	22,554,000
Consumption to Feb. 28	37,614,000	49,792,000	52,551,000

OATS STOCKS AND CONSUMPTION.

Statement of the movement of oats, and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at Aug. 1	1,768,000	4,192,000	36,667,000
Receipts to Feb. 28	200,002,000	159,948,000	157,209,000
Shipments to Feb. 28	102,987,000	113,685,000	122,924,000
Stocks on Feb. 28	63,713,000	15,949,000	23,834,000
Consumption to Feb. 28	35,070,000	34,506,000	46,918,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
Wheat	11,630,000	13,043,000	15,608,000
Oats	970,000	1,161,000	1,792,000
Rye	1,152,000	1,135,000
Barley	1,330,000	1,296,000	272,000

WHEAT IN PRIMARY MARKETS.

Receipts of wheat the past week at 14 primary markets, compared with the corresponding week last year and also for the period beginning July 1 to Feb. 28 (000 omitted):

	Feb. 28, 1925.	Feb. 21, 1925.	Feb. 28, 1924.	Mar. 1, 1924.
Chicago	339	385	64,214	45,483
Sioux City	33	32	1,623	1,228
Milwaukee	46	59	7,843	1,907

Shipments	3,691	2,600	317,760	145,625

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
American	6,713,000	7,576,000	8,889,000
Argentine	5,145,000	5,842,000	4,318,000
Australian	5,576,000	4,000,000	4,346,000
Indian	1,400,000	1,584,000
Russian	1,248,000
Others
Total	18,834,000	19,002,000	18,801,000

Of the above total wheat from America there cleared in the form of flour 1,770,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	294,113,000	280,722,000	300,765,000
Argentine	76,446,000	69,884,000	65,057,000
Australian	51,512,000	40,834,000	25,720,000
Indian	26,960,000	5,864,000	6,564,000
Russian	328,000	23,024,000
Others	2,544,000	13,092,000	4,111,000
Total	451,903,000	433,320,000	402,320,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
American	19,000	16,000	752,000
Argentine	860,000	804,000	32,000
African
Russian	264,000	330,000
Others	578,000	993,000	688,000
Total	1,457,000	2,077,000	1,802,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	367,000	6,031,000	32,367,000
Argentine	43,428,000	18,392,000	53,604,000
African	867,000	4,629,000
Russian	1,761,000	1,451,000
Others	12,491,000	15,636,000	446,000
Total	58,914,000	46,139,000	86,667,000
Season	229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
American	293,000	206,000	340,000
Argentine	1,015,000	504,000	798,000
Others	90,000
Total	1,398,000	710,000	1,138,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	15,378,000	13,169,000	25,552,000
Argentine	30,858,000	18,707,000	15,146,000
Russian	180,000
Others	1,714,000	580,000	3,410,000
Total	47,950,000	32,636,000	42,800,000
Season	67,500,000	65,765,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Feb. 20:

	Feb. 20, 1925.	Feb. 13, 1925.	Feb. 22, 1924.
Wheat	1,444,407	1,857,956	350,855
Oats	1,710,343	1,710,343	3,894
Barley	334,594	334,594
Rye	3,776,590	3,844,558	843,560
Corn	1,072,699	1,097,189	95,674
Total, bus.	8,338,633	8,844,640	1,294,973

TAX EXEMPTION

Co-operatives Escape if All Shareholders Are Farmers, Mellon Rules.

In accordance with suggestions from President Coolidge relative to co-operation of the treasury department with agricultural interests, as recommended by the recent agricultural conference, Secretary of the Treasury Mellon has made public new regulations pertaining to the tax exemption of co-operative marketing associations.

A further study of the law is being made by Solicitor Hartson of the bureau of internal revenue, to determine whether the bureau can follow out all suggestions of the conference.

A co-operative marketing association, preferred stock of which has been sold to persons other than producers who market their produce through it, and which has made no provision for early redemption or retirement of stock, is excluded from exemption, the treasury held.

Co-operative associations acting as sales agents for farmers, fruit growers, live stock growers, dairymen and others engaged in marketing farm products and turning back to the producer the proceeds of sales, less operating costs, are exempt from tax.

"If the proceeds of the business are distributed in any other way than on such a proportionate basis, the association does not meet the requirements and is not exempt," Internal Revenue Commissioner Blair said.

The Mellon decision is that the maintenance of a reasonable reserve for depreciation or losses, reserves required by state statutes, reasonable surplus to provide for erection of buildings or purchase of other facilities, or to retire indebtedness incurred to meet improvements, does not destroy exemption.

In case stock is owned in co-operative associations by persons other than producers satisfactory explanation must be made in the application for exemption. Ownership of a share of stock by a non-producer to qualify him as an officer under statute requirement does not invalidate an exemption claim.

The restriction is not placed on stock issued temporarily, for the sole purpose of providing working capital or acquiring property, providing such stock is not entitled to participation in the profits or control of the association.

Under the same restrictions, co-operative associations acting as purchasing agents for farmers are exempt from federal taxation.

TEXAS COTTON FUTURES.

The legalizing of dealings in commodity futures in Texas will have a marked influence upon the cotton trade in general and in Texas in particular, in the opinion of Richard T. Harris, of New York. In a statement issued Wednesday he said he expected that other Southern States which have anti-futures laws would follow the lead of Texas. "The signing of the bill by Governor Ferguson legalizing dealings in commodity futures where actual delivery is intended is a splendid thing for the cotton trade

generally, and for the Lone Star State in particular," Mr. Harris said. "Texas produces more cotton than any other State, and its action in wiping anti-futures laws off the statute books, I am confident, will pave the way for the repeal of similar discriminatory laws in Georgia and other States of the South."

"The action of the Texas Legislature and Governor Ferguson is a strong testimonial of the validity and fairness of the contract used on the Cotton Exchanges and should meet the unqualified approval of every person who is legitimately engaged in the cotton business, particularly the producers. This act will enable producers to hedge their cotton if they wish to, without the fear that they may be violating the law."

AGRICULTURAL COMMISSION RESUMES WORK.

Immediate relief measures for the live stock industry are now being considered by the Agricultural Commission appointed by President Coolidge to study the farm situation. Advice regarding financing of the cattle industry was obtained from the presidents of the twelve Federal Farm Loan banks who recently were in session in Washington. The commission, which spent its six weeks' recess in study of information supplied by Government agencies, is considering aid for the cattlemen through four channels, finance, tariff, transportation and marketing. It is the plan of the members to recommend a relief program before the end of January.

TRADE COMMISSION REPORT ON STOCKYARDS.

Additional interest attaches to the announcement concerning the sale to the public of 750,000 shares of the class A participating common stock of Armour & Co., by the report just sent to the Senate by the Federal Trade Commission, recommending that either congress or the courts should finally separate Armour & Co., and Swift & Co., from their ownership of the stock yards.

The sale of Armour stock will, it is said, ultimately mean the practical elimination of both the Armour and the Morris families from their controlling influence in Armour & Co.

In its report to the Senate the Federal Trade Commission also recommended divorcement of the packing companies from their control of meat refrigerator cars through the formation of a single company, similar to the Pullman company, entirely independent of the control of the packers. The report declared that the large packing companies have a practical monopoly of all meat refrigerator cars operated in the U. S.

According to the report, the independent packers during the last six years have increased their proportion of the total inspected slaughter over the old big five group, but the merger of Armour & Co. and Morris & Co. has resulted in strengthening the dominant position of Armour and Swift. These two companies last year slaughtered 47.7 per cent of the total inspected slaughter and 87.7 per cent of the total

of the big five group, according to the report.

The report summarizes the divergent economic interests involved in the question of packer participation in so-called unrelated lines, particularly canned goods, fruits, and general groceries, but makes no recommendation in this respect.

WINTER WHEAT ACREAGE INCREASED.

While private estimates anticipated the government report on the estimated winter wheat acreage, the figures indicate the farmers are satisfied with present prices and have increased the acreage appreciably. The area sown this fall is 42,317,000 acres, which is 6.5 per cent more than the revised estimate of 39,749,000 acres sown in the fall of 1923. The sowings in the fall of 1922 were 46,100,000 acres and in the fall of 1921 were 49,787,000 acres. Winter damage during the last ten years has caused an average abandonment of 10.6 per cent of the acreage sown, and has ranged from 1.1 per cent to 28.9 per cent in different years during that period. Condition on Dec. 1, was 81.0 against 88.0 and 79.5 on Dec. 1, 1923 and 1922, respectively, and a ten-year average of 85.6. The states showing the largest increase are Kansas with approximately 700,000 acres, Nebraska and Texas with each having increases of about 400,000 acres, followed by Indiana with 300,000 acres, and Nebraska with 200,000 acres.

The area sown to rye this fall is 4,206,000 acres, which is 0.8 per cent more than the revised estimate of 4,173,000 acres sown in the fall of 1923. Condition on Dec. 1 was 87.3 against 89.9 and 84.3 on Dec. 1, 1923 and 1922, respectively, and a ten-year average of 89.4.

NEW TYPE FARM LEADERSHIP.

Julius H. Barnes, former United States Grain Administrator and former president of the United States Chamber of Commerce, speaking at a luncheon of the British Empire Chamber of Commerce recently predicted "Some day we will have farm leadership that will see that if agriculture is to maintain its step with industry in the attraction of the youthful and ambitious there must be a way by which it can be lifted out of food competition and put into the production of those things which serve industry and its products instead."

"Farm leaders of this country have so far devoted their whole attention to producing agriculture for a market of the unexpandable stomach and with industry opening a thousand times wider as man learns that he can buy and possess the thousand devices suggested by invention."

"We have the problem, the chief problem as I see it, of the growing complexity of industry and its growing reliance on government, and, therefore, the question of the proper relations between the two. Government must put its hand in every pocket in the form of taxes at least for the maintenance of public service. There must be a way to find the proper relation between gov-

ernment and industry by which we can preserve that divine thing called individual incentive. National progress is after all only the aggregate of individual progress. We must preserve that individual thing which makes for individual effort and there rests the chief problem in this growing complexity of business and government today."

WILLIAM M. JARDINE.

William M. Jardine, whose appointment as Secretary of Agriculture, has just been confirmed, was born Jan. 16, 1879, in the home of a pioneer ranchman in Oneida county, Idaho, the fourth child and the eldest son of a Scotchman who came to this country when he was a boy. His mother was of Welch extraction and a native of Utah. He spent the first twenty years of his life on the ranches of Idaho and Montana helping to grow crops and to produce cattle on the ranges. In 1904 he was graduated from the Agricultural College of Utah, having made his way through college in spite of financial handicaps which almost caused him to abandon his schooling. He became an instructor and professor in the department of agronomy in the Agricultural College of Utah after his graduation, and in 1907 went to Washington to serve in the department of agriculture as cerealist. In this capacity he traveled much over the West in the interest of the dry-farming projects he had been instrumental in establishing, and made so thorough a study of the subject that he is considered the greatest authority in America on dry-farming. He is also an authority on wheat production and the growing of sorghums, and has made exhaustive studies of the pasture problems of western Kansas. In 1910 he went to the Kansas State Agricultural College as professor of agronomy, and after three years was appointed dean of the division of agronomy and head of the agricultural experiment station, which position he held until March 1, 1918, when he was appointed president.

A Practical Farmer.

Although the greater portion of Jardine's life work has been in connection with educational institutions, he is not without a wide experience with the business affairs of farming, and with political life at the national capitol. During his early career he was the manager of a big corporation in Utah which tried out the use of modern machinery in growing crops on thousands of acres of Utah land, and he is credited with having introduced the growing of hard winter wheat in the Far Northwest. Besides his four years' residence in Washington when he was connected with the United States Department of Agriculture, he served in 1921 on the advisory committee of the Food Research Institute of the Carnegie corporation, on which were such associates as Herbert Hoover, Julius Barnes and other distinguished men. He served as president of the International Dry-Farming Congress 1915-1916, and has been closely associated with its work ever since its organization. He has rendered service as a member of the President's agricul-

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Feb. 28:

WHEAT—CHICAGO, ST. LOUIS, KAN. CITY.		OMAHA, MILWAUKEE, M'POLIS.

CROSS WORD PUZZLE

This week Price Current-Grain Reporter offers its subscribers a cross word puzzle in which some trade words are used. This is an easy puzzle.

No prizes are offered for solving this puzzle, but the name and address of every person who sends a correct solution to The Price Current-Grain Reporter by letter will be printed by us in the next available issue.

If the returns indicate that our readers are interested, the puzzles will be continued.

We will pay our readers \$5.00 for each Cross Word Puzzle sent in which is used. Any person who submits a puzzle is requested to include in it several words relating to grain seeds or feed or grain elevator equipment. Names or parts of names of companies may be used, or names of men living or deceased who have been prominent in the grain trade.

Puzzles should be eleven to thirteen spaces square. A complete drawing is not necessary, only a sketch showing half inch spaces properly numbered with the solution written in, accompanied by a list of definitions of the words.

Address each letter to PUZZLE EDITOR, Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

HORIZONTAL.

- 1—The kind of crops we all like—they spell prosperity.
- 2—Place where grain and other things are sold.
- 7—Present time—(the third word in our name).
- 8—What our editors do.
- 9—Clouds—across the sky.
- 12—It governs our profits—(second word of our name).
- 14—Two main words in the name of a publication that endeavors to serve you best.
- 16—Preposition meaning from the time of.
- 19—A garden where Adam and Eve grew the first grain.
- 21—A moving part of machinery.
- 22—An order from authorities holding up shipments.
- 23—A portion of the year.
- 24—Very pressing, calling for immediate action.

VERTICAL.

- 1—The gentleman to whom we all cater.
- 3—An agreement.
- 5—Animals that destroy grain.
- 4—Another name for commerce and business.
- 6—To become present at any place.
- 10—Word we use from the French meaning an unbeatable barrier.
- 11—The act of conveying by cart.
- 12—All men wear them.
- 13—To eat away as by rust.

- 15—Important part of plant life that contains embryo of new growth.
- 17—Close at hand.
- 18—To build—to raise upright.
- 20—Information about events.
- 21—A bell like instrument sounded for dinner—or fire.

FULGHUM OATS IN OHIO.

The farmers of Huntsville, Ohio, community who grew certified Fulghum oats last season were pleased to learn that a sample of their oats took fifth premium at the State grain show held at Columbus during Farmers' Week.

About a year ago seven farmers of that community, five of whom had sons taking vocational agriculture, pooled an order for 120 bushels of certified Fulghum seed oats. In order to qualify for certification in Ohio oats must be at least 99 per cent variety pure, have a high test weight per bushel, and be absolutely free of mustard, smut, noxious weeds, and barley. Four fields which passed inspection averaged 99.5 per cent pure, tested 35 pounds per bushel, and

95 per cent germination, according to the report of the Pure Seed Association.

Fulghum is a small-strawed, early maturing red oat, which was first grown in Ohio in 1918. On the University Experimental Farm, as a five-year average, it led all other varieties, averaging 65 bushels more per acre than its nearest competitor. It also had the highest test weight per bushel, averaging 2.2 pounds more than any other oat. Its splendid showing as to yield has been possible because it yields much higher than other varieties in poor oat years, while in good oat years it does little more than hold its own. Yet, last year which was a good oat year, Fulghum outyielded other varieties on six of the seven farms where it was grown, the increase running from two to fourteen bushels per acre.

It is sometimes discriminated against on the market because of its color, but its thin hull and heavy weight per bushel make it an especially valuable feed. Because of its short straw and early maturity, Fulghum makes an excellent nurse crop for clover or alfalfa, a three-year test on the university farm showing Fulghum to be at least the equal of barley as a nurse crop and much superior to the later maturing varieties of oats.

Approximately 3,000 acres of this oat were grown on 100 farms of Clark county in 1924, where it was unknown four years ago.

INDIANA CO-OPERATIVE LAW IN FORCE.

In spite of the strenuous protest of the Indiana Grain Dealers' Association, the Indiana Millers' Association, and numerous other organizations, and in spite of personal objection from many of its citizens, the Indiana legislature refused to strike from or amend the penal sections of the Co-operative Marketing law which became effective on February 23rd, and independent Indiana elevator men are warned to be on their guard against its violation until its constitutionality has been determined.

Patterned apparently after the Minnesota co-operative marketing law, and carrying similar penalties, it will doubtless stand or fall upon the ultimate decision of the court in a Minnesota case which is already on its way to the higher court.

INDIANA FARMERS' GRAIN DEALERS' MEETING.

At the tenth annual meeting of the Farmers' Grain Dealers' Association which was held at Lafayette, Indiana, recently Mr. M. P. Hill of Francisville was re-elected president and Indianapolis was chosen as the place for holding the 1926 convention.

The other officers chosen were: First vice-president, Matthew Maroney, Lucerne; second vice-president, Samuel Foster, Otterbein; directors, O. A. Pulley, Warren; William Hagen, Chalmers; John Nelson, Wolcott; William Stephenson, Muncie; James Mauch, Honey Creek; Charles Strickland, Lowell;

Claude Record, Medaryville; W. E. Wilson, Sheridan; H. O. Rice, Huntington.

Among the speakers were Prof. F. G. King of Purdue University, who talked on "Economical Feeding of Farm Animals"; Claude Record of Medaryville, who spoke on "A Managers' Association"; Gray Silver, who told about the Grain Marketing Co.; Russell G. Fast, whose subject was transportation; J. J. Fitzgerald, who talked about insurance, and Charles Latshaw of Defiance, Ohio, who spoke on plans for a national publicity scheme by which it is hoped to have 5,000 elevators from Ohio to Oklahoma painted the same color—a battleship gray, with green trimmings—and bearing the legend "There Is No Substitute for the Farmers' Elevator."

Among the resolutions adopted was one urging completion of the St. Lawrence deep waterway and one demanding lower taxes for Indiana farmers.

SHORT CROPS AFFECT FT. WILLIAM MOVEMENT.

As a direct result of the marked reduction in the Canadian crops, receipts and shipments of wheat, oats, barley, flax and rye during 1924 at Ft. William showed a decrease from the preceding year. In 1924 the receipts of these grains were 286,103,213 bus., compared with 338,452,312 bus. in 1923, and the shipments were 286,389,004 bus. compared with 321,106,016 bus. in 1923. The movement of coarse grains, with the exception of rye, was heavier in 1924 than in the preceding year, the decreases for the year having been recorded principally by wheat.

CORN IN CHEYENNE CO., COLO.

Corn growing in Cheyenne county, Colorado, is only a recent development, but the picture below is conclusive evidence that it is no longer just an experiment.

Previously, the cattle business was the chief source of income, wheat being grown by those who were not interested in cattle, and a partial failure of the wheat crop, was responsible for some of the farmers with large acreage, turning to corn as an emergency.

The results were so surprising and so satisfactory that while in 1919, not enough corn was grown for home consumption, in 1924 there were shipped out more than four hundred thousand bushels, with plenty left for home feeding and seeding.

That this development did not result in a lessening of the wheat acreage, is shown by the fact that last year there were 220 car loads totalling 376,305 bushels of wheat sent to market.

Although there are two elevators at Cheyenne Wells, they were unable to take care of the 1924 corn crop, which, by the way, was raised without irrigation, thus making necessary the temporary wire cribs, here shown, and in which 10,000 bushels were temporarily stored.

The 1924 yield per acre ranged from 20 to 35 bushels and the quality was of the best, while the 1923 crop averaged

PLENTY OF AIR-DRIED CORN STORED IN THE WEST.

more per acre and the total yield for the county was greater.

Cheyenne is one of the eastern counties, bordering on the Kansas-Colorado line and the county seat, Cheyenne Wells, which in 1910 had a population of less than 300, is now a thriving little city.

Located on the main line of the Union Pacific railroad, about three-fourths of the way from Kansas City to Denver and at an altitude of approximately 4,200 feet, this county at the time of the building of that railroad, was the home of the buffalo, the coyote and the prairie dog, and the picture herewith is just another example of what farming experience, coupled with courage and faith have accomplished in this great country of ours.

The largest percentage of this crop was marketed by the Cheyenne Wells Elevator Company which is a wide-awake company and very popular. They are also the oldest concern here.

Other crops grown in this county include millet, cane, feterita, kaffir and broom corn.

STEEL CUT CORN.

"I know that I am not over-shooting the mark when I say that of all the commodities used in the blending of commercial feeds, there is none which is more discussed at the present time than steel-cut corn." The words just quoted are those of a prominent manufacturer.

The campaign of education carried on by the larger mixed feed concerns during the past few years, extolling the virtues of better feeds, has borne fruit. Due credit must also be given to the many state agricultural experiment stations and feed control officials, who have come out in the open and declared for better feeds. They have preached it to the consumer that it is more profitable—and far more sensible to use high grade, properly balanced rations than to stick to the old, hit-or-miss program of farm feeding. Naturally, in feeds of quality one must use only high grade materials. Consider for a moment scratch grains. In the old days almost any kind of cracked corn would fill the bill; not so now. While the consumer nine times out of ten buys on appearance, he knows from actual experience that in feeding the nicer looking goods there is no waste. The birds pick up every little particle of steel-cut corn, they relish it so. It's not surprising, therefore, that he demands steel-cut corn and must have it, and so it goes along down the line. The retailer, the wholesaler and the jobber all call for the feed in which steel-cut corn is so important an ingredient.

Until but a short time ago, it was only the big plants which could supply steel-cut corn, for the cost of the machinery to produce it was away beyond the means of the average mill owner. The time came, however, when the operators of small feed plants had to meet the demand for steel-cut corn or shut up shop. In desperation, they appealed to the builders of the pioneer "Eureka" corn cutter, the people who have practically made steel-cut corn what it is today. The result is that there is now a machine, and an amazingly simple one at that, which makes as pretty cracked corn as was ever scooped out of a bin. Not only does this combination outfit, the "Eureka" All-In-One, cut the corn, but it polishes it and grades it into two sizes, sifts out the meal and blows all the light hulls into a dust collector. The "Eureka" All-In-One is really six machines condensed into one. It is manufactured by S. Howes Co., Inc., Silver Creek, N. Y., who will mail photographs and descriptive matter on request. The Howes Company also builds a very unique piece of machinery consisting of a "Eureka" Junior corn cutter, mounted in a frame, on the top of which is an automatic magnetic separator for arresting the flow of the metal into the cutter.

Use our liner advertising department to sell or buy second-hand equipment.

THE "EUREKA" JUNIOR CORN CUTTER.

EXPORTING GRAIN VIA HOUSTON.

Even though the municipal grain elevator to be erected at the Turning Basin will not be ready in time to invite business for next season, Port Houston is not to be without her chance to start in the grain exporting business when the season opens.

Announcement is made that the American Maid Flour Mills, Inc., of which R. S. Sterling is president, has let the contract for construction of an additional 500,000-bushel grain elevator at the Manchester Plant. This addition will double the capacity of the plant and not only allow the company sufficient storage for the flour manufacturing requirements of the mill, but permit export of the wheat also.

Construction is expected to start not later than March 1 and the new elevator is to be completed by June 20. The latter date will enable the company to be ready for next season's grain movement. It will be the first time Houston is able to participate in the grain exporting business.

The Jones-Hattel-Sator Construction Company of Kansas City has the contract for the construction work. It is estimated the elevator will cost \$150,000.

It will give the plant a total elevator capacity of 1,000,000 bushels.

In the meantime, the port commission is awaiting return of the plans for the 1,000,000-bushel municipal grain elevator from the John S. Metcalf Company. The plans are being revised so as to bring the cost of construction of the first unit within the \$1,000,000 available for the purpose. The plans have been submitted for bids twice, but the bids were rejected by the commission both times because of the inability to make the plans fit the finances.

TOLEDO

The firms listed below will give you up-to-the-minute service in Cash and Futures, Grains, Seeds, Provisions and Cotton. Flour and Feed Milling Industries provide a continuous demand for Cash Grains. Six private wires to the Chicago Board of Trade give instantaneous execution of Future Orders.

Legal, Traffic and Arbitration Decisions

Must Connect with Barge Canal.

The Interstate Commerce Commission has handed down a decision ordering the New York Central railroad, on or before May 1 to extend its service over the railroad tracks owned by the state of New York, at Buffalo, so as to bring about such a connection that traffic may be interchanged between that road and barges operating on the state owned barge canal. The case was fought by the railroad largely on the ground that it would frequently be called upon to perform just a short haul and unremunerative switching service, instead of a profitable line haul one.

TRADE COMMISSION ADVOCATES COÖPS.

After an extensive pilgrimage to Europe, the Federal Trade Commission has made a number of recommendations in its report to Congress as a result of their investigations of the cooperative movement. Among these recommendations is one which directly affects the grain trade: Farmers' cooperative sales societies for marketing agricultural products directly from the farm to the urban householder. As an aid to such distribution establishment of numerous cooperative warehouses and elevators where produce from the surrounding country is assembled, stored, and shipped, is recommended. Joint purchase of farm supplies is carried on successfully by numerous foreign cooperatives.

ARBITRATION BILL IN FORCE.

The Mills Federal arbitration bill, which was unanimously passed by the House and Senate a week ago, making arbitration contracts valid, enforceable and irrevocable throughout the Federal courts, was signed by President Coolidge on Lincoln's birthday. This measure, which will save merchants, farmers, lawyers and bankers millions of dollars annually, was sponsored by the American Bar Association, aided by 140 other civic and commercial organizations.

The bill is one of the most far-reaching pieces of legislation that has been introduced in recent times in the interest of sound business practices. It is unquestionably a measure of monumental progress.

This Federal arbitration law, when fully developed and practiced, will result in reducing more than half of the civil suits that are now clogging the Federal court calendars all over the country. The saving of time and money will be incalculable. It is the most far-reaching law that has been enacted for the benefit and protection of business men during the past twenty years.

The two amendments which might have been eliminated from the bill and in which the Federal arbitration law does not apply are domestic coastwise shipments of goods and disputes in which the amount involved does not

total above \$3,000. This latter, on the surface, would seem to deny to the small merchant the advantages that the larger one will possess. However, the law is signed. Federal arbitration is a fact and these minor matters will be corrected at a future session of Congress.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
Wheat	32,493,000	37,212,000	51,666,000
Oats	17,830,000	18,404,000	8,590,000
Rye	2,486,000	2,201,000	2,105,000
Barley	6,813,000	7,124,000	1,759,000
Afloat—Wheat, 4,672,000 bus.; oats, 848,000 bus.; barley, 354,000 bus.; rye, 140,000 bus.			

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 101,000 bus. last week; oats, 426,000 bus., and barley, 36,000 bus. Corn increased 201,000 bus. and rye 31,000 bus. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	1,550	4,028	6,428,000	15,805,000
Corn	4,200	8,041	13,407,000	4,930,000
Oats	6,978	12,960	21,451,000	4,531,000
Rye	1,926	310	2,317,000	1,569,000
Barley		171	171,000	208,000
*Includes 900,000 bu. wheat, 1,166,000 bu. corn, 1,513,000 bu. oats, and 81,000 bu. rye afloat.				

EXPORTS OF HOG PRODUCTS.

The past week's clearance of hog products compared with previous week and last year:

	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 1, 1924.
Pork, bbls.	330	1,250	1,295
Pork, lbs.	62,700	237,500	246,050
Meat, lbs.	12,491,000	12,568,000	19,612,000
Total meat	12,553,700	12,805,500	19,858,050
Lard	10,328,000	10,928,000	18,871,000
Total products	22,881,700	23,733,500	38,729,050

COTTON INTO SIGHT MOVEMENT.

The amount of American cotton and linters available for movement into sight during the balance of this season is 2,231,000 bales, compared with 1,861,000 at this time last season and an average of 3,887,000 in the past four seasons. The amount actually brought into sight after this time last season was 1,530,000 and in the past four seasons the average was 2,439,000.

The amount available for spinners' takings during the balance of this season is 6,686,000 bales compared with 4,748,000 at this time last season and an average of 7,533,000 in the past four seasons. The amount actually taken by spinners after this time last season was 3,465,000 and in the past four seasons the average was 4,054,000.

COTTON STATISTICS.

Cotton exports to date total 6,016,637 bales or about 1,800,000 ahead of a year ago and a total of from 7,500,000 to 8,000,000 bales is predicted for the season.

Total consumption in this country for the six months ending January 31 was

2,939,305 bales as against 3,096,367 last season and the total in public storage was 3,863,475 bales against 2,963,983.

The total exports last season excluding linters were 5,656,000 bales, and the exports for the first half of this season show an increase of 37.4 per cent. Figuring the increase for the entire season at 40 per cent would mean a total export of 7,920,000 and with an estimated domestic consumption of 6,300,000 bales would mean a heavy demand upon our reserves.

ALBERTA SEED BUSINESS GROWING.

Production of pure seed grain for commercial purposes in Alberta, Canada, has grown very rapidly. This growth has been largely stimulated by the success of the province in taking prizes at the International Hay and Grain Show held at Chicago annually in connection with the live stock exposition, and to the encouragement given by the government in furnishing facilities for cleaning and grading the seed. It is expected that the government plant will handle 75,000 bus. of grain during the 1924 season, made up principally of Marquis and Ruby wheat, and Banner and Victory

oats. The total cost of handling the seed grain through the plant and marketing it abroad last season was 18.7 cents a bushel, which covers all charges in-

FLAX IN OREGON.

Recent experiments have shown that flax can be grown successfully in the Willamette Valley, Oregon. Representatives of the Portland Chamber of Commerce and the Salem Chamber of Commerce were invited to see the results and came away more than satisfied that future development of the industry was assured. There were two leading questions which were satisfactorily answered: First, the recently developed flax-pulling machines, toward the purchase of which the state and Portland chamber have advanced funds, are a practical success; second, flax will grow in Oregon under dry conditions as have prevailed this summer. The plan is to develop the linen industry, and the Willamette Valley experiment has proved that this flax fibre is entirely suitable.

At Your Service

The courteous girl at the switchboard speaks the first word in more than two million conversations an hour. Presiding day and night at the busy intersections of speech, she is always at the call of the nation's homes, farms and offices.

Out of sight, and most of the time out of hearing of the subscribers, little is known of the switchboard girl—of her training and supervision under careful teachers, and of her swift and skilful work. Likewise, little is known of the engineering problems necessary to bring the terminals of fifteen million telephones within the reach of a girl's arm, or of the ceaseless work of maintenance which in fair weather and storm keeps the mechanism fit and the wires open.

America's millions of people must have at their command means of direct and instant communication, and the Bell System must ever be in tune with the demands of national service.

These are the components of America's system of telephony: The best of engineering, of manufacture, of facilities—and a personnel trained and eager to serve.

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 23 Holiday					
Feb. 24.....	90	16	4	71	54
Feb. 25.....	26	2	47	27	26
Feb. 26.....	34	3	14	26	8
Feb. 27.....	36	..	18	34	34
Feb. 28.....	22	..	2	32	24
Total	208	21	85	190	146

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Feb. 23...Holiday	Feb. 26...\$0.95@1.03
Feb. 24...\$0.93@1.03	Feb. 27... .95@1.03
Feb. 25... .96@1.03	Feb. 28... .96@1.03

Receipts of barley at Chicago for week ending Feb. 28, 1925, were 320,000 bus., compared with 208,000 bus. same week 1924; shipments, respectively, 80,000 bus. and 109,000 bus.

BARLEY MARKETS.

DULUTH—Trade in barley was restricted here during the last week by the small movement this way. Just 16 cars were received on track and the bulk of them were on previous sales. Some buyers were ready to pick up a little barley and they advanced their bids to obtain it. Spot barley closed unchanged to 3c up at from 80c to 95c.

KANSAS CITY—Barley was practically unaffected by the strength of other grains this week. Offerings increased to 6 cars and they sold at unchanged prices. No. 3 closed at 94@97c per bus. and No. 4 at 91@94c. Mixed feed manufacturers were fair buyers, taking the fresh arrivals and 1,000 bus. from store. Local stocks fell to 8,000 bus., against 34,000 a year ago. The weather was too cold for new-crop seeding.

CHICAGO—Offerings moderate and demand good. Feeling very firm for quality grain and prices compared with the sales of yesterday unchanged. Best prices on the crop prevail, with active sales covering a range of 90c@1.03, according to sample. Exports, 56,000 bus. Local receipts for week, 320,000 bus.; last year, 208,000 bus.; shipments, 80,000 bus.; last year 190,000 bus. Malting, 96c @1.03, with fancy mellow higher. Feeding and mixing, 90@95c. Local inspection, 17 cars; shipping sales, 10,000 bus.

MINNEAPOLIS—At the opening of the week, malting quality barley was in good demand but feeding quality in light request but as the week progressed, all grades came into a good demand and the bulk of the sales today were made in a range of from 84@96c as compared with 81@93c on Tuesday. A little stuff was worked for export during the week. Elevator interests were offering some of their stocks but bids did not meet their ideas. Country run barley with heavy mill oat dockage slow sale. Local stocks show 2,167,418 bus., vs. 2,181,606 last week and 566,177 last year.

MILWAUKEE—The Milwaukee barley market was more active last week than it has been for sometime past. The desirable grades were readily salable on the malting accounts and lower grades were absorbed by the shippers. Choice malting was scarce and in good demand. Prices closed 3@4c higher for the week and receipts were 125 cars as compared with 156 the previous week and 121 in 1924. Choice to fancy, 48 to 50 lb. test, quotable at \$1.03@1.04; fair to good, 44 to 47 lb. test, 96c@1.02; light weight, 40 to 43 lb. test, 90@98c; feed, 85@94c. Iowa quoted 92c@1.04, as to quality; Wisconsin, 92c@1.04; Minnesota, 92c @1.04; Dakota, 90c@1.02; feed and rejected, 85@94c.

Don't let your subscription lapse; you may lose valuable numbers.

EXPORTS OF BARLEY.

The exports of barley (bus.) from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows:

Mos.	1925.	1924.	1923.	1922.
Jan.	1,522,000	299,000	661,000	385,000
Feb.	613,000	1,194,000	463,853
Mar.	969,000	1,012,000	836,000
Apr.	706,000	708,000	1,002,000
May	448,000	365,000	1,015,000
June	513,000	362,000	1,153,000
July	1,054,000	816,000	2,519,000
Aug.	1,396,000	2,571,000	2,085,000
Sept.	1,955,000	2,054,000	3,671,000
Oct.	5,315,000	1,425,000	2,940,000
Nov.	2,709,000	264,000	1,563,000
Dec.	1,744,000	382,000	762,000
Yr.	17,721,000	11,814,000	18,394,853	25,834,283

RYE MARKETS.

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Feb. 28:

Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 23.....	Holiday			
Feb. 24.....	19	17	4	11
Feb. 25.....	2	6	6	3
Feb. 26.....	6	5	6	5

Feb. 28.....	5	7	4	4
Total	36	40	21	28

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Feb. 28:

Feb.	May.	July.	Sept.
23 1.61½@1.63½	1.36	@1.37½	1.19 @1.19½
25 1.60½@1.63½	1.35	@1.38½	1.19 @1.21½
26 1.64 @1.67	1.38½	@1.42½	1.22 @1.25½
27 1.66 @1.68½	1.41½	@1.44½	1.25½ @1.27
28 1.65½@1.69½	1.41½	@1.45½	1.25 @1.28½

Receipts of rye at Chicago for the week of Feb. 28, 1925, were 40,000 bus. vs. 100,000 bus. same week of 1924; shipments were 4,000 bus. vs. 12,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Feb. 28 were:

Mpls.	Dul.	Chi.	Win.	Mil.
Feb. 23 Holiday				
Feb. 24\$1.49½	\$1.53½	\$1.55½	\$1.56½	\$1.55
Feb. 25 1.50½	1.54½	1.57½	1.58½	1.54
Feb. 26 1.54½	1.58½	1.60½	1.63½	1.59
Feb. 27 1.58	1.58½	1.61½	1.63½	1.61
Feb. 28 1.60½	1.61	1.62	1.65½	1.60

RYE MARKETS.

MILWAUKEE—The Milwaukee rye market was firm and prices climbed steadily throughout the past week. Offerings were small and the demand was good. Practically all offerings were absorbed by the shippers but some of the choice went to mills. Considerable Wisconsin sold on a forward shipping basis while on arrival grades were lower. Dry was scarce and wanted. Prices closed 9@10c higher for the week and receipts were 14 cars as compared with 18 the previous week and 52 in 1924. Market closed at \$1.61¼@1.62¼ for No. 2, inside for Wisconsin, ranging at 7@8c under May price.

DULUTH—Receipts of rye fell off to a few cars daily during the last week, so that spot trade became negligible. Dealers who wanted rye at times to cover contracts were unable to get anywhere in picking it up so that little trade was done in that department. No further eastern demand was experienced on this market in view of reported offerings of supplies held in the East at below the market. Spot No. 1 rye closed 8c up at \$1.61.

PHILADELPHIA—Rye flour, \$8.90@9.25 per bbl. in sacks, as to quality.

MINNEAPOLIS—Light offerings generally, characterized the local rye market during the current week. Mills were after the choice stuff and had considerable difficulty in filling their rather limited requirements. The demand for rye flour, which has been fairly good up to the present, appears to have slumped off, for the time being at least. If it was up to the same point that it has been during the past month, mills might be rather hard put to find all that they

need, of milling quality. Local elevator stocks show 1,163,302 bushels vs. 1,162,531 last week and 7,901,963 last year.

CHICAGO—Closed with gains of 2@2½c for futures and 2½c for car lots. Trade was of larger volume and the market active. Buying more general and was influenced mainly by the strength in wheat. Foreign news construed as "bullish" and Russia reported to have purchased, but amount not disclosed. There was considerable selling early in the day, but the offerings were quite readily absorbed. Car lots were in very good demand and the basis firmer at 4@5c under May for No. 2. Offerings light. Local inspection, 3 cars. No. 2 sold at \$1.62; No. 3 sold at \$1.60¼@1.62½.

EXPORTS OF RYE.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows, not including rye flour:

Mos.	1925.	1924.	1923.	1922.
Jan.	1,187,000	200,000	3,449,000	129,000
Feb.	137,000	5,974,000	1,194,249
Mar.	299,000	1,361,000	903,000
Apr.	2,077,000	2,219,000	3,898,000
May	1,924,000	4,611,000	5,483,000
June	3,708,000	3,877,000	4,953,000
July	1,306,000	3,328,000	2,789,000
Aug.	1,469,000	1,741,000	4,610,000
Sept.	11,563,000	2,558,000	11,130,000
Oct.	10,852,000	455,000	2,197,000
Nov.	1,297,000	755,000	5,431,000
Dec.	832,000	522,000	3,763,000
Yr.	25,664,000	30,900,000	46,460,249	29,811,177

Beans and Potatoes

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Feb. 28:

Beans—New York.—Continued dull sale in all varieties with feeling about steady on Saturday and quotations unchanged throughout. Pea beans somewhat unsteady. Red and white kidneys dull and unchanged. California limas held generally at the quotation. Black eye peas when strictly choice sold at \$11. Splits had quiet sale at unchanged prices. Domestic—Marrow, \$9.75@10.25; pea, choice, hand-picked, \$7.15@7.25; screened and prime, \$6.75@7; red kidney, \$10.75; white kidney, \$9.25@9.50; Marrow, \$9.25@9.50; white kidney, \$8.50@8.75; Lima, Mad.—1924-25, \$12.75; 1923-24, \$12.25@12.50; 1922-23, \$9.50. Lima, Europe—Large, \$11.75; med., \$11.75; sm., \$10.50. Lentils—Chile, \$7.50@7.75; Russia, Giant, \$8.25; avg., \$6.50@6.75. Peas—Domestic—Black Eye, \$11; yel. split, \$6.25@6.50; gr. split, \$8@8.25. Imported—Green—Japan, \$6.50@6.75; Holland, \$5.50@5.75; yel. split, \$5.50@6; gr. split, \$3@8.25. Chick, Mex.—Imperial, \$12@12.50; Monster, \$11@11.50; large, \$9.50@10; sm., \$7.50. Chick, Alg.—Large, \$7.50@8.

Chicago—Michigan beginning to consign more beans to this market. Fair, scattered supplies noted in commission houses and good prices being paid. A dark red kidney bean fit for Chili Con Carne wanted. Weather favorable. Per 100 lbs.—Spot Navy beans, Mich., fancy, \$6.65@6.75; red kidney, fair stock, \$10@10.50; large, dark, extra quality, \$11.

Minneapolis—Nominal quotations, including sacks, follow: Fcy. h.-p. navy, lb., 6c; lima, Calif., 18c; brown, 5c. Peas, green fcy., lb., 8c; yellow fcy., lb., 6c; marrowfat, lb., 9c.

Potatoes—

New York.—Receipts Saturday included at Pennsylvania R. R. pier 29: 1 car Florida potatoes, 2 cars Delaware basket sweet potatoes. Me., bulk—180 lbs., \$2.25@2.75; 165 lbs., \$2.25@2.50. SOY BEANS SUBSTITUTE FOR CORN.

One bushel of soy beans and 5 to 10 lbs. of mineral ration will save from four to five bushels of corn when used as a supplement to corn in fattening swine, according to C. M. Vestal, of Purdue University.

RECORD POTATO YIELD.

An almost unbelievable production of potatoes has been recorded by the Department of Agriculture on one surveyed acre in San Joaquin County, Calif. The potato was of the Burbank variety, the yield being 57,572 lbs., which is equal to 577 bags of 100 lbs. each or over 962 bus. This is a world record, only being approached by a yield of 53,700 lbs. raised in Great Britain.

SWEET POTATOES WILL BE HIGH.

Owing to the light crop of sweet potatoes in the South, wholesale prices of southern stock have been higher than last year and carlot movement has been stimulated. In North Carolina, Tennessee, Arkansas, Oklahoma and the seven other states directly south of them this year's combined production is estimated around 55,000,000 bus., compared with 80,000,000 last season, nearly 89,000,000 in 1922, and 83,000,000 in 1921. Final December estimate of the total sweet potato crop is 71,861,000 bus., a reduction of about 4,000,000 from the preliminary estimated in November.

LARGEST POTATO CROP.

All previous records for United States potato production apparently have been broken. The November estimate shows a total of 454,119,000 bus., which is an increase of 30,600,000 bus. over the October forecast; 41,700,000 bus. more than last year, and 63,400,000 bus. more than the average. The highest previous record was in 1922.

Crop Reports

Compiled by GEO. A. WELLS

OHIO.

Circleville, Ohio (6): The winter wheat is in a fair condition. If the weather continues favorable, we will have a bumper crop. Corn is moving fairly well but there is not much demand. We are paying \$1.10 per bushel. Hogs are being marketed rather light weight but hogs are not very plentiful.

Lima, Ohio (1): The condition of the winter wheat has so far been very favorable. No movements of corn or oats. Hogs are being marketed light.

Bucyrus, Ohio (4): The weather condition for the wintering of wheat is very bad. No movement of corn or oats at all. The two grains are being fed. Hogs are going on the market very light.

Blanchester, Ohio (3): Wheat is very small and brown but still in the ground pretty well. Weather conditions are fair at present. No corn and oats moving in this direction to speak of as there is not enough to supply future demands. Hogs are being marketed rather light on account of scarcity of corn.

Springfield, Ohio (2): The condition is favorable for the winter wheat crop. There is no corn to move. The oats movement is good considering the past several years.

INDIANA.

Rushville, Ind. (8): The condition of winter wheat is very favorable. The movement of corn and oats is at this time very light. Hogs are being fed out, and nothing but heavy hogs are at this time being shipped.

Jasper, Ind. (3): The weather is very favorable for winter wheat. Wheat is looking as good or better than ever known to be this time of the year. Corn and oats are moving more freely than 30 days ago. Hogs are mostly marketed heavy weight on account of better prices for heavy hogs.

Winchester, Ind. (8): Weather just now is favorable for winter wheat as we had a nice rain. Reports are mixed as some of our good farmers say wheat is ruined and others say it is damaged 25 per cent. In our opinion we have about 60 per cent condition of winter wheat. No movement of corn or oats from the country. Seems to be some oats back in the country but little or no corn. Not enough for home requirements. Expect central eastern Indiana will have to ship in corn. Hogs being marketed heavily. Advance in price has caused feeders to make heavy hogs and the light hogs being taken back to the country to be fed.

Lawrenceburg, Ind. (9): The weather is favorable for wheat now. Not much corn and oats moving now. Hogs are about all gone.

Frankfort, Ind. (2): Conditions are now favorable for winter wheat and clover. Corn and oats not moving to market. Hogs being marketed at about average weight.

Angola, Ind. (7): Conditions are very favorable for the winter wheat. Frost is out of the ground and just had 1½ inches of rain. No corn to move. Some oats changing hands among farmers. Heavy hogs all in for this season. All light ones from now on.

Brook, Ind. (1): Wheat came through the winter in good shape. Corn is nearly all feed. Some oats here but will mostly be feed. Hogs are marketed usual weight.

Tipton, Ind. (5): Conditions are favorable for the winter wheat. There is a slow movement of corn and oats. Hogs are being marketed heavier.

Kendallville, Ind. (7): We consider weather favorable for winter wheat but March and April are usually our hardest months on our winter wheat. There has been very little oats to move in our section. Our corn crop was so very short that our farmers are compelled to

feed their oats; besides they are shipping in corn feed. They have been marketing their hogs light on account of shortage on feed.

Monticello, Ind. (1): Wheat wintering fine to date. Could not be in better condition than at present. Movement of corn and oats very light. Not much left. Hogs are being marketed light weight.

ILLINOIS.

Mt. Pulaski, Ill. (5): The weather conditions are now favorable for the winter wheat crop. Greening up and looks good. No corn and oats moving. The roads are impassable. Hogs going at better weight than earlier.

Lexington, Ill. (5): Conditions are now favorable for wheat. No corn or oats moving. Hogs going to market light.

Odell, Ill. (7): No wheat sown. Shipments of corn and oats will be very light for 30 days. Hogs are being marketed light.

Sparta, Ill. (6): Weather conditions are good for wheat. Sufficient moisture. Corn and oats are all sold. Hogs are being marketed light.

Decatur, Ill. (5): The winter condition is now favorable for the wheat crop. Movement of corn and oats is light. Hogs are being marketed light.

Freeport, Ill. (4): Ground is bare of snow, and winter wheat condition might be considered in doubt. Reports have been favorable. Very little grain of any kind moving. Hogs so far have been marketed light in weight.

Mt. Carroll, Ill. (4): Weather conditions now favorable for the winter wheat crop. No movement of corn and oats. Hogs are being marketed very light.

Earlville, Ill. (4): Very small movement of both corn and oats from now on. No hogs will be marketed light.

Nashville, Ill. (3): So far the condition of wheat is quite favorable. Very little has been winter killed. No movement of corn or oats. Very few hogs in this section to be marketed.

Rockport, Ill. (2): Reports differ. Some report the winter condition of wheat favorable and some unfavorable. Think wheat is hurt to a certain extent. About 75 per cent of the corn and oats have been sold. Hogs are going to market light.

Paris, Ill. (8): The weather is very favorable for winter wheat. No corn or oats moving to market now. Feeders are holding their hogs since the market is getting higher.

Riggston, Ill. (5): The weather has been very favorable for the last three or four days. Wheat looks good. No corn moving. No oats here. Hogs are being fed heavy as we have plenty of corn.

Ashton, Ill. (4): Condition of the winter wheat is favorable. Movement of corn and oats at a standstill. Roads are out. Hogs going out freely, but rather light weight.

MISSOURI.

Corning, Mo. (1): Early sown winter wheat looking a little brown. Corn movements slowed down. Hogs are being marketed light.

Marionville, Mo. (3): Conditions are good on the winter wheat. Corn and oats about all moved. Only now and then a load of corn coming in to market and is selling at \$1.00 per bu. The bulk of the hogs have gone to market and were only one-half fat.

Lamar, Mo. (3): The weather conditions are now good for the wheat crop. The movement of corn and oats is light. Hogs being marketed light.

Paris, Mo. (5): Wheat has wintered well. Looking fine, abundance of moisture. Roads all but impassable. Very little corn to be moved and no oats.

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

Hogs are being marketed a little light on account of weather conditions and cost of feeding.

Chillicothe, Mo. (1): The winter wheat is in good condition. No corn or oats to move. Hogs nearly all gone.

Carrollton, Mo. (2): The weather is favorable for the growth of winter wheat. About 25 per cent of the surplus in hands of producers. No oats for market. Hogs that are left going out light but there are not many to go.

Salisbury, Mo. (4): The winter wheat is in good condition. No oats or corn moving. Hogs are sold as fast as can get them ready for market. Mostly light weights.

Sedalia, Mo. (5): Wheat is looking fairly good. Wheat seems to have taken good root. Corn is being marketed freely. Most of the heavy hogs have been marketed. Small hogs are on feed and not being sold.

Higginsville, Mo. (2): The winter wheat is favorable. The movement of corn is light. No oats on farms for sale. Majority of hogs marketed are light weight.

Harrisonville, Mo. (1): The wheat crop looks good. The weather is favorable. No corn or oats being shipped.

Bethany, Mo. (1): Having heavy rains. Wheat looks good, do not expect much complaint from winter killing. Shipping in corn and oats. Hogs about all gone, what few are being shipped are good weight.

IOWA.

New Hampton, Ia. (7): No winter wheat is raised here. There is no corn and very little oats for sale. Hogs are being marketed light.

Williamsburg, Ia. (8): No winter wheat here. We are still selling corn and oats, from cars shipped in. The roads are in bad condition. There is a good movement of hogs and some heavier than in January.

Arthur, Ia. (2): There is a very light movement of corn and oats. Hogs are going to market light.

Clarinda, Ia. (3): The wintering condition of wheat is favorable. The movement of corn and oats is light. Hogs are going to market light.

Wall Lake, Ia. (2): So little winter wheat here that I have not paid any attention to it. Very little corn and oats moving. Hogs are being fed to good weight now.

Jefferson, Ia. (5): No winter wheat here. Very light movement of corn and oats.

Belmond, Ia. (4): No wheat in this locality. No oats or corn moving here. Hogs are being marketed light. No

more corn in this locality than will be used for feed.

Clemons, Ia. (5): I think the weather is against winter wheat. Corn and oats are not being marketed much. Hogs coming on the market of both light and heavy weight.

North Liberty, Ia. (8): No winter wheat here. No movement of corn and oats. Hogs going to market light.

Whitten, Ia. (4): No wheat. Corn and oats movement light last two weeks. Hogs being marketed somewhat light.

Marcus, Ia. (1): It has been thawing and freezing. Not much frost in the ground. There is no movement of any grain. Cattle feeders and hog men buying oats to feed at higher prices than normal. There are many cattle and hog men here who find oats now makes fat stock. Hogs are being fed to make pork on account of cheapness of oats and they figure high prices for hogs in May.

Tama, Ia. (5): Have not seen any wheat this winter. Movement of corn and oats is very small. Scarcely enough to mention. Hogs are being marketed under average weight.

Randolph, Ia. (3): Wheat is in good condition. No oats and corn moving on account of prices. Hogs are being shipped light.

Onawa, Ia. (2): Wheat seems to be in just fair shape as to winter killing and it is really hard to determine as yet. Movement of corn and oats very light. Hogs are being marketed heavy at present as most of the light weights have either been marketed or are being finished out.

Guthrie Center, Ia. (2): It is too dry for winter wheat. Movement of corn and oats is about over until after seeding. Hogs are running heavier.

Hamlin, Ia. (2): As far as I know the weather is all right for the winter wheat. There is no movement on corn or oats. Farmers here are all short of feed. Hogs are being marketed light as they don't pay for the feed, if you have to buy it.

Indianola, Ia. (6): Wheat has wintered good to this date. No selling of

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

corn and oats only between farmers. Hogs being marketed around 200 lbs.

Lowden, Ia. (8): Prospects not good for winter wheat. Not a bushel of corn will come in. Banks have paid out \$60,000 for corn shipped in mainly from Kansas. Farmers not offering oats as all needed for feed. Hogs have been and will be marketed light.

Corydon, Ia. (6): No winter wheat. The movement of corn and oats is light. Hogs are going to market light up to this time. While now there is a country demand for light hogs.

NORTH DAKOTA.
Ashley, No. Dak. (6): No winter wheat in this section and no corn. Hogs are marketed very light.

Fargo, No. Dak. (8): Weather is favorable. 4 inches of snowfall. There is a normal movement of corn and oats. Hogs are going to market heavy.

Carrington, No. Dak. (5): No winter wheat here. No corn or oats movement. About all gone. Hogs are being shipped light weight.

SOUTH DAKOTA.
Canton, So. Dak. (9): The condition of the winter wheat is favorable. Very little corn or oats moving. There are a good many light hogs coming to market.

Flandreau, So. Dak. (8): No winter wheat raised here. No business offered to speak of for 40 days past. Principally caused by bad roads and lately price declines. Hogs being shipped medium weight.

Beresford, So. Dak. (9): So far the condition of the winter wheat is favorable. The movement is very light on grain. Hogs being shipped medium to light, mostly medium weights.

Brentford, So. Dak. (7): No winter wheat. Corn is all sold. There are no oats to ship. Marketing hogs very light weight.

Bridgewater, So. Dak. (8): The condition of the winter wheat is favorable. Movement of corn and oats very slow. Corn is about cleaned up from this territory. Will not be very large movement at any time. Oats are being sold for feed, now that they are relatively cheap. Big run of hogs is over. Balance of hogs held will be fed out.

NEBRASKA.
Humboldt, Neb. (9): Too early to tell about winter wheat. No corn or oats moving to elevators. Hogs are being marketed light weight.

Beatrice, Neb. (9): Movement of corn slow. Farmers are holding for higher prices. General conditions for wheat couldn't be better. Hogs being marketed light.

Winnetoan, Neb. (7): No winter wheat here worth mentioning. What there is looks good. No corn to move. Feeding the oats. Hogs being marketed light.

Central City, Neb. (9): Had a good rain Sunday. Weather is mild, frost out and condition winter wheat reported uniformly good. Movement of all kinds of grain light. Some light hogs going to market but farmers now have more confidence and keeping more of them.

Swanton, Neb. (9): Condition of wheat is favorable. No movement of corn and oats. Hogs are being made a little heavier.

Roseland, Neb. (9): Some of the winter wheat is killed. It will probably show up in a few weeks what per cent is left. Hogs are marketed too light and are not finished.

McCook, Neb. (6): Condition of wheat is very favorable, no winter killing and plenty of moisture. Corn is being marketed freely and hogs are being shipped unfinished as raisers

claim to be losing money on the corn fed.

Orleans, Neb. (6): Wheat is coming on fine. Corn moving slowly. 80 per cent of the hogs arriving are light.

Harvard, Neb. (9): Farmers claim too much thawing and freezing not beneficial. Fear oats will have to be shipped in. Very little corn offered at this time. Feeders are consuming it as fast as offered. Many hogs have been marketed light but at present about average weight.

Oakland, Neb. (7): The wintering condition is favorable for wheat. No corn or oats moving. Hogs are coming more heavy now.

KANSAS.
Logan, Kans. (4): We now regard winter wheat crop at least 90 per cent failure. Most farmers are out of corn. No surplus oats. Hogs going to market light.

Concordia, Kans. (4): The winter wheat crop is unfavorable due to lack of moisture. Corn and oats are being marketed light. Hogs are going to market light.

Oberlin, Kans. (1): Winter wheat plant is in fine condition. The soil and moisture is good. There is a small corn movement. No oats here. Hogs marketed light to medium.

Minneapolis, Kans. (4): The condition of wheat is unfavorable. No corn or oats being offered. Hogs marketed medium or light.

Waldo, Kans. (5): The condition of the winter wheat is very unfavorable. No corn and oats to move. No hogs are moving. The outlook for the wheat crop is very poor. Much of the crop is dead.

Ashland, Kans. (3): We are needing rain. Wheat condition hardly as good as it was last month. Heavy wind of late has done some damage. We must have rain soon or wheat will begin to go back. No movement of corn and oats. Hogs are being marketed heavier.

Alta Vista, Kans. (8): Wheat is coming out in good shape. The last warm days the wheat is looking fine.

Belleville, Kans. (4): The winter wheat is not doing very well; are anticipating about 35 per cent of a normal crop. We could use lots of moisture. Corn and oats are not being marketed very freely; they are being fed and hogs are being held back from market until they are heavier and ready to go.

Wichita, Kans. (6): The winter wheat is favorable. Early sown wheat reported infested with Hessian fly. Cannot verify report yet. Corn and oats movement is slow. Hogs going to market light.

Hillsboro, Kans. (5): The weather is and has been favorable for winter wheat crop. Hardly any oats moving at present prices. Hogs are marketed heavy.

Neodesha, Kans. (9): The winter wheat is favorable. There is a fair movement of corn. No oats. Hogs are going to market light. There are not many to sell.

Wakenney, Kans. (2): Rather early to tell much about the winter wheat. Some very unfavorable reports are coming in. Very little corn and oats for market. The movement of hogs is very light.

Pleasanton, Kans. (8): The winter wheat condition is favorable. Movement of corn has slowed up on account decline prices. No oats. Hogs are being marketed light.

Madison, Kans. (9): The wheat condition is favorable. 90 per cent of the corn and oats has moved out. Hogs marketed light.

Wellington, Kans. (6): Wheat is in very good condition. Very slow movement of corn and oats. Hogs being marketed light.

Uniontown, Kans. (9): No wheat here. A few oats moving for seed. 75 per cent of the corn is sold.

We expect wheat and in fact all grains will make top within next six to ten days

This means a reversal of movement which will be worth going after. Stocks continue on the upgrade with many of our specialties making good. Raw Sugar and Lard are also attractive to the trader. We continue to give splendid service in both. It will be to the benefit of all interested in above to keep in touch with us.

MARKET CHART

O. D. WEAVER, Manager

309 So. La Salle St.

Chicago, Ill.

Pittsburg, Kans. (9): Winter condition is favorable for wheat. Plenty of moisture and wheat seems to have come through all right. Oat sowing will soon begin with good weather.

OKLAHOMA.
Marshall, Okla.: The soil and general conditions for winter wheat in this section is favorable. Farmers trading with each other for feed corn, none will be shipped out. Movement of oats liberal. Several cars shipped out for seed purposes. Hogs are being marketed light weight. Very few hogs and no cattle on feed.

Altus, Okla.: The wheat is badly in need of rain. No corn or oats moving. No hogs in the country.

Kingfisher, Okla.: Winter wheat in fairly good condition. Had some rain lately but need more. Very little wheat abandoned. Corn is moving slowly.

Enid, Okla.: A good rain would do wonders for the wheat. Considerable unfavorable reports about wheat being frozen out in spots, and others about grub worm damage from last fall. Only a fair stand of wheat. Corn and oats are not moving. Hogs being marketed light.

Geary, Okla.: Locally wheat in critical condition on account drought. Light rain but need more soon as we have no subsoil moisture. Corn movement light. Oats movement over. Very few hogs left to market.

ALFALFA SEED SERVICE ORGANIZED.

According to J. F. Cox, executive secretary of the Federated Seed Service, alfalfa growers have had nearly 1,000,000 acres of this crop die from winter kill, causing a loss of more than \$10,000,000, all because they unwisely bought 15,000,000 pounds of unadapted Argentine seed. Mr. Cox says the failures of alfalfa where severe winters occur are largely due to the use of seed produced in mild regions. He advises farmers to get adapted seed of known origin as well as high purity.

To protect the grower and to place the alfalfa crop on a safe basis farmers have formed a co-operative organization, the Federated Seed service, made up of farm bureaus and co-operative seed departments of Michigan, New York, Ohio, Indiana, Maryland, Virginia, and Wisconsin. Through this mutual organization arrangements have been made by the growers' representatives for the distribution of alfalfa seeds of known origin, including Grimm and hardy common varieties, that are certified as to source and quality.

Buy Good Seed.

"The buyer who considers price alone in buying seed and gets the cheapest seed offered has small chance of getting good seed," said Mr. Cox. "The seed bootlegger, a dangerous minority in the American seed industry, is on the job every minute to take business away from reliable seed distributors. This year adapted alfalfa seed of high quality can be had in quantity at reasonable prices, but farmers should buy it from dependable sources and beware of usual price bargains and false advertising."

It is claimed Argentina alone shipped more than 7,000,000 pounds in each of

the last two years, and nearly all of this seed is produced in regions of milder climate where the ground does not freeze. The mild regions of the southwestern part of the United States produce an excess of 11,000,000 pounds of seed. Most of the Argentine and southwestern growers' surplus reaches the corn belt and northern states, and is in competition with seed that is better adapted to this territory.

According to Mr. Cox, Idaho, Montana, the Dakotas, and the high altitude region of Utah have collectively produced a record crop of seed adapted to planting in the corn belt and northern sections. Ontario has also produced an unusual crop of the hardy Ontario variegated. About 25,000,000 pounds of adapted alfalfa seed is available for midwestern and northern states.

"Unfortunately," adds Mr. Cox, "under present trade conditions the careless buyer may get some of the 20,000,000 pounds of unadapted alfalfa seed, most of which will also undoubtedly be offered for sale in the corn belt and northern states."

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Feb. 21, 1925 (000 omitted):

Articles and countries.	Week ending			July 1

TO BUILD 100 NEW ELEVATORS.

Manitoba wheat pool executives announce the formation of the Manitoba Pool Elevators, Limited, with capital of \$1,000,000. The purpose of the company is to erect 100 elevators this year in Manitoba to store wheat of contract signers. Saskatchewan pool directors will organize a similar company with capital of \$2,500,000 to build an elevator system in Saskatchewan. The Alberta wheat pool directors are satisfied with the contract they have with present elevator companies operating in Alberta.

The National Hay Assn. memorial committee has issued memorials honoring the following departed members: Herman E. Kasten, of Brauer & Kasten, Richmond, Va.; Thad C. Dean, Spartanburg, S. C.; John E. Murray, New York, N. Y.; Colan A. Morrison, of Morrison-Kleinberg Co., Ellensburg, Wash.; and Thos. J. Davis, chief official hay and grain inspector, Savannah, Ga.

Terminal Markets

MINNEAPOLIS.

H. A. Paul, Correspondent.

M. L. Vehon, of Chicago, was seen on 'Change Friday.

D. F. DeWolf of W. P. Deveraux Co. was a Chicago caller last week.

George Reed of Hallet & Carey spent several days in Winnipeg last week.

L. S. Gregory of Gregory-Jennison Co. has left for a tour of the battle fields of France.

C. D. Sturtevant, of the Trans-Mississippi Grain Co. of Omaha, was a caller here Friday.

Chas. H. Hamp of the Eagle Roller Mills is spending a week at the milling plant, New Ulm, Minn.

E. D. Mitchell and A. Mitchell of the Mitchell Grain Co., Winnipeg, were Minneapolis visitors Saturday.

The Commander Milling Co. has purchased the milling business of the C. S. Christenson Co. at Madelia, Minn.

C. P. Thayer of the Cannon Valley Mfg. Co. is back in Minneapolis after a six weeks' trip through the southwest.

Byron L. Kabbot of the Menominee Milling Co., Menominee, Wis., called on the Minneapolis millfeed trade last Thursday.

H. P. Grabo, local manager for the Gould Grain Co., has been confined to his apartment for the past week account of sickness.

H. R. Shepherdson of the Quinn-Shepherdson Co. is now enroute to the Mediterranean, which he will tour for a six weeks' period.

Among the visitors on the Minneapolis trading floor during the past week were: G. J. Keefe of Milwaukee, C. E. Jennings and L. Williams of Indianapolis, P. L. Wild of Edmonton, Can.; J. L. Bowlus of Milwaukee, F. X. Patterson and H. H. Carter of Washington, D. C.; Frank Sticka and T. MacInnis of Duluth; Milton Crowe of Nashville, Tenn.; H. Gauer of Winnipeg; C. C. Blair and J. L. Strong of Duluth, C. G. Spender of Winnipeg, and R. G. Coombe of New York City.

Cash Markets.

Wheat—Mills were inclined to go easy at the tail end of last week, on account of the expected influx of grain over the double holiday, but receipts were rather disappointing in that they did not attain nearly the volume which was expected, being only a trifle over 300 cars. Medium to poor quality stuff continues to be neglected, but the wheat which was at all desirable was in good demand and mills paid 1@43c over the May for No. 1 hard spring at the beginning of the week. Country car loadings are more than moderate; one day during the past week corn receipts exceeded those of wheat at this market, which is an occurrence worth mentioning. As the week progressed, the poor and medium quality wheat, which had been more or less neglected right along, came into better request and yesterday bids were up about a cent for the medium quality stuff. Interior mills were fair buyers and with local ones anxious to pick up the choice stuff wheat among the current receipts, the market was firm to strong during the past seven days. Shipping sales, reported day by day, averaged close to 50,000 bushels daily. Today, Saturday, No. 1 hard spring sold at 2@45c over the May option; No. 1 dark northern at May to 43c over and No. 1 northern at 1c under to 38c over.

With the exception of Wednesday, the local durum market was characterized by a very strong tone throughout the week. Offerings were scarce and in excellent demand. Today's sales were made largely on the following basis: No. 1 amber, 1c under @ 30c over Duluth May; No. 1 durum, 5c under @ 22c over and No. 1 mixed, 6c under @ 28c over.

Winter wheat offerings, like those of durum, were light and the market was firm to strong throughout the week.

Local elevator stocks made public today show 13,572,589 bushels this week vs. 13,708,289 last week and 15,311,189 a year ago.

Corn—The local cash corn market experienced a rather erratic market during

the week closing today. Tuesday's receipts were almost a little too heavy for the demand to digest and consequently the market was slow and discounts were heavier than ever. The advance in the futures, which seemed to stimulate the wheat market, did not help corn a bit; if anything it acted as a brake. Receipts were liberal and quality uniformly poor. The return to colder weather permits the shipping of this high moisture content corn, but of course this cannot go on much longer.

Today's sales were largely made within the following range: Yellow—No. 3, 10@14c under Chicago May; No. 4, 16@20c under; No. 5, 23@30c under, and No. 6, 32@33c under. Mixed—No. 3, 16@20c under Chicago May; No. 4, 24@27c under; No. 5, 28@30c under, and No. 6, 32@33c under.

Local elevator stocks for the week show: This week, 932,829 bus., vs. 887,330 last week and 1,288,625 a year ago.

Oats—There was a fair demand from both shipping and milling interests all week and with the futures borrowing a little strength from the corn market, the local cash oats situation was fairly strong. Nothing much to report in the way of new shipping business and local stocks show very little inclination to shrink. Today's figures show 22,202,412 bushels vs. 22,350,741 last week and 4,921,271 a year ago. Cash discounts were a trifle lighter toward the end of the week, Saturday sales being as follows: No. 3 whites, May price @ 3/4c under and No. 4 whites, 1@2c less.

OMAHA.

Leigh Leslie, Correspondent.

J. B. Adams Grain Co. has incorporated with \$50,000 common stock at \$100 per share. Closed corporation.

John G. Kuhn, traffic manager of the Omaha Grain Exchange, has been in Kansas City and in Sioux City attending rate hearings before the Interstate Commerce Commission.

A telegram from Byron, Nebraska, under date of February 26th, said that at least 50 per cent of the winter wheat between that station and Lincoln will be plowed up and put into other crops.

Late reports gathered by an Omaha grain concern from 275 stations in Nebraska show 8% of last year's wheat crop remaining on farms in this state. This is sufficient only for seed requirements, and will be held till the new crop is assured.

A letter from Wymore, Nebraska, says: "Good rains visited Gage county this week, wheat fields are beginning to show green, and a fairly good stand of wheat is expected notwithstanding the adverse conditions which prevailed over this section of the state last fall."

The additional storage of 800,000 bus. to the Rock Island elevator will be completed about the first of July. The Trans-Mississippi Grain Co. is the operator, and when completed the entire property will store considerably in excess of one million bushels. The Van Ness Construction Co. of Omaha has the building contract.

Eastern mills were in the Omaha market for wheat last week. Some sales were made to them. More than a quarter of a million bushels of wheat were worked out of here Wednesday, and more could have been worked had it been available. There was in Omaha elevators Monday only 1,833,000 bushels of wheat. Much of that was protein wheat owned by millers.

A party of distinguished Northwestern railway officials visited the floor of the Omaha Grain Exchange Wednesday and met and talked for a half hour with members of the Exchange. The party was chaperoned by Walter W. Head, President of the Omaha National Bank, who is a director of the Northwestern company. The party included William H. Finley, president of the company, Marvin Hughett, Jr., executive vice-president, and Frank Walter, vice-president in charge of operation.

The United States Radio Service Department has authorized WAAW, the Omaha Grain Exchange's radio station, to use a wave length of 384.4 meters. This will enable the Exchange to send its market reports to western Nebraska and Eastern Colorado without difficulty. The Exchange sent out its first reports on this wave length Saturday morning, and within a few hours it had received upward of one-hundred messages of thanks and of congratulation from shippers of grain and farmers in the territory which it had not hitherto been able to reach.

At the monthly dinner of the Omaha Grain Club at Hotel Fontenelle Tuesday evening, L. L. Quinby, of the Mid-West

Grain Company, was elected president to succeed Hugh A. Butler, of the Butler-Welsh Grain Company, whose term of office had expired; B. O. Holmquist, of the Holmquist Elevator Company, was elected secretary-treasurer, and M. I. Dolphin, of the Dolphin-Jones Grain Company, and "Ed" Miller, of the Miller Cereal Mills, were elected directors. Mr. Miller gave a very interesting and instructive talk on "Corn: Its Origin and Its Uses," and Mr. Bingham, of Penick & Ford, Limited, Cedar Rapids, Iowa, also talked entertainingly on that subject.

FLOUR.

Sales of flour were light last week. Shipping orders on old flour contracts are hard to get and are coming in very slowly. The mills in this territory are reducing their operating time, deeming it far better, as Secretary Campbell of the Nebraska Millers' Association, says, to lie low and hold fast to what they already have, than to force a lot of flour on the market at distress prices through over-production, as was done with so disastrous results last year.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Nelson K. Thomas, secretary of the St. Joseph Grain Exchange, and Miss Marian Rogers of St. Joseph were married at Kansas City Feb. 23.

Wheat prices at St. Joseph advanced 12c during the past week on hard winters and soft wheat was 6@8c higher. Corn was 5@6c higher for the week, and oats 4c up. Arrivals were somewhat heavier than during the preceding week. Demand fair to good for all grains.

Visitors on the St. Joseph Grain Exchange during the week ending Feb. 28 included: J. F. Dodson, Bigelow, Mo.; J. W. Falkner, Bellevue, Kans.; Otto Moritz, Hastings, Nebr.; A. J. Watkins, Lawson, Mo.; J. W. Curtis, Stella, Nebr.; R. Thompson, Amity, Mo.; W. T. Diller, Danbury, Nebr.; Geo. Chapman, Howe, Nebr.; W. M. Gerhart, Easton, Mo.; S. A. Groniger, City.

Receipts and shipments of grain at St. Joseph, Mo., for the month of February, 1925, with comparative figures of February, 1924. Figures are in bushels:

	1925.	1924.
Receipts—		
Wheat	879,200	648,000
Corn	892,500	1,338,000
Oats	118,000	108,000
Rye	1,500	
Barley	1,750	14,000
Kaffir	1,500	
Milo maize	1,500	4,500
Total	1,895,950	2,112,700
Total 2 months	4,756,350	3,601,000
Shipments—		
Wheat	291,200	156,800
Corn	699,000	952,500
Oats	108,000	88,000
Rye	4,500	
Barley	1,750	1,750
Total	1,104,450	1,199,050
Total 2 months	2,504,750	2,127,450

BALTIMORE.

Robert C. Neu, Correspondent.

Manager J. A. Peterson, of the Western Maryland Elevator at Port Covington, this city, returned last week from a Canadian trip.

Henry A. Lederer, of Lederer Bros., grain and flour commission merchants of this city, who is making a cruise with his wife around the world, arrived at Honolulu about ten days ago.

Charles M. Trueheart, of Trueheart & Russell, flour merchants, will be the toastmaster at the forthcoming annual dinner and ladies' night of the Baltimore Flour Club, to be held at Hotel Rennert, March 25.

The grain inspection department of the Newport News Chamber of Commerce has been temporarily discontinued and licensed inspector, John Gimpel, formerly in charge there, has returned to his former home in Baltimore.

Edward Netre, of Barnes-Jackson Co., Inc., grain receivers and exporters of this market, has been elected chairman of the commission rule committee of the Baltimore Chamber of Commerce for the ensuing year.

Milder weather recently and better country roads have resulted in a decided renewal of hay receipts from adjacent country points by farmers' wagons and motor trucks, and the local hay market is therefore somewhat easier.

President A. W. Mears, of the Baltimore Chamber of Commerce, started from Baltimore on Feb. 21 for a month's trip to Florida and the West Indies. Most of his time while away he expects to devote to fishing. Mrs. Mears accompanied him.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were: D. A. Stickell,

millers, of Hagerstown, Md.; Jas. T. Wolfe and J. M. Middlekauff, of Hagerstown, Md.; H. P. Bell, representing the Colorado Mill & Elevator Co., Denver, Colo.; C. E. Fox, of Chicago, Ill.

The M. A. Long Co., designers, engineers and constructors of this city, who built the model export grain elevator of the Baltimore & Ohio Railroad at Locust Point, has removed from their former location at 17 Guilford Ave. to their own building at 10 West Chase St., where they will have decidedly more spacious and accessible quarters.

In a check-up on the grading of grain "between markets," that is, between Baltimore and Chicago, Milwaukee, Kansas City, Duluth and some other important centers, Baltimore's percentage in grade verification in December was 99.7, and in January 99.8 out of a possible 100. This included the inspection and grading of wheat, oats, rye, corn and barley.

EDWIN HEWES.

The "grand old man" of the Baltimore grain trade, and for years identified with the export grain firm of C. P. Blackburn & Co., of this market, celebrated another birthday anniversary on Feb. 28 and the Triangle Club, of which he is sergeant-at-arms, again went into executive session. After Mr. Hewes reached the 80th milestone in life's journey, no further record of his birthday anniversaries was kept, so that it cannot be definitely stated whether the latest is his 81st or 84th, but the frequency with which the Triangle Club has met during the past year indicates that its members must be guided by a calendar which reckons only about ten months to the year.

TOLEDO.

T. M. Bender, Correspondent.

John Luscombe of Southworth & Co. and wife have returned from a ten days' visit in New York City.

Grain inspections for the past week were 33 cars of wheat, 21 cars of corn, 20 cars of oats and 1 car of rye; total, 75 cars.

Grain inspections for the month of February were 412 cars of wheat, 248 cars of corn, 270 cars of oats, 12 cars of rye and 5 cars of barley. Total, 946 cars.

Toledo flour output as reported by mills for the past week was 31,750 bbls., equal to 66 per cent of capacity. The week before it was 29,300 bbls. and a year ago last week was 34,800 bbls.

Members of the Toledo Produce Exchange sent a congratulatory message to Alphonse Mennell, senior member of the milling company that bears his name, last Friday it being his 76th birthday. He is at present visiting at San Diego, Calif.

Corn and oats are lagging because of a poor demand and they are slow to follow any strength in the futures market. Receipts of coarse grains have taken a decided drop during the past two weeks and this may bring about a better sellers' market. Heavy weight and good color oats are wanted here and in other nearby markets and are commanding excellent premiums.

The flour demand has been slow lately, while feeds have been moving at a good pace. The recent break in millfeeds stimulated the demand and brought prices back a dollar almost before buyers knew what it was about. Milling demand for soft wheat has not increased, as was expected. Buyers are rather cautious about following the recent advance. Stocks of flour are not large in any quarter and this will help the general situation. Millers expect the flour trade to stay on a hand to mouth basis at least until more is known of the coming crop of winter wheat.

The tenth annual convention of the Ohio Farmers Grain Dealers held in this city last Tuesday and Wednesday was one of the best attended sessions ever held.

Speakers of national prominence aided in making the program one that was instructive as well as entertaining. The banquet Tuesday evening at the Boody House with entertainment by the members of the exchange brought out many complimentary remarks. The music was furnished by the Cummings and Hofner sextet and two singers who made a hit with the crowd. The toastmaster's position was capably filled by Fred Mayer of J. F. Zahm & Co., who acted in that capacity due to the absence of J. D. Hurlbut, president of the exchange.

MILWAUKEE.
D. K. Steenberg, Correspondent.

The March rate of interest has been determined by the finance committee of the Milwaukee Chamber of Commerce at 6 per cent.

Grain receipts at Milwaukee during the past week were 125 cars barley, 248 corn, 71 oats, 35 wheat, 14 rye, 4 flax, 16 miscellaneous; total, 483 cars, against 473 the week before, 1,093 a year ago and 961 in 1923.

Higher prices obtained in the Milwaukee market during the past week and wheat has risen 11@14c for this period, rye 9@10c, oats 2½c, corn 4@5c and barley 3@4c. The movement is light and demand generally good.

Shipments of grain from Milwaukee for the week ending Feb. 28 were 344,817 bu. oats, 120,625 corn, 90,085 barley, 43,525 wheat, 10,260 rye; total, 299,312 bu., against 443,658 the preceding week and 972,500 a year ago.

The Milwaukee Chamber of Commerce silver trophy cup, to be awarded each year to the county which scores the most points at the annual grain show of the Wisconsin Agricultural Experiment Association, was won by La Crosse county at the 1925 show, which was recently held at Madison, Wis.

Milwaukee milling output last week consisted of 7,350 bbls. of wheat flour, compared with 7,250 the previous week and 3,500 in the same week last year. Receipts of flour at Milwaukee last week were 16,840 bbls. as compared with 43,050 last year and shipments were 19,350 bbls. last week as compared with 32,200 the same week of 1924.

The La Budde Feed & Grain Co., members of the Chamber of Commerce, Milwaukee, is distributing their annual charts on mill feeds, oil meal, hominy, cottonseed meal and grain. The trade looks forward to the receipts of these each season, showing at a glance the trend of the market for the entire year 1924 and sub-tables and charts for the four years, 1921, 1922, 1923 and 1924. We are confident the La Budde Company will gladly send this colored chart without charge to friends who address them as above.

F. C. Meyer of Menominee, Wis.; R. H. Jones of Cambria, Wis.; B. B. Kraus and Charles Taft of Elkhorn, Wis.; C. T. Turner of Lanesboro, Minn.; A. Post of Horicon, Wis.; Theodore Edwards of McFarland, Wis.; N. Rosenberg of Appleton, Wis.; E. T. B. Estes of Beloit, Wis.; Otto Timm of Plymouth, Wis.; E. J. Barry of Minneapolis, Minn.; Walter Sadow of Barton, Wis.; Louis Boller of Washington, D. C.; David Rosenheimer of Kewaskum, Wis., and H. Short and C. A. Shipley of Chicago, Ill., were among recent visitors at the Milwaukee Chamber of Commerce.

KANSAS CITY.
T. J. Tanner, Correspondent.

As this correspondence was being written, Sunday, March 1, a fine snow fell in Kansas City, which was believed to have been general in the Southwest.

Visitors at the Board of Trade this week included Jack Barry, Minneapolis, Minn.; William Caldwell and G. M. Davis, St. Louis, Mo.; W. L. Ayers, Hutchinson, Kan.; L. E. Kindie, Topeka, Kan.; W. S. Heffelfinger, Excelsior Springs, Mo., and E. R. Mears, Menard, Tex.

E. G. Wallingford of Wallingford Bros. received a report from Ashland, Kan., Saturday that cut worms were injuring wheat in southwestern Kansas. Farmers were said to be alarmed over the situation. Crop damage from other sources, such as drouth and Hessian fly, coupled with this latest development, indicates a short wheat crop in southwestern Kansas this year.

Oscar T. Cook, Manager of the Wyandotte Elevator Co., who returned this week from a trip to New Orleans, spoke enthusiastically regarding the grain export activity at the port. He said there was afloat on the Mississippi River between St. Louis, Cairo and New Orleans more than 1,500,000 bus. of wheat, much of which was sent from Kansas City by rail to the river.

J. W. Perry, trustee for creditors of Houston, Fible & Co., defunct brokers, stated Friday that the final dividend payment probably would reduce the losses to 5 per cent. The outcome depends largely upon the recovery of \$200,000 income taxes collected by the Government before the failure, in 1922, when the firm was practically bankrupt.

Dr. W. M. Jardine, newly-appointed Secretary of the United States Department of Agriculture, spent Saturday night and Sunday in Kansas City. He was enroute from Manhattan, Kan., to Washington, to assume his duties and was accompanied by Mrs. Jardine. The new secretary and his wife were given a generous reception here.

Directors of the Board of Trade have

PHILIP H. SCHIFFLIN & Co.

49 Board of Trade

CHICAGO

submitted for a vote March 9 an amendment to the exchange rules specifying that grain sold "to arrive" must be billed direct to the Kansas City market. On request of the buyer, the country shipper shall furnish car numbers before the grain reaches the market. Prior to acceptance, the grain must pass the regular inspection.

The Ralston-Purina Mills, Kansas City branch, made a trial run, Sunday, March 1. F. H. Udell, manager, said the plant probably would be running regularly within another week or two. The alfalfa grinding unit has been in operation for several months. In its entirety, the Ralston-Purina enterprise is a vast addition to Kansas City's feed manufacturing capacity. It will absorb large quantities of grain and hay.

The Berg bill, designed to favor the interests of Co-operative grain agencies that make patronage returns to association members, has passed both houses of the Kansas Legislature and is said to have been signed by Governor Paulen. The bill provides that "no rule of a Board of Trade or contract market shall forbid or be construed to forbid the return of any patronage basis by such co-operative association to bona-fide members, of moneys collected or made in excess of the expense of conducting the business of such association." All Kansas markets are also automatically made contract markets under the Berg bill.

Bakery merging on a large scale developed in Kansas City during the week as a culmination of negotiations long pending, but frequently denied. The Consumers' Bread Co., headed by Brice B. Smith, was said to have entered the Empire Baking Corporation of New York. It turned over eight plants in Kansas City, Mo., Wichita, Kan., and Tulsa and Enid, Okla., on a valuation of \$3,000,000. Mr. Smith is to become president of the Empire, which will have 25 bakeries in the United States and Canada. Late in the week it was announced that the Purity Bakeries Corporation of New York had taken over the eight plants of the Nafziger Baking Co. of Kansas City, valued at \$2,000,000. The Nafziger Company operates bakeries in St. Louis, Burlington, Ia.; Decatur, Ill.; Springfield, Mo.; Sedalia, Mo.; Muskogee, Okla.; Wichita, Falls, Tex., and Kansas City.

BIG MILL TO INCREASE STORAGE.

Rumors of the intention of the Washburn-Crosby Co. of Minneapolis to enlarge its flour milling plant in Kansas City were partly confirmed Friday, when E. P. Mitchell, local manager, announced that the directors had authorized an addition of 1,000,000 bus. of wheat storage room to the mill elevator, in the East bottoms. Twenty-one new tanks, 100 feet high, with an inside diameter of 25 feet, will be built before the 1925 wheat harvest. Construction will be of reinforced concrete. The cost, including equipment and trackage, will be around \$400,000, as estimated by the Jones-Hettelsater Construction Co. of Kansas City, which has the contract.

Last year the Washburn-Crosby Co. added 750,000 bus. to its grain storage. The company has room for 1,300,000 bus. of wheat, but the proposed addition will raise this to 2,300,000 bus. by far the largest of any mill in Kansas City. Only four elevators here have a greater capacity. The mill is capable of producing 3,500 bbls. of flour daily. This may be doubled in the future.

FARMERS ELEVATOR MEN MEET.

About 50 manager and officers of farmers' elevators in Central and Southwestern Missouri attended the Annual Convention of the Missouri Farmers' Grain Dealers' Association, in the Coates House, Kansas City, February 23 and 24. Addresses were delivered by Roy Monier, State Warehouse Commissioner, D. W. Fear, Missouri College of Agriculture, A. V. Svarthout, United States Bureau of Agricultural Economics; Dr. H. J. Waters of the Kansas City Star and others.

The association is five years old. It has organized about one-fourth of the 200 farmers' elevator companies in Missouri and intends to greatly increase the membership during the coming year. The farmers visited the Board of Trade Tuesday and were shown through the new building. During the convention there were many interesting discussions, particularly with reference to the soft winter wheat industry, which is a specialty in Missouri. R. W. Crowther of Golden City was re-elected president of the association. He has served three years. Mr. Crowther exhibited his faith in the Grain Marketing Co. of Delaware by accepting from George H. Davis, head of the company, a commission as agent for stock, which will be sold to Missouri farmers. The association will meet next year in St. Louis.

CASH MARKETS.

Wheat—Receipts for the week, 425 cars, against 472 a week ago and 395 a year ago. Conforming to the bullish "come-back" in futures, the market for hard and dark

wheat advanced consecutively and rapidly from Monday until Saturday. There was good buying for export and milling accounts, the latter including orders from Buffalo and other eastern centers. While the local millers complained as to a poor flour trade, they absorbed all of the high protein samples available and were credited with making purchases in Omaha. Wheat was sold out of store here for both domestic and export shipment. Most of the Gulf business was directed to New Orleans. Prices scored an advance of 12@13c. No. 1 hard and dark closed on a range of \$1.36@2.05 a bu., No. 2 at \$1.86@2.05, No. 3 at \$1.85@2.04 and No. 4 at \$1.84@2.02. Soft wheat was relatively slow, but it also worked upward. It rose 7@10c, closing as follows: No. 1, \$1.97@2.03; No. 2, \$1.97@2.03; No. 3, \$1.92@1.96; No. 4, \$1.86@1.92. Among the light offerings of soft wheat there were few cars of choice grain. The local mills reported a strictly hand-to-mouth demand for soft wheat flour. Withdrawals of all kinds of wheat from elevators reduced the local stocks 424,000 bus., to 8,935,000, whereas a year ago 11,923,000 were in store. It is said that a small percentage of the grain held here is of the high quality required by American mills, which means that it must go for export. Great interest is felt in the forthcoming report of the Government on farm reserves. According to private advices, Kansas is the only state in the Southwest having a considerable share of the 1924 crop. The week was cold, imposing a check on the growth of the new wheat crop. Rain on February 22 was beneficial to the fields in Oklahoma and parts of Nebraska and Kansas, but in North Central Kansas and northward into Nebraska a large area remained dry. There were scattered reports during the week indicating that wheat would be slowed up on account of winter killing. Presence of Hessian fly and other insects was noted, also, especially in the southern half of Kansas.

Corn—Receipts, 397 cars, against 402 a week ago and 317 a year ago. Reflecting sympathy with higher wheat and hogs, the corn market developed pronounced strength. In addition to the local storage demand, there was fair buying for feeding account, though shippers said they could place any grain in Texas. With yellow in the lead, prices advanced 3½c to 10c. The closing quotations were: No. 2 white, \$1.22@1.22½; No. 3, \$1.18@1.20; No. 2 mixed, \$1.20½@1.21; No. 3, \$1.16½@1.18½; No. 2 yellow, \$1.24@1.25; No. 3, \$1.20½@1.22½. There was a reduction in the offerings of high-moisture corn from the Northwest and this kind sold at a smaller discount under dry samples. Local stocks increased 136,000 bus., to 7,079,000, against 1,809,000 last year.

Oats—Receipts, 29 cars, against 63 a week ago and 108 a year ago. Competition among local feed dealers and shippers for the limited offerings put the market beyond the hedging level. White oats advanced 4@6c. No. 2 closed at 56@57½c and No. 3 at 54½@57c. Red seed oats were quoted nominally at 55@56c, with few on sale. Elevator stocks decreased 35,000 bus., to 2,542,000, against 918,000 a year ago. Seeding in the country made slower progress than a week ago, owing to less favorable weather.

Kafir and Milo—Receipts, 130 cars, against 113 a week ago and 51 a year ago. Though eastern orders continued to show a hand-to-mouth character, local handlers bought freely on basis relative to corn prices. As milo offerings were in a decided minority, that grain maintained its premium over Kafir. Dealers said nothing came in from territory west of Hutchinson, Kan., indicating that the Pacific Coast is absorbing supplies from western territory. Kafir advanced 9@13c per cwt. No. 2 white closed at \$1.82@1.83, No. 3 at \$1.80@1.81 and No. 4 at \$1.78. The gain in milo was 10@13c, with final quotations as follows: No. 2, \$2.08@2.10; No. 3, \$2.08; No. 4, \$2.03@2.05. Stocks increased 16,000 bus. to 355,000, against 428,000 a year ago.

NEW ORLEANS.
M. L. Davis, Correspondent.

G. D. Estes, of the Mid West Grain Co., Hutchinson, Kans., spent several days in New Orleans this week.

Stocks in elevators as of today: Wheat, 1,103,000 bus.; corn, 499,000 bus.; oats, 237,000 bus.; rye, 36,000. Cars on track: Wheat, 43.

Standard blackstrap molasses is firm at 13c per gallon f. o. b. tank cars New Orleans; light blackstrap is quoted at 14c per gallon.

J. B. Payne, vice-president of the T. & P. Railway, announces that effective Mar. 1st the office of the foreign freight agent at New Orleans will be abolished and A. P. Smirl, assistant traffic manager at New Orleans, will be in charge of export and import traffic.

Bruce Baird, for the past six years in charge of the foreign trade department of the Hibernia Bank & Trust Co., has re-

signed to accept the vice presidency in the New Orleans Bank & Trust Co., and will be in direct charge of foreign trade. Mr. Baird was formerly with the First National Bank of Chicago in the foreign department.

Leases are being drawn up by the Board of Commissioners of the Port of New Orleans covering the I. C. elevators at Stuyvesant Dock and the T. & P., M. O. P. elevators at Westwego. The leases are for a period of five years and will give the Dock Board control of the entire export handling facilities at New Orleans. One of the provisions of the lease of the Stuyvesant Dock elevator from the I. C. will be that a marine leg to handle barge grain will be erected. This addition will involve the expenditure of quite a large sum, but will add immensely to the port's facilities for handling bulk grain from barges. As soon as the attorneys approve the legality of the leases they will immediately be signed by the Dock Board, the I. C., T. & P. and M. O. P. railroads.

cars having been received. Oats were a little more plentiful than the previous week, 106 coming, while but 25 cars of alfalfa meal came. Demand continued slow, but there was a little improvement and corn prices jumped several cents. Track 3 white was quoted February 29 at \$1.32, 3 mixed at \$1.29 and 3 yellow at \$1.34. Three white oats were quotable at 59½ to 60 cents. It is believed demand will be better just as soon as farm work gets well started.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending Feb. 27 were 986,161 bu. of wheat.

Albert J. Bussenius of the grain and feed firm of Walton Bros. has just returned from two weeks at Miami, Fla.

Receipts of flour and grain for week ending Feb. 28 were 58,577 barrels flour, 1,292,467 bus. of wheat, 69,263 bus. of corn, 21,232 bus. of oats, 3,778 bus. of rye and 440 tons of feed.

The following out of town visitors were registered at the Commercial Exchange during the week: Orville Wright, Baltimore; A. S. Smalley, Bridgeton, N. J.; Paul A. Brennan, Bridgeville, Del.; A. E. Bowman, Hagerstown, Md.; L. A. McGalliard, Trenton, N. J.; D. D. Mancill, Kenett-square, Pa.; Howard Hilyard, Kenton, Del.

Robert Morris, chairman of the Commercial Exchange Grain Committee, has notified the members that a hearing on the proposed revision of the United States standard for oats will be held in New York City March 3, and your Grain Committee asks that they submit to it any suggestions or objections that you may have bearing on the matter so that the same may be presented at the hearing.

Flour.

The market ruled firm and millers' limits were well maintained, but there was only a moderate demand and mostly for current wants. Exporters manifested little interest with buyers and sellers apart. Receipts for the week were 58,577 barrels. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$9.50@9.75; do nearby, \$9@9.50; hard winter straight, \$9.75@10.25; do short patent, \$10.25@10.75; spring first clear, \$9.50@9.75; do patent, \$10@10.35; do short patent, \$10.50@10.75; fancy spring and city mills patent family brands, \$11@11.75.

DULUTH.

S. J. Schulte, Correspondent.

Randall, formerly of Randall, Gee & Mitchell, Duluth, but now engaged in the trade on both the Minneapolis and Winnipeg markets, was a visitor here from Winnipeg during the last week.

Ernest F. Jacobi, one of the veteran operators on this market, was accorded enthusiastic congratulations on the exchange floor of Friday on the announcement that he had become a grandfather, his daughter having presented her husband with an infant girl.

H. J. Atwood, of the Atwood, Larson Co., has returned from a West Indies cruise of five weeks. He said it was a delightful and instructive holiday, there being something new and of interest to see every hour of the time. It was the first holiday Mr. Atwood had taken for several years.

James Graves, of the Capitol Elevator Co., is spending a vacation in taking in the West Indies cruise after a strenuous fall and early winter business. He had been anxious to get away some time before he did, but he was compelled to defer his trip in order to clean up outstanding trades as far as possible.

Millers have been active buyers of spring wheat on this market lately and premiums extending up to 40c over the Minneapolis May price have been paid. Amber durum wheat was also wanted by millers and the premium on it was marked up to 29c over May. The lower grades have not been wanted and they have been absorbed by the elevators at the elevator basis.

With limited receipts storage space is holding out in elevators at Duluth and Superior much better than expected. Stocks of all grains only gained a few thousand bushels in the elevators last week and in view of the opening of spring being only a few weeks off, no interests are doing any worrying on the score of not being in position to take in all the grain from the country that may offer up till the opening of navigation. Some of the houses have been able to do a little merchandising of grain lately, and they have made space for fair tonnages. The Consolidated Elevator system and Great Northern Elevators have the great bulk of the available storage space.

Elevator and commission men here are complaining of the almost entire lack of eastern inquiry for either wheat or coarse grains for shipment at the opening of navigation, as has always been usual at this period. One elevator man said he had never found trade as dull as it is at present. He attributed that condition to the heavy stocks in the East of everything in

food grains, in conjunction with Canadian stocks available for the Liverpool market. Anxiety was expressed in some quarters over the delays coming about in unloading and moving the cargoes of grain being held at Buffalo and at other Lake Erie ports.

PORTLAND, ORE.

The Japanese steamer Kongosan Maru has been chartered to load the middle of March for the United Kingdom.

With increased acreage the prediction is being freely made that the Oregon wheat crop this fall will be double what it was last year.

The last full cargo floated at Portland for the United Kingdom was aboard the Norwegian steamer Hercules, which was dispatched Jan. 11. The probabilities are the Kongosan Maru will be the tail-end carrier to take on a complete load of grain at Portland this season for the European side and it is expected to total 7,000 tons.

Practically 75 per cent of the wheat in Umatilla county was killed by the December freeze and it will require about \$750,000 to pay for wheat with which to reseed, according to Lyman G. Rice of Pendleton, a Portland visitor. Mr. Rice told banker friends here that the banks of Umatilla county will be able to meet the extra financial needs occasioned by the loss of wheat.

Wheat is now being reseeded where the land is in condition to make a good seed bed. Some reseeded is being done in the west end of the county and in the extreme north and east ends. Between Pendleton and Helix and east of Pendleton the ground is still too damp, according to farmers, and comparatively little seeding has been done there.

John Cameron, of the Cameron-Yenney Grain Co., of Walla Walla, Wash., has purchased the interests of John Mikkelsen of the Seattle office of the Mikkelsen Grain Co., with offices in Portland and Seattle. S. E. Mikkelsen, heretofore Portland manager of the Mikkelsen Grain Co., will manage the business, with headquarters in Portland.

Terminal receipts, in cars, were reported by the Merchants' Exchange for the season to Feb. 26 as follows:

Portland—Wht.	Bly.	Flr.	Crn.	Ots.	Hy.
1924-25	13,526	487	1288	512	531
1923-24	20,450	170	1986	378	553
1924-25	3,872	308	207	424	220
1923-24	7,820	119	542	302	181
1924-25	6,446	290	1855	602	412
1923-24	8,736	233	2331	732	378
1924-25	1,984	3	163	1	2
1923-24	1,984	3	163	1	2

CINCINNATI.

George Mosbacher, Correspondent.

There is an excellent demand here for seed oats at good premiums, but ordinary quality was only in fair demand.

Bert Gale, son of A. C. Gale, of the A. C. Gale Grain Co., who was formerly connected with the grain business, is now associated with a wholesale grocery firm at Jacksonville, Fla.

D. J. Schuh, executive secretary, represented the local Exchange at a public hearing on the subject of oats grading, which was arranged by the U. S. Dept. of Agriculture at Louisville and Chicago the past week.

Fire of undetermined origin destroyed the College Corner Milling Co. grain elevator at College Corner, Ohio, causing a loss of \$25,000, according to a report received here from Hamilton, Ohio, last Wednesday.

Fred Scholl, of The Scholl Grain Co., popular and successful operator of one of Cincinnati's largest elevators, returned Friday from a week's business trip to eastern seaboard cities, which he visited in connection with the company's export trade.

The Richter Grain Co., which has made a specialty of marketing smutty wheat, grain screenings, bin burnt grain, mahogany corn and off grade oats and rye for many years, are soliciting consignments to meet their increasing demands. The firm requests that shippers send large samples.

The wheat market has hardly deserved mention this week as there was little demand for spot or for shipment. Mills reported a very slow flour demand with ample stocks of wheat on hand. Receipts were the smallest of the crop season. The market, though, was strong with options and No. 2 red sold up to \$2.05.

Substantial decreases in express rates and charges which will save shippers who

consign goods to Southern and Western points thousands of dollars annually went into effect last Sunday in accordance with a ruling of the Interstate Commerce Commission. J. W. Dale, general agent of the American Express Co. of this city, announced this week.

Receipts of corn were materially smaller, but sufficient to care for the immediate needs of millers and industries who were principally the buyers. The high prices continued to curtail the feeding demand, and the advanced prices for cattle and hogs to the highest of the season, while enabling farmers to again feed corn profitably was not noticeable in local buying.

Dr. Rufus Blume, chief food inspector of Cincinnati, made the assertion this week that Cincinnati was one of the greatest sausage and lard producing cities in the country and was noted for the exceptional quality of the foods packed here. He said that half of the 43,000,000 pounds produced in 1924 were shipped to other cities in the United States and abroad. He said there were about 75 sausage factories in the city, with 35 of them under municipal inspection. The others were under federal supervision because of interstate business, according to Mr. Blume.

Total stocks of grain in Cincinnati elevators for the week ending Friday, Feb. 27, and week previous are as follows:

	Feb. 27, 1925.	Feb. 20, 1925.
Wheat	264,189	258,661
Corn	255,329	263,533
Oats	192,763	204,170
Rye	2,633	3,233

NEW YORK.

J. M. Nugent, Correspondent.

There was only a small scattered trade in barley for export, and a moderate business in Canadian oats.

Export business in rye was not very brisk and it is doubtful if sales for the week amounted to one million bushels in all positions.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: P. Y. Young of Boston; C. D. Palmer of London; W. W. Hutchinson and F. Sullivan, both of Montreal; H. B. Johnson and S. H. Jones, both of Chicago; L. S. Gregory of Minneapolis, and J. J. Page of Toronto.

There was an improvement in the export demand for American wheat during the past week and sales amounted to about two to three million bushels of American hard winters for March, April and May shipment and also for July-August and August-September shipments. There was only a moderate trade in Manitobas and American spring wheat.

BOSTON.

Frank W. Wise has been elected treasurer of the Boston Grain and Flour Exchange. Mr. Wise was secretary of the old Corn Exchange.

OKLAHOMA CITY.

W. F. Kerr, Correspondent.

George Sohlberg, President of the Acme Milling Co., and family have gone to Quebec on a vacation.

A flour, cereal and feed mill has been completed and put in operation at Fairland by the Fairland Milling Co.

Mrs. Magdalene Dobry, mother of V. A. Dobry of the Yukon Mill & Grain Co., died recently at the home of a daughter at Kremlin, Okla., and was buried at Yukon. She was 90 years old.

Cecil Munn, sales manager of the Southwest Wheat Growers Association at Enid, was a recent visitor in Oklahoma City. He was on business relating to Rotary matters principally. Enid is preparing to entertain a district Rotary meeting in April.

A letter from Wymore, Nebraska, says: "Good rains visited Gage county this week. Wheat fields are beginning to show green, and a fairly good stand of wheat is expected notwithstanding the adverse conditions which prevailed over this section of the state last fall."

Millers reported millfeeds in better demand near the end of February. Farm activities were partially responsible. Dealers bought more heavily than during recent weeks preceding because of the belief that feed prices are probably as low as they can be expected to be during the remainder of the season and that increased prices may be expected. Brans were in best demand. Flour millers reported a slow movement of flour both in domestic and export trade.

The Oklahoma Farmers Co-operative Grain Dealers Association held its annual meeting in Oklahoma City, Feb. 25. Plans were made for establishing this year five group marketing agencies and reviving a demonstration agency at Mooreland. To further perfect these plans another meeting is to be held at Enid March 23. Paul Peeler of Elk City and James Murphy of Enid were elected president and secretary respectively. The new board of directors consists of Harry Dunn of Rocky, G. H. Fryer of Weatherford, A. B. Nessel of Upply, James Murphy of Enid, E. J. Clark of Marshall, H. Hendrixon of Okeene and W. H. Henderson of Mooreland.

PEORIA.

L. L. Eckard, Correspondent.

Heavy snow throughout this district Saturday night is thought to be a great benefit to the winter wheat.

Several commission men from Peoria motored to Springfield Monday to be present at the opening of the new stocks at that point.

Heavy, \$1.20@12.35; packers, \$11@11.40.

There was no change in the tone of the cattle market. Veal calves were steady, with the best reported around \$14. Receipts were very light.

Only three cars of oats reported. The market was quiet, although the fresh business reported indicated values to be unchanged from Friday. No. 4 white selling 51½c.

Hogs at local yards showed a steady advance during the past week, with receipts of 2,000 head. Prices were 10@15c higher, with a top of \$11.40, the best heavy hogs selling at that price. Trading was active and a good demand for all kinds. Light hogs, \$11.15@12.15; medium, \$12.15@12.30;

Louis Mueller, president of Mueller Grain Co., was nominated for mayor of the city of Peoria at a hotly contested primary held last Tuesday. Mr. Mueller defeated E. N. Woodruff, who has served Peoria as mayor for eight terms, or 16 years, by a good majority. Mr. Mueller's many friends are confident of his election to the high office next April.

Corn receipts at Peoria have been moderate the past week. With 30 cars Saturday prices were quoted unchanged to 1c higher. The demand for the most part was confined to picked cars, the local industries taking a few cars. Demand was limited and a few cars were held over. No. 6 yellow, \$1.09½; No. 5 yellow, \$1.13; No. 6 mixed, \$1.10; No. 5 mixed, \$1.13; No. 4 mixed, \$1.15½; sample yellow, \$1.03.

Grain receipts and shipments at Peoria for week ending Feb. 23, as compared with same week last year, as reported by secretary of Peoria Board of Trade, as follows:

Receipts—		1925.	1924.
Wheat	16,800	20,400
Corn	463,450	440,700
Oats	167,400	473,900

SIOUX CITY.

Seed merchants' disclaimer tags will not relieve them from responsibility for the purity of seeds under the terms of a pure seed bill passed by the senate.

The measure provides, in addition to invalidating the disclaimer tags, that seed purchasers may have 15 days in which to test seeds for germination and return their purchases to the dealers if not satisfactory.

The merchants, however, are relieved of responsibility for loss of crop if the 15-day clause is not invoked by the purchaser.

Seedmen from the chief cities of the state have offered strenuous objection to the bill, claiming that it would open the door for importation of impure seeds from other states while placing Iowa dealers at a disadvantage in meeting the competition of outside dealers.

Stockholders of the Terminal Grain corporation voted to reduce the par value of the stock from \$100 a share to \$50 a share at a special meeting held last week.

The organization will be left with a capital of \$625,000 and a working surplus fully paid in. The amendment includes a cash distribution of 10 per cent on the new capital which will be paid out of the new surplus to each stockholder without impairment of the corporation's business.

The amendment, which was unanimously carried, will permit all earnings to be distributed as earned from year to year.

The deficit account represents losses in the conduct of the business accrued during the period of reconstruction following the war, and the organization account represents cost of selling the stock and overhead expenses incurred during the period of construction.

CHICAGO.

John F. L. Curtis of Clement, Curtis & Co. is spending the winter at Palm Beach, Fla.

Franklin I. Mallory of New York and A. R. Marquis, with Swift & Co., have been elected to membership in the Board of Trade.

The Arcady Farms Milling Co. has arranged to close its East St. Louis plant and to handle the business through the office here.

James Stewart & Co. of this city have secured the contract for the erection of a storage plant for the Superior Elevator Co. of Buffalo.

Among visitors on the Chicago floor last week were Sam L. Rice of Metamora, O., president of the Ohio Association, and John C. Husted of Toledo.

The recent announcement by the Quaker Oats Co. of a plan to split up their common stock on a four for one basis, an extra cash dividend of \$10 per share and record earnings of \$37.39 per share are of particular interest at this time.

The balance sheet as of December 31, last, shows a strong financial position, the net working capital having been increased more than \$5,400,000 during the year to \$22,438,249 and the ratio of current assets to current liabilities being better than 4 2/3 to 1. Inventories show an increase of more than \$5,500,000 to \$15,538,357, this being due, it is explained, by higher grain values and larger stocks of grain on hand than a year ago.

Stockholders will vote upon the proposed change in the authorized common capitalization from \$25,000,000, consisting of 250,000 shares of \$100 par, to 600,000 shares of no par, at a special meeting which will be held March 13 prior to the annual meeting on the same date. The preferred stock provisions also will be changed to allow holders of preferred four votes for each share they hold, thus making no change in the relative voting powers of the two issues.

Trade Opinion.

The recent sharp break of nearly 30 cents a bushel in May wheat raises the question: "Is the supposed shortage only a theory, or is the price of \$2 a bushel and probably a higher level justified?"

Taking the export surplus this year, 740 million bushels, as 100% and assuming the world's requirements will call for an average export of 762 million bushels, or 103%, of the available surplus, we find there is a shortage of 22 million bushels, or 3%, which has to be taken from the carryover of July 1st, 1924, which amounted to 203 million bushels. This 3% shortage proportionately divided over the exporting countries would mean that the carryover on July 1st, 1925, would be 13 million bushels smaller in the United States and Canada, 4.2 million bushels smaller in Argentina, 1.8 million bushels smaller in India and 3.3 million bushels smaller in Australia.—Frazier Jelke & Co.

There has been no specific item of news to account for action of the wheat market; the strength is presumably due to the theory that the major portion of the crop has already been marketed by producers; sentiment is also affected by the foreign acceptance of new wheat. We again suggest that the July delivery is more favorable for investors than the May, because of its extreme discount; also because importers are dependent upon North America for about three months after the first of July, the southern hemisphere having completed its shipments by that time.—Thomson & McKinnon.

During the next four months we expect a bullish movement both here and abroad, which may carry into the new crop year and make July wheat a decidedly good purchase at this discount under the May. If foreign conditions develop as expected, rye will soon be wanted and there is only one source for any big amount and that is in strong hands.—Logan & Bryan.

Reports on the condition of wheat in Kansas have been received from 135 stations in Kansas within the last week. The average for the state is rated at 81 per cent of normal as compared with 76 last Dec. 1. Low conditions are reported in north central counties, where it had a poor start last fall and in a few counties in the west and southwest, where it is too dry. In central counties the appearance is good, but Hessian fly is present and fears for the future are indicated by some reports. The rating of condition by districts of the state is: Northwest, 92; west central, 70; southwest, 85; north central, 85; northeast, 90;

east central, 85; southeast, 90. Weighted average for the state, 81. March is regarded as the most critical month of the season.—Clement Curtis & Co.

Public participation in the wheat market has been quite pronounced and sentiment is positively bullish. We are not at all surprised at the action of the market and believe the future course of prices will be largely determined by the action of exporters and the foreign demand which has appeared in volume. The corn market is experiencing a short covering period which does not yet appear to have culminated.—Bartlett-Frazier & Co.

Estimates as to the carryover at the end of the crop year and amounts of wheat available for export between now and then have been lost sight of in the general wave of buying at the moment present. Rye prices did not reflect the advances in wheat and corn and outside interest in this grain is still lacking. No change in this respect is looked for until definite export business appears. We are of the opinion, however, that sooner or later the continent will take rye in preference to wheat at around the present difference between May rye and May wheat, namely, 31 cents.—J. J. Badenock Co.

Wheat has a lower start in response to weakness abroad, but there was active support on the declines, which rallied the market and a sharp advance occurred. After a weak start, corn advanced steadily on the strength in wheat and persistent support from local leaders and outside trade, while oats reflected the strength in other grains in only a moderate way.—Pope & Eckhardt Co.

DES MOINES, IA.

W. H. Bartz, 23, who had been in charge of the cash department of Harper & Son, died of appendicitis and was buried Feb. 13. Up to the present time no arrangements as to his successor have been made.

To better serve their customers and broaden their working territory, D. L. Anderson Co. have changed their name to "Lockwood Grain, Incorporated." J. H. Owens, who for eight years was with Taylor & Patten Co., has been added to the executive force of the new corporation.

PROBLEMS IN FARMING.

In the reconstruction of industry and peaceful living after the war agriculture has had depressions, reverses and losses. New problems have sprung up in the minds of those interested both as actual farmers and the many self-appointed "leaders." Much has been said and many wailings have been indulged in and many propositions in the nature of solutions of the numerous problems of the farmer, both real and imaginary, have been made.

There is now an important commission consisting of some of the leaders of various agricultural organizations appointed by the president to work out a program doubtless of legislation and otherwise for the consideration of these "problems." In many ways this is an excellent commission. We have a right to expect a thorough, well intentioned, exhaustive study of the agricultural sit-

CATTLE FOR TUBERCULIN TEST.

With 9,000,000 cattle already under supervision for the eradication of tuberculosis, veterinary officials of the United States Department of Agriculture and the various states are making efforts to meet the continued demands for additional testing. A summary of the status of the work up to December 1 shows a waiting list of 226,534 herds containing more than 2,500,000 cattle. This list represents applications for testing in 34 states, the others having been able to handle the testing as fast as requested.

The states which had "clear slates" in this respect at the time the summary was prepared were: Arkansas, Delaware, Georgia, Kentucky, Louisiana, Missouri, Montana, Nevada, New Jersey, Oregon, Utah, Virginia, Washington, Wyoming, and the District of Columbia.

During November official veterinarians tested more than 50,000 herds, or lots containing more than 600,000 cattle. Of this number, about 18,000 cattle reacted as tuberculous and were removed from the herds, thereby leading to the establishment of accredited herds and areas.

MINERAL MIXTURES VALUE TO SWINE.

Mineral mixtures as a supplement to the swine ration have proved of distinct value in making gains and every mineral mixture should include salt. If only one mineral should be fed, according to results of the Iowa station, common salt should be that mineral, but all of the results show that common salt alone is not enough.

A mineral mixture consisting of two parts flake salt and 80 parts of ordinary sand made the best showing of any mineral mixture fed. All of the pigs fed in this test were given a basic ration consisting of shelled corn (mixed in color but mostly yellow), self fed; plus a 43 per cent protein, soy bean oil meal, self-fed; plus flake salt, self-fed. The sand-fed group was fed the same ration except that the salt was displaced with a mixture of two parts flake salt and eight parts of ordinary sand. Mr. Evvard recommends that no hasty deductions be made from the sand-feeding results, because of the limited data available. Further experiments with sand in the mineral mixture will be made immediately with both hogs and cattle. "It is well to emphasize that even though we may eventually prove that sand or material of like nature is of benefit in pig nutrition," Mr. Evvard says, "the proven value of calcium carbonate, bone products, potassium iodide salt and other time-tried substances should be not disregarded."

CAIRO, ILL.

Halliday Elevator Company
CAIRO, ILL.

Grain Dealers**USE OF CORN COBS.**

Corn cobs, one of the great waste products in American agriculture, are now coming to have an appreciable value as a by-product in corn production.

Adhesive gum or glue, a cheap adhesive in the fiber board and paper box industry, in labeling and in bill posting, is easily obtainable by adding water to the cobs and subjecting them to heat and pressure. It is estimated that the yield of such glue is about 30 per cent of the weight of the dry corn cob.

It is now possible to very cheaply extract two different sugars from the cobs; namely, crystalline glucose and crystalline xylose. They are both used as appetizing, nutritious components in commercial stock feed mixtures. Xylose, in turn, can be readily fermented into lactic and acetic acids if it is not desirable to use the sugar as a feed.

According to results of an investigation just finished by agricultural bacteriologists of the Wisconsin College of Agriculture, the greatest commercial possibilities in the fermentation of corn cobs rest in the production of acetone. It was found that 100 pounds of corn cobs yielded 2.7 pounds of acetone, 6.8 pounds of alcohol and 3.4 pounds of acetic acid. Acetone is a high-priced and important solvent used in the manufacture of celluloid, artificial ivory and other products of a celluloid nature.

There are produced in the U. S. some 20,000,000 tons of corn cobs annually. Most of this material is either a total waste or at best is used for fuel. The possibilities of developing a commercial value for corn cobs have not yet reached large factory scale production, but it is believed that within a short time the discoveries of their uses will make corn cobs a valuable source of raw material for manufacturing.

GRAIN FEEDING VALUES.

BROOKINGS, S. D.—Under a slogan of "lower the cost of production," the experimental staff at South Dakota State college announces a program of research that aims to further the farm demand for economic production.

One of the experiments will seek to determine the efficiency of various rations available for the winter feeding of fall pigs under South Dakota conditions. Special attention will be paid to the use of alfalfa in the ration to lower the cost of producing pork. Six lots of pigs will be used in the experiment, all to be fed corn, but each lot to receive a different protein supplement.

Another test will aim to find out the value of soft corn for feeding cattle. Little or no accurate information on this subject is available, and with the corn crop being caught in a soft condition at frequent intervals, the problem is an important one. The corn will be picked from an average field, and the mature ears fed to one lot of steers, while the immature ears are fed to another lot for a sixty-day period. Accurate data will be kept on the feed consumed and the weights of the animals.

REQUEST HIGHER CORN TARIFF.

Senator Brookhart, radical member of the Senate from Iowa, has asked the Tariff Commission to make an investigation of the corn situation with the view of increasing the import duty. The request has been made at the instigation of E. C. Corey, secretary of the Corn Growers' Assn., who pointed out that at the very time corn is at a high figure in this country large quantities began moving northward from Argentina.

uation of the day and, of course, this will follow up with well based recommendations. We should all expect good to grow out of this effort. It is intended for that purpose..

The demands upon Washington in regard to these farm troubles have been on the increase. It has become the mecca for many who either had a pain or a panacea. There are others, and they are numerous, who have never had faith in such cures for the actual difficulties and problems of the farm people. They believe that these problems will never be solved except by those who are in the industry and that nothing in the nature of sound solution of such difficulties will ever be approached by self designated, so-called leaders and problem solvers. It is possible that Congress may help but it can not cure. It should be extremely cautious in yielding itself to the promiscuous recommendations and clamorings which come to it.

A finer exhibition of the follies into which even the most sincere may fall in such efforts was exhibited in the effort to have Washington finance the suggestion to convert the great body of wheat growers into dairymen. Fortunately, the basis of this effort was wiped out by the advance in the price of wheat in response to an inexorable economic law.

Whatever may be suggested and whatever Congress may do to these ends, whether wise or foolish, it yet remains to be an absolute agricultural verity that the farmers must solve their own problems. This is a good time for those who have their money in the business and who look to it for reward to open the pages of that wise old philosopher "Aesop" and read the story of "The Farmer and the Lark."—*Weekly Market Bulletin, West Virginia Department of Agriculture.*

SOY BEANS AS FEED FOR DAIRY ANIMALS.

Soy beans make a valuable addition to the feeds suitable for dairy cows, finds C. H. Eckles, chief of the dairy division at the University of Minnesota. Feeding trials conducted at the university farm last year showed ground soy beans to be equal to linseed oil meal in feeding value. The ration, for cows milking up to 45 pounds, daily, consisted of alfalfa hay, corn silage, ground corn, barley, oats and ground soy beans. Soy beans carry 33 per cent protein compared with 30 per cent in linseed oil meal.

Soy bean hay proved a close second to alfalfa. The ration, when soy bean hay was used, consisted of soy bean hay, silage, ground corn, barley and oats. The beans were cut when slightly more mature than usual for hay purposes. While the beans make good silage, Eckles thinks it better to make them into hay. When used for silage, the general practice is to mix one load of beans with two of corn.

Soy bean hay is very palatable and carries a high percentage of mineral matter; one pound having practically the same amount as is found in 100 pounds of corn. Although the hay may seem rather coarse, cows eat it with relish and the coarse stems are usually cleaned up. In chemical composition, it ranks fully equal to alfalfa and carries digestible protein in quantities almost equal to wheat bran.

News of the Country Grain Trade

ARKANSAS.

Murfreesboro, Ark.—C. E. Wilson recently opened up a feed store and will build a warehouse 25 feet by 50 feet.

Stuttgart, Ark.—The Grand Prairie Comn. Co. has been purchased by Troy Watkins, of Stuttgart, and A. F. Christenson, of Pine Bluff, which they will operate under the firm name of Watkins & Christenson Cash Feed store.

Little Rock, Ark.—The following officers were elected at a meeting of the Little Rock Grain Exchange: Guy Cameron, pres.; Lane Satterwhite, vice pres.; August Probst, re-elected sec'y and treas.; M. W. Martin, traffic mgr.; J. F. Mueller, re-elected chief inspector and weigher.

CALIFORNIA.

San Fernando, Cal.—The San Fernando Grain & Supply Co. has reorganized its policy and personnel. Ralph J. Musser is manager.

Petaluma, Cal.—C. H. Aroyan, of Boston, and M. Asdorian, of Fresno, have bought the Kenney milk products and feed business and will take immediate possession.

Turlock, Cal.—W. C. Woxberg, of Hilmar, has purchased the entire stock of merchandise of the Turlock Produce Market and will maintain a feed and seed store here.

Riverside, Cal.—A. M. Lewis has purchased the Riverside Milling & Fuel Co. property, which he will remodel into a modern warehouse, continuing the feed and grain business.

Los Angeles, Cal.—The Sunset Mfg. & Grain Co. is now occupying the new 110,000 bu. plant, managed by O. H. Blasingham. Equipment for the manufacture of mixed feeds and conditioning of grain has been installed.

CANADA.

Vancouver, B. C.—The Globe Grain Co., Ltd., closed its offices Jan. 31st.

Owen Sound, Ont.—The Great Lakes Elvtr. Co. Ltd., has been incorporated to build grain terminals.

Regina, Sask.—The Saskatchewan Pool Elvtrs., Ltd., has incorporated with a capital stock of \$100,000.

Ft. William, Ont.—The Eastern Terminal Elevator Co., Ltd., has closed this office and will maintain the one at Ft. Arthur only.

London, Ont.—Hunt Bros. Ltd., will replace their mill which burned in December with a new 1,200 bbl. building and will re-engage in business, when completed.

COLORADO.

Denver, Colo.—One hundred and thirty-eight cars of grain were received here last week.

Denver, Colo.—Clyde Williams, mgr. of the Crescent Flour Mills, recently returned from a trip in eastern Colorado.

IDAHO.

Hazelton, Ida.—F. A. Robinson, formerly with the Gooding Mill & Elevator Co. at Gooding, now manages the Deaver Mfg. Co.'s elevator.

ILLINOIS.

New Canton, Ill.—The Heidloff & Rose warehouse will install a new sheller this summer.

Bondville, Ill.—Henry Giblin has sold his interest in the M. A. Kirk & Co. elevator.

Decatur, Ill.—L. W. Snerly succeeds Robert I. Hunt as president of the Decatur Terminal Elevator Co.

Stewart, Ill.—The Shearer elevators and business have been sold. Roy Nelson, of Tampico, will be the new manager.

Cullom, Ill.—Bernard Sullivan has increased his storage capacity by 20,000 bus., giving his warehouse 50,000 bus. capacity.

Elizabeth, Ill.—The Elizabeth Roller Mills, in charge of George Hartman, is now ready to grind wheat as well as coarser feeds.

Towanda, Ill.—Oren Clark has resigned his position as manager of the Towanda Grain Co. elevator, to take effect about March 1st.

Stratford, Ill.—A 7,000-bu. elevator and feed grinding plant equipped with a Munson Attrition Mill, has just been completed by Edward Dusing.

Graymont, Ill.—The Graymont Co-op. Ass'n will complete the installation of electric power this spring, and will build a concrete feed warehouse.

Assumption, Ill.—Alex Branyan, formerly manager of the Farmers' elevator has sold his interest to a man from Decatur, and will engage in some other business shortly.

Woodhull, Ill.—At the annual meeting of the Woodhull Grain Elevator Co., managed by I. R. Titus, it was reported that the elevator handled 356,000 bushels of grain during the year. Henry Brown is president.

Moline, Ill.—K. I. Willis Corp. has filed trade mark Mo. 195,286 for elevator cups, which consists of a heart, bearing the words "Superior Elevator Cups" a picture of an elevator cup and the letters "DP" and "OK."

Bloomington, Ill.—A very substantial profit was reported at the annual meeting of the Harris Grain Co., which was placed in the surplus fund. F. D. Gillespy is manager; C. O. Gillespy, pres.; J. W. Bateman, sec'y.

Colfax, Ill.—The recent sale of the Colfax Grain Co.'s elevator to E. S. Lyons for \$5,050, was disapproved by the court because the price was less than one-half of the appraised value. The trustee, James Fielding will hold another sale soon.

Oneida, Ill.—At a meeting of the Farmers Co-op. Co., Inc., the following directors were elected: James McBride and Zina Crane. M. C. Brown will begin his third year as manager. A large mill, costing between \$8,000 and \$9,000 is nearing completion.

Ottawa, Ill.—The Wallace Grain & Supply Co. reported a profit of \$15,125.92 for 1924, at the annual meeting and 8 per cent dividends were declared. Officers elected: Matt Gahan, pres.; Oscar Haerberle, treas.; R. A. Green, sec'y. Henry Bonges as manager and the old board of directors, were re-elected.

INDIANA.

Corunna, Ind.—J. H. Knauer has leased his elevator to Frank E. Bard.

Evansville, Ind.—Polk-Genung-Polk Co., has started work on the concrete 354,000-bu. addition to the Igleheart Bros. Mfg. Co.'s grain elevator.

Advance, Ind.—Ralph Cunningham, age 35, a grain dealer, died as a result of an attack by robbers, presumably, as money and receipts were missing in his office, and an iron bar was found near by.

Burket, Ind.—On March 20, at 10 o'clock, the elevator, equipment, office furniture, all stocks, etc. of the Burket Equity Union and Burket elevator will be offered for sale by the receiver, William Shaffer.

Etna Green, Ind.—The Etna Lbr. & Elevator Co., which succeeds the partnership of John W. Stackhouse, Wm. T. Hess, F. E. Melick, V. V. J. G. L. M. and R. M. Anglin in the Etna Lbr. & Mfg. Co., took possession Feb. 16. Officers are: John W. Stackhouse, president; Wm. T. Hess, vice-president; Victor V. Anglin, secretary-treasurer.

IOWA.

Story City, Ia.—The Farmers' Elevator Co. will build a new house in the near future.

Allendorf, Ia.—It has been decided to establish a co-operative farmers' elevator. Meno Feldkamp, president; R. Hoekstra, secretary.

Onawa, Ia.—This spring L. C. Roush and F. A. Huggenberger will rebuild the Roush mill, recently destroyed by fire, at a cost of \$60,000.

Fostoria, Ia.—The Fostoria Elevator Co. has reincorporated for a period of twenty years more. Capital stock, \$10,000. President, J. H. Graham.

Clarksburg, Ia.—Small damage was done to the Farmers Elevator Co.'s elevator when a motor burned out and set fire to surrounding timbers.

Cedar Falls, Ia.—Directors of the Farmers Co-op. Co. were re-elected at the company's annual meeting and a \$200,000 business during the year was reported.

Brooklyn, Ia.—At the annual meeting of the Malcolm Farmers' Elevator Co., Harley Bocknau was re-elected as manager. From six to twelve per cent dividends have been paid every year.

Larrabee, Ia.—The stockholders of the Farmers Elevator Co. held their annual meeting and re-elected their officers and directors. Officers: W. R. Montgomery, president; Fred Gilbert, vice-president; Geo. Nitz, secretary; Geo. Lockwood, treasurer.

Traer, Ia.—A reorganization of the company has been attempted by the directors of the Farmers' Co-operative Co. The capital stock of the new company will be \$20,000, divided into shares of \$100 par value each, subscriptions not to be binding until the \$20,000 has been subscribed. The buildings and equipment, so the plan goes, are to be purchased from H. J. Ferguson, receiver at a price of \$12,644.50. The board of directors was also granted authority to purchase the stock on hand

of the Farmers' Co-operative Co. at its appraised value.

Duncombe, Ia.—T. E. Ibberson Co. was awarded the contract to build the Farmers Co-op. Elevator Co.'s new 40,000-bu. cribbed elevator which will be equipped with up-to-date machinery, including a self compensating Richardson Automatic Grain Scale, capacity 3,000-bu. per hour.

KANSAS.

Harper, Kans.—Fire practically destroyed the August Mentze Feed Store.

Bonner Springs, Kans.—Fire damaged the Enterpe Mill, two miles south of here.

Pratt, Kans.—The office of the Kansas Flour Mills Co. was destroyed by fire, Feb. 25th.

Hazleton, Kan.—A Kewanee All Steel Truck Lift has been installed by the Star Elevator Co.

Galva, Kans.—The Farmers Co-op. Grain & Supply Co. will install a truck dump about Mar. 1.

Garden City, Kans.—Fire slightly damaged the warehouse of the Garden City Co-operative Equity Exchange.

Sublette, Kans.—The Sublette Grain Co. has installed a Kewanee All-Steel Truck Lift, Standard Model, Single Outfit.

De Soto, Kans.—The De Soto Elevator, operated by Messrs. Dicken and Morse, has neared completion and is in running order.

Paxico, Kans.—The J. H. Dougan & Son elevator which burned recently will be replaced with another built of re-enforced concrete.

Junction City, Kans.—On March 1st, Andrew Beeler entered the firm of R. H. Christensen, coal, grain and feed, in which he had purchased an interest.

Penalosa, Kans.—The Dickhut Grain Co. operating at Cullison, Preston and Wellsford, has purchased the Magruder elevator. Ross Knappenburger will remain as manager.

KENTUCKY.

Hopkinsville, Ky.—A train load of flour and mill products left the Acme Mills here for Birmingham and Montgomery, Ala.

Hickman, Ky.—The Hickman Milling & Feed Co., composed of Roy Clark and J. N. Rogers, has almost completed another large mill, replacing the one destroyed in November.

MARYLAND.

Ellicott City, Md.—The Patapsco Mills of the C. A. Gambrill Mfg. Co., Inc., has commenced liquidating. The bondholders received the milling plant, which included a 100,000-bu. elevator here and another at Woodbine, Md.

MICHIGAN.

East LeRoy, Mich.—The elevator of W. H. Nelson was recently destroyed by fire.

Owosso, Mich.—A new firm to rebuild the Isbell Bean Elevator is being organized by L. C. Sly. One-third of the capital stock of \$35,000 has been pledged.

MINNESOTA.

Faribault, Minn.—E. B. Murphy, manager of the Farmers Co-op. Elevator Co., has resigned.

Barnum, Minn.—The Farmers Co-op. Co. will probably increase their grain storage space this year.

Waseca, Minn.—The Claro Mfg. Co. has installed two new Fairbanks-Morse Oil Engines, one 4 h. p. and the other 6 h. p.

Madelia, Minn.—A flour mill was purchased here by E. W. Erickson, representing B. B. Sheffield and associates, Minneapolis.

Lester Prairie, Minn.—Fire, originating in an elevator head, destroyed the mill

of C. F. W. A., V. E. and R. L. Newstrom on Feb. 23rd.

Worthington, Minn.—The Humiston & St. John Co. elevators and business at Org and this point have been purchased by the St. John Seed Co.

MISSOURI.

Springfield, Mo.—The Holland-O'Neill Milling Co. will erect a \$100,000 flour mill.

Ash Grove, Mo.—G. W. Wilson recently traded the old Ash Grove Flour Mill for some real estate in Springfield.

Salem, Mo.—G. C. Gwin, of Nevada, Mo., has traded his farm near there to Summers Bros. for the Banner Roller Mills, to become effective March 1st.

Norborne, Mo.—The defunct Farmers' Elevator Co.'s properties, now in the hands of the federal bankruptcy court, will be disposed of in the near future.

Concordia, Mo.—Geo. A. Klingenberg has bought his father's half interest in the elevators and yards here and at Aullville and will operate same under his personal name, taking the place of the former J. S. Klingenberg & Son.

MONTANA.

Hardin, Mont.—The Hardin Grain & Fuel Co. will paint its elevator and coal sheds.

Standford, Mont.—The Stanford Milling Co., will erect a 30,000-bu. capacity elevator as soon as weather permits.

Livingston, Mont.—W. J. Kaull, for several years in charge of the Park County Milling Co.'s mill and elevator, is moving with his family to a ranch near here.

Absarokee, Mont.—The elevator formerly operated by the United States Elevator Co. has been leased by G. W. Potts who will add an up-to-date feed grinding dept.

NEBRASKA.

Crete, Neb.—The Crete Mills has erected a 25,000-bu. capacity addition.

Wauneta, Neb.—The new flour mill is installing a 25 h. p. Fairbanks-Morse oil engine.

Bertrand, Neb.—S. Genho, of Holdrege, has purchased the East Elevator of the Johnson Grain Co.

Ord, Neb.—Ed Freeman has purchased the stock and fixtures of the Farmers' Grain & Supply Co.

Superior, Neb.—The concrete elevator and feed mill of the Superior Terminal Elevator Co. has been leased by Scouler Bishop Co. with Frank Saums in charge.

NEW YORK.

Oswego, N. Y.—The State Elevator in this port will be ready for the opening of navigation on April 1st.

Oakwood, N. Y.—A modern truck dump scale is contemplated by the Shoemaker Co. to be installed this spring.

Lyons, N. Y.—Henry Killeck, a miller for over forty years, died of pneumonia. The business will probably be carried on by his four sons who were associated with him.

Syracuse, N. Y.—Harry Mason Knox, a feed salesman, of New York, has been appointed to the list of official Holstein-Friesian judges. Mr. Knox bred the famous "Adirondac Wietske Dairy Maid" who produced in four successive lactative periods, 129,600 lbs. of milk, the world's record.

NORTH DAKOTA.

Forbes, N. D.—Fire destroyed all the combustible material in the Forbes Equity Exchange concrete elevator Feb. 13th. The machinery loss alone is approximately \$4,000.

Holtsberry, secretary; E. J. Sherman, treasurer, and Jesse Strahm, deputy grange master for Hardin county, assistant secretary.

OKLAHOMA.

Oklahoma City, Okla.—The Acme Milling Co. will add six concrete tanks of 200,000 bus. capacity to its plant.

Tulsa, Okla.—The Johnson & Son Seed Co., owned by H. H. Johnson and Harry E. Johnson, has opened up a seed store.

Guthrie, Okla.—The El Reno Mill & Elevator Co. has closed a deal with F. S. Carroll, of Cashion, whereby he will haul about 6,000 bushels of grain from their elevator at Lockridge to Cashion, to be loaded into cars and shipped.

Buffalo, Okla.—At a meeting of the Buffalo Farmers' Elevator board, the following officers were elected: John Saunders, president; Ross Price, vice-president; Earl Anderson, secretary. M. V. Braley was employed as manager.

OREGON.

Imbler, Ore.—The Imbler Elevator Co. has been incorporated for \$16,000 by James McKinnie, H. H. Huron and Otis C. Buchanan.

PENNSYLVANIA.

Oil City, Pa.—The mill of the Riverside Mills was slightly damaged by fire.

Conneaut, Pa.—Clifford Dickey has purchased half interest in the Geo. Wright mill.

SOUTH DAKOTA.

Eureka, S. D.—Jacob and Christian Fichtner have purchased the elevator of Ed Bohle.

Hazleton Siding (Meckling p. o.), S. D.—The Steele Investment Co.'s elevator was destroyed by fire caused by backfire from a distillate burning engine. The contents were 30,000 bus. of corn, 4,000 bus. of oats, 40 tons of stacked rye, stacked alfalfa, a feed mill and warehouse, causing a loss of \$60,000, partly covered by insurance.

Plankington, S. D.—Proceedings have been started by A. Muller, receiver of the

Farmers Union Milling Co., to close up the affairs of the old corporation. \$40,000 is alleged to be the debt of the company and it is the plan of the directors to call upon the stockholders to make good the indebtedness after the milling property is sold.

TENNESSEE.

Nashville, Tenn.—The Neil & Shofner Grain Co. has closed their offices.

Celina, Tenn.—The Celina Mfg. Co., incorporated for \$4,000, has surrendered its charter.

Clarksville, Tenn.—At the meeting of the stockholders and directors of the Dixie Mills Co., an 8 per cent dividend was declared and it was decided to increase the capital stock from \$50,000 to \$75,000. A 30,000-bu. capacity concrete elevator will be erected next spring.

TEXAS.

Luddock, Tex.—J. B. Roundtree will erect buildings for an ice, coal and grain business.

Brownsville, Tex.—The Tex-Mex Trading Co., dealers and manufacturers of feed and Tex-Mex corn meal is erecting a feed and meal mill which soon will be in operation.

Port Arthur, Tex.—A committee of the Pt. Arthur Chamber of Commerce and Shipping will investigate the feasibility of plans for the issuance of bonds to construct grain elevators, high density cotton compresses, cotton warehouse, cold storage plans and wharves, etc., on the Port Arthur-Beaumont ship channel.

WASHINGTON.

Seattle, Wash.—J. Heffernon succeeds John Mikkelsen as manager of the Mikkelsen Grain Co.

Seattle, Wash.—Kerr-Gifford & Co., Inc., grain and flour exporters and millers, has re-established an office here, with Philip Benedict in charge.

Ritzville, Wash.—The A. J. Finck interest in the Myers Shepley Co. has been purchased by W. H. Kreager who will succeed Mr. Finck as secretary-treasurer.

WISCONSIN.

Fennimore, Wis.—L. C. Berry is manager of a new feed store opened here.

Menomonee Falls, Wis.—The business, real estate and good will of the Menomonee Falls Grain & Supply Co. has been purchased by Fleetwood W. Schunk.

Houston, Wis.—The Houston Farmers & Merchants Elevator Co. has taken out articles of incorporation with capital stock of \$25,000, and opened for business Feb. 20th. Officers elected were: D. A. Tiffany, Money Creek, president; B. E. Lilly, Houston village, vice-president; A. G. Dyer, Houston village; Adolph Anderson, Houston town, treasurer; A. D. Nelson, Money Creek, director.

YIELD PER ACRE AND PROFITS.

Higher wheat yields mean greater returns for the time used in growing the wheat. This is well illustrated by the experience of 60 farmers whose cost of wheat production was secured by the Department of Agriculture. Eight farms had a yield of wheat of less than 15 bus. to the acre and got 10 bus. of wheat

for every 10 hours' work on the wheat. Thirty-two farms had yields of more than 15 bus., but less than 20 bus. to the acre and got 15 bus. of wheat for every 10 hours' work. The better yields were much more profitable, not only from the standpoint of returns but also from the labor involved.

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Aug. 1 to Feb. 28 (final 000 omitted):

NOTICE!

MILLS AND ELEVATORS

The U. S. Department of Agriculture recently recommended a new mixture for killing WEEVIL in grain, stating that the mixture was Non-Inflammable and Non-Explosive and could be used without injury to man—at the same time leaving NO ODOR or TASTE in the grain.

"TETRI-CIDE"

For your convenience we are placing on the market the above mixture ready for use, in 30 and 50 gallon Drums, at \$2.25 and \$1.95 per gallon respectively, F. O. B. shipping point. The drums are charged extra at \$6 each, but returnable for full credit within 90 days. Our name and trade-mark for this mixture is "TETRI-CIDE."

For a General Non-Poisonous and Non-Explosive Insecticide for killing moths and spraying for insects generally in mills and warehouses, we recommend

"S. O. S. Liquid Gas"

\$3.25 per gal. in drums, delivered.

Frt. Allowed
50-gallon drums @ \$3.25 gallon
30-gallon drums @ \$3.50 gallon
10-gallon cans @ \$3.75 gallon
No extra charge for containers.

1924	366	1,111	521	170	645	269
1924-25	31,228	20,774	8,278	5,041	13,744	14,207
1923-24	28,347	14,436	7,199	4,992	18,995	9,119
1922-23	28,527	24,044	7,994	6,497	20,731	5,140

Timothy—Market quiet and easy. Fair country run \$5.25@5.50 per 100 lbs., good country run about \$5.50@5.75 and fancy \$6.00@6.25.

Alfalfa Seed—Firm. Recleaned country lots \$22.00@23.00 per 100 lbs.

Clover Seed—Scarce and wanted at full prices. Country lots \$24.00@26.75 for 100 lbs., good \$27.50@28.50, choice \$29.00@30.00, fancy \$31.00@32.00 and Mammoth \$27.00@32.50, according to quality.

Flax Seed—Strong. No. 1 Northwest-ern closed at \$3.22@3.27.

Alsike—Firm. Average country lots \$20.25@21.50 per 100 lbs. Fair seed \$16.25@17.25 and poor at \$11.50@13.50.

Field and Grass Seeds

GRAB PURE SEED.

NAPOLÉON, OHIO—Seed houses are beginning to absorb the Henry county soybean supply. The market is strong at \$1.75 a bushel for good clean soybean seed. Soybeans is one of Henry county's best new crops. Wheat shorts, wheat bran, oil meal and cotton seed, together with corn oil by-products are high and will be high during the next few years. Soybeans replace tankage remarkably well when accomplished by mineral feeds. Henry county's acreage in soybeans will go forward by leaps and bounds next spring on account of these facts. Consequently the seed supply will be exhausted before the needs have been supplied. Seed houses are quoting soybeans at \$3.60 a bushel now.

KANSAS SEED SITUATION.

Seed trade with us is about normal for this time of the season. Demand for alfalfa and white blossom sweet clover is very good. Farmers are sowing a larger acreage than usual.

Sudan trade rather slow but picking up a little now. This being a late crop demand does not come till rather late in the season.

This part of Kansas being fortunate in having raised a well matured corn crop, we can furnish high germinating seed corn.

We are looking for a good seed business as the season advances.—Lindsborg Seed Co., Lindsborg, Kans.

KANSAS CITY SEED MARKET.

KANSAS CITY, Feb. 28.—This week was not an eventful period in the field seed trade. Dealers said the southern demand for forage seeds was held back by inadequate moisture in the cotton states and fear of another boll-weevil season. Ninety-three cars of cane seed arrived in Kansas City during February. Some of the large seed houses quit buying, as their stocks were ample for some time. The offerings were therefore thrown into the feed manufacturing trade. Some seed was taken for mixture with milo. Red top and orange were quoted as from first hands, at \$1.40 @1.45 per cwt., and black amber at \$1.35 @1.40. There was no pressure of millet seed on the market. Inquiry was fair, especially for German. The closing prices were: German, \$3.50@4; common, \$2.50@3; Siberian, \$2.30@2.50; hog, \$2@2.25. Sudan seed, country-run, brought \$3.50@4.25, and was offered for resale at \$5.50@6, cleaned and sacked.

Spring business in grass seeds has begun and March promises to bring activity in the distribution of blue grass, timothy and other varieties. Farmers are taking red clover seed at high prices. Very little native seed is available. Seeds are quoted in a wholesale way as follows, per cwt., sacked: Blue grass, \$17@28; timothy, \$6@7; red clover, \$20 @34; sweet clover, \$9@10; alfalfa, \$15 @23.

Buyers seem to think there is plenty of time to supply themselves with cow peas and soy beans. Trade is light. Cow peas are offered by dealers at \$4@5 per bushel. Bids to producers for soy beans are: Virginia, \$2.50@2.75; black Wilson, \$2.25@2.50.

TOLEDO SEED MARKET.

TOLEDO, O., March 1.—Clover seed after selling below eighteen dollars the past week staged a good comeback and closed strong at the end of the week. Buying power easily absorbed the offerings of March clover under eighteen dollars, and the trading was quite brisk. Deliveries on February contracts continued right up to the last day and were taken for store or shipment. Strictly domestic prime clover of known

origin is bringing a handsome premium and selling as high as two dollars over the prime quotation. The foreign clover is perhaps better looking seed but many dealers and farmers prefer the domestic seed and will pay high for it. The shortage of domestic seed is very pronounced and seedsmen are combing the country for any stray cars that may be for sale. The trade is certain to take large amounts of the foreign seed as it can hardly be distinguished from domestic without expert inspection. It is adaptable to this section of the U. S. and has been grown on many farms nearby and proven successful. October clover is getting more attention as its wide discount under cash and March makes it quite an attractive investment. There is so many things that may happen to make or break the coming crop between now and the time it is harvested that it offers many opportunities for the careful investor.

Alsike continues to lag behind clover, losing about twenty-five cents last week. Trade has been restricted by the plentiful stocks of good quality available. Prices are considered low enough at present and with a lively demand should do better.

Timothy has the blues with stocks all over the country that must disappear before it will be ready to sell higher. Liquidation the past week caused a twenty cent decline and this may bring fresh investment buying. First trade in September was made at \$3.25. There will most likely be some trading over of March to September and May.

DULUTH FLAXSEED MARKET.

DULUTH, Feb. 28.—An impressive bullish demonstration was afforded in the flaxseed market during the last week. Starting with just an upward tendency on Tuesday after the holiday, strength developed and the market fairly boiled over on Thursday, with advances extending from 10 to 12 cents registered. Top figures were more than maintained, with good underlying support evident during the two succeeding days. On the net result of the five days' trading, spot and the February future closed 16 to 19 cents up and the March, April, May and July futures from 13½ to 16¼ cents up.

Receipts from the country were negligible during the week, aggregating 17,407 bushels. Shipments in a moderate way continued to Milwaukee and Chicago crushers, aggregating 36,432 bushels, and stocks in the elevators were brought down to 670,000 bushels.

While some operators professed inability to understand the resumption of the upturn in the market in the face of possible urgent efforts on the part of Argentine holders to press the marketing of their season's productions of flaxseed on account of the light movement of it so far owing to limited buying of the European importing countries, it was noted that crushers' agents were standing right behind the market here during the week. Crushers were represented with having taken a hand in closing the market up here each day, and their buying and their bidding, especially on any weak spots, was in evidence right along.

The conference of operators on the long side was considered to have been in a measure explained by the impression gaining headway that Europe will begin to buy Argentine seed more freely in the near future, and thus remove its competition from this market beyond contracts for deliveries that have been already entered into by Eastern crushers. Holders of American seed were inclined to breathe more easily on account of the spread between Argentine and American seed being well in favor of the latter in Buffalo territory. American linseed oil interests have been expressing hopes that seed prices would

be maintained at a level this spring that would encourage Northwest farmers to materially increase their flax acreage and place themselves in position to supply sufficient tonnage to take care of the needs of the home market. Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year:

	Saturday.	Week ago.	Year ago.
On track	\$3.14 1/4-20 1/4	\$2.98 1/4-3.01 1/4	\$2.56 1/4-60 1/4
To arrive			
Feb.	3.14 1/4	2.98 1/4	2.56 1/4
Mar.	3.14 1/4	2.98	2.56 1/4
Apr.	3.14 1/4	2.99	2.57
May	3.14 1/4	2.99 1/4	2.56 1/4
July	3.11 1/4	2.98 1/4	2.53 1/4

SEED IMPORTS.

Red Clover: The demand is greatly disappointing and is only from hand to mouth, which is on account of the very high prices. We believe the farmers will use only limited quantities, substituting the balance either with alfalfa, alsike clover, sweet clover or even timothy. Although the French market has greatly declined the American buyers find it more profitable to secure presently their stock of No. 1 quality, which means 99.25 per cent purity, free of buckhorn and weed seeds and free of dodder, good color, in Toledo to better advantage than buying the crude material in Europe.

Alfalfa: Although the American crop has been reported much smaller than expected, the demand is far behind and practically at a standstill.

White clover is a coming feature. So far limited quantities have been imported, owing to the very high prices prevailing but lately the market has declined mostly on account of depressing conditions in Central Europe. There are not sufficient quantities available of extra fancy qualities, while of medium and low grades large quantities are in sight at very reasonable prices.

Dwarf essex rape is in very strong hands—stocks in Europe are practically

exhausted. The demand is likewise far behind the usual one. The new crop from Europe is usually ready in August, all depending on the weather and conditions.

Grass Seeds: Imported fancy and natural grasses were in fairly good demand and are expected to be in further good demand just as soon as warm spring weather sets in. Prices are very moderate.

Sunflower seed has been rather dull, owing to the unusually heavy crop in the United States. On top of this, Europe has considerable quantities which cannot be brought in, owing to the high import duty. Fancy qualities, free of weevil and free of rain damages are getting very scarce.

Canary Seed: Stocks are large—demand rather slow. Argentine reports temporarily to have 10,000 to 15,000 tons of the new crop available, which may lower the prices considerably.

In general, the month of February was, as usual, very slow, but we are all optimistic regarding the future, as the spring season is not very far off and should bring us plenty of business.—Julius Loewith, Inc., New York.

URGED TO FORM CORPORATION

PIERRE, S. D., Jan. 16.—Development of an efficient standard method of seed certification and extension of the active membership roll to make for more effective efforts in all parts of the state were laid down as the two immediate objectives of the South Dakota Crop Improvement association in the annual message to this organization delivered here by Hugh B. Nash, of Redfield, president.

Mr. Nash, in his address, urged that members give favorable consideration to a plan of incorporating their organization, owing to the aid this action will give to its business program.

"Grain growers of South Dakota must face the fact that they are less efficiently organized for the purpose of gaining a seed market than those in practically any neighboring state. Certification of seed is necessary to obtain the confidence of buyers, and the adoption of this system in South Dakota is one of the most important problems before us."

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending Feb. 28, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....	64,500	68,415
1924.....	120,000	16,920	210,515	411,706

NEW CORN FOR NORTHERN MINNESOTA.

A new corn for northern Minnesota is being considered by the Minnesota agricultural experiment station. The new variety to be developed will be obtained by crossing an early flint and a later dent corn. The flint corn possesses earliness and hardness while the dent corn gives yield and other desirable qualities. Crossed seed is obtained by planting the varieties, which it is planned to cross, in alternate rows and detasseling all of one variety before the silks of that variety appear. To cross an early with a later variety, it is necessary to plant the late variety several days before the early variety so that both may mature at about the same time.

MOST OF TIMOTHY SOLD.

Approximately 80 per cent of the timothy seed crop had been sold by growers up to November 4. Movement of the crop has been somewhat slower than that of the last two years, especially in southern Minnesota, southeastern Iowa, and northeastern South Dakota.

If this paper pleases you kindly recommend it to your neighbors in the trade.

WHEAT AREA INCREASED.

The area sown to wheat in Italy for the 1925 harvest is estimated to be 11,664,000 acres, the largest in the last four years, according to a cable from the International Institute of Agriculture to the Department of Agriculture. The final report of wheat acreage last year is 11,281,000 acres, the preceding year 11,554,000 acres, and for the 1921 harvest 11,489,000 acres. Practically the total wheat crop of Italy is fall sown.

WORLD WHEAT AND RYE PRODUCTION.

A decrease of about 440,000,000 bus. in the estimated world wheat crop as compared with last year is indicated by reports received by the Foreign Service of the Department of Agriculture up to Dec. 17. The estimate for the year 1924 is 3,300,000,000 bus., compared with 3,740,000,000 bus. produced in 1923, 3,400,000,000 bus. in 1922, 3,320,000,000 in 1921 and 3,740,000,000 the estimated average production during the five pre-war years 1909-13. The most important reductions in the current year are the 200,000,000 bus. decrease in the Canadian crop, and a decrease of about 60,000,000 bus. in the Argentine crop. European crop outside of Russia is about 180,000,000 bus. below last year and nearly 260,000,000 bus. below the average for the same territory in 1909-13.

A reduction of about 320,000,000 bus. is reported in the world rye crop as com-

pared with last year. The estimated production for the current season is 1,174,000,000 bus., compared with 1,495,000,000 bus. in 1923, 1,424,000,000 bus. in 1922, 1,249,000,000 in 1921 and 1,764,000,000 bus. the estimated average production for the years 1909-13. About 99 per cent of the world rye crop is produced in Europe and the reduction in this is due to the unfavorable condition in Europe during the year. The greatest decrease occurs in Poland where the 1924 crop is about 84,000,000 bus. below the crop of 1923, while a reduction of 27,000,000 bus. is reported in Germany.

PREVENTING SMUT IN WHEAT.

With the approach of wheat sowing time, Kansas farmers are being warned by the State Agricultural College to guard against wheat smut. Records show that smut losses cost Kansas wheat growers on an average of about \$1,000,000 each year. The cheapest and most positive insurance against smut is treating the seed. After cleaning, the wheat seed should be soaked or sprinkled with a formaldehyde solution of one pint to 40 gallons of water. A dry treatment may be employed with copper carbonate at the rate of 2 ounces to a bushel of wheat.

Feedstuffs

The Mulvane Co-op. Union, Mulvane, Kan., is installing a new feed grinder.

The Associated Feed Mills, Inc., has been organized at Philadelphia, Pa., to deal in grain and feed.

The Gardner Roller Mill, Gardner, Ia., installed a 50 h. p. feed mill recently which has a capacity of 8 tons of ground feed hourly.

John Ryan is president and Jas. A. Ryan, treasurer, of the John Ryan Co. which has been incorporated at Boston, Mass., with 1,000 shares of no par value stock to deal in poultry feeds.

Jay Chapin, formerly associated with the Chicago and Hammond feed manufacturers, Chapin & Company, as Sales Manager, is now representing several mills and shippers of feed, at 508 South Dearborn street, Chicago.

Max Cohn, manager of the Tioga Milling & Elevator Co., Waverly, N. Y., has just returned from a Panama trip. The main punch of this story, however, is the fact that he was not alone because he took unto himself a wife before he left for Panama and charged up the time to a wedding trip. THE PRICE CURRENT-GRAIN REPORTER joins his many friends in wishing him a long and happy married life.

The feed business was very good up to Feb. 1st. Since then it has been slow. Outside demand is very quiet also. Prices now much lower but the farmers do not seem to buy. Our part of the state is nearly all dairying and when the prices are too high in the fall the farmers stop feeding, and do not start again later even if prices drop to where it would be profitable to feed. We think it a big mistake to boost prices in the fall and early winter.—McKercher & Rossiter, Wisconsin Rapids, Wis.

The La Budde Feed & Grain Co., members of the Chamber of Commerce, Milwaukee, are distributing their annual charts on mill feeds, oil meal, hominy, cottonseed meal and grain. The trade looks forward to the receipts of these each season, showing at a glance the trend of the market for the entire year, 1924, and sub-tables and charts for the four years, 1921, 1922, 1923 and 1924. We are confident the La Budde Company will gladly send this colored chart without charge to friends who address them as above.

After May 1 the Murphy Products Co. of Delavan, Wis., is expanding their mineral feed business through equipping a second feed mill unit at Burlington, Wis., in the Badger Creamery Bldg. "Monarch" grinding and crushing machine, additional motors, scales, etc., will be installed by the Globe Engineering Co. of 9 S. Clinton St., Chicago. Among the several leading manufacturers of mineral feeds, practically the only phase of the feed business that has been progressing satisfactorily recently, the Murphy Products Co. stands out prominently.

E. D. Koehler is now in charge of experimental work, of the Collis Products Co., Clinton, Ia. He was formerly with Purdue university at Lafayette, Ind.

Robert Hall, sales manager of the Collis Products Co., Clinton, Ia., while on an extended southern trip in the interest of his company is finding that the demand for Collis Process dried buttermilk is increasing rapidly among poultry feed manufacturers.

COTTONSEED MEAL.

KANSAS CITY, Feb. 28.—Dullness of trade and liberal offerings from Oklahoma and Arkansas resulted in a further decline of 50c a ton in cotton seed meal and cake prices this week. Kansas City dealers sold carlots at \$42.10 a ton and ton lots at \$47.10. Oklahoma mills asked \$36.50@37 for carlots; Arkansas, \$35.50@36.50; Texas, \$35.50. The Texas market was held firm by export business and dry weather. March and April are expected to prove better months than February for cattle feeding orders in Kansas and Missouri.

Anxiety of Minneapolis mills for bids caused a big slump in prices of linseed meal. The Minneapolis price dropped \$2 a ton, to \$43, and Chicago offered at \$41 to \$41.50. Kansas City handlers quoted meal \$3 lower, at \$46 for carlots and \$50 for ton lots. While sales here remained light, there was an increased interest. Linseed meal, since the recent recessions, is on a more reasonable basis, from the feeder's standpoint, though still out of line with the cottonseed product.

There were no changes in tankage and meat scrap prices. The previous week's price reduction of \$10 a ton developed some new orders, but trade was only fair. Tankage sold at \$55 a ton for carlots and \$60 for ton lots. Meat scrap was quoted at \$60 and \$65.

MINNEAPOLIS FLAX MARKET.

Crushers were in the market during the first and middle part of the week and with light offerings, the market was firm to strong right up till Saturday, when they cut a cent off of the top of the premium range.

Bulkhead offerings rather than full carloads began to make their appearance this week, which means the gradual lowering of country elevator stocks.

Tuesday's sales were made on a basis of 2c under to 3c over May; by Friday, the discounts had been entirely eliminated and crushers were paying 2@6c over the May for No. 1 seed on track and May at 4c over for to arrive. Minneapolis stocks were 400,377 bushels vs. 412,493 last week and 282,862 last year.

WEEKLY LINSEED REVIEW.

NEW YORK, Mar. 2.—United Kingdom: The linseed situation in the United Kingdom during the past week has displayed a firmer tone owing to the small shipments being made direct to the United Kingdom, and also being influenced by reports of very unfavorable weather in part of India.

Linseed oil remains steady but inactive. Fair quantities of foreign sorts are being imported.

Cotton oil is meeting with more inquiry, especially industrial.

India: Shipments of linseed this week amount to 188,000 bushels, compared with 80,000 bushels the week previous. Our Bombay agent estimates the total crop at about 18 million bushels compared with 18½ million bushels last year and 21¼ million bushels in 1923. The weather in the North has been distinctly unfavorable.

Argentina: The markets for seed in this country have been generally firm during the week with less pressure of country offers. However, the foreign demand has not been particularly keen. Clearances of linseed continue light around ½ million bushels weekly compared with two million bushels at this time a year ago. Port stocks are gradually increasing and now aggregate 3,000,000 bushels against 2,800,000 bushels the week previous, and 5¼ million bushels at this time a year ago.

EXPORTS OF FEEDS IN 1924.

The value of the exports of feeding-stuffs during 1924 was \$29,463,000, or \$7,727,000 more than during 1923, a gain of over 35 per cent. Most of this gain was due to the increase in the exports of oil-cake and oilcake meal which during 1924 amounted to \$27,589,000, or \$7,758,000 more than during the preceding year.

The exports of linseed cake during 1924 amounted to \$13,655,000, a gain of 23 per cent over the year before; those of cottonseed cake came next with a value of \$8,673,000, a gain of 28 per cent over 1923. Cottonseed meal was exported to the value of \$4,497,000, or nearly four times as much as exported during 1923.

The exports of hay during 1924 showed a decrease of \$338,000, or 45 per cent when compared with 1923; those of bran and middlings showed an increase of \$2,800; of corn feeds, an increase of \$21,000; prepared feed, not medicinal, an increase of \$115,000.

The amount of prepared feeds exported during 1924 was 6,690,000 pounds more than during 1923 and 4,520,000 pounds more than during 1922. The quantity of cottonseed cake exported in 1924 was nearly 411,000,000 pounds. This was 119,000,000 pounds more than in 1923 and 88,000,000 more than in 1922. The linseed cake shipments in 1924 were the largest in volume, amounting to 632,600,000 pounds or 100,000,000 pounds more than during 1923 and 190,000,000 pounds more than during 1922. Since 1922 there has been a gradual decrease in the volume of our exports of hay; in 1922, 52,005 tons were shipped from the United States, 37,444 tons in 1923, and 19,992 tons in 1924. There has been also a decrease in the shipments of linseed meal, the volume falling from 32,000,000 pounds in 1923 to 21,000,000 pounds in 1924.

FOOT-AND-MOUTH DISEASE ERADICATED.

Complete suppression of the foot-and-mouth disease in the United States has been announced by the Department of Agriculture. In California there has been no spread of infection since Oct. 9, and several months before that date eradication of the plague was virtually complete in most of the previously infected region. The Texas area also has been freed from the disease.

NORTHERN OHIO FEED MARKET.

Dealers in northern Ohio are all stocked up with high priced feed and when approached to buy are rather pessimistic regarding the situation on account of the unseasonable weather, in this section, and the demand is very poor.

If March should bring a cold spell we feel the situation would be decidedly improved.—E. L. Motts, Cleveland, Ohio.

THE FEED MARKETS.

MILWAUKEE.

Milwaukee, Feb. 28.—There was a slight revival in the mill feed market last week and quotations closed generally higher for the period. The increases, however, in all cases were slight as compared with the sharp price cuts which have ruled recently. There has been little if any improvement in demand noticeable here and the steadiness which is so desired by the dealers is still lacking. Prices for linseed oil meal, cotton seed meal and reground oat feed declined. Current quotations are: Winter bran, \$25.70@26.20; spring bran, \$25.50@26.50; standard middlings, \$26.50@27; flour middlings, \$30@31; red dog, \$37.50@38.50; yellow feed, \$26.50@27.50; linseed oil meal, \$43@44; cotton seed meal, \$38.50@43.50; omny feed, \$37@38.50; reground oat feed, \$30@31; gluten feed, 30 days, \$33.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

BALTIMORE.

Baltimore, Feb. 28.—The market is easier on both wheat and corn feeds, with demand at the moment confined to the supplying of actual wants only. No volume therefore to trading and stocks on hand ample for all requirements. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$32.50@33; western middlings, per ton, 100-lb. sacks, \$33.50@34; hominy feed, per ton, \$44@44.50; gluten feed, per ton, \$38.50@39; alfalfa meal, per ton, \$32; dried beet pulp, per ton, \$38.

LOS ANGELES.

Los Angeles, Feb. 25.—The market at this terminal during the past week has been very inactive. Receipts for the past six weeks being somewhat above normal and the uncertainty of the markets caused by the fluctuations in eastern markets has caused the dealers to delay in placing orders. The ground feed market has been dull with a decline in price of some of the commodities. Kansas bran is quoted at \$33 per ton. Utah-Idaho millrun, \$36.50. No. 3 yellow corn, spot, is being offered at \$2.50, with \$2.42 bid. No. 2 feed barley, \$2.25 per hundred. Grain sorghums have declined and No. 2 kafir is now being offered at \$2.25, with but \$2.12½ bid. There has been but little trading in wheat and No. 2 western white and No. 2 dark hard winter are offered at \$3.50 per hundred, with no bid price. The bills and warehouses are well stocked and there will probably be no change in the conditions for the next ten days or two weeks.

NEW YORK.

New York, Feb. 28.—Weakness prevailed in both city and western feed with declines of about \$1 to \$1.50 per ton. Consumers were well supplied by recent purchases calling for March delivery from the mills. Most of this material was bought considerably above ruling prices.

City bran was quoted at \$31.50; middlings, \$32.50, and red dog, \$45; while western bran ruled at \$31.25; middlings, \$32.75, and red dog, \$46.50 to \$47 per ton.

Flour Situation.

The local flour market was very firm with advances averaging twenty-five to fifty cents per barrel over the previous week aided by the renewal of strength in the wheat market.

Consuming demand probably decreased to actual requirements and the upturn also shut off important export business. Further large clearances were reported, however, mainly to southern Europe.

Spring patents were quoted at \$9.75@10.25; Soft Winter Straights, \$9.25@9.50, and Hard Winter Straights, \$9.50@10, per 196 lbs.

DULUTH.

Duluth, Feb. 28.—Trading in feeds was slightly improved on this market during the last week, following the recent cuts in prices of both ground feeds and mill feeds. Jobbers were reported to have been coming in more freely to fill better orders from cattlemen and the dairying interests. Closing prices are unchanged as follows: Bran, \$23; shorts, \$24; Boston mixed, \$25; red dog, \$37; flour middlings, \$31; No. 1 ground feed, \$39; No. 2 ground feed, \$36.75; No. 3 ground feed, \$34.50; cracked corn, \$43.50; coarse cornmeal, \$43.50; ground oats, \$30.

PHILADELPHIA.

Philadelphia, Feb. 28.—There is a better demand for feedstuffs and with moderate offerings the market ruled firm and in some instances prices are a shade higher. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$34@35; winter middlings, \$35@36; spring bran, western shipment, \$32@33; standard wheat middlings, \$33@33.50; flour middlings, W. S., \$37@40; red dog, W. S., \$44.50@46.50; low grade flour, W. S., \$56@57; rye middlings, W. S., \$32@33; reground oats feed, \$16@17; fine yellow hominy, W. S., \$44.50@45; fine white hominy, W. S., \$45@45.50; cotton seed meal, 36% protein, W. S., \$41; cotton seed meal, 41% protein, W. S., \$42.

MINNEAPOLIS.

Minneapolis, Feb. 28.—Local mills and jobbers reported the millfeed situation in a more convalescent state at the close of the current week; as one of them expressed it, if a relapse can be guarded against, things may turn out all right yet. The buying which did materialize during the past six days did not seem to originate from any one source. Mixers were in the market for small quantities, as well as the strict consumptive trade. The advance in coarse grains tended to put a little courage into the hearts of the local trade and with the end of the week today, a decidedly more optimistic spirit was to be noted.

Weekly shipments totalled: 10,503 tons this week vs. 12,068 last week and 19,950 tons last year. This does not compare very favorably with last year but with mills almost unanimous in their statement that they had the worst flour business on the crop during this week, not much can be expected in the way of feed shipments. Season shipments were: Since Sept. 1st., 342,518 tons vs. 398,462 last year; and since Jan. 1st., 107,005 tons this year vs. 127,558 last year.

Address G. B. Glenn, of Chattanooga Feed Co., Chattanooga, Tenn.

MEMPHIS.

Memphis, Feb. 28.—The feed market has been dull all week, but slight improvement is being reported. Millfeed is steady and a little higher, although stocks are large and mills find it difficult to meet the competition of distressed offerings. Wheat bran is quotable at \$27 to \$27.50, while gray shorts are offering from the mills at \$31.50 to \$32.00, although little is being sold. Cotton seed meal is quiet, but fairly steady and is selling at about the same price, although holders are asking more. For 41 per cent bids are \$35 to \$35.50 and 43 per cent \$37 to \$37.50. Alfalfa meal is still slow and is being offered at \$28.00 to \$28.50.

CINCINNATI.

COLLIS PROCESS PURE DRIED BUTTERMILK

SHOULD BE A PART OF ALL POULTRY MASH FEEDS

Feed Manufacturers who keep in touch with the experimental work conducted by the Agricultural Colleges and Poultry Feeding Experts in the scientific feeding of poultry, realize what a prominent place Dried Buttermilk has taken as part of all Mash Feeds fed.

If you are manufacturing mash feeds for growing, developing baby chicks, egg production in hens and pullets, and for fattening without **Collis Process Pure Dried Buttermilk**, you are doing so contrary to all present day teachings.

Buy your requirements now from the largest producers of Dried Buttermilk in the world.

Buttermilk dried by the Collis Process retains all feeding value and Lactic Acid found in fresh churned pasteurized buttermilk.

tion, and the losses suffered for bran and standard middlings early in the week were partially recovered toward the close. The firmness, however, was largely due to the higher prices asked by mills, though the jobbing demand was generally better with a good volume of car lot sales reported. Middlings remained unchanged. Quotations represent 100 lb. sacks: Soft winter wheat bran, \$28.50@29.50; hard winter wheat bran, \$28.50@29.50; standard middlings, \$31.50; soft wheat middlings, \$33.50@34.00; gray hard middlings, \$33.50@34.00; mixed feed, \$31.50@32.00; No. 1 alfalfa meal, \$30; hominy feed, \$43.50@44.

BOSTON.

Boston, Feb. 28.—Millfeed: Prompt shipment, per ton—Spring bran, \$32@32.50; winter bran, \$32.50@33; middlings, \$33@34; mixed feed, \$35@41; red dog, \$47; gluten feed, \$42.95; gluten meal, \$51.70; hominy feed, \$45.50; stock feed, \$50; oat hulls re-ground, \$17; cottonseed meal, \$12.50@14.75; linseed meal, \$46@46.50.

Oatmeal—Per 96-lb. sack, rolled, \$3.50; cut and ground, \$3.85.

Oats—All rail, fancy, 40 lbs., 69@70c; 38 lbs., 67@68c; regular, 38 lbs., 66@67c; regular, 36 lbs., 65@66c; regular, 34 lbs., 64@65c.

FEEDSTUFF SITUATION.

Mill feed market is about \$1 stronger on all grades of feed above prices of a week ago. Stronger grain markets have had their effect in a sympathetic way consequently mill feeds have tended to advance though it is conjectured that the strength is due more from the effect of the grain markets rather than the actual demand. Much more persistent buying wave must develop to maintain present market prices.

MINNEAPOLIS.—Bran, \$24; standard middlings, \$25; flour middlings, \$29; red dog, \$39 to \$41.

CHICAGO.—Bran, \$26.60; standard middlings, \$27.60; flour middlings, \$31.60; red dog, \$41.60 to \$43.60.

KANSAS CITY.—Bran, \$23.50; gray shorts, \$23.

St. Louis.—Bran, \$25.90; gray shorts, \$30.40.

ALFALFA MEAL.

A little scattered demand exists over widely scattered territory in small volume. Second-hand bag basis, nominally, quoted, choice, \$28; No. 1, \$26.50; No. 2, \$23. New bags, 50c a ton more. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—More sellers' interest than buyers', particularly for nearby shipment. Mills are discounting prices where they are urgently in need of shipping instructions. Market from a seller's standpoint is in a little healthier condition than a week or two ago. Nominally quoted reground, \$8.50 to \$9.50; unground, \$9.50 to \$10.50. Slight premiums asked for future months.

HOMINY FEED.—The distressed condition which has existed in the hominy feed market for some little time is about cleaned up and hominy feed is marketable on a much more normal and firmer basis at present. Nominally quoted, white, \$40.50 to \$41; yellow, \$39 to \$40. In bulk where available, \$1 to \$2 per ton less.

LINSEED OIL MEAL.—The market has had slight fluctuations from day to day and the tone has been very changeable during the past week or ten days. However, at this writing, market is in a more stable condition and is nominally quoted sack basis \$41.50 to \$42 Chicago. In bulk, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory. Quotations are as follows: Creamery in carlots a 6½c per lb. and L. C. L. up to 7½c.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop with resulting heavy production of seed and surplus stocks are the main influences in the market. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Demand is good and most of the orders received are for immediate shipment. Quotations follow: Gluten feed in bulk \$31 a ton, sacked \$33.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is better and at the lowered prices all packers' products are moving in increasing volume. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

BONE MEAL FOR CATTLE.

An experiment in feeding bone meal to cows was tried last winter by a number of farmers in western Minnesota. These cows are owned in a section of Minnesota where the disorder known as "depraved appetite" had been prevalent. The past winter was the first in which the cattle had not chewed boards and bones. Calves born of these cows in the spring were strong and vigorous. The experience of these Minnesota farmers is evidence that under some conditions cattle have a real need for mineral feed in addition to that provided by their ordinary ration.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Feb. 28.—A few April-May orders for alfalfa meal were booked this week, but prompt and March business was light, with mixed feed manufacturers asking for delayed shipment of February bookings. The mixed-feed people complained as to the disposition of their customers to postpone acceptance of delivery or maturing contracts. Probably this was due to uncertainty over the cotton seeding outlook in the Southern states. Mills in Kansas City are sold ahead to April and are more desirous of shipping instructions than of fresh orders. No price changes were quoted. Carlots sold as follows, per ton: Choice, \$27@28; No. 1, \$25@26; No. 2, \$22@22.50; No. 3 or brown, \$21.50@22.

While molasses-grain feed manufacturers reported a better demand for hog feeds this week, on account of a brighter swine market, the main activity was in horse, mule and poultry feeds. Some dairy feeds were taken. On the whole, business was fair and improvement was expected to follow spring development. Irregular price changes were quoted, the most notable being a decline of \$2 in pig meal. Farrowing this year is lighter than usual and not much pig meal is wanted. The various feeds sold in carlots, per ton, as follows: Dairy, \$37@47; cattle, \$39@46; hog, \$48@53; pig, \$71; horse and mule, \$33.50@45; alfalfa-molasses, \$28@34; scratch poultry, \$50.50@57; mash poultry, \$50@79.

ALFALFA A MILK PRODUCER.

Many Illinois dairymen could double the milk production which they get out of each acre of feed they grow by substituting alfalfa and corn for some of the less efficient dairy feeds now commonly grown on scores of farms in the state, W. J. Fraser, dairy farming specialist at the Illinois agricultural college advises.

These two feeds produce from two to four times the amount of digestible nutrients an acre that is produced by other crops commonly raised, he explained.

"Land and labor cost money and it is just as necessary that each acre produce a high yield of raw material to be manufactured into milk as it is that each cow in the herd should be an efficient machine for turning feeds into milk."

GRADES FOR ALFALFA, JOHNSON AND WILD HAY AND DRY EDIBLE BEANS.

During recent months the United States Department of Agriculture has been pushing its study of the grades for alfalfa, Johnson and wild hay, and dry edible beans so as to announce grades for these products in the very near future. The preliminary work is now practically completed and the Department expects to announce definite hearings to be held at various points in the country to consider the tentative grades before they are made official by the Secretary of Agriculture.

The hearings on alfalfa hay will be held at various points covering most of the states west of the Missouri River, also New York, Michigan and Alabama; the hearings on Johnson hay will be held in Alabama and Texas; those on wild hay in Texas, Kansas, Nebraska, Missouri and Minnesota; those on dry edible beans in Michigan, New York, Colorado, California, Idaho and Montana. A detailed statement of the dates and places of these hearings will be published in these columns as soon as available. We shall also publish items each week showing the progress of the hearings and the nature of the discussions. It is expected that more than thirty hearings will be held altogether

beginning early in March and continuing to May 1.

With the advent of the grades for alfalfa and wild hay, along with the grades which are now already out on timothy, clover and mixed grass hay, the Department will be in a much better position to organize its hay inspection service to cover most of the major classes and kinds of hay. It has received during the past few years many requests from the West for inspection of alfalfa hay at shipping points and important markets, but has held off organizing such a service until United States grades were available.

It is expected that the official grades for hay and beans will be announced very soon after the close of the hearings and that the Department will be in a position to extend the organization of its hay inspection service into the Western and Southern states, and to organize a bean inspection service if there is an expressed desire for this service in any of the important producing states.

MEASURING TIMOTHY AND CLOVER HAY.

The average number of cubic feet of timothy or a mixture of timothy and clover hay is on measurement averaged at 562 cu. ft. per ton of 2,000 lbs. weight, this being the average of 92 stacks measured and weighed in Virginia and New York states. This average does not apply to hays other than those named.

LEGUME HAYS RICH IN LIME.

Legume hays are rich in lime. The relatively large amount of lime in alfalfa, clover, and soy bean hay, together with their high protein content makes them especially valuable in the ration of growing animals. Grain and wheat bran carry abundant phosphorus, another mineral essential to the growth of bone. In two recent trials with beef calves at the Ohio experiment station, the addition of lime and phosphorus to a ration of ground corn, linseed meal, corn silage, and alfalfa hay resulted in slightly larger gains, less feed per pound of gain, and larger frames. In another trial with fattening steers at the Iowa station, the addition of a mineral mixture containing lime, phosphorous and iodine to a ration of shelled corn, linseed meal, corn silage, and clover hay proved profitable.

The Letter Box

One-Third of Former Wheat Acreage.

The Price Current-Grain Reporter: The wheat acreage in Two Dot vicinity was and also will be this year only about one-third of what it used to be some four or five years ago.

While the condition of the farmers and ranchers, with perhaps the exception of sheep men, is far from being good, it seems to me general conditions more than anything else have put this country on the bum.—*John C. Matson, Two Dot, Mont.*

Seeds and Crops in Ohio.

Price Current-Grain Reporter: Our demand for seeds will be mostly alfalfa and sweet clover. The Med and Main clovers are not being planted as much as in former years, and the price of red clovers being so high this year will drive more to the other seeds. Our corn crop was light and poor quality. Oats and wheat were good. Wheat on the ground is looking good now.

Not much grain left in farmers' hands. Wheat 5 to 10 per cent; corn 20; oats 10 to 15.—*Fred Kalmbach, North Baltimore, Ohio.*

OIL MEAL MARKET.

The oil meal market has been exceedingly strong the last couple of days. It dipped down below last week's level early this week but came back with a "whoop and a bang." Tremendous buying developed and mills claim sales in some cases from five to fifteen hundred tons at a crack. Apparently everybody had let their stock of meal run down to the last point and they all had to come in together. The mills now have apparently their entire production sold for March shipment and some of them claim to be well sold up into April.

Our price for prompt shipment meal is way under the market. This is simply due to the fact that we bought quite a round tonnage at the low prices for prompt shipment and we are able to give our customers the advantage of this, also we are desirous of selling a limited quantity to be shipped right out. Get in touch with us before it is gone.—*The Bertley Bulletin, Chicago, Feb. 28.*

MORE ALFALFA NEEDED.

Minnesota's ratio of leguminous crops is about one acre to every 16 acres of other crops and is much lower than the ratio in some of the neighboring states. "The ratio for best yields of other crops and for best results with live stock should be one acre of legumes for every four to six acres of other crops," says A. C. Arny of the farm crops section at University Farm. "Wisconsin and Michigan have reached this goal. If Minnesota is to keep step, it must increase its legume area from a little more than a million now to better than three millions of acres. Minnesota has about 200,000 acres of alfalfa and more than a million and a half dairy cows to feed. An acre of alfalfa for every dairy cow is a good aim."

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

RELIABLE Standard Blue Flame HOVER

"Footproof and Safe"

Has newest improvements. Saves time, money and trouble. Nothing to wear out. Chicks grow faster and stronger. Built of galvanized steel. Special burners give steady flow of oil and even flame. Our 1923 style is perfection itself.

Reliable Coal Burning Brooder

Built of strongly bolted, heavy gray cast iron. Will last a lifetime. Greater coal capacity. Burns hard or soft coal. Has two double disc wafers which control heat regulation. Has self-ventilating canopy. Specially designed fire bowl keeps grate clean. Used by largest poultrymen.

Reliable Standard Incubators

50 to 1100 Eggs
THE LEADER OF THEM ALL! Every Incubator proves Reliable reputation. There is a Reliable incubator built especially for your needs. Write us your requirements, and ask for Poultryman's Guide; it's Free.

Hay Department

HOLDING HAY IN OHIO.

We believe there is about 50 per cent of the hay crop left in the country. Farmers are not inclined to accept present prices and the demand is dull. Hay seems to be about the cheapest farm product at present.—*The Greenville Feed Co., O. P. Hall, Greenville, Ohio.*

HAY SHORTAGE IN MISSISSIPPI.

There was very little hay produced in Mississippi last year, owing to excessive drouth. Nearly every farmer is buying hay and will continue to buy until April or May.—*Grenada Oil Mills, Grenada, Miss., J. B. Perry, Treas.*

HAY RESTRICTIONS IN CANADA.

On and after January 1, 1925, the importation into Canada of merchandise packed in hay, straw or other fodders is prohibited from all countries except the United States, Japan, Australia and New Zealand unless such merchandise is accompanied by a certificate from a properly qualified government veterinary office of the country of origin that such hay, straw or other fodder has been grown and stored, and the merchandise packed in a district not infected with hoof and mouth disease, or, that the hay, straw or other fodder used in packing such merchandise has been thoroughly disinfected.

In the absence of such certificates, merchandise so packed will not be admitted into Canada unless satisfactory

evidence is produced to the veterinary director general at Ottawa that such merchandise was en route to Canada prior to November 15, 1924, in which case the veterinary director general may order the packing to be destroyed under the supervision of an officer of the federal department of agriculture, at the cost of the shipper.

TENTATIVE HAY GRADES HEARINGS.

The tentative grain specifications as proposed by the Department of Agriculture on alfalfa, Johnson and wild or prairie hay, will be as follows:

March 9—10:00 a. m., Montgomery, Ala.; Chamber of Commerce—alfalfa and Johnson hay.

March 11—10:30 a. m., Fort Worth, Tex.; 1st floor Neil P. Anderson building; alfalfa and wild hay.

March 13—10:00 a. m., San Antonio, Tex.; care adjutant's office, Fort Sam Houston; alfalfa, Johnson and wild hay.

March 16—10:30 a. m., El Paso, Tex.; Chamber of Commerce; alfalfa hay.

March 19—10:00 a. m., Phoenix, Ariz.; Jefferson hotel; alfalfa hay.

March 20—10:00 a. m., Los Angeles, Cal.; Grain Exchange room, I. W. Heilman building; alfalfa hay.

March 23—10:00 a. m., Fresno, Cal.; city council chamber; alfalfa hay.

March 26—10:00 a. m., San Francisco, Cal.; room 240, 425 California street; alfalfa hay.

Secretary J. Vining Taylor of the National Hay Ass'n is making a very proper and extended effort this year to provide entertainment for the ladies at the National Convention, Cedar Point, Ohio, July 28-30. He is offering a prize of some sort to the gentleman with sufficient experience to recommend a form of entertainment, both unusual and happy as it will appeal to the lady guests at the annual convention.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Asked why the Kansas City Stock Yards Co. had not been a good buyer of prairie hay on the recent decline, an official of the company said the barns in the yards were full and that there was no place to store the hay. This recalls a report in circulation last summer, that the stock yards company intended to erect some new barns before the 1925 harvest.

W. H. North observes that hay now arriving is showing improvement in condition, owing to the unusually favorable February weather.

Commenting on the big run of prairie hay a week ago and the price slump that resulted from it, Victor Faris said: "The big receipts were due mainly to a desire on the part of country holders to avoid tax assessments on March 1 in Kansas and other states. Aside from the unpatriotic feature of such action, the shippers exhibited bad judgment in rushing their product to market in February, which nearly always is a bearish month for hay, especially the wild variety. In order to save a few cents a ton in taxes, the shippers lost dollars a ton in the market recession. I don't think all of the hay was sent in to dodge taxes. Some of the hay was virtually sacrificed by tenant farmers, who had to move on March 1. In such cases it was necessary to get rid of the hay, but it might have been marketed sooner with better results."

February receipts of hay and straw in Kansas City were 2,724 cars, as compared with 3,776 in January and 2,800 a year ago. The arrivals are officially reported as follows:

	Feb., 1925.	Jan., 1925.	Feb., 1924.
Alfalfa	1,703	2,671	2,093
Prairie	726	695	480
Timothy	202	251	111
Clover mixed	33	31	26
Clover	24	40	3
Straw	36	88	87

Owing to the pressure of business, the directors of the Kansas City Hay Dealers' Association have not met for several weeks. Hence the committee appointed to arrange for a banquet of the association has not been able to report. C. M. Funk, a member of the banquet committee, said this week that the dinner might not be held before the middle of March. The hay men probably will dine at the Kansas City Club.

J. M. Hail's reports indicate that Nebraska farmers still have a large percentage of surplus alfalfa hay, but this is not the case in Colorado, nor to such an extent in Kansas. New Mexico, by holding too long for high prices, is faced with the necessity of selling a considerable portion of its crop on a comparatively low market. According to Mr. Hail's information, many holders of prairie hay in Kansas will carry a part of their production over into the new crop year, as prices have become too low to justify shipping.

"There would be more appreciation of threshed timothy hay of feeders had a better understanding of its relation to the unthreshed product," said Thomas Ennis of the Ennis Hay Co., when asked for an opinion Thursday. "Most people think threshed timothy has less feeding value than unthreshed hay because the seed has been removed," continued Mr.

NORTHERN HAY & FEED CO.

502 Corn Exchange Minneapolis Minn.

HAY Shippers Write for Quotations
WESTERN UPLAND ALFALFA AND TIMOTHY

Ennis. "In fact, the seed cuts little figure. If the hay is harvested green, the seed is immature, constituting a small fraction of the nutriment. In case the hay is cut after the seed matures, the seed will shatter out and most of it will be lost before the hay is consumed. Of course, threshed timothy is broken up and doesn't look nice, but appearance is not the only thing to be considered. Usually it is clearer than unthreshed hay, because in cutting for seed the farmer sets his sickle bar several inches from the ground. Timothy harvested for hay alone is cut close to the roots and is dusty. Dirty hay often gives horses the heaves."

HAY MARKET REVIEW.

The market was dull during the week Feb. 23-28, according to the Department of Agriculture. Offerings of ordinary and low grades were in excess of trade needs and were almost unsalable at some markets, although the light receipts of top grades moved without pressure. The demand continued slack with favorable weather restricting hay consumption while the possibility of early pasturing in the South tended to reduce the takings of this section.

Timothy averaged easier. Receipts continued fully equal to current needs at Boston and some concessions were still necessary to move the lower grades. Stocks accumulated at New York and prices declined 50 cents per ton with the market closing barely steady. The demand was light at Pittsburgh and all grades were accumulating at the terminals, while the Cincinnati market was burdened with heavy arrivals and prices declined. Low grades were almost unsalable and even top grades were harder to sell since buying was only moderately stimulated by price concessions.

Light receipts held the Chicago market steady and timothy was practically unchanged at St. Louis. Offerings were liberal at Minneapolis and St. Paul but the shipping demand improved at Kansas City and timothy was 50 cents per ton higher.

Good quality alfalfa held steady but low grades were dull. Prices declined \$1 at New York with limited demand. Damaged alfalfa sold at very wide discounts at Omaha but good quality hay was practically unchanged. Receipts were lighter at Kansas City and the surplus was being cleared up rapidly although the lower grades moved with difficulty. Feeders took more hay while shipments to the South and Southeast increased slightly.

Stocks at Southern markets were being reduced with a fair volume of trade. Alfalfa was dull in California market with consumers restricting takings on account of the growth of green feed. Light shipments from Washington have been selling at San Francisco at slightly under California quotations.

Prairie was barely steady. Demand was inactive at Chicago although quotations were unchanged while prices declined 50 cents at Minneapolis. Very little good hay arrived at Omaha and demand was light for the offerings of poor hay but quotations were unchanged. Prices were lower at St. Louis but light receipts advanced the market \$1 per ton at Kansas City.

HAY MARKETS

Feb. 28.—The large supply of hay accumulated over the holiday early in the week had the effect of not alone producing a serious glut upon the market, and bad break in prices, but also reducing profits, and in some instances severe losses to many engaged in the business. Offerings on single days totaled as much as 83 cars in the yards and 105 in the terminals with receivers finding it almost impossible to interest buyers or to get an outlet for the hay. Quality was large responsible for the indifferent demand, but

even the better grades had only limited inquiries and owing to the large arrivals also suffered in price. Low grade clover and heavy mixed, of which supplies were excessive was unsalable, in fact all common and even ordinary quality was neglected. The country movement continues large and receipts again totaled more than 200 cars for the week, indicating that heavy stocks were still on farms to be marketed regardless of current low prices. Good timothy and choice cars of other descriptions sold at a premium, but any kind below the top grade necessitated concessions to stimulate buying.

Timothy—No. 1, \$17.50@18; No. 2, \$16@16.50; No. 3, \$13@15; threshed, \$8@10; no grade, \$8@10. No. 1 heavy clover mixed, \$15@16. No. 1 light clover mixed, \$15.50@16.50. NEW YORK.

Feb. 26.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Hay.	Straw.
Receipts for week, tons.....	1,072 80
Receipts last week.....	1,292 10
Receipts from Sept. 1st.....	32,326 514

Heavier arrivals over Sunday and Washington's birthday (Monday), combined with increased rail supply and extremely light (end of the month) demand, have created a much weaker situation. With supplies accumulating and buyers inactive, the level of values has declined fully one dollar per ton over the week, \$26.00 now being extreme and reached only on strictly No. 1 timothy in large bales and uniform throughout.

Stocks on hand consist of an average assortment of large and small bales, with a possible exception of Brooklyn where low grade small bales form a large percentage of the offerings and in consequence this class is meeting with slow disposition.

The general character of the hay at 33rd St., is mostly large bales of about a No. 2 quality, ranging in value from \$22.00 to \$24.00, and this class is meeting with extreme competition. Small bales, while in comparative lighter supply are likewise in lighter demand.

Arrivals at off-market points also show an increase and this somewhat affects the general situation.

Rye straw in plentiful supply, light call, values nominal.

New invoices are reported light to moderate.

Federal grade quotations for large bales: Timothy—No. 1, \$26; No. 2, \$23@24; No. 3, \$20@21. Light clover mixed—No. 1, \$23@24; No. 2, \$20@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$20@21; No. 2, \$17@18. Light grass mixed—No. 1, \$23@24; No. 2, \$20@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$17@18. Rye straw—No. 1, \$19@20.

KANSAS CITY.

Feb. 28.—Reductions affecting prairie and alfalfa made another big cut in the offerings of hay this week, though some of the minor varieties were in slightly larger supply. Total arrivals were 505 cars, as compared with 683 a week ago and 607 a year ago.

Alfalfa again preponderated in volume, with 291 cars, but this aggregate was 49 less than for the preceding week. While low grades and poor conditioned stuff were slow at the outset, the upper qualities were steady. Demand improved and on Wednesday grades above standard advanced \$1@2 a ton. Later there was some improvement in prices of the lower grades, as the pressure of offerings was considerably relieved. The market closed with a good one. Select dairy was \$1@2 higher. Other kinds were unchanged at \$1 up.

Prairie receipts were 140 cars, as compared with 280 a week ago. The slump in offerings was appreciated, as a glut had existed. Absorption improved from the start and the desirable qualities moved well throughout the week. On Friday the competition began to elevate prices. The closing market was unchanged at \$1.50 a ton higher on the week.

Timothy was in liberal supply. This day, with clover-mixed and clover, showed receipts of 74 cars, or 11 more than a week ago. Demand for timothy was hardly adequate and prices at the finish were unchanged to \$1 lower. Clover-mixed was dull, ending 50c to \$1.50 down. Straight clover broke \$1.50@3, owing to slack buying and poor quality of arrivals.

The straw market, with 10 cars in sight, was slow. It closed unchanged to 50c lower.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$22.50@25; choice, \$21@22; No. 1, \$18@20.50; standard, \$15.50@17.50; No. 2, \$12.50@15; No. 3, \$9@12. Prairie—No. 1, \$10; No. 2, \$8.50@9.50; No. 3, \$6@8; packing, \$4.50@5.50. Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13. Clover—No. 1, \$13.50@15; No. 2, \$8@13. Straw—Wheat, \$6.50@7.

MILWAUKEE.

Feb. 28.—The Milwaukee hay market continued in its nominal status with quotations unchanged throughout the past week. All movement into Milwaukee seems to be by truckloads direct to the consumers. Current quotations are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed,

\$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

PITTSBURGH.

Feb. 28.—Receipts of all grades have been more than the very limited demand can absorb and prices are being reduced materially in order to clear the tracks and save demurrage, there is still quite a surplus on tracks which will not be cleaned up for the next week or ten days. Timothy—No. 1, \$20@20.50; standard, \$17.50@18.50; No. 2, \$15@16; No. 3, \$13@14. No. 1 light clover mixed, \$16.50@17. No. 1 heavy clover mixed, \$17.50@18.50. Clover mixed—No. 1, \$17.50@18.50; No. 2, \$13@15. Clover—No. 1, \$17.50@18; No. 2, \$12@15.

Receipts of oat straw equal to the light demand. Few cars of wheat can be placed at price quoted: No. 1 wheat straw, \$12@13; No. 2 wheat straw, \$12@12.50; No. 1 oat straw, \$11.50@12; No. 2 oat straw, \$11@11.50; No. 1 rye straw, \$13@13.50; No. 2 rye straw, \$12@12.50.

MINNEAPOLIS.

Feb. 28.—The past week shows no particular feature. Receipts have been fairly light but the demand has not kept step with the supply and prices are off slightly for the week. Today's quotations follow: Timothy—No. 1, \$16.50; No. 2, \$15; Upland, No. 1, \$16 and No. 2, \$14.50; Midland, No. 1, \$10.50 and No. 2, \$9; packing hay, \$6.

PORTLAND, ORE.

Feb. 26.—Buying prices f. o. b. Portland: Alfalfa, \$19@19.50 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$16@16.50; oat, \$19@20; oat and vetch hay, \$18.50@19.50; straw, \$7.50@8.

LOS ANGELES.

Feb. 25.—The hay market is in sympathy with the grain market in regard to supply and demand. There has been the past week, receipts above the normal and the dealers report considerable hay on tracks at the week end. No. 1 alfalfa is selling at \$28@29 per ton. No. 2 grade \$2 less, with demand weak. No. 1 barley hay is selling at \$29 and No. 1 oat hay at \$34. There has been during the past week rains throughout the state and in this immediate locality sufficient to start the pastures and no doubt will lessen the demand for hay.

DULUTH.

Feb. 28.—Business in hay on this market was on a better scale during the last week with jobbers being compelled to come in for supplies. Closing prices per ton are steady and unchanged as follows: Timothy, No. 1, \$15@16; No. 2, \$13@14; No. 1 mixed timothy, \$14@15; No. 2, \$11@12. Prairie, No. 1, \$15@16; No. 2, \$13@14; No. 3, \$11@12. Midland, No. 1, \$9@10; No. 2, \$8; rye straw, \$9; oat straw, \$8.50.

BALTIMORE.

Feb. 28.—As a result of freer receipts of hay during the past ten days by both motor trucks and cars, the local hay market is somewhat easier in tone and the outward movement of all grades of hay is slow, the poorer qualities being especially hard to place. Straw of all descriptions holds its own in price under light receipts and small stocks. Demand is fair in a jobbing way for wheat and oat blocks. We quote: Timothy—No. 2, \$20.50@21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18. No. 1 clover, \$19@19.50. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$16@17; No. 1 oat, \$17@17.50.

TOLEDO.

Mar. 1.—The hay market was quiet again the past week with receipts and shipments both light. Dealers are satisfied to see prices remain steady considering the large stocks which are held at most every market and also back on the farms. Condition this year may bring about a smaller crop and surplus hay will then be needed. Prices at present are ready to respond to either bull or bear sentiment.

Prices the past week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13; No. 1 heavy clover mixed, \$12; No. 1 clear clover, \$12; No. 1 first cutting alfalfa, \$16; No. 1 second cutting alfalfa, \$22; sound dry wheat straw, \$9; sound dry oats straw, \$9.50, f. o. b. Toledo.

PHILADELPHIA.

Feb. 28.—The market for baled hay continues dull and ruled in buyers' favor. Choice qualities were in limited supply and for even these outside quotations are hard to obtain. The bulk of the offerings consists of low grade stock which is pressed for sale at irregular prices. Straw is quiet and barely steady under moderate receipts. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$19@20; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$19@20; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$13@15. Heavy clover mixed—No. 1, \$15@16. Light grass mixed—No. 1, \$17@18. Straw—No. 1 straight rye, \$16@16.50; No. 2 straight rye, \$15@15.50; wheat, \$16@16.50; oat, \$16@16.50.

MEMPHIS.

Feb. 28.—Receipts of hay fell off sharply here during the past week, due to the large stocks on hand and the continued poor demand. Receipts were only 26 cars. Prices are still more or less nominal, but have improved, about \$3 to \$4 on alfalfa and \$1 to \$2 on timothy, from the recent lowest and holders are more disposed to await higher prices. Quote: Alfalfa, one, \$30; standard, \$26 to \$27; two, \$21.50 to \$22. Timothy, one, \$22; standard, \$21; two, \$19 to \$20.

BOSTON.

Feb. 28.—Hay, per ton: No. 1 timothy, \$28@28.50; No. 2 timothy, \$25@26; No. 3 timothy, \$18@20; eastern, \$16@28; clover mixed, \$20@24; straw, rye, \$21@21.50; oat, \$13@15; wheat, none offering.

CHICAGO HAY NOTES.

If it were not for the extremely cold weather, buyers would be out in full force looking for hay, as we now have a good firm market for all grades of tame hay and we advise shipment at this time of any description of tame hay.—Walters Bros.

Light arrivals and more active buying, caused no doubt by the colder weather, is giving us an active market with prices ruling firm. In fact we see quite a good demand for hay this month.—Albert Miller & Co.

The demand is fairly good and with light loadings due to cold weather we look for a good strong market. We advise shipment of all good sound grades of hay. Western and Southwestern prairie hay and straw, steady.—Van Wie & Moorhead.

Weather is cold, which means increased consumption. Local trade is looking for good hay and there is also some shipping demand. Urgent demand for prairie; other kinds of prairie and marsh, quiet. No alfalfa here and some inquiry for all grades, especially top.—Bridge & Leonard.

CUTTING SOY BEANS FOR HAY.

Soy beans for hay may be cut any time after the pods are formed and before many of the leaves begin to fall. Too early cutting lowers the yield and late cutting reduces the quality of the hay. They may be cut with an ordinary mower, allowed to wilt for a day in the swath, and the curing completed in the windrows, advises H. R. Sumner, agronomy specialist, Kansas State Agricultural College.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending Feb. 28 (000 omitted):

	Wheat.	Corn.	Oats.	Rye.	Barley.

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES
For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.
No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.
Complete descriptive catalog sent free for the asking.

Preceding week	77,444	18,030	36,200	
Last year	79,338	20,354	20,259	

CHICAGO PROVISION REVIEW.

CHICAGO, March 2.—Hogs advanced sharply the past month and while values of product were marked up materially at times, the parity between hogs and product was reduced. Trading of a speculative character was larger and values covered a good range with the close on lard Saturday showing gains of 72½ to 75c, short ribs 80 to 85c and bellies 72½ to 80c, at the highest of the week. Deliveries for the month of February were 1,500,000 lbs.

Packers were liberal sellers of May lard on all advances and are bringing lard here from outside points to an un-

sual extent, receipts for the week being 10,812,000 lbs., while shipments were only 5,510,000 lbs., a small increase for the week, but a reduction of more than 12,000,000 lbs. as compared with last year. Receipts of cured meats from outside packing points were larger and shipments smaller, being 15,812,000 lbs., compared with 23,130,000 lbs. last year.

Expectations are that stocks of lard will show another big increase as the domestic and export demand has been only fair and the make, of liberal proportions, but with reduced receipts of hogs the latter is expected to be curtailed as compared with the last two months. Foreign markets were irregular with a good advance in lard toward the last. Denmark is said to be supplying more hogs to the English markets owing to the advance in prices of product in the United States as it gives them a better advantage. Fresh meat trade is of liberal proportions and hams and bellies are passing into consumption at a good rate. Prices for the week follow:

	High.	Low.	Close	Feb. 28, 1925.	Feb. 21, 1925.	Mar. 2, 1925.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk 227,000	797,000	298,000	1,322,000	
Wk ago 209,000	893,000	273,000	1,375,000	
1924	220,000	938,000	245,000	1,403,000
1923	226,000	855,000	274,000	1,355,000
1922	210,000	628,000	222,000	1,160,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
--	---------	-------	--------	------------

1925 ..	2,012,000	8,318,000	2,228,000	12,558,000
1924 ..	2,082,000	8,978,000	2,325,000	13,385,000
1923 ..	2,155,000	7,941,000	2,353,000	12,449,000
1922 ..	1,976,000	6,373,000	2,308,000	10,657,000

TOP HOG PRICES SINCE OCTOBER.

The hog market in Chicago for good packer grades touched \$12.40 Friday, and by the time this issue goes to press we may have still further advances. Just why, say the trade, under today's high hog market should it be so difficult to sell tankage and other hog feeds at fair prices? Ordinarily, there is a certain affinity between the ups and downs of corn and oats and mixed feed ingredients, but this year the situation is different. In considering dairy feeds, the answer to those who know is easy, traceable to the milk war in the East and dairy difficulties generally over practically the entire country. It is contrary to economic law to feed high priced grain to low priced milk producing machines, otherwise known as dairy cows.

In looking over the feed situation, it is furthermore no secret to mention publicly the fact that Eastern states' federation and G. L. F. feed purchases aggregate an enormous tonnage, taken out of the feed sales of many manufacturers heretofore, and now handled through a single sales organization.

MOVEMENT OF CATTLE.

Weekly receipts and shipments of cattle and calves at 6 Western centers the week ending Feb. 28, 1925, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

	Repts., 1925.	Shpts., 1925.	Repts., 1924.	Shpts., 1924.

For Sale--

Modern Concrete Terminal Elevator at Peoria.

With the present unusual demand for elevators, when both operating profits and carrying charges on grain are attractive, we offer a property that meets the most exacting trade demands.

Several million dollars have been expended in recent years, remodeling Peoria's distilleries and feed mills, converting them into corn industries, feed and food plants. Their daily corn purchases are enormous. Peoria's fourteen railroads give unexcelled in and out railroad service.

DATA ON THIS PLANT

Grounds consist of 4½ acres with room for tracks on River side of Elevator, and also for additional tracks at the end of the building.

Work House has capacity for 40 cars per day each way and has handled 50 cars out and 48 cars in in eight hours. The Head House has a capacity of approximately 125,000 bushels.

The Power is electric, legs, conveyors and machinery being driven by separate motors.

The capacity is 500,000 bu. on wheat basis and 600,000 bushels on oats basis. There are 56 bins ranging from 800 to 22,000 bushels and there is ample room for an addition with half to three quarters of a million bushels additional.

The Hess Dryer has capacity of 500 bushels per hour on a 4% moisture basis with room for an additional 500 bushel capacity.

The building and equipment are practically new; in good condition, no need for repairs.

Grain elevators of this sort in a market like Peoria are practically unavailable.

Write or wire for inspection privilege.

WANTED and FOR SALE MARKET PLACE, CLASSIFIED

for Buyers and Sellers of Properties and Equipment in Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.
25c Per Printed Line Each Insertion

ENGINES FOR SALE.

DIESEL OIL ENGINES
For Elevators and Flour Mills.
All Sizes.
ST. MARY'S OIL ENGINE COMPANY,
St. Charles, Mo.

MILLS FOR SALE.

FOR SALE—Will give someone a bargain in a 40-bbl. flour, feed and meal mill all combined, as my wife's health is poor. Address A. R. BECKETT, Cabool, Mo.

MACHINERY BARGAINS.

WE OFFER you a select list of elevator and seed equipment, in new and used machinery. Write for our bargain prices. STANDARD MILL SUPPLY CO., 501 Waldheim Bldg., Kansas City, Mo.

ELEVATORS FOR SALE.

FOR SALE—Terminal elevator and Kansas Line. Terms. Bargain. ALLIN GRAIN CO., Coffeyville, Kans.

FOR SALE—Elevators on A. T. & S. F. R. R. Good business. No trades. R. N. MARSHALL, Stronghurst, Ill.

INDIANA—ELEVATOR, well located in city of twelve thousand, in good dairy and farm country. Well established feed business, which will show handsome profit every year in connection. Owners have too many irons in the fire. A genuine bargain. Address IND. ELEVATOR, Box No. 36a, care Price Current-Grain Reporter, 309 So. LaSalle St., Chicago.

FOR SALE—10,000-bu. cap. iron clad elevator with coal, feed, seed, salt, etc., in connection. Two warehouses for feed and salt, also grinder with 14 hp. gas engine in separate building. Modern residence on four lots with barn and two chicken houses with room for 1000 chickens, ground planted to fruit trees, grapes and strawberries. This elevator property is located in northern Iowa, handles 200,000 bu. of grain yearly and no competition.
Price \$15,000.00 cash, no trades. Address ELEVATOR, Box No. 36, care Price Current-Grain Reporter, 309 So. LaSalle St., Chicago.

PLANT FOR RENT.

FOR RENT—Our plant which we operated as a feed store for 40 years and until October 1, 1924. 1923 sales \$175,000.00. CONKLIN AND CUMMINGS, Goshen, N. Y.

MR. SEED DEALER, we can furnish you with high quality, clean, scarified White Blossom sweet clover seed. For lowest prices and best seed, write us. SEBENS BROS., Milnor, N. D.

BUSINESS AND TRADE CONDITIONS

THE outstanding news feature of the past week was the inauguration ceremonies at Washington, widely heralded in the press and justly receiving practically unanimous approval by the people, as a strictly non-partisan detail of National politics.

Vice-President Dawes gave evidence of his characteristic positive make-up, suggestive of a firm hand at the Senate's helm during the next session.

Much in the address of President Coolidge is well suited for editorial emphasis and comment. Under the latter head, he must be credited with an extremely fair and at the same time shrewd bit of sophistry in his remarks regarding the make-up of Congress and the accomplishments which he expects from that body. In discussing Republican party unity, he said, "If there is to be responsible party government, the party must be something more than a mere device for securing office." It is his purpose that the November election shall not be merely a mockery, and that the confidence of the public shall find the party which it placed in power an effective instrument of Government. It seems logical to read between the lines of the President's address, and later in the Senate's organization proceedings a continued effort to keep LaFollette, Brookhart, Ladd and Frazier out of the Republican councils. It is probable that in future time this first inaugural address will be taken as more aptly representative of the President than anything else he has heretofore written. He has had enough experience in the White House to define and clarify his aims and he has not been there long enough to undergo that peculiar transformation which comes to many executives.

The President acts wisely in confining his promises and program to effort rather than to accomplishment and in urging upon his fellow citizens an allegiance to the policies and principles he sets forth because of their real worth.

Among the many forceful and scholarly parts of the President's address, the following impress us with particular merit:

"Confidence has returned, business has revived, and we appear to be entering into an era of prosperity which is gradually reaching into every part of the nation."

"We believe we can best serve our own country and most successfully discharge our obligations to humanity by continuing to be openly and candidly, intensely and scrupulously, American. But * * * we cannot permit ourselves to be narrowed and dwarfed by slogans and phrases. It is not the adjective, but the substantive, which is of real importance * * *. It will be well not to be too much disturbed by thought of either isolation or entanglement."

"There is much to be hoped for in international relations from frequent conferences and consultations * * *. I am strongly in favor of a continuation of this policy, whenever conditions are such that there is even a promise that practical and favorable results might be secured * * *. The same considerations should lead to our adherence to the Permanent Court of International Justice."

"The time is arriving when we can have further tax reduction, when * * * we must have tax reform. The method of raising revenue ought not to impede the transaction of business; it ought to encourage it. I am opposed to extremely high rates * * *. We cannot finance the country, we cannot improve social conditions, through any system of injustice, even if we attempt to inflict it upon the rich. Those who suffer the most harm will be the poor."

"Those who want their rights respected under the constitution and the law ought to set the example themselves of observing the constitution and the law. * * *. Those who disregard the rules of society are * * * treading the way that leads back to the jungle."

"Our congress represents the people and the states. In all legislative affairs it is the natural collaborator with

the President. In spite of all the criticism which often falls to its lot, I do not hesitate to say that there is no more independent and effective legislative body in the world."

Closing Days of Congress.

It is popularly felt that the closing Congress is to be commended more for their avoidance of harmful legislation than the establishment of new laws on the record books. From the viewpoint of a large majority of the readers of the PRICE CURRENT-GRAIN REPORTER, the Senate showed good judgment, however, in defeating the McNary-Haugen bill which was beat-

WHEAT AND CORN FARM RESERVES SMALL

FIGURES as of March 1st according to the Government report of Monday, showed an exceedingly small farm reserve of wheat and corn. Wheat stocks were the smallest in twenty years with but one exception, and stocks of corn the lightest in thirty years with four exceptions.

Oats farm stocks, however, were one hundred and three million bushels more than a year ago, a bearish statement.

In spite of the present range of prices on wheat and corn, the majority of grain traders construed the Government report as bullish for such cereals.

en in the house during the last session. During the closing hours of March 3rd and 4th, very little of importance was carried through. In the list of proposed legislative measures which have gone by the boards are the various Capper co-operative marketing bills and other agricultural proposals.

The Muscle Shoals bill, which occupied most of the time of the Senate this session, was blocked in the jam.

Jones foreign trade zone bill.
French claim bill.
Cape Cod Canal bill.
Gooding long and short haul clause bills.
Brookhart bird and game refuge bill.
Howell-Barkley bill for abolition of the railway labor board.
McLean bill to lower the interest rate on railroad obligations held by the government.
Bursum bill for increase of pensions for civil war veterans.
McFadden banking bill to liberalize the national banking laws.
Cramton prohibition unit bill.
Stalker bill to increase penalties for violation of dry laws.
Alien deportation bill.

Economic Improvement.

The conservative and yet consistent progress of business is at least partly attributed to the Coolidge administration. During the four months since his election millions of dollars have been added to the

market value of securities and commodities. Even the most enthusiastic Coolidge supporters, however, would not lay claim to the entire responsibility for the bull markets of the above period, but it must be plain that the country is "all set" for a continuance of business expansion, under the leadership of one who has well proven his qualifications even before actually assuming office in his new term-elect.

Industrial improvement has been associated with natural and yet rather unexpected high grain prices. Crop failures to a considerable degree abroad, unduly magnified no doubt and hence bringing in heavy although spasmodic public speculation of a bullish character, has been definitely reflected in the advances of the grain market.

The Financial Markets.

\$450,000,000 comprised of two new security issues is the figure covering the March financing needs of the Government, consisting of nine month treasury certificates and long term treasury bonds. It is expected that this financing will cover the cash requirements of the Government until June. In view of the comparatively easy money situation, bankers were somewhat surprised to be asked a premium on the long term four per cent issues expiring in 1944-1954. However, over the full list the bond market in the early part of last week was established at lower levels as a result of a tightening in the money market, but with an easier tone in loans there developed improvement in some issues. The recovery was not general, however, nor was there any unanimity in the movement in any one group. Trading was on a limited scale. The offering of new securities was extremely small, no new issues of any great importance making an appearance.

The stock market followed an erratic course last week, the entire list being sensitive to the least bearish developments. On the other hand, when declines of any consequence occurred there developed a good demand, which caused the market to stage a comeback.

Our Foreign Loans.

American foreign investments in 1914 were estimated at something over \$2,000,000,000, prior to which the importation of capital into this country was much larger than the investments of our people in foreign projects.

According to Arthur N. Young, Economic Advisor of the State Department, the above situation has been transformed and today, the United States is a creditor to the amount of \$20,000,000,000. Of this amount, approximately \$12,000,000,000 represents the sum owed our Government by foreign Governments, and \$8,000,000,000 covers the foreign investments of Great Britain. Mr. Young's statement says further that the department "will not pass upon the merits of foreign loans as business propositions, nor assume any responsibility whatever in connection with loan transactions." It is not indifferent, however, to the flotation in the American market of loans which are likely to go into default. Also, our Government opposes the lending of American capital for militaristic purposes or for projects which tend to make difficult the carrying out of our foreign policy.

Public Investments.

Comment has been made here relative to the difficulty of enforcing our laws designed to protect investors in speculative stocks, a detail of which is found in the reckless character of the public, whose protection is indeed difficult under such circum-

stances. A recent conference in Chicago discussed the feasibility of establishing a National movement towards curbing financial swindling and through this organization to aid state and federal authorities. The assistance of stock exchanges, chambers of commerce and like organizations, together with the solid backing of business interests is invited, and from now on we should do much more than merely talk about the enforcement of our "Blue Sky" laws. It is to be hoped that the above mentioned conference will carry through its splendid ideas and make less easy the way of many organizations which prey upon the public in this manner.

Commodities and Materials.

The important bearing upon the industrial life of the nation, found in the iron and steel trades, lends much of interest to the following survey:

"Pig iron production on March 1 was at an annual rate of over 42,200,000 tons. This is 3½ per cent over the performance of March last year, and compares with 40,361,000 tons, the record output in 1923. Three more furnaces were in blast than at the beginning of February," the Iron Age says. It adds:

"The output of last month was 3,214,143 tons more than that of any other February in the history of the iron trade. It was less than the 3,370,336 tons for the thirty-one days of January, but the daily average was 114,791 tons, against 108,720 tons per day for the preceding month, an increase of over 5½ per cent. Only in four months in 1923 has the daily rate ever been exceeded."

In the meat packing trades, aviation activity characterized the hog market again last week and prices moved up another quarter, bringing the top to \$14.35. It is the highest March price since 1920 when the best swine sold at \$16.35. In March, 1915, the top was \$7.05 for the best hogs and 20 years ago the summit was \$5.50. The lowest top in March was noted in 1899, when the best heavy hogs sold at \$4. The general hog market now is nearly \$8 higher than a year ago, which means that producers are getting much more profit out of swine than they did last year at this time. The supply is dropping off seriously at all Western markets.

With wheat sales showing an increase of nearly 100 per cent, total sales of all grains last week increased 312,290,000 bu. for the week. General liquidation of all but a few of the leading long lines was on and prices finished at losses of as much as 18½c on wheat, 6½c on corn, 2¼c on oats and 15½c on rye.

LIMITING PRODUCTION

SOMETHING was said in these columns a few weeks ago, about the futility of the attempt of Department of Agriculture to limit the production of certain crops, by advising farmers not to increase the acreage planted to quite a number of them.

Pursuing this same line of thought, the question has been raised as to the wisdom of the research and other educational work which is resulting in increased yields per acre.

As we have previously indicated, the suggestion, upon the part of the government, that farmers should limit the acreage devoted to specific crops, does not at all appeal to us, and we have absolutely no patience with those who would discontinue efforts to increase yield per acre.

The advocates of such a course, have, it seems to us, failed quite as completely, to think the thing through, as have those who favor acreage limitation.

As a matter of fact, the only way which a farmer may hope to regularly increase his per acre yield is through crop rotation and that, properly followed, would mean hundreds of thousands of acres less in any one year, given over, for example, to the growing of wheat.

This country is unquestionably in a state of evolution, insofar as many of its economic questions are concerned, and the relative rate of pay to the farmer and to the organized laborer is one of them, but we are free to confess that we fail to see any possibility of a solution, through the adoption of the course suggested.

SPRINGTIME IS LIGHTNING TIME

FIGURES compiled by the Grain Dealers' National Mutual Fire Insurance Company, and covering a period of 22 years, show that 24.19 per cent of all of the fires in mills and elevators were caused by

lightning, and as springtime is lightning time, right now is the logical moment for reminding our mill and elevator friends of the value of lightning rod protection.

By way of emphasis, in that specific direction, it might be well to call attention to the fact that one fire insurance company in its advertisement in this paper says: "If lightning rod protection could be installed on every grain elevator on which this company carries insurance, it would not only effect a reduction of ten cents in the rate but also a reduction in fire losses paid by this company."

Another company in its advertisement emphasizes the danger from lightning by saying: "An elevator that is covered with iron, and properly grounded, is safe from lightning."

A fire at any time and in any kind of a building, is a terrible thing, but a fire in a mill or an elevator, in the early spring, when it is full of grain, is a real calamity.

Quite aside from the loss on the building, which may or may not be covered by insurance, and quite aside, also, from the loss on the contents, which is, in most cases, not fully covered, there is always the interruption or the disruption of business, the throwing of people out of their regular employment and the loss to the business and the farming community which comes through the permanent or even temporary closing of a needed industry or marketing facility.

As an indication of the rapidly increasing belief in the protection afforded by lightning rods, we believe it in order to say that more than one hundred mill and elevator installations were made last year by just one lightning rod company and there are of course quite a number of such concerns throughout the United States.

PROCEDURE BEFORE I. C. C.

IN the reply of the Interstate Commerce Commission, to the complaints concerning it, which were made by President Coolidge's Agricultural Conference, the following statement as to methods of procedure were made. As all of these facts may not be familiar to our readers and as some of them are quite important they are presented thus fully for the possible guidance of some who may desire to handle some rate or other matter with that department of the government:

"It is and has been our practice to advise the parties as to the form of any paper to be filed in any proceedings before us; errors which might become technical defects we discover and correct as far as possible before they can assume importance. To the fullest extent possible under our appropriations we hold hearings at points convenient to the complainant, and our examiners are sent on itineraries accordingly. Our standing instructions are that every examiner shall elicit all possible facts as to whether the requirements of the interstate commerce act are met, regardless of the character of presentation made by the parties. There are no costs incurred or taxes in our proceedings; and we know of no other comparable tribunal which furnishes the parties with a free copy of the transcript of testimony for their convenience, and to facilitate their presentation. No party needs to come here to argue a case before us unless he desires; the same careful consideration is given in cases submitted without argument as to those orally argued. Our rules permit oral arguments to be made at the hearing before the examiner, which are reduced to writing at the expense of the Government, and are given consideration by us when we study the case. Thus the expense of briefs may be wholly avoided at the option of a party. The extent to which parties in the presentation of the cogent facts see fit to amplify the record or to burden it with exhibits which it is expensive for them to compile, is obviously within their own control and discretion.

It has been overlooked that it has been and is now the policy of the Commission to undertake on its own motion general investigations in many matters of great importance—as well as many which are small—wherein we undertake to develop upon the record all pertinent facts. In such cases we are, of course, customarily greatly aided by the presentations tendered to us by the respondent carriers, and by shippers individually and collectively. In practice, hearings upon such investigations have often been held in the sections of the country affected. Upon the hearing any individual can appear, with or without counsel, at his option, and may state his grievance. In many of these cases we have the active co-operation of the state commissions. As typical, we may mention the following, among others, detailed in our

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Mar. 7, 1925.	Feb. 28, 1925.	Mar. 8, 1924.
Wheat—			
Primary receipts	4,707,000	3,783,000	4,723,000
Primary shipments ..	3,854,000	3,691,000	3,145,000

report to the Congress for 1924; investigations as to the nation-wide rates on grain, grain products, and hay; class rates in the Southeast; class rates in Official Classification Territory; wool rates; express rates generally. The general reductions in 1922 were the result of proceedings of this character. In hundreds of cases annually we suspend proposed rate changes, and require affirmative justification of the changes, either upon our own motion or upon informal representations by affected persons.

In our endeavor to keep down the cost of proceedings before us, we have devised a simple method of procedure under which oral hearings, with the attendant expenses, may be entirely avoided. During the last two years more than 600 formal cases have been and are being presented under this procedure and the number of cases in this class is constantly increasing."

EDITORIALETTE

WE have been impressed, during the past few months, by the reports that have come to us, of the number of farmers who have completed courses in the different agricultural colleges and of the educational work that has been carried on by county agencies, boys' and girls' club organizations, granges, etc.

We are confident that money appropriated for projects like those named, will prove of vastly greater benefit not only to the farmers, but also to the country as a whole, than money appropriated for the most of the newfangled ideas recently proposed in Washington.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, MARCH 11, 1925.

GRAIN TRADE REVIEW

While there has been no material change in the world's wheat situation the past week, there has been one of the most radical changes in the price, in the history of the grain exchanges, and one that is not likely to ever again be witnessed. A range of 25c per bu in May wheat within a week with the market breaking in a most persistent manner is taken by many as indicating that the bull structure was not based on facts, and that the trend will be steadily downward. However, it remains to be seen, whether it was not a case of a heavily overbought market, rather than any error in the statistical calculations by the bulls that was responsible for the decline, and a few weeks more will demonstrate which side is right in its contentions. There have been no claims of scarcity, but every authority, American or foreign, has persistently claimed that the supply was closely adjusted to the demand the world over. When the foreign exchange situation is taken into account, especially the depreciated currency of France, Italy and other countries, the amount of grain they have taken is remarkable, and should anything happen to the new crop, and the yield in Europe be short again this year there is no telling what would happen. As near as can be figured at the present time, there will be no burdensome carryover in any country of the world at the end of the crop year, and to a great extent the trend of values in the immediate future will be determined by the outlook for the new crop. As compared with pre-war days, July is regarded as selling at a sensationally high figure, and there have been times when the world's situation was very closely adjusted before, although not as closely as at the present time. With the price sufficiently high to justify farmers seeding a greatly increased spring wheat acreage, there is a growing bearish sentiment in wheat that will take a great crop scare to shake. Europe has been buying more or less new crop winters already, suggesting that foreigners are anxious for supplies early in the season, but this business is of a highly speculative character, and it is very probable that both buyer and seller are well protected by hedges, so that the business passing is not conclusive.

Wheat in Store at Terminals.

A materialization of the many theories advanced by the bulls in the way of rapidly decreasing domestic stocks or

heavy clearances, will be necessary in the immediate future if prices for the old crop grain are to advance materially. The wheat in store at Kansas City and Omaha that could be moved to Chicago for delivery in case of a lack of export demand has been gradually decreasing as the result of recent export sales, but the net loss in the visible supply has not been sufficient to have much effect on the market. With 70,000,000 bus. wheat in store at terminals the visible can be reduced over 4,000,000 bus. per week and still leave a small total at the end of the season. The Government's report on farm reserves of wheat was about as expected, and apparently the United States can still export 40,000,000 to 50,000,000 bus. between March 1 and June 30 and have a carryover close to the normal which is around 80,000,000 bus. There are indications that the Canadian Government underestimated the crop of the three provinces. Probably 70,000,000 bus. can be spared by that country. Much depends on whether the southern hemisphere can continue to export at the rate of around 10,000,000 bus. the balance of the season. With European requirements around 15,000,000 bus. or more, North America will certainly be called upon to furnish considerable grain and Manitobas are selling at a big premium over No. 2 hard winter. There are a few dry spots in the American southwest and rains would be highly beneficial, but it is still too early in the season for a real crop scare to get under way. There are indications that the amount of abandoned acreage this season will be slightly below to about normal, which would result in the acreage being practically the same as the previous year. Expectations are for a good increase in the spring wheat area, both sides of the international line, with favorable weather conditions for plowing and seeding.

Coarse Grains.

The cash corn and oats situation is certainly depressing with a slow shipping demand, and stocks of corn continue to accumulate. It is expected that there will be an increased movement of corn from farms to terminal markets, as many will want to get rid of their surplus before the warm weather comes. Low grade corn is selling at about the widest discount under May ever known, as much as 37c under, for No. 6 mixed. There are many traders, however, who look at the relatively small supply of corn on farms rather than the large holdings in the visible, and with supplies of hogs apparently more than ample to take care of the grain still back on farms, have been buying futures on a liberal scale on all breaks. Farm reserves, when merchantability is considered are probably the smallest in a great many years and no great difficulty should be experienced in disposing of the grain. Stocks of oats, however, are so large that it may take a decided crop scare to bring in sufficient buying to cut the holdings down to normal. Seeding is progressing in the southwest and field work will progress rapidly northward.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Mar. 7, 1925.	Feb. 28, 1925.	Mar. 8, 1924.
Wheat	4,692,000	3,800,000	4,715,000
Corn	7,989,000	5,541,000	10,674,000
Oats	2,790,000	2,545,000	4,519,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	15,471,000	19,908,000
Preceding week.....	11,896,000	22,222,000
Since July 1.....	860,537,000	803,012,000

Liquidation was on in the wheat market the past week within an extremely wide range, May breaking 25c from the high point and the finish was well toward the bottom with net losses of 19c, going to only 17½c over the July at the last compared with 27½c at the finish the previous week. The decline was

one of the most sensational that has ever been witnessed under normal conditions. There was nothing in the news to account for the break although the export demand and clearances up to the closing days of the week were not up to expectations. Heavy buying of July against sales of May was responsible for the narrowing of the difference. July closed 9½c, and September 4¼c lower for the week.

Corn market showed stubborn resistance to pressure, although closing 5½@ 6¼c lower, the break being largely in sympathy with wheat. Sentiment was bullish the greater part of the week, but the cash news was distinctly bearish with low grades declining steadily as compared with the May, and at the last No. 6 grades sold as low as 37c under the future, the widest discount on the crop. Warm weather caused handled to go slow in taking hold.

Liquidation was on in oats and with a slow cash demand a decline of 1½@ 4¼c was easily attained. Seeding is progressing in the southwest and is expected to work rapidly northward. The east is taking limited quantities of cash grain while the receipts at terminal markets are holding up well, and there is still a very large quantity in sight. Rye was 7@18½c lower for the week, the latter on May. Despite the drastic decline the export demand at the last was only fair, and there is a liberal supply at terminal markets. Range of prices the past week follow:

	High.	Low.	Mar. 7, 1925.	Feb. 28, 1925.	Mar. 8, 1924.

March First Farm Reserves of Wheat, Corn and Oats, as Figured by Experts

Snow, of Bartlett Frazier Co., Murray, of Clement, Curtis & Co., and Cromwell, of Lamson Bros. & Co., Present March First Figures.

Farm wheat reserves, according to Snow of Bartlett, Frazier Co., are 112,000,000 bushels, while Murray of Clement, Curtis & Co., puts the figure at 117,255,000 bushels and Cromwell of Lamson Bros. & Co., has it 121,000,000.

Some other figures in the Snow report are as follows: Visible stocks about 69,000,000 and mill and elevator stocks 95,000,000, or a total at this date of 276,000,000 bus. Requirements from March 1 to June 30 approximate 194,000,000 for domestic consumption and 30,000,000 for spring seeding, leaving some 52,000,000 for four months' exports and carry-over stocks at the end of the wheat year. These figures of present stocks remaining in all positions strongly suggest that the final official crop estimate last year over-stated the wheat yield by approximately 20,000,000 bus. and it is significant that the increase made by the government between its October harvest estimate and its final December revision approximates fairly closely the same figure. The final official estimate also exceeded the harvest figure of recognized private authorities by a somewhat similar margin.

Farm stocks of corn, 778,000,000 bus., or 31.9 per cent of the crop, against 1,153,000,000, or 37.8 per cent last year. It is the smallest total March 1st farm holding in over 20 years and the percentage has been reported lower but twice in the history of modern crop reporting. In spite of a winter farm consumption which by rigid economy has been held to the lowest volume in many years there remains for eight months' use only 44 per cent of the amount which has already been consumed in four months.

Farm stocks of oats 503,000,000 bus., or 32.6 per cent of the crop, against 445,000,000 bus. and 24.7 per cent last year. Consumption has been upon the largest scale known in many years, supplementing the corn deficiency, but there still remains a volume of farm stocks larger than in any year since 1921.

Figures by Murray

Comparable figures by Murray show visible stocks of 70,000,000 bushels and mill and elevator stocks 76,000,000, making a total of 263,000,000, as compared with 300,000,000 a year ago and 306,000,000 two years ago. The supply for this season was 976,000,000, compared with 919,000,000 last season and 961,000,000 two years ago.

The apparent domestic disappearance of wheat in the eight months July 1 to March 1 (total supply less exports and March 1 stocks) was 503,000,000 bushels, which compares with 498,000,000 in like period a year ago and 487,000,000 two years ago.

The domestic disappearance in the four months March 1 to July 1 last year (March 1 stocks less exports four months and carry-over July 1) was 168,000,000, and two years ago, 165,000,000. Three years ago, however, the domestic disappearance was much smaller, being 445,000,000 in the first eight months and 121,000,000 in the last four months.

Estimates of wheat held March 1 on farms, and in country mills and elevators, segregated into soft winter wheat region, hard winter, spring wheat region, and Pacific Coast are shown, in thousands of bushels; i. e., 000 omitted:

	Soft winter.	Hard winter.	Spring.	Pacific Coast.
On farms—				
1925.....	31,379	24,535	45,503	5,838
1924.....	56,569	31,226	31,390	18,622
Mills and elevators—				
1925.....	20,124	20,202	25,609	10,369
1924.....	27,197	15,158	20,112	35,816
Total above—				
1925.....	51,503	54,737	71,112	16,207
1924.....	83,766	46,384	51,412	54,438

Stocks of corn on farms March 1 are estimated 33.7 per cent of the crop; a year ago the percentage was 37.8 and

the ten-year average is 38.1 per cent. The quantity held is 820,000,000 bushels compared with 1,153,000,000 last year, thus being 30 per cent less than a year ago. Total supplies for the season were 19 per cent less than the preceding season.

Stocks of oats on farms are estimated 34.8 per cent of the crop; a year ago the percentage was 34.3 and the ten-year average 36.7 per cent. The quantity held is 536,000,000 bushels compared with 447,000,000 a year ago, thus being 20 per cent more than a year ago. Total supplies for the season were 16 per cent more than the preceding season.

Cromwell Estimates

Visible stocks as estimated by Cromwell are 70,000,000 bushels, in country mills and elevators 90,000,000 and the total 281,000,000 as against 299,000,000 bushels at this time last year.

There are about 880,000,000 bushels of corn on farms March 1, or 36 per cent of the crop compared with 1,154,000,000 the previous March and 1,093,000,000 March, 1923. The ten-year average is 38.1 per cent. In other short crop years the figures were as follows: 1913 crop, 2,417,000,000, and reserves following March, 866,000,000; 1916 crop, 2,567,000,000, and reserves 782,000,000; 1918 crop, 2,503,000,000 and reserves 855,000,000. Farm hog population January 1, 1914, 1917, 1919 and 1925 were 59, 67, 74, and 54 millions respectively.

March 1 farm oats reserves are around 590,000,000 bushels or 39 per cent of the crop. They compare with 447,000,000 or 34.3 per cent the previous March, and 421,000,000 or 34.6 per cent March, 1923; the ten-year average per cent is 36.7. On account of a small corn crop, country elevators contain a larger supply of oats than usual.

Moisture, soil and plant conditions of the growing winter wheat crop are mostly satisfactory to very good in the lake states, south and east, except fall growth was small in some sections. In the west 10 to 20 per cent of the acreage is doubtful to abandoned, 10 to 20 per cent poor but should recover if moisture is received by the time spring temperatures arrive, 30 per cent fair and 40 per cent good to very good. The poorest sections are north Texas and part of the panhandles, southwestern Oklahoma, north central Kansas and southeastern Nebraska. A liberal abandonment is either assured in the above sections or is likely unless early spring rains are secured. Generally speaking the entire west is short of surface or subsoil moisture or both. There is considerable abandonment in the Pacific northwest and in localities in Montana but conditions there are now favorable for the remaining.

Government Reserves of Wheat and Corn.

Government estimates of all wheat in the United States on March 1 were 113,928,000, corn 801,609,000, oats 250,342,000 and barley 43,127,000 bushels.

Reserves of wheat are smaller than they have been since 1918 when they amounted to 107,745,000 and they show a falling off of 23,789,000 from last year.

One of the most notable features in connection with the report is that stocks in Illinois are 3,576,000 bushels against 9,376,000 last year; in Indiana, 3,458,000, against 6,165,000, and Ohio, 6,343,000 against 11,120,000.

Of the 26 states included in the report, six show greater reserves than in 1924 and in only three of them, are the increases of any material size.

The three states showing the greatest increase are North Dakota which shows reserves of 21,539,000 bushels against 12,854,000 last year, Nebraska with 9,138,000 against 6,278,000, and Minnesota with 8,033,000 against 5,379,000.

The government tables show the average price of wheat by states this year to be \$1.698 against 98 cents last year and \$1.044 two years ago.

Corn reserves, according to this report, are 801,609,000 bushels against 1,153,847,000 bushels last year, a decrease of 352,238,000 bushels, with but three of the 32 states that are included in the report showing an increase, these three states being New York, with 6,375,000 bushels against 6,140,000 last year, Georgia with 23,595,000 against 21,162,000, and Kansas with 40,581,000 against 34,202,000.

Among the states showing the greatest decreases are Ohio with 26,572,000 against 65,542,000, Indiana with 35,075,000 against 78,973,000, Illinois with 108,632,000 against 138,298,000, Minnesota with 30,321,000 against 49,501,000, Iowa with 97,521,000 against 170,207,000, South Dakota with 23,998,000 against 56,618,000 and Nebraska with 73,181,000 against 111,541,000.

The merchantable percentage of the 1924 crop is figured at but 66.3 per cent against 80.8 per cent last year and 88.3 per cent the year before.

MILLION LOSS IN FARM CREDITS.

Forecasting a loss in the South Dakota rural credits system of "several million dollars" when the affairs are liquidated, and censuring the proponents of the system, the joint committee of the South Dakota legislature, designated to investigate the department of rural credits, has made public a report covering a six weeks' inquiry into the department affairs.

The investigating committee recommends liquidation of the boards' affairs as rapidly as good business judgment will permit, urges drastic, immediate changes in the board's policies and management and declares that "the abuses and complication which have followed the adoption of the system, and the losses, present and prospective "overbalance" any benefits which have come from the rural credits system.

"The bonded indebtedness," says the report, "is entirely out of proportion of our assets and our other state debts."

NEW ORLEANS WHEAT EXPORTS.

The New Orleans Board of Trade reports exports of wheat through that port, for the month of February to have been 2,173,043 bushels; of corn, 163,879 bushels, and of oats 102,749 bushels. Compared with the corresponding week in 1924 this is an increase of 2,027,943 bushels of wheat and 84,534 bushels of oats and a decrease of 996,163 bushels of corn.

RANGE OF CONTRACT GRAIN PRICES.

Following is the daily and weekly range of quotations for contract grain prices at Chicago in February, the January range and the range previous to January 1 of the deliveries indicated:

	WHEAT			CORN			OATS		
	May.	July.	Sept.	May.	July.	Sept.	May.	July.	Sept.

1925 CROP OUTLOOK

Thorough Study of This Year's Prospects Made by Stanford University.

The Food Research Institute of Stanford University in its Wheat Studies bulletin makes the following statement concerning the wheat crop for 1925:

Though no accurate forecast of the 1925 crops is possible for several months, a few words concerning the outlook are justified.

In the United States, winter wheat seedings are reported at 42.3 million acres, as compared with a revised figure of 39.7 million acres last year, an increase of 2 1/2 millions, but a lower planted acreage than in any other post-war year except last year.

On the average some 11 per cent of the acreage planted is abandoned, but the percentage varies greatly from year to year. This year the condition was reported Dec. 1 as 81 per cent of normal, considerably below the average figure of 88 plus, but higher than for the 1922 and 1923 crops, which suffered excessive abandonment. Though the December condition figure is by no means an index of spring abandonment, which is also greatly affected by winter developments and spring prices, low December condition figures tend to be followed by abandonment above average. Even the average percentage abandonment, however, would reduce next year's harvest area of winter wheat to 37.2 million acres, less than a million acres above last year's harvested area.

Since last year's yields per acre harvested were exceptionally good, there is no present reason to expect next year's winter wheat harvest to exceed last year's, if indeed it be as large. On the basis of 15 bushels to the acre, a harvested acreage of 37.2 million acres would give 538 million bushels, about 50 millions short of the 1924 crop.

For Europe, data on fall sowings are still too scanty to have much significance, but no pronounced change in acreage is indicated by available information. In British India a 5 per cent increase is reported.

Marked increases in acreage, if they take place at all, must take place in spring wheat areas, notably in Canada and our own Northwest, or in the Southern Hemisphere. In view of prices and the price outlook, such an increase can be expected if the weather is ordinarily favorable for seeding.

The yield per acre will be the dominant factor in next year's crops, as always, and as to this no safe basis for forecast exists.

CHANGE OF DATE.

Because of a conflict of dates, the annual meeting of the Illinois Grain Dealers' Association which was scheduled to be held in Peoria on May 12 and 13, has been set forward and will be held on May 5 and 6, at the Hotel Jefferson.

NEW MEMBERS.

The Illinois Grain Dealers' Association announce the reception of the Claudin Grain & Coal Co., of Gridley, the Sullivan Grain Co. of Sullivan, and the De Laney Grain & Lumber Co. of Wapella, into membership in the organization.

PRICE CONTROL IN ENGLAND

Millers Refuse to Sell to Bakers Who Cut Bread Prices.

By JACK BROOKS.

LONDON, Feb. 20.—There was a stormy session at the resumed hearing of evidence by the Royal Food Commission this week when the matter of flour and the methods pursued by the millers in respect of output and prices was before the investigators. The accusation of a millers' boycott of a cheap loaf was threshed out and Sir Auckland Geddes more than once became strongly indignant at the attitude of some of the witnesses. Geddes is chairman of the commission which seeks to get at the reason for certain commodity prices, particularly wheat, flour and meat.

Herbert Smith, chairman of a big milling association in Wales, was giving evidence. Chairman Geddes said to him: Is your position this—that it is right and proper that millers should refuse to sell flour to individuals prepared to pay for it if such individuals are selling bread at an uneconomic price? Smith said: That is so; the price is kept as low as possible.

Allegations before the commission were that South Wales millers are boycotting bakers who do not sell bread at a certain price level. Two bakers stated that they were selling bread in competition with other people and that they were charging four cents a loaf lower—16 cents instead of 20—and that the millers informed them that unless they raised their price to 20 cents their flour supplies would be stopped. The bakers later admitted that by selling at 16 cents they were registering a decided loss. Chairman Geddes said he could see the purpose of the millers' action. They thought that if bread were sold below the normal price it would induce a method of competition among bakers which would result in bad debts for the millers.

Regarding the allegations of boycotting, Mr. Smith agreed that it was so, but, he said, it was distinctly understood that the millers would not stop supplies until every effort at persuasion had failed. It was, he said, essential to prevent a bread war. The economic price was fixed by a reference board of which he is chairman and the board acted mainly on information from the master bakers. One of the commissioners said that they had evidence that during the last year 15 cents was the real cost of the loaf to the Coöperative Societies and that this surely is evidence that a 20 or 22 cent loaf showed a substantial profit. Mr. Smith, however, maintained that the price of 20 cents for the loaf is uneconomic. He did not think the refusal to supply flour to certain bakers was interference with private enterprise.

Commenting on the millers' association's propensity to condemn without having made any inquiry into figures, Chairman Geddes waxed wrothy and thumped the table angrily. It is your duty, he said to Smith, to know the facts

before condemning individuals. You come here as a chairman of your association and tell us you do not know the facts of the case. Smith protested.

Another commissioner advised Smith to "get outside your little South Wales and your high prices, and take the prices that are being charged elsewhere."

Smith said his association condemns no man who wishes to sell bread at an uneconomic price. All it does is to stop supplies of flour.

1924 LAKE TONNAGE.

The year 1924 saw the greatest movements of grain on the Great Lakes in the history of inland navigation. For the second time in history more than half a billion bushels of grain were transported on lake bottoms. The total movement, 543,647,566 bushels, equal to 125,222,787 net tons, exceeded the previous high mark of 1922 which was 509,411,131 bushels, and was greater by more than 132,000,000 bushels than the 1923 movement.

In making known these figures the Lake Carriers' Association annual report points out that grain was virtually the only commodity to provide any great degree of satisfaction to carriers during the 1924 season. The iron ore movement was poor, being 42,623,572 net tons as compared with 59,036,704 net tons in 1923. During the past 12 years there have been only three seasons, 1914, 1921 and 1922, in which iron ore movement was smaller than in 1924, the records of the Lake Carriers' Association show.

Bituminous coal cargoes, an important part of the lake freighter trade, also were well under 1923 figures. Cargo shipments of bituminous coal, transported and delivered during the navigation season of 1924 totaled 22,941,970 net tons. Besides the loss of 6,714,583 net tons in comparison with 1923, the revenue from the carrying charges also was a reduction from the 1923 rates.

The report from the American Locks of the Sault Ste. Marie canal revealed that copper shipments decreased three per cent during 1924, compared with the previous year. Flour, moreover, showed a five per cent increase and lumber trade boomed, an increase of 45 per cent being noted.

HOW CORN CROP IS USED.

Eighty-four per cent of the acreage grown to corn in 1924 was used for grain, as compared with 86 per cent in 1923, according to the Department of Agriculture. The total area for all purposes was 105,012,000 acres, of which 87,838,000 acres was used for grain. Another 6,090,000 acres were cut for silage, and 11,084,000 "hogged down" or used for forage. Much of the 1924 corn going into silos was unfit for husking, as it was immature or frosted. Ordinarily much of the corn cut for silage could be utilized for grain, if desired. The immaturity of the crop also increased the quantity cut for forage.

HOWES COMPANY BUYS ANOTHER CONCERN.

It is announced that the business of the Vogt-Zanone Scale & Mfg. Co., Inc., Louisville, Ky., has been purchased by S. Howes Co., Inc., Silver Creek, N. Y., manufacturers of the well known "Eureka" and "Invincible" lines of grain cleaning machinery.

The following particulars pertaining to the transaction were sent in to this journal by M. L. Barbeau, treasurer of S. Howes Co., Inc.

"The Vogt-Zanone Scale & Mfg. Co. has for about eight years built a complete line of patented automatic package filling and weighing machines for putting up packages of flour, cereals, feeds, granulated products generally and whole grains. One of the smaller, motor-driven machines is pictured here.

U.S.T.

For quite a while we have sold Vogt-Zanone's Champion Scales on a jobbing basis and have had plenty of opportunity to observe the behavior of the machines, operating under all sorts of conditions. While gratified to find that users were liberal in bestowing praise

VOGT-ZANONE "CHAMPION."

on the scales, what impressed us most was their whole-hearted enthusiasm when speaking of the accuracy of the Champion. With such a satisfactory experience as a background, it was a foregone conclusion that when the opportunity unexpectedly presented itself to purchase the Vogt-Zanone business as a going concern, it was considered favorably, more perhaps by reason of the good reputation of the machines themselves than because of the prosperous condition of the company and its large volume of sales. A. C. Barbeau, president, and W. K. Miller, secretary of our company, last month visited the estab-

Solution of the Price Current-Grain Reporter cross word puzzle, as published on Page 14 of the March 4th issue.

lishment at Louisville, and the deal shortly afterwards was completed. A carload of models and patterns has already been shipped to Silver Creek and it will only be a short time before Champion scales will be in volume production at their new home, plant No. 2 (Invincible Works), which as your readers will recall, we bought last October.

In the Champion line, there is one model which every one in our organization is delighted with. It does seem as though this particular machine has a wonderful future. The No. 12 as it is styled is a dual-purpose automatic sacker and weigher for paper, cloth or burlap containers, ranging in size from 5 lbs. up to 180 lbs. It is a mighty fast worker—for instance, 25-lb. sacks can be filled and accurately weighed at the rate of fifteen per minute; 50-lb. bags at better than nine per minute, and five 100-lb. bags can be turned off every sixty seconds. An unusual thing about the No. 12 is that it can be used for all kinds of whole grains, scratch feeds and seeds, and for such commodities as cracked corn, corn meal, poultry mashes and dairy feeds, as well. We can't recall another sacking scale which is adapted to a similar wide range of work, or which can be employed for so many different materials.

Had Howes' executives not believed that prospects for the future were just as bright as they ever were, they would not, during a period of fourteen months, have bought outright four concerns, Noye Bros. Company, A. E. Reilly Roll Grinding & Corrugating Co., the Invincible Grain Cleaner Co., and now the Vogt-Zanone Scale & Mfg. Co. These transactions involved an investment of more than a quarter of a million dollars, and this fact alone furnishes the best proof that we have complete faith in the commercial soundness of the United States."

ELLIS-NIXON Feeder: Widely installed in feed mills for the past several years. Manufactured by the Ellis Drier Co., Roosevelt Rd. and Talman Ave., Chicago, Ill.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Mar. 7:

MILL AND ELEVATOR FIELDMEN'S ASSOCIATION.

The eighteenth annual meeting of the Mill and Elevator Fieldmen's Association, which is being held at the Hotel Sherman, in Chicago, this week, is proving of unusual interest to its members, as well as to mill and elevator men generally.

Among the many interesting features of the program are addresses by J. C. Adderly, president and general manager Ohio Millers' Mutual Fire Ins. Co., A. P. Husband, secretary Millers' National Federation; Frank J. Delany, G. A. McKinney, secretary Millers' Mutual Fire Insurance Ass'n; G. N. Williamson, ass't general manager Ohio Millers' Mutual Fire Insurance Co.; J. J. Fitzgerald, assistant secretary Grain Dealers' National Mutual Fire Insurance Co.; H. C. Lee, C. W. Gustafson, R. D. MacDaniel, R. A. Backus, L. P. Dendel, and others.

Theater parties and dinners are filling the social hours. A fire demonstration is on the program for Thursday afternoon and the annual election of officers is scheduled for Friday.

HAY GRADING SCHOOL HELD FOR ARMY VETERINARY CORPS.

Contracts covering purchases of hay by the United States Army now specify United States grades for timothy and clover hays and their mixtures.

In order that the Army might be in a position to grade properly hay offered on contracts, a course in hay grading at the Hay Laboratory of the Department of Agriculture, Washington, D. C., has been included in the curriculum of the of the Army Veterinary School. This school is held annually by the Army to provide additional training for members of the Veterinary Corps. A number of both officers and enlisted men are detailed to the school for training each year. Eventually all members of the Veterinary Corps will receive this training.

On December 26 a class of ten officers (seven captains and two second lieutenants, Veterinary Corps, U. S. Army, and one captain from the Cuban Army) completed this course in hay inspection. This was the second class of officers to complete this course, one class of seven veterinary officers (one captain and six first lieutenants) having completed this course last spring.

These officers after graduation from the Army Veterinary School are stationed at the principal army posts and depots throughout the country, where they will be available to pass on the hay offered on contracts.

All of these officers have had previous experience in handling and feeding hay. With this background of experience, the

simplicity of the United States grades, and the intensive training received in the hay school, these officers will now be in a position to place United States grades on hay purchased.

The course while intensive carries the student from a minute study of the individual plants to a broad and general study of the mass or large lot of hay, and also the practical application of the grades and classes. This minute study is to teach the students the various factors which affect grades. After this part of the course is completed, the student, accompanied by a competent inspector, is required to inspect and pass on hay in carloads and in large warehouses.

This will not only insure the Army against application by shippers of low grade hay on these contracts but will give the Army a broader market in that dealers and shippers will feel that all who bid on these contracts will be compelled to furnish the grade specified and are assured that hay meeting the United States grade specified will be accepted without question.

XXTH CENTURY BUYS CONSTANT LINE.

Through the purchase of The B. S. Constant Mfg. Co., Bloomington, Ill., a merger of this line and the XXth Century Mill Mfg. Co., of Decatur, Ill. is affected under the name of Constant XXth Century Corporation. The office and factory of the new company will be located at 100 Euclid ave., Bloomington, Ill. The XXth Century Mill Mfg. Co. manufacture the XXth Century self contained Flour Mills and Flour Mill equipment having their mills in operation in all sections of the United States, Canada, Mexico and other foreign countries. The U. S. Corn Shellers and Cleaners, Chain Drags, Manlifts, Distributors, Grain Elevating and Conveying Machinery manufactured by The B. S. Constant Mfg. Co. have been on the market for many years and the new company is in position to give prompt service on repair or replacement orders.

An organization has been formed consisting of men thoroughly familiar with both lines of manufacture. D. G. Eikenberry who will be superintendent of the factory was connected with The B. S. Constant Mfg. Co. for many years, his duties including sales and engineering as well as factory production. The past four years he has been engaged in the construction of Grain Elevators. Frank J. Temple had his initial experience in the manufacturing business with The B. S. Constant Mfg. Co. in 1895 to 1902 leaving this company to become engineer for the Union Iron Works of Decatur, Ill., becoming treasurer of that company in 1915 and remaining in that capacity until 1919 when he identified himself with the XXth Century Mill Mfg. Co. Mr. Temple has specialized in designing of Grain Handling Machinery, being the inventor of a large percentage of Cleaners in use in the Middle West today. Mr. Temple will be in charge of engineering and assist in sales of both lines. Faie A. Hurd entered this field through connection with the Union Iron Works in 1908 and was secretary of that company when he resigned to take the Presidency of the XXth Century Mill Mfg. Co. in 1919. Mr. Hurd will be in charge of the office, XXth Century Mill Sales and general correspondence.

A complete stock of belting, buckets, bearings, hangers, for both Mills and Elevators will be carried at the Factory and prompt shipment given thereon. The Factory Equipment includes one of the most complete sheet metal and steel working departments in the West particularly fitting the new Company to furnish steel elevator legs, heads and boots in all capacities as well as all sheet metal work required in the construction of fire proof Country and Terminal Elevators. This equipment will also be utilized in the construction of gravel and coal handling installations, smoke

stacks, tanks, etc. Many XXth Century Mills throughout the central and western states have been installed and operated in connection with grain elevators and owners, especially co-operative companies have found this combination very profitable through continuous operation and providing farmers with flour from their own wheat saving in freight and handling charges. The new company will give particular attention to the designing and equipping of such installations. In addition to the XXth Century Flour Mills, other equipment manufactured by the company for mill installation includes the XXth Century ball bearing wheat scourer, receiving and milling separators. Flour packers product elevators, tempering conveyors, grinders, reels and dust collectors.

The combination of the kindred lines should enable the new company to give a service that will be appreciated by the trade in general and maintain the popularity enjoyed heretofore by the XXth Century Mills and U. S. Corn Shellers and Cleaners.

If this paper pleases you kindly recommend it to your neighbors in the trade.

THE \$EAL OF \$ERVICE

You can depend on feeds that bear the Seal of Edwards Licensed Formula Service.

They are backed by thirty years' experience and a thorough knowledge of feeds, feed manufacturing and feeding problems. Edwards Feed System Engineering Service brings added profits to your feed business.

We design, construct and equip feed plants.

Let us inspect your plant, offer expert advice on plant operations, feed formulas, sales and advertising campaigns.

WE supply tested formulas for quality feeds—poultry, dairy cows, hogs and all animals (baby pigs, calves, etc.). For instance, as indicative of the trend of mixed feed formulas, dairy feeds with dried buttermilk are now very popular.

72 MANUFACTURERS NOW USE OUR FORMULAS

We can do for you what we have done for Early & Daniel Co., Cincinnati, Ohio Wiedlocher & Sons, Springfield, Illinois Transit Milling Co., Cincinnati, Ohio Shawnee Milling Co., Shawnee, Oklahoma and scores of others

BARLEY MARKETS.

DULUTH—Barley market was slow here during the last week but it held steady in the face of selling elsewhere in the grain market. Supplies were wanted in some quarters. Receipts here during the week were only 5 cars and prices closed unchanged to 1c off at 80c to 94c.

KANSAS CITY—With only two fresh cars in the week's offerings and demand restricted by falling prices of other grains, the trade in barley this week was insignificant. The arrivals went into store as indicated by an increase of 3,000 bushels in elevator stocks. Prices fell 4c a bushel. No. 3 closed at 90¢ and No. 4 at 87¢90c. Stocks are 11,000 bus., against 264,000 a year ago. Seeding reports from the western districts were generally favorable.

CHICAGO—Prices 1¢2c lower. Local receipts for week, 247,000 bus.; last year, 255,000 bus.; shipments, 108,000 bus.; last year, 111,000 bus. Malting, 95¢@1.03, with fancy mellow higher; feeding and mixing, 90¢95c. Local inspection, 16 cars. Shipping sales, 6,000 bus.

MILWAUKEE—Barley sustained the smallest decline in price of all items in the Milwaukee cash grain market but offerings were light and demand dull. The more desirable malting grades were readily absorbed but lower grades, especially black oats mixtures, moved slowly. For the week prices closed 1¢3c lower and receipts were 124 cars as compared with 125 the previous week and 95 in 1924. Choice to fancy, 48 to 50-lb. test, quotable at \$1.01@1.02; fair to good, 44 to 47-lb. test, 95¢@1.01; light weight, 40 to 43 lb. test, 90¢@97c; feed, 85¢95c. Iowa quoted 90¢@1.02, as to quality; Wisconsin, 90¢@1.02; Minnesota, 90¢@1.02; Dakota, 90¢@1.01; feed and rejected, 85¢95c.

MINNEAPOLIS—There was talk of a round lot of barley having been worked

out of here for export this past week but persistent checking of all possible sources failed to reveal the truth of the report. Feeding quality was in poor demand, with thin and oat stuff apparently not wanted at all. Malting barley scarce and bids were firm to strong for that kind throughout the week. Local stocks for the week totalled 2,110,535 bushels vs. 2,167,418 last week and 516,104 a year ago. Sales today were made in a range of from 89¢92c.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending Mar. 7:

	Mpls.	Dul.	Chi.	Win.	Mil.
March 2.....	17	11	3	2	2
March 3.....	3	6	4	9	2
March 4.....	2	4	1	4	3
March 5.....	13	5	8	2	1

Total	53	47	25	23	18

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Mar. 7:

	Mar.	May.	July.	Sept.
2 1.63½@1.70½	1.41½@1.48	1.26	@1.31½	
3 1.63½@1.66½	1.42½@1.44½	1.28½	@1.28½	
4 1.57	@1.65½	1.37½@1.44½	1.25	@1.28
5 1.57	@1.60½	1.37½@1.42	1.23½	@1.25½
6 1.50½@1.53	1.35½@1.39	1.20½@1.22½		
7 1.48½@1.54½	1.32	@1.38½	1.20	@1.24½

Receipts of rye at Chicago for the week of Mar. 7, 1925, were 22,000 bus. vs. 74,000 bus. same week of 1924; shipments were 2,000 bus. vs. 12,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Mar. 7 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Mar. 2.	\$1.55	\$1.56	\$1.62	\$1.61½	\$1.60
Mar. 3.	1.56½	1.57½	1.61	1.63½	1.60
Mar. 4.	1.51	1.50½	1.61	1.56½	1.58
Mar. 5.	1.50½	1.51½	1.55½	1.57½	1.55
Mar. 6.	1.42½	1.42½	1.45½	1.48½	1.48
Mar. 7.	1.41½	1.42½	1.45½	1.42½	1.46

RYE MARKETS.

MILWAUKEE—The Milwaukee rye market was weak throughout the past week although demand from the shippers was comparatively good and improved steadily the past four days as quotations declined 14¢15c. Receipts were light and offerings were chiefly offgrade with high moisture content and discounts liberal. Considerable Wisconsin sold on a forward shipping basis but on arrival grades were slower and resulting settlements made accordingly. Dry was scarce and wanted. Receipts for the week were 18 cars as compared with 14 the previous week and 45 in 1924. Market closed at \$1.42½@1.44½ for No. 2, inside for Wisconsin ranging at 6¢8c under May price.

DULUTH—Rye market was weak during the end of the week reflecting the liquidation in wheat and other grains. Though receipts of rye from the country fell off sharply, the end of the week showed declines extending to 18½c. Spot No. 1 rye closed 18½c off at \$1.61.

CHICAGO—Closed irregular—2½c lower to ¾c higher for futures and no sales of cash reported. Trade was large and the market active. There was general selling, especially in the nearby futures, influenced principally by the weakness in wheat. Fair demand in evidence on the break on reports of new export business overnight. There was also some coverings by "shorts." Car lot demand was quiet and no sales reported. No. 2 was quoted at 6¢7c under May. Offerings light. Local inspection, 4 cars. Seaboard clearances none.

NEW YORK—Business in rye for export amounted to about one million bushels for the week, principally to Scandinavia. Cash rye displayed a firmer tone and No. 2 rye f. o. b. Atlantic for March was held at five cents over the Chicago May rye future, and first half April loading f. o. b. New York sold at 6½c over the Chicago May rye future.

MINNEAPOLIS—Local houses made fair export sales of rye during the week just past, but mills had nothing encouraging

to offer in the way of reports of betterment in flour demand. Like wheat, the poor quality was in slow request but the good stuff was taken readily by the mills, apparently in anticipation of later demand. Today's local elevator stocks show 1,154,358 bushels in store as compared with 1,163,302 last week, and 7,967,583 a year ago. Today, No. 1 rye, on spot, was quoted at ½¢1½c over May and No. 2, ½c under at 1c over.

PHILADELPHIA—Stock of rye on Mar. 1, 1925, was 178,690 bushels, compared with 278,401 bushels held on Feb. 1, 1925, and 60,965 bushels on March 1, 1924. Stock of barley March 1, 1925, was 1,396 bushels on Feb. 1, 1925, and 30,988 bushels on March 1, 1924.

CASH PRICES FOR RYE.

The following is the range of prices paid for spot rye of contract grade at Chicago in the months named:

	1925.	1924.	1923.	1922.	1921.	1920.
Jan. 1.44½	.71	.86	.77	1.49½	1.66	
Feb. 1.73½	.74	.88½	.86½	1.73	1.85½

Beans and Potatoes

BEAN DELIVERIES LIGHT.

Bean deliveries from this section have been light for several weeks. The portion of the crop that is still in the growers' hands evidently is being held for higher prices. We have had light demand and find the market slightly weaker today.—J. P. Burroughs & Son, Flint, Mich., L. L. Green, Treas.

MICHIGAN BEAN STOCKS

Stocks of Michigan beans are not of sufficient size to cause anxiety. With our checked information that February 1 not over 25 per cent of the crop was in farmers' and elevators' hands in Michigan, we would think that this was rather a small supply to carry the trade six months. The asking prices in Michigan today are \$6.30@6.45 for CHP. The distress beans we believe are practically cleaned up.

Grocers have evidently been more or less depressed by the fluctuating wheat and flour values and have therefore been going slowly on beans, but stocks are light in buyers' hands and any unusual demand would immediately cause a strong reaction to higher levels.

There is no fear of foreign competition as supplies are limited.—Chamberlain Bean Co., Port Huron, Mich.

BUCKWHEAT MARKETS.

BUFFALO.—Quoted at \$2.35 per 100 lbs. MINNEAPOLIS.—Spot quotations follow: Japanese, spot, \$2.10; silver hull, spot, \$2.05; mixed, spot, \$2.05.

CHICAGO.—Fancy Jap, \$2.50, and fancy silver hull, \$2.35, with dirty seed less. ST. LOUIS.—Nominal at \$2.50 per 100 pounds in car lots.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Mar. 7:

Beans—Boston—Car lots, per 100 lbs., N. Y. and Mich. Choice hand-picked pea beans, \$7@7.25; fair to good, \$6.75; California small white, \$8.35@8.50; yellow eye, extras, \$7.00@7.25; red kidneys, choice, \$10.75@11; fair to good, \$9@9.50; California limas, \$14.50@15; native green peas, \$7@7.50; Canada, \$5.50@5.75; split, \$5.50@5.75. Jobbing prices 25 to 50 cents above car lots.

New York—Market showed no improvement Thursday, with most varieties dragging heavily and prices as a whole unchanged. Domestic—Marrow—\$9.75; pea, choice, h.-p., \$7.00@7.25; pea, screened and prime, \$6.50@6.75; red kidney, \$10.75; white kidney, \$9@9.25; lima, Cal., \$15. Imported, 100 lbs.—Marrow, \$9.25@9.50; white kidney, \$8.50@8.75; lima, Mad., 1924-25, \$12.75; 1923-24, \$12.25@12.50; 1922-23, \$9.50; lima, Europe, large, \$11.75; medium, \$11.25; small, \$10.50. Lentils—Chile, \$7.50@7.75; Russia, giant, \$8.25; avg., \$6.50@6.75. Peas—Black eye, \$11; yel. split, \$6.25@6.50; gr. split, \$8@8.25. Imported—Green, Japan, \$6.50@6.75; Holland, \$5.50@5.75; yel. split, \$5.50@6.00; gr. split, \$8@8.25; chick, Mex., imperial, \$12@12.50; monster, \$11@11.50; large, \$9.50@10; small, 7.50; chick, Alg., large, \$7.50@8.

Chicago—Supplies small. Demand large and high prices obtainable for quality. Per 100 lbs. Spot navy beans, Mich., fancy, \$6.65@6.75; red kidney, fair stock, \$10@10.50; large, dark, extra quality, \$11.

Minneapolis—Nominal quotations, including sacks. Beans, fcy. h.-p. navy, lb., 6c; lima, Calif., 1½c; brown, 5c; peas, green, fcy., 8c; yellow, fcy., 6c; marrowfat, 9c.

Potatoes—Chicago—Market was 5c lower on the ordinary grades and steady for fancy. The trade was rather quiet even for a week-end and the volume of business was light. Offerings were liberal, especially the ordinary quality, and price reductions were necessary to effect sales. Fancy grades being scarce still command a premium over the quotations. Receipts were 83 cars and cars on track were increased to 187. Bulk, per 100 lbs., Wisconsin, \$1.20@1.35; ordinary and poor, \$1.10@1.15; round white, sacks, Wisconsin, \$1.15@1.25; ordinary and poor, \$1.05@1.10; Minnesota, \$1@1.15; Idaho russets, \$2.10@2.40. New York—Sack potatoes slow and unchanged; Bermudas sold fairly; Cuban worked out in range given. Me., bulk, 180 lbs., \$2.15@2.60; 165 lbs., \$2.15@2.35; car lots, cwt., \$1.10@1.25; 150-lb. sk., \$2@2.25; state, bulk, 180-lb. sk., \$1.85@2.10; 165-lb. sk., \$1.75@1.90; 150-lb. sk., \$1.50@1.75; L. I. bulk, 180 lbs., \$3.25@3.50; 165 lbs., \$3@3.25; 150-lb. sk., \$2.25@3.00; 3-bu. sk., \$2.50@2.75; Jy., bskt., \$1@1.50; Bermuda, bbl., No. 1, \$15@15.50; No. 2, \$13@13.50; No. 3, \$8@9; Cuba, crt., \$4@4.25; Fla., bbl., \$11@14. Sweets—Jy., bskt., 75¢@3.25; Del. and Md., bskt., 75¢@2.65.

Terminal Markets

MINNEAPOLIS.

H. A. Paul, Correspondent.

F. D. Gill of Hales and Hunter spent the week-end in Chicago on business.

Martin L. Jenks, president of the Itasca Elevator Co., died suddenly while on a vacation in Florida.

E. O. Wright, president of the Wisconsin Milling Co., of Menomonie, Wis., was in Minneapolis on Monday.

C. H. Peterson, flax buyer for the American Linseed Co., left Friday to attend a ten-day conference of department heads at New York.

Among the visitors on the Minneapolis Exchange floor, during the past week were: E. J. Ehler of Milk River, Alta.; Chas. Cave of Lang, Sask.; Wm. B. Buyer of Toledo, Ohio; R. M. Jones of Fargo, N. D.; M. M. Johnson of Cooperstown, N. D.; J. S. Blackwell of Muscatine, Ia.; A. Keble of Des Moines, Ia.; A. B. Treadway of Los Angeles; A. L. Johnstone of Milwaukee, Wis.; A. Wells and A. Murray of Aurora, Can.; C. Kurth, Jr., of Milwaukee; F. C. Engelhart of San Francisco, Cal.; C. Bereson of Duluth; J. R. Golden of Sandusky, Ohio; W. C. Bolle, Rotterdam, Holland.

Cash Markets.

Wheat—The past week in the local cash wheat market was characterized by a very weak, draggy tone until early Saturday, when there was a slight improvement on the opening rally in futures, followed by a hurried backing away from current offerings as soon as the break re-opened. Shipping sales during the past seven days were fairly light; being considerably less than any other similar period since the first of the year. Mills were unanimous in reporting light flour business up till mid-week, when the futures began to sag and a few resting orders were caught as well as a little new business being consummated. Commission houses say that country advices are light and posted receipts bore out these reports.

Good milling wheat was scarce right along and commanded good premiums but the medium and light weight stuff was slow sale. Montana offerings were slightly heavier. For the week, the two terminals, Minneapolis and Duluth, showed 1,514 cars vs. 1,124 last week and 1,672 a year ago.

Today's sales were made largely in the following range: No. 1 hard spring, 1@43c over May; No. 1 dk. no., May price to 41c over and No. 1 northern, 1c under to 35c over May.

Offerings of durum were largely light through the week until Friday, when they picked up slightly. Milling quality, like the spring, was scarce and in good request. No. 1 amber sold today at 1c under @ 32c over Duluth May; No. 1 durum, 4c under @ 24c over and No. 1 mixed, 5c under @ 30c over.

Demand for winter wheat was quiet and featureless. Receipts were some heavier but no improvement in the demand to absorb the surplus. Today's sales were: No. 1 dk. hard Mont., 3c under @ 21c over; No. 1 hard, 6c under @ 7c over.

Wheat in store here, based on last night's figures show: 13,410,409 bu. vs. 13,572,589 last week and 15,201,629 a year ago.

Corn—The strength in the hog market was about the only real encouraging feature in the past week in corn but even this, did not succeed in stopping a further increase in the discounts, especially for the low grade stuff. Industries are backing away sharply from this high moisture content corn and on Saturday holders were only able to get within five cents a bushel of what they were bid at the opening of the week. The weather outlook is far from encouraging and too many have had their fingers burned by having some of this wet corn to dispose of when the real spring weather arrived. Today's sales were as follows: No. 5 yellow, 30@37c under Chicago May; No. 6 yellow, 40@43c under; No. 5 mixed, 36@40c under and No. 6 mixed, 42@45c under. Local elevator stocks showed the following totals: 1,051,753 bu. vs. 932,829 last week and 1,396,597 a year ago.

Oats—The cash basis for this cereal was

slightly firmer for the week ending today. Fair sales to the south were made by local cash houses; about a quarter of a million bushels, held in store at Buffalo, having been worked. Offerings were fairly moderate through the week and demand was fair to good. Based on today's sales, No. 3 whites sold at 1/4@3/4c over May; No. 1 whites at 1@2c less. Local elevator stocks total 22,155,070 bu. vs. 22,202,412 last week and 5,049,730 a year ago.

WINNIPEG.

Geo. H. Measham, Correspondent.

During the week May wheat broke from \$2.09 to within a fraction of \$1.85 cents a bushel. On Thursday wheat showed a weak undertone but closed firm. On Friday the market took a headlong plunge of some 11 cents and a second nose dive on Saturday. The unexpectedly heavy Argentine shipments gave courage to bears to attempt a raid and fortune favored them from the fact that there was no support here from export or milling interests. In fact they were reselling instead of buying.

Coarse grains were influenced by wheat and there was liquidation in progress in them and poor buying power. However, they stood up under strain better than might have been expected. Flax has apparently become disassociated from wheat and has acted independently. On Saturday it was the one commodity on the board to close at an advance, small indeed, but significant. Country holders have apparently liquidated their holdings and flax is now in very strong hands.

The local trade considers that the market is now thoroughly liquidated and on a basis where increasing export business and a demand for spot and for the opening of navigation likely to develop. The cash grain market which has been stagnant for weeks showed a greatly improved tone at the week-end and though little stuff changed hands there was some inquiry. With finer weather receipts are increasing and offerings of farmers' cars are in consequence more numerous.

The drastic break from \$2.20 earlier in the season cut a wide swathe and this week-end completed the work of destruction. The market is likely to be a purely professional affair from now on. Opinion is divided, some of the big people in the export trade are bullish on wheat and it must be noted that Jackson's of Chicago still favor the bull side, according to the local office.

Warm weather has swept the snow covering off the prairies in a manner quite remarkable. It has simply evaporated. This is not favorable but of no great importance if the usual March snowfall follows the present thaws. The time at which the spring wheat seeding starts will be a market factor of first importance and a late start extremely bullish on wheat.

MILWAUKEE.

D. K. Steenberg, Correspondent.

Otto Sickert of Deutsch & Sickert, Milwaukee, made a business trip to Minneapolis last week.

P. C. Kamm of the P. C. Kamm Co., and I. C. Lyman of Kneissler Bros., are now spending a winter vacation at Havana, Cuba.

Stocks of flour at Milwaukee on March 1 were 7,623 bbls. as compared with 5,105 bbls. the first of the preceding month and 13,953 bbls. on the first of March, 1924.

Receipts of cash grain at Milwaukee last week were 124 cars barley, 244 corn, 84 oats, 54 wheat, 18 rye, 2 flax, 17 miscellaneous; total 543 cars, against 483 the week before, 1,100 a year ago and 755 in 1923.

Shipments of grain from Milwaukee for the week ending March 7 were 250,702 bu. oats, 123,200 corn, 124,108 barley, 31,625 wheat, 12,080 rye; total 541,715 bu., against 299,312 the preceding week and 808,936 a year ago.

Milwaukee milling output last week consisted of 7,400 bbls. as compared with 7,350 bbls. the previous week and none during the same week of 1924. Receipts of flour at Milwaukee last week were 13,940 bbls. as compared with 28,700 bbls. the same week of 1924, and shipments were 16,050 bbls. last week as compared with 9,730 bbls. last year.

Prices have receded from the previous week's gains which were more than lost and cash wheat is 17@19c lower for the week, rye 14@15c, oats 2c, corn 5@16c, and barley 1@3c. Movement moderate and trade slow. A study of farm values in southern Wisconsin and northern Illinois

dairy belts is being made at this time by the Department of Agriculture.

Edward Diericks of Minneapolis, Minn.; Kirk Laubenstein of Hartford, Wis.; Charles Wollman of Hales Corners, Wis.; W. T. Hahn of Lodi, Wis.; R. H. Jones of Cambria, Wis.; D. W. Rosenheimer of Kewaskum, Wis.; Walter Weble of Burlington, Wis.; A. Post of Horicon, Wis.; G. Lepper of Menominee Falls, Wis.; John Barrett of Montello, Wis.; K. Kutel of Chicago, Ill.; L. H. Dodge and E. Williams of Cambria, Wis.; Bentley Dadmun of White-water, Wis., and J. A. Thomas of Pewaukee, Wis., were among visitors at the Milwaukee Chamber of Commerce last week.

NEW YORK.

J. M. Nugent, Correspondent.

The foreign demand for barley and oats during the week was not very active.

During the past week, the following visited the floor of the New York Produce Ex.: L. H. Freeman, C. P. Randall, both of Chicago; H. P. Winslow and C. E. Austin, both of Winnipeg; R. E. Castator of Philadelphia; F. K. Morrow and V. C. Green, both of Toronto, and S. I. Herrick of Buffalo.

The export demand for wheat early in the week was disappointing, but toward the close, business improved and total sales amounted to about two to three million bushels. Most of the business appeared to be in Duluth spring wheat and hard winters, but there were also some scattered sales of Manitobas and some durums.

Flour.

Business came almost to a complete standstill in the flour market during the week as a result of the 20-cent decline in wheat. Prices were nominally about 50c per barrel lower.

Export business in flour was also very quiet.

Spring patents were quoted around \$9.25 to \$9.75; soft winter straights, \$8.90 to \$9.25 and hard winter straights at \$9.00 to \$9.50 per 196 lbs.

DULUTH.

H. J. Schulte, Correspondent.

Martin L. Jenks, aged 63, a former president of the Duluth Board of Trade, died at Daytona, Fla., on March 5 after a short illness. Mr. Jenks was president of the

MARTIN L. JENKS, Deceased.

Itasca Elevator Co. and he had been connected with the grain trade in Duluth for more than twenty-five years. He came here from Milwaukee about twenty-five years ago.

Frank Tenney of the Tenney Grain Co. spent a couple of days on this market during the last week. Mr. Tenney is now in a rubber business at Boston, Mass., left by his father. He hopes to be able to return to Duluth next fall during the grain marketing rush period.

Considerable wheat is being shipped all-rail to the east by elevators here to cover special orders. The Occident Elevator Co. has been figuring prominently in that trade, its shipments going forward to its Buffalo milling interests. A shipment of rye was loaded out of an elevator here during the last week for Buffalo delivery.

Walter McCarthy, president of the Capitol Elevator Co., has returned from a three weeks' western trip during which he visited Denver, Kansas City and other mar-

kets. He was impressed by the improved sentiment among grain men on the exchanges he visited as a result of the high prices realized last fall and during the winter to date. Operators met with success in working off large tonnages of their holdings of wheat and coarse grains before the acute weakness developed during the last week.

Percy Fuller, manager of the American Linseed Co.'s Winnipeg branch, was a visitor on this market at the end of the week. Flaxseed operation have been on a heavy scale on the Winnipeg market during the season up to the present, he said. That is attributed to crushers having hedged their buying largely in the May future on that market owing to around 4,500,000 bushels of actual seed in the elevators at the lake ports and country elevators being behind it. Seeding of a larger acreage to rye over their Northwest is looked for this season, he said.

Grain receipts at Duluth and Superior elevators during February showed a moderate falling off, the aggregate of all grains being 3,876,018 bushels as compared with \$4,204,246 bushels during the same month last year. Wheat receipts footed up to 2,504,848 bushels, against 972,880 bushels last year. Comparative receipts and shipments at the elevators during February were:

	1925.	
	Receipts.	Shpts.
Wheat, domestic	2,496,680	866,526

BOSTON.

Recent visitors noted on the floor of the exchange have included N. B. Updike of Omaha, A. M. Connors of Omaha.

W. B. Hanna, representative for the Northwestern Consolidated Milling Co. of Minneapolis, was a recent visitor in New York.

The old Chamber of Commerce building at the corner of Milk and India streets is hereafter to be known as the Grain and Flour Exchange building.

The Grain and Flour Exchange has completed its organization by the appointment of Louis W. DePass as secretary, and Frank W. Wise as treasurer.

OKLAHOMA CITY.

W. F. Kerr, Correspondent.

W. E. Purmort, a pioneer grain dealer of Enid, is seriously ill.

Harry Dunn, grain dealer of Rocky, Okla., was here recently.

J. C. Pearson of Marshall was a visitor at the Oklahoma City Grain Exchange recently.

E. B. McNeil, manager of the Farmers Grain & Supply Co. of Thomas, Okla., was a recent local visitor.

Paul Peeler, manager of the Roger Mills County Farmers' Co-operative Association, was here recently from Elk City.

Chris Constance of Dallas, traveling freight agent of the Gulf Coast Lines, called on Oklahoma grain dealers last week.

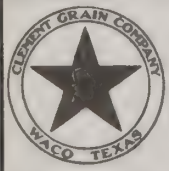

The Garside stock of farm implements at Newkirk, Okla., has been acquired by the Farmers' Co-operative Elevator and Supply Co. of that place.

Capl Cassidy of Frederick and Leo Potisman of Fort Worth are reported to have purchased the elevator of the Billingslea Grain Co. at Frederick, Okla.

Henry A. Richert and Harry White, officials of the Hydro Seed & Grain Co., Hydro, Okla., were here on business recently. They reported wheat and barley suffering for rain in that territory.

Wheat was reported in fair shape except where that in sandy land was damaged by freezes by W. J. Baines, manager of the Star Mill & Elevator Co. at Hennessey, who was here last week.

The Interstate Commerce Commission has denied a petition of the Oklahoma Millers' League for an adjustment of rates

into Texas and sections of other states so that export flour would not be subjected to discrimination as against export wheat. The order, however, called upon the carriers to make certain tariff adjustments to bring these rates into harmony with a general adjustment on similar rates. The traffic committee of the league has called upon railroads to make the adjustments.

KANSAS CITY.

T. J. Tanner, Correspondent.

President Coolidge's inaugural address was received by radio in the trading hall of the Board of Trade.

The fifteenth annual meeting of the Southwestern Millers' League will be held in Kansas City Thursday and Friday, April 2 and 3, at the Kansas City Athletic Club.

C. C. Fields, president of the Winnipeg Grain Exchange and vice president of the Norris Grain Co. of Canada, spent several days this week at the Kansas City Board of Trade. With his son, C. D. Fields, he was en route to Oklahoma to visit relatives.

Visitors at the Board of Trade this week included J. Weinstein, Chicago; B. H. Cayle, St. Louis; Ralph Brown, Joplin, Mo.; J. D. Donahue, Ponca City, Okla.; E. E. Bogby, Sedalia, Mo.; F. C. Tignor, Great Bend, Kan.; A. F. Baker, Wichita, Kan.; Lloyd Miller, Salina, Kan.; K. E. Hipple, Hutchinson, Kan., and H. J. Merrill, Topeka, Kan.

Among the crop reports received this week were many of various character concerning growing wheat. While complaints from North Central and Southwestern Kansas were serious, the trade refused to become excited, owing to the earliness of the season and the possibility of benefit from later moisture. The increased acreage, also, was kept in mind.

W. R. Scott, transportation commissioner and secretary of the Kansas City Board of Trade, has been advised that the recently published reduced rates on grain and grain products from Kansas City to Louisiana stations on the Kansas City Southern Railroad, effective March 3, have been suspended until July 1 by the Interstate Commerce Commission.

A report issued Tuesday by Allen Logan of the Logan Bros. Grain Co., indicated 12,950,000 bus. of wheat still in the hands of Kansas farmers. The investigation showed 16,918,000 bus. also, in country mills and country elevators, making the total reserves 29,868,000 bus. Mr. Logan figured that Kansas could market 7,368,000 bus. after supplying the state's milling needs up to harvest.

Word was received in Kansas City March 5 of the death in St. Louis on the previous day of Eugene J. Gissler, a member of the exchange, in St. Louis, Mo. Mr. Gissler, who was secretary of the Moffitt-Napier Grain Co., St. Louis, joined the Kansas City Board of Trade October 28, 1924, after the death of Nathaniel Moffitt, president of the company, who was a member of the Kansas City exchange.

Coincident with the formal opening of the grain feed grinding department of the Ralston-Purina Mills, in the East bottoms, William H. Danforth, president of the Ralston-Purina Co., St. Louis, will address the Kansas City Chamber of Commerce at a noon luncheon March 11 and thereafter conduct a party of Chamber members and Kansas City grain dealers through the new plant.

F. L. Ferguson, president of the Root Grain Co., who returned Thursday from a trip through Kansas and Oklahoma, said crop conditions were unfavorable. "The southwestern part of Kansas and on into Oklahoma is very dry," he admitted. "Some wheat fields came up last fall to a good stand, while others did not sprout at all because of the drouth. Unless weather conditions are entirely favorable from now on the wheat crop in that territory will not amount to much."

Big Year for Elevator Building.

Elevator building in and adjacent to Kansas City this year promises to be the largest in several seasons. Including the 500,000-bushel addition to its mill storage in North Kansas City, announced this week by the Kansas Flour Mills Co., and the 1,100,000-bushel addition authorized a week ago by the Washburn-Crosby Co., in the East bottoms, the grain storage capacity tributary to the Kansas City market will be enlarged about 5,000,000 bushels. This will bring the total storage up to about 35,000,000 bushels. The construction, with trackage and equipment, will cost \$4,500,000, according to a local estimate. Profitable business for elevator men during the last year is the chief incentive for expansion of storage. At times the available room was crowded with wheat, corn and oats, and it was apparent that the market needed more storage.

Excavation will start during the coming week for an addition of 1,000,000 bushels of tankage to the Murray elevator, in North Kansas City, operated by the Norris Grain Co. This will give the Norris interest a total capacity of 4,600,000 bushels. Improvements on Elevator "A," at Turner, Kan., west of Kansas City, will give the Grain Marketing Co. 500,000 bushels of additional storage. The Eagle elevator, in the East bottoms, is to be enlarged from its present capacity, 70,000 bushels, to 270,000. It will be mainly a kafir handling house, run by Henry Lichtig & Co. The Missouri Pacific Railroad will increase by 500,000 bushels the capacity of the Kansas-

Missouri elevator as soon as certain unit difficulties can be figured out by the Hall-Baker Grain Co. Another addition planned is that of the Wabash elevator, operated by the Nye & Jenks Grain Co. The present capacity of nearly 1,000,000 bushels may be doubled. Other new construction, either completed or proposed, includes the storage of the Rosedale Milling Co., the Staley Milling Co., and the Kansas City Macaroni & Importing Co.

Cash Grain Markets.

Wheat—Receipts for the week, 639 cars, against 425 a week ago and 618 a year ago. The increased movement was reflected in both hard and soft varieties of winter wheat. It was accepted as a response to the sharp advance in prices during the previous week and also as an expression of desire on the part of farmers to unload their remaining surplus before the beginning of the spring work period. Further slight rises in the market were recorded on Monday and Tuesday, but, in view of the sensational break in futures thereafter, a radical decline occurred, which was not arrested until Saturday. There was at all times a good demand from both milling and elevator sources, but on the recessions the holders were loth to sell, causing liberal carry-overs from day to day. Soft wheat was less active than hard and dark. While flour trade was dull, as a whole, soft wheat flour was especially slow. Hard and dark wheat closed with net losses of 13@16c, final prices being as follows: No. 1, \$1.71@1.92; No. 2, \$1.71@1.92; No. 3, \$1.70@1.90; No. 4, \$1.68@1.88. Soft wheat closed 13@17c down, with No. 1 at \$1.80@1.90; No. 2 at \$1.80@1.90; No. 3 at \$1.76@1.79 and No. 4 at \$1.70@1.75. Local wheat stocks continued to decrease, owing to shipments for export and domestic accounts. The week's reduction was 630,000 bushels, leaving 8,305,000 bushels in store. It is reported that fully 3,500,000 bushels of the stock is sold. A year ago Kansas City had 11,909,000 bushels in store.

Corn—Receipts, 751 cars, against 397 a week ago and 481 a year ago. The bullish incentive of sharply advancing hog prices induced early strength in corn, but the market could not withstand the pressure of offerings and the later adverse action of wheat. Prices went down in big drops and closed without much recovery. White corn was particularly weak. There was some buying of yellow and mixed for feeding account, but the burden of the demand fell on storage interests, who took advantage of the opportunity to widen the discount under the May delivery and also to bid lower for samples with high moisture content. At the close the market was 5@10c under the final prices of the preceding Saturday, as follows: No. 2 white, \$1.14½@1.17; No. 3, \$1.08@1.10; No. 2 mixed, \$1.14@1.16; No. 3, \$1.08@1.11; No. 2 yellow, \$1.16@1.18; No. 3, \$1.14@1.15. Stocks increased 243,000 bushels to 7,322,000, as against 1,877,000 last year.

Oats—Receipts, 46 cars, against 29 a week ago and 126 a year ago. Though the outward movement greatly exceeded the inflow, the market was governed by changes in prices of other grains. Competition for the limited floor offerings was good at the ruling prices, with local dealers among the buyers. Most of the cars arriving had been bought ahead by elevator men. White oats closed 3½@5½c lower, with No. 2 at 52@52½c and No. 3 at 51@51½c. Red seed oats fell 2@3c. No. 2 sold at 54c and No. 3 at 52c. Country advices indicated fair sowing progress, with need of rain in much of the territory westward and southwestward. Elevator stocks here decreased 95,000 bushels, to 2,447,000, against 870,000 a year ago.

Kafir and Milo—Receipts, 182 cars, against 130 a week ago and 99 a year ago. Consumptive demand was very slow and local handlers bought only on a basis relative to the level of corn. Kafir predominated in the offerings. It closed 9@13c per cwt. lower, while milo showed a recession of 12@14c. Final prices were: No. 2 white kafir, \$1.73@1.74; No. 3, \$1.71@1.72; No. 4, \$1.65@1.68; No. 2 milo, \$1.96@1.98; No. 3, \$1.94@1.96; No. 4, \$1.90@1.93. Stocks increased 50,000 bushels to 405,000, against 410,000 a year ago.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending March 6 were: Wheat, 975,875 bushels; oats, \$19,968 bushels; rye, 181,955 bushels.

Stock of wheat on March 1 was 2,335,105 bushels, compared with 2,407,662 bushels Feb. 1 and 1,486,876 bushels on March 1, 1924.

Stock of corn on March 1, 1925, was 190,266 bushels, compared with 139,814 bushels Feb. 1, 1925, and 252,094 bushels on March 1, 1924.

Stock of oats on March 1, 1925, was 174,304 bushels, compared with 170,490 bushels on Feb. 1, 1925, and 120,121 bushels March 1, 1924.

During the inaugural ceremonies at Washington on Wednesday last the members of the Commercial Exchange enjoyed them through the radio.

Receipts of flour and grain for the week ending March 7 were: Flour, 50,121 barrels; wheat, 986,017 bushels; corn, 10,759; oats, 89,165 bushels; rye, 160,275 bushels.

Stocks in Philadelphia public warehouses on March 1st, 1925, were: Flour, 156,308 barrels, compared with 125,170 barrels on Feb. 1, 1925, and 136,301 barrels March 1, 1924.

The Eastern Macaroni Manufacturers' Association held a meeting in this city last week to discuss matters pertaining to the industry. It was agreed that unless they received more money for the macaroni that they would have to retire from business or if the price of flour does not come down.

Lizzie J., wife of Ambrose B. Clemmer, secretary of the Commercial Exchange, died on Thursday, March 5, after several weeks' serious illness. She was a devoted wife and mother and his many friends on 'change and elsewhere are expressing their strong sympathy for him in their sore affliction.

John B. Matthaie, general traffic manager for the Commercial Exchange, has received notice from the Great Lakes Transit Corporation that it is expected that all east bound rates in connection with that corporation will be restored effective March 19th, 1925, in anticipation of the opening of navigation.

Number of cars of grain unloaded at Girard Point elevator during the month of February, 1925, were: Wheat 1,848, corn 19, rye 17, oats 43; total, 1,927. The following cars were unloaded at Port Richmond elevator at the same time, viz.: Wheat 1,082 cars, corn 10, barley 10; total, 1,102 cars. The following were unloaded at Twenty-ninth St.: Oats 38 cars, corn 11, mixed grains 1, milo maize 1, wheat 1; total, 52 cars.

The following out of town visitors were registered at the Commercial Exchange during the week: A. J. Bucking, Allentown, Pa.; J. E. Bailey, Indianapolis; A. B. Caple, Toledo, O.; Frank Sloan, Bridgeton; H. S. Smith, Salem, N. J.; H. M. Smiley, Bridgeton, N. J.; G. N. Tanner, Chicago; Orville Wright, Baltimore; Paul A. Brennan, Bridgeville, Del.; A. E. Bowman, Hagerstown, Md.; L. A. McGalliard, Trenton, N. J.; D. D. Mancill, Kennetts Square, Pa.; Howard Hilyard, Kenton, Del.; D. W. Steelman, State College, Pa.; O. F. Patterson, Buffalo; Samuel H. Beek, Townsend, Del.; L. W. Johnston, St. Louis, Mo.; W. H. Stokes, Jr., Watertown, S. D.; H. Anderson, Toledo; A. P. Seabrook, Bridgeton, N. J.; J. E. Bailey, Indianapolis; G. N. Tanner, Chicago; H. S. Smith, Salem, N. J.

FLOUR.

Philadelphia, March 7th. The market is very unsettled and irregular pending the violent fluctuations of wheat. Millers are disposed to hold out for full quotations, but buyers are not inclined to purchase more than will suffice for immediate wants. At the close prices are about 25c per barrel lower on all grades. Receipts for the past week were 50,121 barrels. We quote per 196-lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$9.25 @9.50; do nearby, \$8.75@9.25; hard winter straight, \$9.25@9.75; do short patent, \$9.75 @10.25; spring first clear, \$9.25@9.50; do patent, \$9.75@10.25; do short patent, \$10.25 @10.50; fancy spring and city mills patent family brands, \$10.60@11.25; rye flour, \$8.90 @9.25 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

The grain movement started the month of March with a heavier average volume than in the latter part of February, and arrivals of both wheat and corn have been moderate. Big fluctuations in prices have made for an erratic cash situation, and absorption is generally slow. Cash wheat is 13 cents lower for the week on hard wheat, and soft is quoted 14c to 15c lower. Corn declined 6c to 12c for the week, with biggest losses on low grades. Oats quoted 4c lower for the week. Shipping and elevator demand for wheat rather quiet. Fair demand for corn.

Visitors on the St. Joseph Grain Exchange during the week ending March 7, included: M. Graham, Conception, Mo.; C. Carr, Maryville, Mo.; P. E. Field, Gower, Mo.; F. J. Kelley, City; A. S. Smith, Lawson, Mo.; J. B. Skeltman, Platte City, Mo.; E. Miner, Ridgeway, Mo.; F. P. Schlup, Stewartsville, Mo.; J. W. McCleery, Pauline, Neb.; J. Bostock, Pauline, Neb.; P. O. Townsend, Athelstan, Ia.; S. P. Mason, Sioux City, Ia.; J. H. Larwill, Kansas City; R. C. Myers, Atchison, Kan.; R. Cooper, Conway, Ia.; Marshall Hall, St. Louis; A. Myers, Kansas City; Frank Hall, Robinson, Kans.; W. B. Crabtree, Highland, Kans.; H. E. Leet, Maryville, Mo.; Geo. Donley, Maryville, Mo.; John Donan, Mound City, Mo.; F. J. Niebrugger, Kansas City, Mo.; E. Stockham, Omaha, Neb.; J. R. Durri, Omaha; E. B. Hibbs, Sheridan, Mo.; T. J. Saunders, Cameron, Mo.; J. M. Witt, Stewartsville, Mo.

BALTIMORE.

Robert C. Neu, Correspondent.

The regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce was held on March 9.

The annual auction sale for the choice of grain sample tables on the floor of the Baltimore Chamber of Commerce will take place on the first Monday in April.

The receipts of water-borne corn in the Baltimore market so far this season amount to 13,000 bushels, compared with 158,000 bushels up to the corresponding time last year.

The mill, warehouse and merchandise of the Malco Milling Co., at Hampstead, Md., was sold at public auction by the receivers appointed some weeks ago for the property at a little under \$50,000. It was purchased by a group of citizens of the

Plans are being rapidly completed for the annual meeting and dinner of the Baltimore Flour Club, to be held at Hotel Rennert, on the evening of March 25. A number of out-of-town guests will be in attendance and the musical features are expected to be of high order. The principal speaker will be Hon. J. Frank Suplee, United States Commissioner.

At the annual meeting of the Traffic Club of Baltimore on March 3 George M. Smith, general superintendent of the Pennsylvania Railroad, was elected president for the coming year, and the organization went on record as opposed to the principle of freight-rate regulation by Congress, as proposed in the Butler-Garber bills recently introduced.

MEMPHIS.

George Williamson, Correspondent.

Kyle W. Jones, of Iowa City, Ia., spent Friday here en route home from a trip including New Orleans.

Receipts for the week were 81 cars of corn, 126 of oats, 45 of hay and 44 alfalfa meal. Stocks of all are still large.

H. A. Mosby, Knoxville, Tenn., and Guy Williams, Little Rock, Ark., were registered at the Merchants exchange Thursday by F. C. Chenault.

Charles Johnson, of the Home Mill and Grain Co., Mt. Vernon and Evansville, Ind., was here during the week and a visitor at the offices of the Dixie-Portland Flour Co.

Sale of the American Rice Mill and Feed Co. under the foreclosure of a mortgage held by the Citizens Bank, of Paducah, Ky., has been forbidden in local court, acting on an injunction asked by the Invinible Grain Cleaner Co., of Silver Creek, N. Y. The suit is in a nature of a general creditor's bill. It is alleged that the concern owes about \$50,000 and its assets are worth about \$90,000. The mill has never been operated.

The grain trade continues to hope for better business, but they admit it is disappointingly slow coming. Credits are still one of the main hindrances, but this will be the case throughout the season. The unsettled state of the grain markets has also discouraged business. Track quotations Saturday for 3 white or 3 yellow corn were \$1.27 and for 3 mixed, \$1.22. Oats were also slow and track 3 white quotable at 56½c to 57 cents.

Weather conditions for several days have been favorable throughout this territory and farm work is beginning. This is expected to stimulate demand for all kinds of grain and feedstuffs, but thus far buying has been of hand to mouth sort. Everything points to an effort to grow more feedstuffs, although the reactionary grain markets and the recent advance in cotton may have a tendency to somewhat upset plans. Corn planting will get under way in a few days if the present weather continues, as much plowing has already been done in the delta sections.

NEW ORLEANS.

M. L. Davis, Correspondent.

Theodore Brent, Traffic Manager of the Mississippi Warrior Service, is on a business visit to Memphis.

R. E. Tipton, General Manager of the Lykes Bros. S-S Co., left this week for a business visit to New York.

Standard blackstrap molasses is firm at 13c f. o. b. tank cars New Orleans; light blackstrap is quoted at 14c per gallon.

Export shipments from New Orleans for the month of February were, wheat, 2,173,043 bushels; corn, 163,879 bushels; oats, 102,749 bushels. Stock in elevators as of today are: Wheat, 1,522,000 bushels; corn, 584,000 bushels; oats, 324,000 bushels; rye, 20,000 bushels; barley, 3,000 bushels. Cars on track: Wheat, 14.

Juan Monasterio, who has been with the Hibernia Bank & Trust Company for the past two years in the Foreign Trade Department, will in the future have charge of this department, succeeding Bruce Baird who has resigned to accept a vice presidency in the New Orleans Bank & Trust Company.

J. L. Lancaster, President of the T. & P. Railroad, announces a million and a half dollars will be spent in the expansion of the T. P. and M. O. P. terminals at New Orleans. The plans call for a new freight yard on the west bank of the river with trackage for 1,200 cars and a re-arrangement of the east bank terminal.

LOS ANGELES.

C. G. White, Correspondent.

Ray T. Veltum, former bookkeeper for the Los Angeles Grain Exchange and now connected with the real estate business in San Francisco, was a visitor in the city last week.

O. L. Male, Vice President of the Colorado Mill & Elevator Company, Denver, has been in the city several weeks on business and while in the city called on the Exchange.

Clarke H. Bradshaw, Secretary of the Southern Calif. Feed & Fuel Dealers' Ass'n, left this week for Imperial Valley on a pleasure trip. Mr. Bradshaw will be absent from the city for the next 10 days.

T. P. Armstrong, traffic manager of the Globe Grain & Milling Company, resigned the first of March to accept a position as soliciting agent for the McCormick Steamship Company. Mr. L. P. White will succeed Mr. Armstrong as traffic manager.

Frank Viault, Manager of the Calif. Milling Corp'n, advises that his firm will start at once to erect a modern fire proof warehouse on their property at 55th and Alameda Sts. The new building will be 135x135 feet and will be used for storage for sacked grain only.

J. Carver Strong, manager of the Price Current Grain Reporter, Chicago, was a visitor on the floor of the Exchange this week. Mr. Strong has been in Los Angeles for the past three weeks on his annual vacation and will leave Monday for San Francisco where he will stop off for several days before leaving California for home. Mr. Strong purchased a Willys-Knight sedan several days ago and will motor up the coast to San Francisco.

There has been some change in the market conditions at this terminal during the past week. The mixed feeds have been steady with a fair demand and arrivals light. Utah-Idaho millrun is selling at \$40 per ton, while Kansas bran is quotable at \$34 to \$35. Alfalfa meal, medium ground, dry, is steady at \$34, while that mixed with molasses is selling at \$31. The molasses

alfalfa feed has become a very popular feed with the stock men here and the demand is very good. Grain products as a whole are moving at about the normal rate. No. 3 yellow corn can be quoted at \$2.55 to \$2.60. Kaffir corn at \$2.16 to \$2.20 for No. 2, while No. 3 is quotable at 5c less. There has been some trading in wheat during the past week and No. 2 western red is ranging in price from \$3.20 to \$3.30 per 100 lbs. There has been some movement in barley during the past week and bids of \$2.25 to \$2.30 per 100 are being made on the Eastern quality. There is very little California barley being offered at this time. Some April barley has changed hands during the past week at \$2.25 per 100, in 100-ton lots. The grain and ground feed trade, while not as active, perhaps this week as usual, the prices, however, have remained practically the same as one week ago.

TOLEDO.

S. M. Bender, Correspondent.

Seed receipts for February were 2,701 bags of clover, 349 bags of alsike, 1,382 bags of timothy. Total, 4,432 bags.

Toledo's flour stocks on March 1, were 40,250 bbls, compared with 36,880 bbls. on February 1, and 29,000 bbls, a year ago on March 1st.

Grain receipts in this market for the past week were as follows: 20 cars of wheat, 37 cars of corn, 13 cars of oats, 1 car of rye. Total, 71 cars.

Toledo flour production the past week was 28,200 bbls., equal to 59 per cent of capacity. The week before it was 31,750 bbls., and a year ago last week was 33,200 bbls.

Bill Savage of the Imperial Grain and Milling Co., is having lots of fun with the boys on change by sending them pretty bathing girls postcards from his winter home at Palm Beach, Fla.

The mill of the College Corner Milling Co. at College Corner, Ohio, was totally destroyed by fire of unknown origin the night of February 24th. The loss was partly covered by insurance.

John Luscombe of Southworth & Co., and wife, have returned from a week's stay in New York where they took in every show that was worth while and as John says some that were worth more.

Henry Hirsch, seed and wool dealer, was nominated first vice-president of the Toledo Produce Exchange this week to fill the vacancy caused by the resignation of J. C. Husted. A special election will be held next Wednesday.

The Great Lakes Regional Advisory Board met in Lansing, Mich., March 10th. The importance of this body is becoming more pronounced each time they gather and the subjects brought up are of interest to every line of business.

L. G. Macomber, traffic commissioner of the Chamber of Commerce and of the Exchange, will be in Buffalo this week representing the exchange in a complaint filed with the Interstate Commerce Commission which involves the Toledo grain situation.

Ohio millers report very little wheat moving and farmers not inclined to sell on this decline. Flour and feeds are moving slow account of bad roads and weather. New wheat is reported in good condition in most sections with a promise of a normal crop at this time.

Milling demand for wheat continues quiet and mills are mostly out of the market for wheat. Flour trade has been nervous because of the erratic wheat market and buyers have held off only buying as they need to replenish their stocks. Millfeeds show a little more action and should be in a position to recover when wheat advances again.

Exchange members and their friends didn't need to go to Washington to hear President Coolidge's inaugural address. Bert Boardman of the East Side Iron Elevator, with the aid of Paul Barnes of the Toledo Grain and Milling Co., had a radio set installed in the elevator office on the ninth floor. The music by the Marine Band and the President's speech came in without any static, or cats and dogs. The grain board received but little attention from twelve until two. Nearby offices could hear plain enough so that they did not slow up in their routine work. Another instance of Toledo's live wire grain men and their ingenuity.

Earle Randall of the A. H. Randall Milling Co., Tecumseh, Mich., was host to sixteen Toledo friends at a dinner given at the Secor Hotel, Saturday evening, February 28. A clever menu announced it as Long Lean Randall's Pow Wow Chow. Joe Streicher of J. F. Zahm & Co., was Chief Fixer, and Tom Randall, a son, was Chief Assistant Fixer. Other Chiefs who attended were: Fred Mayer, Fred Jaeger, Bill Cummings, Joe Nichols of J. F. Zahm & Co.; Kent Keilholtz and Joe Doering of Southworth & Co.; Dave Anderson of the National Milling Co.; Edgar Thierwechter of Oak Harbor, Ohio; George Forrester of

ST. LOUIS.

The firm of Bryan, Williams & Cave, 1615 Pierce building, has been appointed legal adviser for the Merchants Exchange for this year, and Mr. Henry Davis of that firm has been assigned to handle the Exchange business. Mr. Davis will advise all Chairmen of Committees who call on him for legal opinions in connection with their work. Members of the Exchange who desire legal opinions on any subject which is of general interest to the members of the Exchange are invited to give the request for such opinion to the Secretary, who will present same to the Attorney if it appears to be such as will interest the membership in a general way. Members will no doubt appreciate that it would not be possible for the Exchange to hold itself out to furnish legal opinions to members concerning their personal or private affairs, so the Secretary has instructions to submit only such requests for legal opinions as appear to interest the members in a general way. It is thought this arrangement will be of greater benefit to the membership than any that has heretofore been tried. A record of these opinions will be kept in the Secretary's office, so that when a request comes in for an opinion on a matter which has already been passed upon, a copy of the opinion rendered can be furnished in answer thereto.

In accordance with instructions issued by the President, dated February 5, 1925, outlining the discontinuance of the collection, tabulation and publication of statistics covering commodities handled principally by non-members of the Exchange, arrangements have been made to get from the railroads receipts and shipments, local and through, of all kinds of grain, hay and flour. These will be posted daily on the floor, and a record kept in the office, so that an annual report can be issued at the end of the year, similar to the one that has just been put out covering the year 1924. By discontinuing the recording of the statistics on other commodities, it is possible to dispense with the services of two statisticians, as well as the cost of printing the annual report, and the various forms which had to be provided for the railroads for the purpose of reporting these commodities, resulting in an aggregate saving in the expense of conducting the Secretary's office of \$6,000.00 per annum.

Members will find enclosed a printed statement of receipts and shipments of grain, grain products and hay, for 1924, with comparisons of grand totals for 1923. This statistical report and the preliminary printed report, dated January 6.

Bill No. 260 was introduced by Representative Davidson of St. Louis, in the House at Jefferson City, which would apparently prohibit the Exchange or any similar institution from declaring rates that should be observed by its members for commission, brokerage, flour inspection, weighing and the like. First Vice-President Martin and the Secretary appeared before the Committee, in Jefferson City, and explained how this bill, if it became a law, would disturb the operation of the Merchants Exchange, and that no complaint had ever been made by people, who sent grain to the market for sale, as to the rates of commission and other charges for service. Mr. Davidson stated he never intended to regulate Grain Exchanges, but was aiming to reach the laundry men, who he claimed were in an illegal combine. The Committee afterward decided that the bill was too sweeping, and should be amended, and it is therefore thought there is no reason to have any further apprehension in regard to legislation on this subject.

Examination of reports of futures trading during the last six months, at Chicago, Kansas City, Minneapolis, Duluth and St.

Effective March 1st, Mr. Earl F. Dunmeyer will become Secretary of the Black & White Milling Company in charge of their Accounting Department, having purchased an interest in the firm.

Mr. Dunmeyer is very well known to the trade having been connected with the Saxony Mills before coming to the Black & White Milling Company, and prior to that was connected with the Kehlor Flour Mills Company for a good many years.

The death of Charles E. Prunty, the oldest active St. Louis Seedsman, occurred at noon on Thursday, March 5, 1925. He is survived by a sister, Ella C. Prunty, and two brothers, Frank J. Barnidge and August J. Barnidge, death resulting from pneumonia.

Funeral took place from his residence, 4321 Virginia avenue, on Saturday morning, March 7, at 8:30 a. m., to St. Anthony's church, interment being in Calvary Cemetery.

Mr. Prunty was 80 years of age last December 21st, being born in St. Louis,

his first employment being with Edward Jackson, a barley merchant, then with Plant Seed Company and in 1874 he commenced business on his own account, having passed the 50 year mile stone last year. The building which he now occupies has been used by him since 1881, and is of historical value, as the home of Pierre Chouteau, one of the first settlers of St. Louis, was at one time located on this block of ground. He also occupied a number of buildings on the Levee front, which in the early days of steamboat traffic in St. Louis, was the most prominent business section of the city.

Mr. Prunty spent the early days of his manhood in the central part of St. Louis, which was at that time the residential section. He has maintained his residence at 4321 Virginia avenue for the past 15 years, his house being a large mansion of frame construction and situated on about 6 acres of land and it was his pleasure to try out the different grasses on this plot of soil with which he had remarkable success, he being an expert on fine grasses. Previous to 15 years ago he maintained a home on the bluffs of the Mississippi River, this home being bought by the City of St. Louis and is now used as a City Park, being the terminus of Kingshighway boulevard Southeast, which runs from the Northernmost part of St. Louis in a semicircle to the Southeastern section.

His business was incorporated just recently, he being elected President, A. J. Barnidge Vice-President, and F. J. Barnidge Secretary-Treasurer and it will no doubt be continued under the same name in the future. Louis, shows that the volume of this trading upon the St. Louis market is very much below that at any of the other markets, notwithstanding the fact that our rates are as low as, or lower than, any contract market, being considerably below the rate of the largest market. The rate for a member is \$3.75; non-member, \$7.50; trading member, \$2.00 per five thousand and bushel trade.

Wheat receipts at St. Louis have been stimulated by the drawing power of the Barge Line, so there is a greater volume of wheat available at this market to serve as a basis for futures trading. The public elevator capacity is now 5,000,000 bushels, with a prospect of addition in the near future. There has been an increase of about 70 per cent in futures trading in the last six months at St. Louis, compared with like period of 1923, indicating that this business is capable of being expanded if our members will take the proper interest and pride in the market and co-operate in every way to bring about that result. It is for the best interest of the members to do this, because thereby the market will receive benefits on account of the cash grain frequently being shipped to the point where the futures contract was made. It has often been suggested that the large grain receipts at Chicago are stimulated by the great volume of futures trading done at that market, which attracts cash grain shipments to the market to fill futures contracts, whereas the grain could frequently be shipped to St. Louis to better advantage for the shipper at the time that it actually moves, owing to a better relative cash price being available at St. Louis at the actual time of shipment than is available at Chicago.

The Rules Committee, of which Mr. W. T. Brooking is Chairman, has embarked upon a thorough revision of the rules to bring them up to date with current practices and with legal opinions that have been rendered since they were originally printed. The Committee will have the close co-operation of Mr. Davis, our attorney.

Admitted to Membership.

Mr. Wayman McCreery Allen, Curlee, Hill & Company, St. Louis, Mo.
Mr. John E. Sherry, St. Louis, Mo.
Mr. Oliver O. Lipe, St. Louis, Mo.

L. Matthews, Sterling, Kan.; D. H. Beavers, Maryville, Mo., and T. H. Halsey, of the Holden (Mo.) Milling & Elevator Co.

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

The Gate Way Grain Company, incorporated, has opened their office in the Neil P. Anderson building, John Davitte, formerly with the Belt Hay & Storage Company as manager.

Cecil E. Munn, sales manager of the Southwest Wheat Growers' Ass'n, Enid, Okla., was a visitor in Fort Worth this week on business for his concern.

H. R. Stinnett, of Diamond Mills, Sherman, and James R. Rayford, Rayford Grain & Elevator Co., Sherman, were visitors here this week.

Young Davitte, of the Federal Commission Company, entertained the grain and mill men of Fort Worth with an oyster roast at his camp at Lake Worth Monday, with about 25 present and reported a very enjoyable occasion.

The executive committee of the Texas Grain Dealers' Association, composed of James Mytinger, Wichita Falls; Harry Kearns, Amarillo; R. H. Wagenfeuhr, New Braunfels, and J. V. Nyehous, Houston, and R. L. Cole, Krum, have been in session this week, and Fort Worth was chosen as the next meeting place for the convention to be held May 22 and 23, 1925.

Weather in Texas continues dry, and as no part of the state has as yet received any moisture, the amount of damage is being increased every day, and unless rain is received in the next two weeks, Texas will not make 20% of last year's crop. Just what extent the crop has been damaged so far has not been determined, and it is a well established fact that the wheat crop has suffered a loss of 25 to 50%, and in some sections of the state has shown a total loss, and as there is no subsoil moisture in the ground, dry winds that now prevail will soon sap what little moisture there is on top.

Some fields in north and central Texas are being plowed up for other crops, but this is rather exceptional.

Oats have also been badly damaged by the drouth, for all the winter oats were killed out by the freeze, and the spring

oats have not had sufficient moisture to properly nourish them.

It is the opinion of grain dealers of long standing that the grain production in the state faces a very dark future, and the prospects are less promising here now than in previous years.

Business the past two weeks has been materially reduced, and the volume of trading is not near so large as recently, and mills report disappointing demand for products.

Receipts of wheat have been extremely light and offers from the country almost nothing, and it has resulted in a sharp reduction in elevator stocks in Fort Worth, as some holders advise that they have completely sold out. The recent decline in the May option has found some of the millers interested in taking on wheat, and have shown a willingness to pay sharply higher premiums than have been prevailing.

Stocks of soft and mixed wheat are about exhausted, and those holding this commodity have their prices far above present working basis. It is believed that if the mills find a demand for flour they will be forced to pay a great deal higher premium for soft mixed wheat, as well as hard wheat in the near future.

Today's values basis delivered Texas Common or Texas Group 3 Points are as follows: No. 1 soft red wheat, \$1.98; No. 1 75% red, \$1.95; No. 1 dark hard, \$1.93; No. 1 hard, \$1.92.

Receipts of corn have also declined materially and consignment notices are very light. With a slight increase in the demand there is some better tone to the cash market and premiums are some higher, and today's values basis Group 1 are as follows: No. 2 white and yellow, \$1.30; No. 2 mixed, \$1.27.

Receipts of oats, as well as country offers have also been very light and demand increased, which has resulted in a wider premium over the option and more interest shown in accumulating stocks, and today No. 3 white oats are worth 10c over Chicago May or 61c, Group 1.

Milo and kaffir receipts have been light with slow country offers, and demand steady and prices have remained firm in the face of decline in other commodities,

O. T. Wilson of the Wilson Land & Grain Co., Arcade, N. Y.; W. L. Johnson of the Marshall-Hall Grain Co., St. Louis.

A special report received by the Buffalo customs department from the Royal Grain Commission of Canada has absolved the Buffalo grain inspectors from the charge of allowing inferior wheat to be shipped to England.

Operating profit of \$14,510,016 in 1924 is reported by Corn Products Co. compared with \$13,978,966 in 1923. Net income was \$10,899,296, equal after preferred dividends to \$3.61 a share on the \$25 par value common stock, against \$10,471,559, or \$17.54 a share on the \$100 par common the year before.

The Clover Leaf plant of the Arcady Farms Milling Co. discontinued business at the end of February. A. E. Yardley, vice-president, has sent in his resignation as a member of the Buffalo Flour Club, in which he has been active for some time. The Clover Leaf Milling Co. began the manufacturing of feed here about 15 years ago and became one of the largest concerns in the business, developing a general line of feed.

CINCINNATI.

George Mosbacher, Correspondent.

M. J. Bevan, Assistant Clerk of the Traffic Department of the Pennsylvania R. R., conferred with local members of the hay trade on plugging track demurrage charges this week.

W. A. Wheeler, chief in charge of the Hay, Feed and Seed Division of the Bureau of Economics, Department of Agriculture, addressed the members of the Grain and Hay Exchange on Federal Grading and Inspection of Hay.

An inactive demand, and fairly liberal receipts, which showed a tendency to further increase, weakened the corn market and prices declined 5c to 6c per bushel. Elevators absorbed most of the offerings, but a fair amount was taken by millers and alcohol manufacturers. Inquiries from feeders were better owing to the sharp advance in cattle and hogs.

Cash buyers of wheat exercised a great deal of caution in making purchases this week, and both spot and milling interests were practically out of the market on several days owing to the radical option changes. Receipts were very light and equalled the shipments to mills or about 25 cars. Prices as compared with last week were 17c to 18c lower.

A memorial fund of \$500,000 to the late Julius Fleischmann, highly esteemed Citizen of Cincinnati, to provide annual Scholarships in the American Institute of Baking at Chicago, has been proposed by the American Merchant Bakers' Association. E. L. Uffellmann, President, declared that the name of Julius Fleischmann who has done so much for the baking industry,

cold in no way be better immortalized than through a movement which eventually would encourage more young men to study the science of baking.

Total stocks of grain in Cincinnati elevators for the week ending Friday, March 6, and week previous are as follows:

	Mar. 6, 1925.	Feb. 27, 1925.
Wheat	280,733	264,189
Corn	240,620	255,329
Oats	135,136	192,763
Rye	5,888	2,633

There is an excellent demand for good sound ear corn, and heavy weight white oats for seed in this market, and early arrivals will readily bring a good premium.

PEORIA.

L. L. Eckard, Correspondent.

Oats receipts were only two cars. The market was quoted inactive, with no sales being made during the session.

Cattle prices were unchanged, while good veal calves were selling a half dollar lower than Friday's best time, with a top of \$13 down. Receipts were very light.

Hogs at local yards showed a continued advance during the past week and Saturday's prices were 15c higher, with a \$14.30 top, which was fully in line with other western markets. The bulk of the sales were from \$14@14.25. Hogs averaging from 130 to 160 pounds were quotable at \$12.50 @13.50; good light hogs sold around \$14.10. Trading was active with a good demand for receipts of around 1,000 head. Light hogs, \$13@14.10; medium, \$14@14.25; heavies, \$14.10@14.30; packers, \$13@13.25.

Corn from the northwest continues to arrive at the Peoria market in good amounts. With 70 cars Saturday, most of which was northwest corn, the market was quoted 2@4c lower, the decline caused mostly by weakness in other markets. There was a fair demand from the local industries, but the shippers were out of the market and several cars were held over. No. 4 yellow, \$1.13 local; No. 5 yellow, \$1.02@1.07; No. 6 yellow, 97c; No. 6 mixed, 97c; No. 6 white, 95c; sample corn, 85@90c.

Grain receipts and shipments at Peoria for the week ending Saturday, March 7, as compared with same week last year, as reported by secretary of the Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	14,400	26,400
Corn	833,200	316,800
Oats	147,200	368,800
Barley	32,200	28,000

Shipments—	1925.	1924.
Wheat	13,200	19,200
Corn	442,150	239,900
Oats	147,600	381,600
Barley	26,600	4,200

629,550 644,900

SIOUX CITY.

Stockholders of the Terminal Grain Corporation voted to reduce the authorized capital stock of the corporation from \$2,000,000 to \$1,000,000 at a recent meeting here.

Both receipts and shipments of grain on the Sioux City grain market during the past month showed a decrease as compared with figures for February, 1924. Grain receipts during the month just ended amounted to 514 cars and shipments totaled 359 cars. Figures were taken from the

BUFFALO.

C. P. Reid of the Marianna Sales Co., Memphis, was a recent visitor in the Buffalo feed trade.

N. L. Berry, wholesale flour and feed dealer of Providence, R. I., was a visitor to the Buffalo Corn Exchange the other day, being introduced by George P. Urban.

M. A. Donner, vice-president of the Traders' Feed & Grain Co., who looks after the company's business in northern New York, with office in Watertown, is spending several weeks at the company's office here.

Visitors to the Buffalo Corn Exchange recently included Matt Howard of the D. H. Grandin Milling Co., Jamestown, N. Y.;

A. S. Dudley, for the past year and a half secretary of the Oregon state chamber of commerce, has been elected secretary of the Stockton, Cal., chamber of Commerce at a salary of \$10,000 a year.

Operation of the seed wheat act, passed by the last session of the Oregon legislature, will be seriously hampered, if not rendered practically powerless, through interpretations which conflict with the federal farm loan board, according to the purport of advices received in Portland from the board.

According to word received by Robert E. Smith, president of the Lumbermen's Trust Co., which owns and operates the Oregon-Washington joint stock land bank, the federal farm loan board refuses to approve the waivers, which under the interpretation of the Oregon seed wheat bill are required before funds will be loaned under the state statute.

Terminal receipts, in cars, were reported by the Merchants' Exchange for the season to March 6 as follows:

monthly report of the Sioux City Grain Exchange.

Last year, receipts totaled 1,245 cars and shipments amounted to 977 cars. Practically all of the difference was in corn; wheat and oats maintaining about the same amount for both months.

James C. Mullaney, treasurer of the Sioux City Grain Exchange and a former president of that institution, was married recently to Miss Alice Cecile O'Connor. Mr. Mullaney now manages the grain business in which he and his father are partners.

A resolution was adopted to exchange the outstanding certificates of stock having a par value of \$100 for new certificates with a par value of \$50, following the recommendation of Dr. E. M. Stansbury of Vermilion, S. D., chairman of the stockholders' committee. This plan removes all objectionable accounts of the corporation and leaves the new capital stock unimpaired, at the same time carrying a \$200,000 surplus and enabling the corporation to make a cash distribution of 10 per cent on the new stock issued.

	Receipts—	Mar. 7	Week Feb. 28	Last Year

Oats: 2 white, 51½¢, basis Omaha; 3 white, 50½¢@51¢, basis Omaha.

CHICAGO.
A membership on the Board of Trade has just been sold at \$9,075 net to the buyer.

G. W. Beaven has resigned as floor manager of the grain department of J. S. Bache & Co. and is going away for a rest.

Harry H. Hunter, manager of the Milwaukee Bag Co.'s plant, a part of the new Chase Bag Co., visited the Chicago trade last week.

Harry C. Avery, who had been an active member of the Chicago Board of Trade since 1880, died at his home in Chicago after a lingering illness.

A. G. Pearson will continue the business of Pearson & Jost which partnership has been dissolved. F. A. Jost has joined the D. Rothschild Co. as secretary.

Charles D. Olson, formerly with Bartlett-Frazier Co., is now associated with the cash grain department of James E. Bennett & Co. He will assist Kenneth B. Pierce.

Fred Uhlmann, head of the Uhlmann Grain Co., Chicago and Kansas City, is en route on a merited European vacation trip with which will be combined a certain amount of business.

The Quaker Oats Co. has arranged to open an office in Nashville to handle the southeastern business of the company. The office will be in the Harry Nichol building and will be in charge of A. T. Fletcher.

The month of February showed the largest volume of trading for the past year, excepting January; 2,597,246,000 bushels, as reported by Dr. Duvel's office for the U. S. Department of Agriculture. The total yearly futures for 1924 was 17,827,070,000 bushels.

M. E. Dixon, until recently with the Fleischman Co., has returned to his former desk with Hales & Hunter Co., feed manufacturers of Chicago. He has again taken up work of a technical nature, in charge of formulas and in the promotion of the feed sales of the company.

The March issue of "Webster Methods," published by the Webster Manufacturing Co., 4500 Cortland street, Chicago, features the export elevator of the Baltimore & Ohio R. R. at Baltimore. Those not on the regular list for "Webster Methods" will be well repaid asking them for an interesting house organ which should be mailed without charge.

C. I. Rehnquist, advertising manager and sales director of the Webster Manufacturing Co., 4500 Cortland street, Chicago, spoke recently before the Engineering Advertising Ass'n of Chicago. His subject was concerning trade paper advertising for fifty years. The company started its business paper publicity in 1876 and has successfully proven its place in their merchandising program.

Reference was made here to the annual report soon after the first of the year as submitted by Dr. Duvel of the Government Chicago office. We are reminded of a feature of this report touching upon the advantages of speculation to the grain trade and the greater use of the facilities provided recommended for country grain dealers. The merit of the report and the broader

use of grain trade hedging facilities has been borne out in the past several weeks.

The Cragin plant of the Cragin Products Co. burned last Wednesday, March 4. The company has been a heavy buyer of corn for alcohol distillation. Newspaper reports bungled the matter somewhat, referring to Frank J. Delaney, a member of the Chicago Board of Trade, as still active in the business. Mr. Delaney and his associates have, however, not been in any way connected with the Cragin Products Co. since Dec. 31, 1923. The plan of the company in the continuance of this business and the possible operation of their alcohol distilling plant has not been announced.

The insurance companies interested in the loss of the 100,000 bushels or more of corn in the Cragin elevator fire of March 4 at Chicago, Ill., have given the handling of the salvage of this grain to Frank J. Delany, Chicago, Ill. Jack Whiteside, well experienced as to the handling of salvage grain from burnt elevator losses, will superintend the job.

Trade Opinion.

Liquidation in wheat has been severe and general and the decline has no doubt built up a heavy short interest. Buyers' confidence has been shaken, but we believe on the appearance of any further export business prices will show sharp advances based on oversold conditions if nothing else. Liquidation has been rather thorough in corn and the market is pretty well evened up while the oats news continues just about as it has for weeks past.—Bartlett-Frazier Co.

The speculative wheat market was evidently over-bought for with liquidation prices declined sharply with weak rallies now and then. We are still on an export basis and Liverpool is an important factor in our market. Our estimate indicates that the United States had on March 1 approximately 100,000,000 bushels available for export and carryover; that is, above domestic requirements from March 1 to July 1. The chief depressing influence in the corn market was the weakness of the spot market for low grade corn.—Clement, Curtis & Co.

U. S. hard winter is now quoted 5c cheaper than Argentina, as against 5c over a few days ago. A large percentage of the arrivals seem to be consignments and in consequence an increase in the trade. Trade in corn was smaller in volume and the action of the market was mainly due to operations by local professionals who were influenced largely by the erratic changes in wheat.—Pope & Eckhardt Co.

While the technical position of the market has been bettered by the savage break of the past two days, we would be very cautious in making purchases of wheat and those only on sharp declines, which attitude will, we believe, be profitable for a few days. At the moment we feel friendly to corn on good setbacks, believing that ultimately the cash situation will better itself. There is little strength to the oats situation and we would take a trading position entirely. Export sales of rye were reported, but no figures given, which is irritating to those who are awaiting real export business to be a factor in advancing the price of this grain.—J. J. Badenoch Co.

News of the Country Grain Trade

ARKANSAS.

Pine Bluff, Ark.—At the annual meeting of the Riley Feed Manufacturing Co. all officers and directors were re-elected. Leo Andrews is president.

CANADA.

Vancouver, B. C.—The Stevens Grain Co. of Winnipeg has opened an office here.

Vancouver, B. C.—The McMillan Grain Co. of Winnipeg now has a branch office here.

Ft. William, Ont.—The Northwestern Elevator Co. has ordered a large Hess drier for its new elevator, being built by the Barnett-McQueen Construction Co.

COLORADO.

Wray, Colo.—The Colorado Wheat Growers Ass'n has formed eight locals in various parts of the state to look after matters where they are organized.

Table Rock, Colo.—The executive committee of the El Paso Seed Ass'n, of which D. B. Campbell is chairman, met to discuss the work of the coming year.

DELAWARE.

Wilmington, Del.—The Reist Seed Co. has been incorporated with a capital of \$100,000.

IDAHO.

Post Falls, Ida.—H. H. Eisenhauer will represent the mill and feed men in their protest against the raising of rates on wheat, corn, oats and by-products 2½ cents per pound from Coeur d'Alene to the coast.

ILLINOIS.

Jonesboro, Ill.—Fire totally destroyed the mill of James I. Choate on March 4.

Anna, Ill.—L. F. Bliss has opened the Farmers & Truckers Seed & Supply Co.

Henry, Ill.—The following directors were elected at a meeting of the McNabb Grain Co.: W. L. Bumgarner, L. B. King and Ernest Hableib.

Illinoi, Ill.—Smith & Hobart and Len Temple are the new owners of the elevator formerly operated by the Kankakee Valley Grain Co.

Catlin, Ill.—F. R. Lloyd has been elected president of the Catlin Grain Co. and C. W. Wherry, secretary-treasurer. W. L. Jackson is manager.

Somonauk, Ill.—At a meeting of the stockholders of the Farmers Elevator Co. the old officers were re-elected and a dividend of \$6 per share was announced.

Chester, Ill.—The Ellis Grove Milling Co. will move the office to Chester in the near future and will operate under the name of the Chester Milling Co., managed by John Neuling.

Voorhies, Ill.—The Voorhies Co-op. Elevator Co. will install an electric motor and transmission equipment at a cost of \$1,000 for running machinery and also for lighting purposes.

Stonington, Ill.—Officers were elected by the stockholders of the Farmers Grain Co. as follows: Henry Gebhart, president; E. A. Ponting, secretary. Directors: Henry Gebhart, E. A. Ponting and Mr. Bottrell.

Arlington, Ill.—At a meeting of the Fitchmoor Elevator Co. the following officers were elected: Leo Flaherty, president; James Boyland, secretary and treasurer. A 10 per cent dividend was declared. Joe Kliebel was retained as manager.

Essex, Ill.—The Essex Farmers Co-op. Elevator Co. has incorporated with a capital of \$5,000 to deal in coal, grain, lumber and farm products. Incorporators: Orland Hoffman, Thomas Calahan, Fred Palmer, Harry Beade, Louis Palazzine, James J. Mulligan, Wm. Schwartz.

INDIANA.

Gary, Ind.—The I. Fisher Co. of Whiting is erecting a \$75,000 mill and warehouse.

Onward, Ind.—Mr. Neiss is the manager of the Onward elevator. Mr. Cripe will manage the South elevator at Peru.

Oaktown, Ind.—Fire of undetermined origin destroyed the Roy Clodfelter grain elevator with an estimated loss of \$30,000.

New Paris, Ind.—Messrs. John Bainter, Jacob Martin and D. W. Weybright have purchased the feed and coal business of the Farmers Co-op. Ass'n.

IOWA.

Spencer, Ia.—M. E. DeWolfe was recently appointed receiver for the DeWolfe Grain Co.

Council Bluffs, Ia.—The Rock Island elevator is enlarging their elevator by an 800,000-bu. annex.

Bedford, Ia.—William Wells, Hopkins, will succeed George Reece as manager of the Farmers Union Elevator Co.

LeMars, Ia.—At the organization of the Plymouth County Co-op. Elevator Ass'n, P. R. Held of Hinton was elected president; G. A. Null of Remsen, vice-president; Nick Luken, Jr., of LeMars, secretary-treasurer.

KANSAS.

Norwich, Kans.—The Red Star Milling Co., of which Loren Gillette is superintendent, will be closed until early summer.

Sylvia, Kans.—A deal was closed recently by which Andrew Senmel of Deerfield contracted to purchase the Sylvia flour mills.

Salina, Kans.—E. J. Smiley, secretary of the Kansas Grain Dealers Ass'n, is planning a district meeting of the association some time in June.

Hutchinson, Kans.—Officers of the Farmers Co-op. Grain Dealers Ass'n were elected as follows: J. B. Brown, Larned, re-elected president; M. H. Rice, Delphos, elected vice-president; R. E. Lawrence, Hutchinson, re-elected secretary.

KENTUCKY.

Ewing, Ky.—T. J. Miller has purchased the mill and feed business of W. F. Lukins.

Providence, Ky.—A new mill to replace the one destroyed by fire will be built by G. F. Kuntz, Jas. Thornsberry and Joe Tapp.

Covington, Ky.—The Market Gardeners' Seed Co. has purchased the northwest corner of Court street and St. Clair alley for \$50,000.

Covington, Ky.—The Licking Valley Milling Co. of Boyd is asking judgment of \$12,000 in a suit against the Aetna Insurance Co. of Connecticut, following the refusal of the insurance company to honor a request of payment for the cost of the mill which was completely destroyed by fire in June. According to the petition, the plaintiff insured its mill with the Aetna Insurance Co. but was never given a copy of the policy.

MICHIGAN.

McBain, Mich.—Fire slightly damaged the potato warehouse of the McBain Grain Co.

Edwardsburg, Mich.—A government license under the Warehouse Act has been granted the Carpenter Grain Co.

Lum, Mich.—At public auction recently, Daniel Merrill of Marietta bid \$1,188.23 for the Lum Exchange elevator. The property was owned by the Port Huron Grain Co.

MINNESOTA.

Biscay, Minn.—F. A. Bendas has purchased the Biscay Flour Mill, now idle.

Bird Island, Minn.—Fire destroyed the Knutson elevator but it was not in use at the time.

Buffalo, Minn.—The General Milling Co.'s elevator was damaged by fire, causing a loss of \$90,000.

Faribault, Minn.—J. T. Coughlin now manages the Farmers Elevator Co. and the Farmers Fuel Co., recently consolidated.

Preston, Minn.—A number of the county's leading crop growers have organized the Fillmore County Crop Improvement Ass'n for the purpose of securing more seed for the county.

MISSOURI.

Boonville, Mo.—W. A. Renken succeeds Earl Ras as manager of the Farmers Elevator.

Edina, Mo.—M. M. Brees has purchased the building and equipment of the Marble Milling Co.

Farmington, Mo.—The St. Francois Co. recently purchased the feed store of Burlbaw & Graham.

Mexico, Mo.—Difficulties in financing caused the closing of the Producers Grain Co. on March 1.

Granby, Mo.—The Farmers Exchange custom mill, owned and managed by Ray Mathis, opened for business recently.

Louisiana, Mo.—The following directors were re-elected at the meeting of the stockholders of the Louisiana Elevator Co.: Oran Smith and T. X. Mackey.

Monroe City, Mo.—The Farmers Elevator & Exchange Co. will soon start a sweet cream station and collect cream from the farmers of this part of Monroe county.

MONTANA.

Moore, Mont.—The division of grain standards of the state department of agriculture is paying the amounts due the farmers who hold claims against the Moore Farmers Elevator which failed Dec. 13,

1922, following the culmination of litigation in which the state was successful.

Coffee Creek, Mont.—Fire destroyed the Gallatin Valley elevator at a loss of \$20,000, including nearly 6,000 bushels of wheat; not insured.

NEBRASKA.

Sutton, Neb.—J. N. Bird and D. J. Krabel were re-elected directors at the annual meeting of the stockholders of the Farmers Elevator Co.

Kenesaw, Neb.—The Kenesaw Grain & Implement Co., managed by L. M. Robinson, has opened for business at the old Whitely Milling Co. location. They carry a complete line of John Deere implements in the machine department and expect to open the elevator soon.

OHIO.

Portsmouth, O.—Coburn Bros. Milling Co. has purchased the feed business of Herr Bros.

Lebanon, O.—J. F. Decker has taken over the duties of manager of the Lebanon Farmers Co-op. Co. mill.

Rosewood, O.—The grain elevator was purchased by J. M. Adlard, Piqua, proprietor of a chain of grain elevators in western Ohio, at receiver's sale for \$7,200.

Findlay, O.—Officers of the Ohio Hay Sales Ass'n are: W. A. Beutler of Ottawa, president, and C. H. Stateler, manager. Among those in the company are J. C. Bright, W. S. Wallen, C. M. Wiseley and J. J. Herman of Vanlue.

OKLAHOMA.

Mangum, Okla.—The Mangum Milling Co. plant was severely damaged by fire on March 3.

Fairland, Okla.—The Fairland cereal and feed mill has started the manufacture of its products.

Mulhall, Okla.—The Farmers Co-op. Elevator Co., whose elevator burned recently, will discontinue business.

Broken Bow, Okla.—The Wooten Feed Co. of Idabel has opened a wholesale and retail feed and flour business.

Tonkawa, Okla.—The Kay and Noble counties district of the Oklahoma Wheat Growers Ass'n will hold its annual meeting March 28.

Frederick, Okla.—A company will be organized to operate the Billingslea elevator which was recently purchased by Carl Cassidy and Leo Potishman.

PENNSYLVANIA.

Lancaster, Pa.—The Lapark Seed & Plant Co. has been purchased at a receiver's sale by Guy C. Eaby of Paradise for \$80,000, who will not continue the business but will sell the machinery and buildings.

TENNESSEE.

Mountain City, Tenn.—W. W. Hawkins has purchased the Mountain City roller mill property.

Nashville, Tenn.—The John A. Tyner & Son grain elevator was destroyed by fire on March 1, causing a \$160,000 loss.

Brownsville, Tenn.—A three-story brick building belonging to the Brownsville Rolling Mill Co. was completely destroyed by fire.

TEXAS.

Dallas, Tex.—Louis Sonnentheil and John C. Sanderson have established Sonnentheil & Co., doing a grain brokerage business.

San Antonio, Tex.—Five thousand bales of hay and a hay barn of the Pecos Feed Store were destroyed by fire, causing a loss of \$4,000.

Lorenzo, Tex.—The Setzler Mill & Grain Co. has chartered with \$60,000 capital by

Simonds-Shields-Lonsdale Grain Co.

QUALITY and SERVICE

Kansas City, Missouri

Mrs. Maud Setzler, W. R. Setzler, Jr., and W. R. Setzler.

Amarillo, Tex.—W. F. Craddock, formerly sales manager for the Grain Sorghum Growers Ass'n of Texas, will soon engage in the grain and elevator business in Amarillo.

Hillsboro, Tex.—Fire of unknown origin destroyed a small corn warehouse belonging to W. V. Blasina game causing a loss of about \$150 for feedstuff and the building, worth around four and five hundred dollars.

UTAH.

Oasis, Utah.—The National Alfalfa Seed Growers Ass'n has filed articles of incorporation with the secretary of state: Officers: Dudley D. Crafts, Deseret, president; Milton Moody, Hinkley, vice-president; A. I. Tibbotts, Hinkley, secretary-treasurer.

WASHINGTON.

Annapolis, Wash.—The Annapolis Feed Store, a branch of the Central Feed Wharf, is now managed by Carl Okholm.

Yakima, Wash.—A. M. Stewart, who produces flour from grain grown in the valley, has asked directors of the commercial club to indorse the increasing of his capitalization at \$30,000.

WISCONSIN.

Waupun, Wis.—Leonard J. Keefe will conduct a commission business, handling grain and seeds.

THE BAKERY COMBINE.

The milling papers particularly have given deserved attention to the present project to consolidate the bakeries of the country in a huge combine. The Journal of Commerce of New York, a recognized authority on affairs generally, has this to say on the proposition:

"News that a long heralded bakery combination has been formed and that it has begun to offer 'securities' to investors deserves some attention from our public authorities. It is rumored that the Federal Trade Commission is already turning its studies in this direction and it is to be hoped that they will be considerably more effective than they have been in the past. Indeed it seems a strange thing that combinations whose hold upon the community is found in their ability to fix the price of an essential staple should be allowed to reach the point at which they take definite form with issues of stocks and bonds designed to stereotype the results of their price control."

"To attack combinations that have already been suffered to grow up in every practical phase and to fix their hold upon the consumer, then to attack them only after their securities have passed into the hands of innocent holders, is, perhaps, locking the door after the horse and his harness have disappeared. The public at large has its own remedy, however, in the natural instinct of the investing community to protect itself against plans that would make it a party to mergers of this particular type. The average investor must be well aware that combinations to establish, or to profit from, the price of food have never been popular. Whatever may be the temporary attractiveness of an investment which advertises itself as depending upon the fact that a certain product is a necessity and must be had, there is always an imminent chance of loss through public refusal thus to be mulcted for dividends."

The Letter Box

The Price Current-Grain Reporter: Fall sown wheat and timothy do not appear to be damaged by the six weeks of sleet and ice on the ground during part of December and January. A large acreage of soya beans planted last spring were threshed this fall, mostly early yellows and a few Virginia and selling from \$2.25 to \$3.50 a bushel. Some oats already planted and expect enough seed corn around here to supply the local demand. Quite a little timothy seed sown during February. On account of red clover seed being high, there is some demand for sweet and alsike clover.—L. R. Lingle Seed & Feed Co., Clinton, Mo.

Price Current-Grain Reporter: You will no doubt be interested in the fact that the Fieldmen's Association of the Mill and Elevator Mutual Fire Insurance Companies is to hold its eighteenth annual convention at the Hotel Sherman, Chicago, beginning Tuesday, Mar. 10, and extending through the balance of that week.

A very interesting program has been arranged, copy of which will be sent you as soon as they are printed. However, you probably will not get it in time to be of any use to you before the meeting.

A. P. Husband, secretary of the Millers' National Federation, is to talk, and also Frank J. Delaney, a Chicago Board of Trade member.

We are very glad to extend to you an invitation for any of your representatives to attend any sessions of the meeting which they may care to. H. C. LEE, Secretary, Mill and Elevator Fieldmen's Assn.

Price Current-Grain Reporter: The growing wheat in Illinois is greening nicely on a slightly increased acreage over last year. Very little complaint of winter killing. After a few days' demonstration of real winter weather moderate spring-like days are again with us. With the exception of a few cold waves our weather man is predicting an early spring.

Good wagon roads and an advance in corn prices coming at the same time induced some selling on the part of the farmers and the receipts at terminal markets are showing the effects. Our heavy test weight Central Illinois corn is in fair demand but the abundance of light weight heavy moisture arrivals has caused the most unsatisfactory cash market conditions seen by persons long in the trade. Selling has now let up

and receipts should materially decrease after a few days. Wagon roads have again broken up and deliveries will be difficult except on the paved roads. Some tired holders have been selling oats and the movement seems to about meet the demand. The burdensome supply at primary markets keeps many from being friendly to this cheap feed. Values here: No. 4 white corn, \$109 to \$111; No. 4 yellow corn, \$109 to \$111; No. 3 white oats, 49½¢ to 50¢.—H. I. Baldwin & Co., Decatur, Ill.

Maryland in Good Shape.
The Price Current-Grain Reporter: Our wheat came through the winter in splendid shape. We had a good snow covering and the loss by winter killing has been less than 1 per cent. The outlook is for a very large crop on the largest acreage planted since 1919, there being every reason to expect the biggest crop of wheat in the East we have had since 1914.

Our farmers are very anxious to contract for their new wheat before the market declines but so far we have been unable to get any bids from our exporters for July shipment wheat at all. Our local mills seem to have ample supply of wheat to carry them through until the new crop.

Feed demand is very poor as our section had the greatest crop of hay last season that we have had for a long while. The price of hay is so low that it is not worth shipping and is practically unsalable.

Our corn crop was short but ample for local needs and amount shipped out will not be more than 20 per cent of our average surplus sales.—W. D. Roe & Son, Sudlersville, Md.

Back from the South.
The Price Current-Grain Reporter: The writer has just returned from an extended trip through the South, having gone through North Carolina, Virginia, South Carolina, Maryland and the New England states. Conditions of the hay shippers this season are not very flourishing and I find that general conditions throughout the hay and grain trade in the territory that I covered, are very satisfactory. This, of course, is due to the very large crop of hay in all producing sections, but just why the grain dealers complain, I am not able to judge, inasmuch as we are not grain shippers. However, they all have a sad story to tell.—The Dellinger & Sons Co., Bloomville, O., L. A. Dellinger.

A Kansas Crop Report.
The Price Current-Grain Reporter: The wheat prospects in this part of Kansas are not very good as wheat did not come up last fall on account of dry weather. The farmers are very much discouraged over the prospects.

There is an abundance of small grain seeds and mostly of pretty good quality. If wheat is a failure, there will be a demand for more seed corn, kafirs, millet and sorgo.

Think there is plenty home grown seed to take care of demand. More sweet clover being sowed than

ever before in this locality.—Lott & Stine, Glasco, Kans.

VISIBLE SUPPLY OF GRAIN.
Following is the visible supply of wheat, corn and oats by weeks (final 00 omitted), with comparisons:

NOTICE!

MILLS AND ELEVATORS

The U. S. Department of Agriculture recently recommended a new mixture for killing WEEVIL in grain, stating that the mixture was Non-Inflammable and Non-Explosive and could be used without injury to man—at the same time leaving NO ODOR or TASTE in the grain.

"TETRI-CIDE"

For your convenience we are placing on the market the above mixture ready for use, in 30 and 50 gallon Drums, at \$2.25 and \$1.95 per gallon respectively, F. O. B. shipping point. The drums are charged extra at \$6 each, but returnable for full credit within 90 days. Our name and trade-mark for this mixture is "TETRI-CIDE."

For a General Non-Poisonous and Non-Explosive Insecticide for killing moths and spraying for insects generally in mills and warehouses, we recommend

"S. O. S. Liquid Gas"

Frt. Allowed
55-gallon drums @ \$3.25 gallon
30-gallon drums @ \$3.50 gallon
10-gallon cans @ \$3.75 gallon
No extra charge for containers.

Clover in this vicinity has been almost a total failure and what little seed is being offered is very low grade. The trade on this has not yet opened up but we are not looking forward to any heavy sales for the reason that the high values are holding farmers from making purchases. This is about the only line that is grown in this locality. Timothy is not grown to any extent.—The M. G. Madson Seed Co., Manitowoc, Wis., C. Kunz.

Cash	3.10	3.10	3.10	3.10
March	3.10	3.10	3.10	3.10
May	3.22½	3.22½	3.22½	3.22½

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Mar. 7, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shts.	Rcts.	Shts.	Rcts.	Shts.
Week	887	1,076	373	218	428	353
Prev. wk.	548	636	344	211	387	656
1924	627	739	375	309	709	519
1924-25	32,115	21,850	8,651	5,259	14,172	14,560
1923-24	28,974	15,175	7,574	5,301	19,704	9,638
1922-23	28,983	24,595	8,459	6,921	21,121	5,303
Timothy—Quiet and unchanged. Fair country run \$5.25@5.50 per 100 lbs., good country run about \$5.50@5.75, and fancy \$6.00@6.25.						
Alfalfa Seed—Wanted. Recleaned country lots \$22.00@23.00 per 100 lbs.						
Clover Seed—Scarcity continues; values firm. Country lots, \$24.00@26.75 for 100 lbs., good \$27.50@28.50, choice \$29.00						

Field and Grass Seeds

@30.00, fancy \$31.00@32.00, and Mammoth \$27.00@32.50, according to quality.

Flax Seed—Steady. No. 1 Northwest-ern closed at \$3.06@3.11 nominal.

Alsike—Firm. Average country lots \$20.25@21.50 per 100 lbs. Fair seed \$16.25@17.25 and poor at \$11.50@13.50.

TOLEDO SEED MARKET.

TOLEDO, O., Mar. 9.—The clover trade has improved considerably the past week. Prices advanced easily with buying power very active. Prime clover is now at a substantial premium over March option and dealers appear willing to pay up for it if the purity is high. Deliveries were of course small due to the price for cash. Old prime clover was a favorite with many buyers. Domestic seed is scarcer than hen's teeth as the old saying goes and the few lots available are being held for top prices. Foreign clover continues to arrive and it looks like it would be wanted in many quarters from the inquiries received by dealers here. Off-grade lots are bringing fancy prices, at least those that can be cleaned to prime. The future trend of the clover market depends entirely upon the cash trade during the next six or eight weeks. Should the spring be late the trade might extend until well into April or the first of May. Seedsmen here are optimistic and are ready to handle a large volume of business. Foreign advices state that seaboard exporters are asking prices above this market for their clover and this is taken as a fair indication of the feeling prevailing. October seed awaits the influence of crop reports to cause more activity in trading. This option always offers many opportunities to shrewd investors as the road to harvest is a long one and full of pitfalls for the uninitiated.

Alsike and timothy are stronger along with the clover advance and deliveries on March contracts were very heavy the past week. These seeds have not received much attention for some time and are about due to start some fireworks. Of course the stocks everywhere are heavy and this is against any great advance but the dullness that has been taken for granted may receive new life from a peppy spring trade. Receipts and shipments of both were light this week.

KANSAS CITY SEED MARKET.

KANSAS CITY, March 7.—The advent of the first spring month enlivened trade in seeds, as was expected by dealers. On the low price basis recently established there was a wider call for germinating qualities of cane seed, but the feed-mixing demand was slow, owing to a declining tendency in kafir and milo. Shippers reported carlot inquiries from Baltimore, St. Louis, Louisville and Omaha for seed. Southern orders comprised the larger end of the demand, as sowing for forage is going on. Receipts here continued liberal, with red top predominating. Prices in the open mar-

ket were as follows, per cwt.: Red top and black amber, \$1.40@1.45; orange, \$1.40@1.50. Resellers asked 40@50c more for carlots and quotations were still higher on small lots.

Millet receipts were very light, as they have been for many weeks. The market was firm, with a fair demand. On the incoming basis carlots were quoted as follows: German, \$3.50@4.00; common, \$2.50@3.00; Siberian, \$2.30@2.50; hog, \$2@2.25.

Buyers of sudan seed remained indifferent and country holders shipped lightly. The planting period for this seed is some time ahead. It is believed that supplies will be plentiful. Kansas City houses are selling at \$5.50@6 per cwt.

Small stocks of red clover seed have been well taken in the last month and the distribution is still going on. Farmers in Missouri are the best buyers. Seed is selling, according to quality, at \$20@34 per cwt. Demand for sweet clover seed is fairly active. This seed is quoted at \$9@15. Timothy is slow, selling at \$6@7. Trade in alfalfa seed is active, with indications of a big increase in acreage, especially in Kansas, the great hay state. Alfalfa seed is quoted by Kansas City dealers at \$15@23. Satisfaction is expressed over the blue grass seed demand. Prices are \$17@28. Cow peas are quoted unchanged, at \$4@5 per bushel, with little buying, as the season for planting comes later. Houses are bidding \$1.65 to \$2.75 a bushel for soy beans, but receipts are light.

DULUTH FLAXSEED MARKET.

Duluth, March 7.—Flaxseed market came under severe selling pressure during the last week, and prices receded sharply. Weakness developed right at the beginning of the week, and it became progressive in sympathy with the course of the wheat market. On the net result of the six days' trading, spot and March seed sold 17½ cents off, and the other futures from 16½ to 17½ cents off.

Receipts were on the straggling order, aggregating only 16,029 bushels and with shipments of 35,762 bushels, stocks of 637,000 bushels were left in the elevators.

Sentiment in the seed market was bearishly affected by the large quantities in store and in sight. Operators had it that 1,750,000 bus. of domestic flaxseed are being held afloat in the East, while stocks at the Canadian Head of the Lakes and in country elevators over their West figure up at more than 4,500,000 bushels. In addition to that, it is estimated that more than 1,000,000 bushels of Canadian seed is lying under the snow waiting to be threshed. A further block in bullish aspirations was furnished in an intimation to the effect that the examiner of the Interstate Commerce Commission had recommended that a cut of 5c a gallon be made in the import duty on linseed oil. Crushers claimed that if such duty reduction were made effective it would be in line to

make a corresponding cut in the present 40-cent duty on flaxseed. Taking everything into account it is feared in trade circles that plans for increasing the production of flaxseed in this country will be badly upset unless the situation is straightened out without delay. Crushers contend that provided no change is made in the rate of import duty on linseed oil, there would be every prospect of the acreage seeded to flax over the Northwest in 1925 being sufficient to take care of the season's estimated requirements of 40,000,000 bushels. In the meantime the trade is awaiting developments.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and the same period last year were:

Seeds and Seed Corn in North Dakota.
The Price Current-Grain Reporter: Stocks of re-cleaned and scarified sweet clover in wholesalers' hands in this territory are quite small, and with the active demand for this produce, occasioned by the high price of red clover, we would not be surprised to see an advance in price a little later when seed starts moving more freely. There is still quite a little sweet clover in the country, but in all probability it will not be re-cleaned and available for this season's demands.

The small red clover crop which was produced in our territory this year was of excellent quality and most of it has been moving at fancy premium prices. However, stocks are practically all cleaned up now and what is left will be practically all needed for local consumption.

There is still some timothy available in the country, but holders are not willing to sell at present prices, so what is left will probably be carried over until next fall.

The outstanding situation that is receiving more attention than anything else is the seed corn problem. A much larger number of farmers picked corn last fall than usual, thinking to save it for seed, but in our opinion there is a very small percentage of this corn which was picked and saved in this way that will be fit for seed purposes this spring. When farmers begin testing this corn they will find it shows a low germination and is not suitable for seed purposes, which will cause a rush for seed corn just before planting time. We feel perfectly confident that available stocks of seed corn showing a high germination will be entirely exhausted before planting time arrives, and we are doing everything we can to urge our customers to cover their requirements while suitable stocks are available.—*Magill & Company, Fargo, N. Dak., by W. H. Magill, Vice President.*

H. J. Boyd, whose new business was recently announced in this column at 526 W. 18th St., Chicago, has this to say about the present seed situation—timothy enjoys a better tone because we have several month's trade ahead of us and values are sound. Other seeds are "draggy," running into the spring trade.

WHEAT THROUGH GALVESTON.

Shipments of wheat through the port of Galveston during February amounted to 977,684 bushels and the total since July 1, 1924, amounted to 30,089,684 against a total of 5,105,000 for the 1923-4 season.

Arbitration Decisions

COURT DECISIONS.

Threshing engine should be equipped with spark arrester if practicable; whether use of spark arrester is practicable is question for jury: Ordinarily one operating a steam threshing engine liable to omit sparks should first equip such engine with a proper spark arrester, when its use is practicable. Whether such use is practicable is a question of fact for the jury.

Findings of properly instructed jury not disturbed unless clearly wrong: Findings of a jury on disputed questions of fact, under proper instructions, will not be disturbed unless clearly wrong. (Sup. Ct. Neb. Dec. 29, 1924, N. W. Rep. 201-642).

Employer failing to comply with Compensation Act liable to injured employee without regard to fault: Following *Fahler vs. City of Minot* (N. D.) 194 N. W. 695, it is held that the Workmen's Compensation Act (chapter 162, Laws 1919) substitutes the principle of compensation for that of liability for fault, and that an injured employee, who sustains injuries in the course of an employment covered by the act, is in all cases entitled to compensation for the damages suffered. In case the employer has complied with the Workmen's Compensation Act, and paid the required premiums, the employer is relieved of liability, and the employee is entitled to be compensated out of the Workmen's Compensation Fund; but, in case the employer has failed to comply with the Workmen's Compensation Act, he is liable to such injured employee for the damages so sustained, without regard to fault.

Remedies against employer failing to comply with Compensation Act stated: Under section 11 of the Workmen's Compensation Act, an employee who sustains injuries compensable under such act, and whose employer has failed to comply therewith, is afforded one of two remedies: (1) He may maintain a civil action against his employer for the damages suffered; or (2) he may in lieu of such action apply to the Workmen's Compensation Bureau for compensation under the act. In case the latter remedy is pursued the Workmen's Compensation Bureau is required to proceed in like manner, as in other claims before the bureau. In other words, the bureau proceeds to determine the question of liability in precisely the same manner as though the employer had complied with the act, and the claim of the injured employee was made against the Workmen's Compensation Fund.

Noncomplying employer, in action to enforce award of Compensation Bureau, may show employee's injuries not within Compensation Act: The award of the Workmen's Compensation Bureau against a noncomplying employer is not final or conclusive upon the fundamental or jurisdictional questions involved in the award; but such questions are subject to judicial review, and, in an action to enforce the award, the defendant employer may assert as a defense any fact tending to show that the alleged injuries for which the award was made were not subject to the operation of the Workmen's Compensation Act, and hence that the claim was not within the jurisdiction of the Compensation Bureau.

In action to enforce award noncomplying employer entitled to jury trial on

RECORD FLAX CROP NOT ENOUGH

Despite a record breaking crop of 30,000,000 bus. of flaxseed in the United States this year, import requirements will run around 7,500,000 bus., provided consumption of flaxseed during the year beginning July 1, 1924, is equal to the average for the past two years, according to the Department of Agriculture. The world supply of flaxseed of the past year promises to exceed that of any previous year in history. Total production in 31 countries for which figures have been compiled is estimated at 132,867,000 bus., as compared with 124,732,000 bus. in 1923.

The Missouri Pacific R. R. elevator at Kansas City is placing equipment and machinery orders for grain driers and other requirements. Chief Engineer Hadley, of the main office in St. Louis, is in charge of this work.

Feedstuffs

Floyd Henley of St. Joe is installing a feed mill in connection with his cotton gin at Marshall, Ark.

The Ohio Dairy Co., of Lima, O., dried milk manufacturer, is the latest applicant for membership to the American Feed Manufacturers' Ass'n.

L. F. Brown, Sec'y of the American Feed Manufacturers' Ass'n, spent a little time recently in Topeka, Kans., and other Eastern feed markets.

M. E. Dixon, until recently with the Fleischmann Co., has returned to his former desk with Hales & Hunter Co., feed manufacturers of Chicago. He has taken up again work of a technical nature, in charge of formulas and in the promotion of the feed sales of the company.

The Buffalo and East St. Louis feed mills of the Arcady Farms Milling Co. are reported closed. Dull business in the dairy feed line is largely accounted as the reason. Harry Ohlendorf is now managing the North Kansas City plant of the Arcady Co., having been transferred from the St. Louis plant.

Mr. George Bailey of the E. W. Bailey Co., who spends his time between their Chicago office and their Montpelier, Vt., office, is leaving for a brief trip to the East in the interest of his own business. Mr. Bailey is very well known among the grain commission men of Chicago.

B. T. Manard, Chairman of the Entertainment Committee for New Orleans in connection with the American Feed Manufacturers' annual convention, May 7-9, is making fine progress. Local talent and outside celebrities have been arranged for the program and those who have experienced the hospitality of New Orleans need no particular assurance along this line that their convention days will be most enjoyable.

J. H. Bergman, formerly of Minneapolis, and president of the Bergman Mill Feeds, Inc., of Minneapolis, was a Chicago visitor over the week end, having motored from Clinton, Ia., to Chicago. Mr. Bergman is now residing in Clinton looking after his interests which are invested with the Hawkeye Feed, Inc., of Clinton, Ia. He is favorably known to the feed trade, particularly identifying himself with the linseed oil meal business and is a large operator.

MEMPHIS, TENN.—The meal market continues quiet. Present prices are lowest of season and should be attractive to feeders of stock. The next decided change in prices should be upward rather than downward. The new crop is getting a poor start in the west on account of drought. The large crop just matured was due to the big increase in the size of this crop in the west, but conditions last year were far more favorable than they are at this time. The winter rainfall last year was several times over what it has been this winter to date.—F. W. Brode Corporation, J. L. Brode, Vice-President.

The demand for mill feed has dropped off considerably in the past two weeks, both in a local way and in the carlot trade, but we are of the opinion that the price on feed will come back, as it usually does in March and April, as mills are not running very strong over the country.—Loughry Bros. Milling & Grain Co., Monticello, Ind., by C. Loughry, Pres.

From prevailing prices and lack of demand the present market is pretty well demoralized. The prices of all by-products are completely out of line with per-ton basis of raw grains.

This week we noticed where Hominy Feed sold at St. Louis on basis of \$6.00 per ton less Whole Corn. This certainly isn't a condition that should exist, as hominy feed is far better feed for animals than whole corn.

The low price of by-products may be due to the tremendous big forage crop that was harvested last year and which has not as yet been consumed. Also this year there has not been the quantity of live stock fed for fattening purposes.

At the present time it is almost impossible to tell what the future will bring forth.—Kellogg Sales Company, Davenport, Iowa, by R. S. Ulmet.

OIL MEAL MARKET.

The oil meal market has ruled about unchanged, mills holding their prices about the same level as last week. Demand has been a little better on oil meal than on wheatfeeds but relatively little demand has been needed to maintain the present prices because the mills are pretty well sold up. Some mills claim to have sold their entire March production.

Oil meal prices throughout the country are just about the same as in Chicago. While Minneapolis is a little higher than Chicago basis, Toledo, Buffalo, and Edgewater, N. J., are at about the same price as Chicago. This makes the oil meal market purely a sectional condition and the conditions prevailing in various markets at the present time have little influence on one another.

While shipments are now slow fine ground meal cannot be shipped out in any great hurry. On the other hand pea size meal is really tight and it is difficult to get straight cars of pea size for shipment faster than two weeks away. A dollar a ton premium is generally asked by western mills for pea size meal.—The Bertley Bulletin, Chicago, Mar. 7.

SPECIAL BARGE FOR SCREENINGS

Vancouver, B. C., will ship a large part of the screenings from local elevators to Puget Sound ports in a specially constructed barge. The barge, which has a screenings carrying capacity of 600 tons, is the W. T. and B. No. 30, owned and operated by the British Pacific Exporters. It is a wooden vessel 153 ft. long and 50 ft. wide, fitted with a scoop conveyor and an unloading system similar to a real elevator, and will be regularly on the run, carrying screenings exclusively.

COTTON SEED MEAL.

KANSAS CITY, March 7—Though the market is scheduled for improvement in March, trade in cotton seed meal and cake during the initial week was not satisfactory to Kansas City dealers. Demand improved a little, but it was far from brisk. There were free offerings from Oklahoma and Arkansas. Texas showed no anxiety to ship northward, probably because of the recent revival of export interest. The Texas mill price was unchanged, at \$35.50 per ton. Oklahoma offered meal at \$36.50, or about 25c lower than a week ago. The Arkansas price also fell about 25c to \$35@36.50, according to freight rate points. The Kansas City quotation on carlots was reduced 30c a ton, to \$41.80. Ton lots were held \$4 higher than carlots.

The market for linseed meal broke and turned up during the week. On the decline there was a continuation of the buying that developed a week ago, but demand later was checked.

Mills in Minneapolis asked \$43.50 a ton, or 50c higher than a week ago. Chicago mills offered to sell at \$42.50. Resellers quoted \$42.50 and \$42. Dealers in Kansas City raised their prices 80c on carlots to \$46.80, and sold ton lots at \$50.80.

Tankage and meat scrap manufacturers and dealers reported small bookings, though in a position to sell their products on a relatively low basis, as compared with other feeds. They are hoping for a spurt in business before the end of March. Prices were unchanged. Tankage was quoted at \$55 a ton for carlots and \$60 for ton lots. Meat scrap sold at \$60 and \$65.

MINNEAPOLIS FLAX.

County movement for the past week was somewhat lighter and with crushing interests after the choice seed, the market was firm to strong, as compared with the futures. Cars which could run out of town were bringing higher premiums, as was the heavy dockage stuff. Many bulkheads in, instead of full cars. Local stocks tonight totalled 373,465 bus. vs. 400,377 last week and 272,000 a year ago. Spot No. 1 seed quoted today at 1c under at 4c over May and to arrive; 1c under at 3c over. Oil and meal quite weak.

WEEKLY LINSEED REVIEW.

NEW YORK, Mar. 9.—United Kingdom: The linseed situation in the United Kingdom during the past week was quiet, and prices declined in sympathy with the lower Argentine markets. However, the floating supply of seed is rather small.

Linseed oil has been inactive most of the week, but toward the close steadied owing to the small seed shipments being made from Argentine and India. The Continent has stopped offering oil temporarily.

Cotton oil closed quiet after early firmness.

India: Shipments of linseed this week amount to 272,000 bushels, compared with 188,000 bushels the week previous.

Argentine: Markets for seed have been dull with the foreign demand quieter. Clearances of linseed continue moderate. Port stocks are gradually increasing and now aggregate 3,200,000 bushels, compared with three million bushels last week and about 5,200,000 bushels at this time a year ago.

THE FEED MARKETS.

BALTIMORE.

Baltimore, Mar. 7.—The wheat feed situation is steady as quoted on spot bran and middlings, while hominy feed and gluten feed have been going at all sorts of prices under pressure to force business in these lines. Alfalfa meal unchanged. Dried beet pulp is in fair demand in a jobbing way. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$32@32.50; western middlings, per ton, 100-lb. sacks, \$33@33.50; hominy feed, per ton, \$44@45; gluten feed, per ton, \$38.75@39; alfalfa meal, per ton, \$32; dried beet pulp, per ton, \$38.

The erratic movements of wheat recently have had a tendency to check the demand for flour, and the local trade is holding off, awaiting more settled conditions. Very little business reported. Export movement of flour through the port, however, shows signs of improving, further large shipments to Russia being scheduled to go out in the near future. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, \$10@10.25; straight, \$9.75@10; hard winter patent, \$9.75@10; hard winter straight, \$9.50@9.75; winter patent, \$9.50@9.75; winter straight, \$8.75@9; rye flour, medium to white, \$7.50@9.

MILWAUKEE.

Milwaukee, Mar. 7.—The slight strengthening of prices of the previous week was not sustained in the Milwaukee market with today's closing. Winter bran advanced 50c, hominy feed \$1.50 and flour middlings and cottonseed meal were unchanged for the period. All other items were weak and declined in price. There was practically no consumptive demand

and sellers were very active. Current quotations are: Winter bran, \$26.20@26.70; spring bran, \$25@26; standard middlings, \$25@25.50; flour middlings, \$30@31; red dog, \$37@38; rye feed, \$26@27; linseed oil meal, \$42@43; cottonseed meal, \$38.50@43.50; hominy feed, \$39@40; oat feed, \$8@9; gluten feed, 30 days, \$33.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

MINNEAPOLIS.

Minneapolis, Mar. 7.—The improvement in the local millfeed market noted last week failed to continue and holders were reporting a very quiet tone in the market tonight. Mixers were not making their presence felt and neither was there any particular demand from nearby points. The interior feed dealer feels inclined to wipe out all of his existing stocks of feed before coming into the market again. With flour business in its present quiet state, and mill feeds weak, the dealer does not feel any particular anxiety regarding what may happen when flour business improves with a natural increase in the offerings of mill offal. Shipments during the week ending today totaled 11,912 tons vs. 10,503 last week and 17,217 a year ago. Season shipments: Since Jan. 1 this year, 118,917 tons; last year, 144,775 tons; since Sept. 1 this year, 364,430 tons, and last year, 415,679 tons.

DULUTH.

Duluth, Mar. 7.—Business in feeds was slow on this market during the last week. In line with the markets in wheat and coarse grains, advances extending to from 50c@\$.25 a ton were shown. Sales were light, largely owing to woods operators beginning to wind up their winter's work. Closing prices per ton follow: Bran, \$24.50; shorts, \$25.50; Boston mixed, \$35.50; red dog, \$38; flour middlings, \$31; ground oats, \$38.50; No. 1 ground feed, \$42; No. 2 ground feed, \$39.50; No. 3 ground feed, \$37.25; cracked corn, \$46.75; coarse corn meal, \$46.75.

PHILADELPHIA.

Philadelphia, Mar. 7.—The demand for feedstuffs is quiet, but offerings are moderate and there is not much change in prices. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$34@35; winter middlings, \$36@37; spring bran, Western shipment, \$32@33; standard wheat middlings, W. S., \$33@33.50; flour middlings, \$37@40; red dog, W. S., \$44.50@46.50; low grade flour, W. S., \$56@57; rye middlings, W. S., \$32@33; re-ground oats feed, \$16@17; fine yellow hominy, W. S., \$44.50@45; fine white hominy, W. S., \$45@45.50; cottonseed meal, 36% protein, W. S., \$41@41.50; cottonseed meal, 41% protein, W. S., \$43@43.50.

NEW YORK.

New York, Mar. 7.—A slightly higher selling schedule was named in Western feed, while city feed remained unchanged during the week. For the former there was a trifle more interest for March shipment, but the consuming demand for the latter continued flat. City bran was quoted at \$31.50, middlings \$32.50 and red dog \$45, while Western spring bran ruled at \$32.25, middlings \$33.25 and red dog \$46.50 per ton.

CINCINNATI.

Cincinnati, Mar. 7.—Jobbers reported the demand for mill feed as only moderately improved and that the advances quoted by mills for soft and hard bran hardly warranted a change in local values, which, however, were also increased 50c per ton. Standard middlings ruled slightly easier and soft and hard unchanged. Receipts were not large, but track supplies fully ample for the needs of the trade. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$29.50@30; hard winter wheat bran, \$29.50@30; standard middlings, \$30.50@31; soft wheat middlings, \$33.50@34; gray hard middlings, \$33.50@34; mixed feed, \$32@32.50; No. 1 alfalfa meal, \$30; hominy feed, \$43.50@44.

MEMPHIS.

Memphis, Mar. 7.—Movement of feed continues moderate and new buying very limited. Millfeed asked prices are slightly better but very little selling is reported. Gray shorts are selling around \$32 although some mills are asking \$33 to \$34. Wheat bran is quiet and steady at \$28, but sales were made during the week as low as \$27 and \$27.50. Alfalfa meal is nominal at \$28 to \$29 for No. 1 and \$25 for No. 2, with buying limited. Cotton seed meal is as low as ever and unchanged at \$33 for 36 per cent, \$35 for 41 per cent, and \$37 for 43 per cent. Hulls are unchanged at \$7.50 for loose.

BOSTON.

Boston, Mar. 7.—Prompt shipment, per ton: Spring bran, \$32.50@33; winter bran, \$33@33.50; middlings, \$33.50@40; mixed feed, \$35.50@41; red dog, \$47@47.50; gluten feed, \$40.70; gluten meal, \$48.70; hominy feed, \$47.50; stock feed, \$47; oat hulls, re-ground, \$16; cottonseed meal, \$42.25@47; linseed meal, \$45.75@46.25. Oat meal, per 90-lb. sack, rolled, \$3.50; cut and ground, \$3.85.

An Essential
Experimental feeding and the facts thus established have proved that a perfectly balanced ration must contain protein, vitamins and minerals. Tomco Calcium Carbonate Dust is now recognized by leading feed manufacturers as ideal for mixtures. It supplies the essential mineral content—it is of highest purity—it is powdered exceptionally fine and is absolutely free from moisture, being artificially dried.
Correspondence solicited.

sentative of the marketing company, and Robert Cowles of the Illinois Agriculture association.

The latter explained why the I. A. A. had persistently opposed the \$26,000,000 merger.

Twenty-five were present but only those holding privileges in the association were allowed to vote on the two questions submitted.

The first question asked an opinion against the merger, and nine voted "no."

The other question was in favor of the merger and no one committed himself.

At a meeting of the association in January, a motion to bring the questions to a vote had been tabled.

CORN GROWING IN CANADA.

Since 1915, the acreage devoted to corn in western Canada has increased 1819 per cent and the production by 3,809 per cent. It is estimated that 100,000 acres in Alberta and a similar area in Saskatchewan have been planted in corn this year, which will represent an increase of about 50 per cent over last year. In the year ending May, 1924, Canada imported for consumption 9,203,000 bus. of corn from the United States, compared with more than 10,000,000 bus. the year before and about 15,000,000 bus. in the year ending May, 1922.

GRAIN AT SUPERIOR.

Comparative statement of grain handled at Superior, Wis., during February:

	RECEIPTS.

*Including via Pacific ports this week: Wheat, 97,000 bus.; flour, 58,600 bbls.

CONSTRUCTION NEWS.

The Twin City Trading Co., Minneapolis, an auxiliary of the Albert Dickinson Co., has taken out a building permit for the erection of several steel tanks to increase its storage facilities. The permit calls for an expenditure of \$11,000.

The Kansas City office of the Allis-Chalmers Mfg. Co. has taken the following recent contracts: New bolters for the entire 1,500-bbl. capacity New Era Milling Co., Arkansas City, Kans., as well as other machinery for the plant; new bolters and other machinery for the Perry (Okla.) Mill & Elevator Co., increasing the capacity of the plant from 500 to 800 bbls. daily; equipment for a chicken feed plant for the Landa Milling Co., New Braunfels, Texas; grinding machinery for the J. E. Ransom Co.'s feed plant, Kansas City.

COLORADO POOL MEMBERS CONTINUE DISSOLUTION EFFORTS.

Further steps have been taken by dissatisfied members of the Colorado Wheat Growers' Assn. to dissolve the pool. H. S. McGillvray president of the Boulder, Colo., unit of the dissolution association and W. H. Kepner, secretary-treasurer, have been in conference with Frank Burn, representative of 600 Kit Carson County grain growers, who are trying to break away from the pool. The Boulder unit represents 200 members. It is the purpose of the dissolution organization to secure a petition calling a special meeting to vote on the question of disbanding the Colorado Wheat Growers' Assn. Under the by-laws of the pool, 600 names on the petition are sufficient to call the meeting.

STANDARD MILLING BOND ISSUE.

The \$2,500,000 bond issue of The Standard Milling Co. is being offered for sale by New York bond houses.

The proceeds of this sale will be used to retire indebtedness incurred in the construction of a new warehouse and in the purchase of the stock of the H. O. Cereal Co., as well as to increase the company's working capital.

FEEDSTUFF SITUATION.

Two phases, both strong and weak, have appeared and disappeared on the feed market within the last week; all caused more or less sentimentally by the action of grain and at the present writing with a tendency of little firmer prices and a little better feeling on the part of the buyers to buy, particularly bran, for their prompt requirements. It is conjectured by some that the grain markets have caused a very reluctant attitude on the part of feed buyers and with a continuance of this situation, there is little likelihood of selling a very large volume of feed for the balance of the present feeding season. Most buyers will buy only their urgent requirements and operate cautiously due primarily to the uncertainty of present conditions.

MINNEAPOLIS.—Bran, \$23; standard middlings, \$23; flour middlings, \$29; red dog, \$37 to \$39.

CHICAGO.—Bran, \$25.60; standard middlings, \$25.60; flour middlings, \$31.60; red dog, \$39.60 to \$41.60.

KANSAS CITY.—Bran, \$24; gray shorts, \$28.

ST. LOUIS.—Bran, \$26.40; gray shorts, \$30.40.

ALFALFA MEAL.

The supply and demand remains unchanged with a little in favor of more buyers' interest than the previous week.

Prices are slightly lower. Nominally quoted second-hand bag basis, choice, \$28; No. 1, \$26.50; No. 2, \$23. Fifty cents a ton additional in new bags. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Considerable sellers' interest for immediate shipment where instructions can be obtained. Where that is true, liberal discounts are offered. Nominally quoted immediate prompt, reground, \$7.50; unground, \$10. Approximately 50c a ton premium asked for each succeeding month.

HOMINY FEED.—Little better feeling and more buyers' interest; consequently a little firmer price. Corn mills have not obtained a price on hominy feed within the last nine or ten months anywhere in line with the intrinsic value of the corn itself; hence, any additional demand which develops and gives them an opportunity to advance prices more in line with true value is embraced immediately. Nominally quoted sack basis white, \$40.50; yellow, \$39.50. In bulk where available, \$1.50 per ton less.

LINSEED OIL MEAL.—Sentimentally, the market is a little easier and more sellers' interest than buyers' with tendencies on the part of holders to discount market prices slightly in order to move the feed. Nominally quoted sack basis, \$41 to \$42. In bulk, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With production cut down sharply, stocks are now in strong hands and prices are steady. Demand is very satisfactory and market cleaning up in good shape. Quotations are as follows: Creamery in carlots at 6½c per lb. and L. C. L. up to 7½c.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop, but with a present reduction in meal production has given the market a somewhat better tone. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$43.30.

GLUTEN FEED.—Demand is good and most of the orders received are for immediate shipment. Quotations follow: Gluten feed in bulk \$31 a ton, sacked \$33.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is better and at the lowered prices all packers' products are moving in increasing volume, last week's movement being unusually good. Prices are as follows: Meat scraps in carlots f.o.b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f.o.b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending Mar. 7 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.

MORE ALFALFA FOR KANSAS.

J. C. Mohler, secretary of the State Board of Agriculture, is making a strenuous effort to restore the leadership of Kansas as an alfalfa state. In a recent address before the Kansas Crop Improvement Association, in Manhattan, he admitted that "we are losing this legume from our fields at the rate of 49,000 acres a year. In the last decade the total decrease has been 486,000 acres. In 1915 we had 1,360,000 acres. Today we have 884,000 acres. Not long ago we were first among the states in alfalfa; now we are the third."

The decrease in the alfalfa acreage, Mr. Mohler said, was uniform over the state. It was due to the war demand for bread grains, to the collapse of the beef industry, to weather and to insects, to labor shortage, and to reduction of certain elements of the soil, as lime and phosphorus, where alfalfa has been permitted to stand too long.

"Alfalfa," he continued, "justly has been noted as a dry-weather resisting crop, and under proper management it will continue to live up to that well merited reputation. Moreover, a thrifty growth will recuperate more readily from insect depredation. We know how to grow alfalfa, and we know its value. We also know it is admirably adapted to our conditions. If we are to profit as we should by our opportunities we must plant more. The situation is changing to a point where we are going to need a great deal more alfalfa if we are going to improve our methods of farm management. Alfalfa is the most valuable crop that can be grown in Kansas."

ALFALFA MEAL MARKET.

Kansas City, March 7.—While the smaller millers and brokers complained of dullness in demand for alfalfa meal this week, the larger manufacturers maintained a cheerful attitude and said their mills were running day and night. However, the big operations were due to old contracts rather than to new bookings. Buyers for April and May are not expected to come in freely until the latter part of March. Prices on choice and No. 1 were unchanged. Owing to pressure of Colorado and Wyoming meal, the lower grades were reduced 50c to \$1 a ton. Carlots were offered as follows: Choice, \$27@28; No. 1, \$25@26; No. 2, \$21@22; No. 3, \$20.50@21.50. High-priced hay is of no consequence to the large mills, as stocks in hand are large.

Feeds of the molasses-grain-alfalfa character displayed moderate activity, with sales chiefly in horse and mule feeds. There was a fair interest in poultry feeds. A few dairy feed orders were booked. Better prices for hogs suggested expansion in the demand for swine feeds and pig meal, but this has not yet appeared. Irregular price changes were reported. The carlot quotations per ton, are: Dairy feeds, \$37@47; cattle, \$39@46; hog, \$46@52; pig, \$71; horse and mule, \$33.50@46; alfalfa-molasses, \$28@34; scratch poultry, \$51@58; wash poultry, \$50@59.

NEW ELEVATOR AT ENTERPRISE.

The Kansas Flour Mills Co. has decided to build an elevator at Enterprise, Kans. The workhouse will have a stor-

age of approximately 50,000 bushels in fifteen bins. It will be equipped with three approximately 5,000 bushel legs and with a 3,000-bus. grain cleaner, car puller, power shovel, etc., and will arrange to receive and load out on two tracks. There will be ten round storage tanks twenty feet in diameter and four large interstice bins with a total capacity of more than 200,000 bushels. Contract for making plans has been awarded and are now in progress.

These are the Fastest
Selling and Most
Profitable Feeds for

FEED DEALERS

Sugared Schumacher Feed and Boss Dairy Ration are the fastest selling and most profitable feed for feed dealers because—

1. They are **QUALITY** Feeds that exactly meet the requirements of farmers and dairymen.
2. They produce such splendid results for feeders that they always come back for more.
3. They make a **COMPLETE** dairy ration. Sugared Schumacher Feed supplies the carbohydrates and Boss Dairy Ration the protein part of the ration.
4. Sugared Schumacher Feed is an "all 'round" feed—good for hogs, horses and dairy cattle.
5. They are extensively advertised in the farm and dairy publications. These convincing advertisements send thousands of customers to the stores of dealers who handle these feeds.

If you are not handling these fast selling and profitable feeds write us today for our attractive dealer proposition.

ALFALFA HAY

ALFALFA MEAL

A. B. CAPLE, Toledo, O.

Hay Department

The National Hay Ass'n Memorial Committee has adopted memorial resolutions with respect to the death of Joseph L. Biderman, of Defiance, Ohio, and Norrington Bedall, of Cardington, Ohio.

MONDAY'S GOVERNMENT REPORT.

Stocks of hay were reported by the Government on Monday at 37,386,000 tons or 3,931,000 tons more than a year ago and the price on farms ranged from \$12.04 to \$13.60 per ton, as of Feb. 15 for past three years.

INDIANA HAY.

There is no surplus hay in this territory as the hay will all be used on farms. We think hay is too cheap and with spring close at hand and farmers getting busy on their farms we look for advanced prices. We had abundance of rainfall last spring which is necessary for a good growth of hay, hence a big crop. Should we have a dry spring we will see a short crop and higher prices. We have had too much hay of poor quality the past season. We think above reasons are the cause of poor shipping demand and can't lay it to hard times, for general business is good and plenty of money. Grain all out of our territory.—James R. Guild & Co., Medaryville, Ind.

STILL HAVE RED TOP FOR SALE.

We raised and harvested an average crop of No. 1 and No. 2 timothy hay last year which is mostly shipped out. We also have quite a lot of threshed red top hay baled for sale. Not much demand for this hay. It is better feeding hay than people think that never used it.—H. R. Hall, Sandoval, Ill.

HAY IN NEW YORK PLENTIFUL.

There is considerable hay for sale in this section. The farmers think the buyers are not paying enough. The crop

was quite heavy and damaged by rain on many farms and on others it was not cut until it was over ripe.—B. Graves & Son, Perrysburg, N. Y.

HAY PLENTIFUL IN PENNSYLVANIA.

There is a fair supply of Pennsylvania hay which is being marketed locally, some of it going to the south. The quality is fair but the grade is uneven so that it is not a very satisfactory commodity to handle.—James W. Barker, Harrisburg, Pa.

HAY IN CALIFORNIA.

The State of California has just passed through sixteen months of drought, during which time we have had to draw almost entirely on our 1923 crop of grain hay, on about 40 per cent crop of grain hay cut in 1924 and upon a normal alfalfa production for the year 1924. We have not only had to feed our dairy cattle and horses, but we have also had to feed a great many sheep and range cattle. The supply was more than sufficient, although the price was high and consumption was curtailed.

Today, in our opinion, there is a surplus of alfalfa and enough grain hay to do us until new crop. First cutting alfalfa is moving on to the market now from Yuma, Ariz., into Los Angeles and should arrive in Los Angeles in volume in about three weeks. Central California will begin to cut alfalfa in about two weeks and within thirty days we should have considerable new baled first cutting. Within sixty days our Volunteer hay will probably be baling in large volume.

We expect to have considerably more than a normal crop of grain hay this season. Our pasture lands are in excellent condition and we have more than enough grass to take care of our range cattle and sheep for the year. Conservative estimates place our alfalfa acreage at considerably more than 100,000 acres above the acreage we had in this state a year ago.

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

We expect extremely cheap prices for hay in California. On the other hand, if we fail to have our usual spring rains, the production will not be normal. One good rain the last of this month will mean a big hay crop for California. There is plenty of snow in the mountains to provide irrigation for our alfalfa districts.

Alfalfa is bringing from \$16 to \$23 on the cars in the country. Volunteer hay is worth about \$23 on the cars in the country and grain hay about \$25 a ton. Race horse red oat hay is practically unobtainable and is worth around \$30.

Our barley market is steadily declining. All feeds seem to be weak.—The Grange Company, Modesto, Cal., Arlo V. Turner, Second Vice President.

HAY MARKET REVIEW.

The hay market continued its downward trend during the week ending Mar. 7, according to the Weekly Hay Market Review of the United States Department of Agriculture. Favorable weather continued to restrict hay consumption and buyers took only for immediate needs. Offerings of top grades were light and moved without pressure but low grades were practically unsalable at most markets as buyers had plenty of fair quality hay to pick from. Timothy averaged slightly lower and alfalfa ruled barely steady with weakness in California markets offsetting strength at Kansas City. Prairie held steady.

A smaller farm consumption of hay is indicated unless the decrease in farm animals should be balanced by more liberal feeding of late pasturage this spring. There were about 2,000,000 fewer "other cattle" on farms Jan. 1, 1925, than the previous year, while the increase in the number of sheep and dairy cattle as far as hay requirements are concerned, was almost offset by the decrease in horses and mules. The 1924 crop was 6,000,000 tons larger than the 1923 production and it appears probable that more hay will be carried over this summer than the preceding year.

Timothy was dull at Boston and top grades declined 50 cents although other grades held steady. Receivers were still cutting prices to move cars. Stocks accumulated at New York and prices declined 50 cents with the market closing barely steady. The market was weaker at Philadelphia but the accumulation at Cincinnati was reduced although pressure was required to move all grades and some cars were stored to save demurrage, while others were shipped at a sacrifice. Light receipts held the Chicago market steady and even good No. 3 timothy sold readily. Southern markets took for immediate needs only and were not interested in low grades.

Good alfalfa was steady at Omaha but low grades were slow sale. Light receipts strengthened the Kansas City market where only nine cars of Wyoming alfalfa were received. Dry had sold readily but wet and damaged alfalfa was not wanted. Prices held steady in Southern markets with a fair volume of trading but California markets were weaker with the approach of pasturage.

Prairie hay was neglected at Chicago on account of the liberal offerings of tame hay at low prices. Prices recovered at Kansas City on moderate receipts and other markets held practically steady.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Difficulties arising from January shipments of stock-damaged hay have caused Kansas City dealers loss in making settlements with southern customers, and in a few cases trips to Louisiana and other states were found nec-

HAY & FEED CO. N 02 Corn Exchange Minneapolis Minn.

HAY Shippers Write for Quotations
WESTERN UPLAND ALFALFA AND TIMOTHY

essary. There has never been an experience just like the one gone through in the winter of 1925, when frozen hay defied inspectors and deceived the most competent handlers until it thawed out in a warm climate.

H. W. Dewey of Garnett, Kans., a large handler and producer of prairie hay, spent the week in Kansas City. His annual harvest of prairie is 1,000 acres. Mr. Dewey said a large quantity of good prairie hay remained in the hands of dealers and farmers.

"The Kansas City market could take care of more good alfalfa hay than it is receiving," said Stuart Brubaker after the close of Wednesday's trading, "but it is in poor shape to handle grassy, spotted and damaged qualities. The off grades should be sent in very slowly or used at home."

Alfalfa hay sold this week within about \$2 a ton of the season's top level, due to the recent let-up in receipts. Recovery of prices from the new year slump has been very gratifying, but some dealers are fearful that it will start another abnormal country movement, as farm supplies are still believed to be liberal, especially in Nebraska. However, most of the commission men say the breaking up of country roads and the activity of farmers in the fields are a safeguard against heavy receipts henceforward.

Transportation efficiency is duly appreciated by Kansas City hay dealers, but the line is drawn when railroads, in the name of better service, attempt to increase penalties on unsold hay. A few days ago the railroads gave notice of intention to charge a trackage fee of \$1 a car, effective April 1, on hay standing in the yards more than 24 hours. This is in addition to the demurrage charge of \$2 a car. Before the United States entered the war the carriers allowed 48 hours' free time for unsold hay, but in order to facilitate the movement of cars the Kansas City Hay Dealers' Association signed an agreement reducing the free time to 24 hours. This pact has remained in effect, but the present attempt of the railroads to tack on a trackage fee seems to be a violation. Any way, the hay association's directors intend to fight it. They have filed a protest with the Interstate Commerce Commission and are threatening to abrogate the entire contract with the railroads unless the carriers drop their demand.

CHICAGO HAY NOTES.

There is an excellent demand for quality hay in light two-wire bales and it is selling above quotations. Low grade hay is draggy. There is quite a demand for packing, but other kinds of prairie and marsh hay are quiet.

There is no alfalfa in the market but some demand for it and also quite a demand for rye straw.—Bridge & Leonard.

It is estimated that the amount of hay of the 1924 crop, still back in the hay producing states, runs from 50 to 85 per cent of the crop. Those having hay to market should be moving it out, at least a part of their holdings. We are sure as good and possibly better prices will be secured now than later. When the producer must have room for the new crop, we are likely to see glutted markets and much lower prices.—Albert Miller & Co.

The demand continues very good for No. 2 timothy and No. 1 timothy, also No. 1 light clover mixed. We advise shipment of good hay as same will sell readily at good prices. Packing hay is scarce and wanted, straw is steady and demand very light for western and southwestern prairie.—Van Wie & Moorhead.

of tame hay light and demand better. No. 3, and sample grades are very dull and can only be moved at very low prices. Receipts of western prairie light and demand also light. We recommend shipment of the better grades of tame hay.—Walters Brothers.

HAY MARKETS.

KANSAS CITY.

Mar. 7.—Further sharp decreases in arrivals of prairie and alfalfa this week placed the total receipts of hay on a basis that stimulated competition for supplies. Total offerings were 370 cars, as compared with 513 a week ago and 608 a year ago. Alfalfa exceeded in volume all other kinds of hay. There were 236 cars, or 59 less than for the previous week, but practically the same as for the week a year ago. Prices began to move upward on Monday and there were advances every day except Friday and Saturday. Demand for dairy qualities was active and there was not enough on sale to go around. Only the damaged hay was slow. Handlers reported a good shipping business southward and in other directions. Closing quotations were \$1@3 a ton higher, exclusive of poor No. 3, which was unchanged. The week's top price, \$30, was scored Thursday on a car of select dairy.

Real scarcity of prairie developed, owing to the falling off in receipts to 60 cars. The small movement was a reflection of recent low prices and excessive offerings. Inquiry was very good for both local and outside accounts. Prices went up in consequence and held their gain, closing 50c@1.50 higher.

Timothy comprised the bulk of other hay on the market. There were 74 cars of timothy, clover mixed and clover. Trade in these varieties was mostly slow. No price changes were recorded.

Six cars of straw were in the receipts of that commodity, but a majority had been contracted before arrival. The market was firmer than a week ago and prices advanced slightly.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$25.50@30; choice, \$22@25; No. 1, \$20@21.50; standard, \$17@19.50; No. 2, \$14@16.50; No. 3, \$9@13.50. Prairie—No. 1, \$10.50@11.50; No. 2, \$9.50@10; No. 3, \$6.50@9; packing, \$5@6. Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13. Clover—No. 1, \$13.50@15; No. 2, \$8@13. Straw—Wheat, \$7.

MILWAUKEE.

Mar. 7.—All quotations closed unchanged for the week in the purely nominal Milwaukee hay market. Current prices are: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

MINNEAPOLIS.

Mar. 7.—Local receipts of hay still light, but no particular feature to the demand. Today's quotations were as follows: Timothy—No. 1, \$18; No. 2, \$16; No. 1 clover mixed, \$15; No. 2, \$12; No. 1 upland, \$16 and No. 2, \$15; No. 1 alfalfa, \$21; standard alfalfa, \$18.50 and No. 2 alfalfa, \$14.50.

DULUTH.

Mar. 7.—Demand for hay continued light on this market during the last week and dealers could do little with lower grade arrivals. A ready market was, however, experienced for good hay and its stocks did not accumulate. Closing prices per ton are steady and unchanged as follows: Timothy—No. 1, \$15@16; No. 2, \$13@14; No. 1 mixed timothy, \$14@15; No. 2, \$11@12. Prairie, No. 1, \$15@16; No. 2, \$13@14; No. 3, \$11@12. Midland, No. 1, \$9@10; No. 2, \$8; rye straw, \$9; oat straw, \$8.50.

BALTIMORE.

Mar. 7.—Under freer receipts of hay generally the tone of the local market is somewhat easier and movement of all grades is slow. Supply therefore more than sufficient for present wants. Low grade and inferior hay is especially hard to move. Receipts of hay by motor trucks from nearby country points now supplying most wants. Straw is selling mostly in a jobbing way and there is consequently no volume to the trading in this commodity. Quotations follow: Timothy—No. 2, \$20.50@21.50; No. 3, \$17@19. Light clover mixed—No. 1, \$19.50@20. Clover mixed—No. 1, \$19@19.50; No. 2, \$17@18; No. 1 clover, \$19@19.50. Straw—No. 1—straight rye, \$18@19; No. 1 wheat, \$16@16.50; No. 1 oat, \$17@17.50.

PHILADELPHIA.

Mar. 7.—The market for baled hay and straw is dull and weak and outside quotations can be obtained only on choice stock. The lower grades drag slowly at inside figures. Offerings were moderate but the supply is fully ample for all requirements. Wheat and oat straw are dull and lower, but receipts of straight rye are small and values steadily held. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$18.50@19; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$13@15. Heavy clover mixed, \$15@16; light grass mixed, \$17@18. Straw—Straight rye, \$16@16.50; wheat, \$15@15.50; oat, \$14@14.50.

TOLEDO.

Mar. 9.—Hay is in the doldrums period between crops and the large stocks in all

quarters are a check on any upturn. Dealers are none too hopeful about the price trend and would rather await developments before giving an opinion. Farmers may bring hay to market when spring turns the corner and again they may not when they figure the prices they will get. In the meantime a conservative policy is the safest course to pursue. Receipts and shipments light. Prices the past week were as follows: No. 1 timothy \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8, f. o. b. Toledo.

LOS ANGELES.

Mar. 7.—The hay situation here is not so good as there have been heavy arrivals during the past week and with light demand has caused a considerable amount to remain on track. There has been a decline of \$2 per ton on alfalfa hay and No. 1 is now selling at \$26@27, with No. 2 at \$2 less per ton. There is a light supply of grain hay, the prices have remained firm and No. 1 barley hay is selling at \$29 and No. 1 oat hay at \$34. The indications at present are favorable for a good hay crop in all central and northern parts of the state and with rains coming this month will assure good crops in the southern part.

MEMPHIS.

Mar. 7.—Receipts of hay for the week were but 45 cars, but stocks are still large and the market very slow. Efforts were made during the week to elevate prices, but buyers refused to become interested and quotations are now near the recent lowest, although distressed offerings are not so plentiful. Quote: Timothy, No. 1, \$28; standard, \$21@21.50; No. 2, \$20; alfalfa, No. 1, \$28; standard, \$26, and No. 2, \$21.50@22.

CINCINNATI.

Mar. 7.—While the hay market was not in as badly a muddled condition as in recent weeks when liberal concessions in values were necessary to create a special movement to reduce the heavy accumulation, there was still a dull and draggy situation apparent and the offerings of ordinary and common hay just as burdensome and in as slow demand as recently. Receipts were materially smaller and desirable quality scarcer, which helped to sustain and slightly advance prices for the top grades, but the demand even for the best was limited to only an occasional car. A large percentage of the daily offerings consisted of replugged cars of the previous day, which were finally stored to save demurrage or shipped out at sacrifice prices. Low prices attracted some out of town buyers to the sales, but transactions were mostly in one and two car lots. Prices as a whole were better than a week ago, but only for top grades, with timothy and light mixed shown a decided preference. Clover and heavy mixed owing to the lateness of the season sold slowly. Timothy—No. 1, \$17.50@18; No. 2, \$16@17; No. 3, \$13@15; threshed, \$8@10; no grade, \$8@10. No. 1 heavy clover mixed, \$15@16; No. 1 light clover mixed, \$16@17. Clover mixed—No. 1, \$15@16; No. 2, \$13@14; no grade, \$10@12. Clover—No. 1, \$15@16; No. 2, \$11@14; no grade, \$8@10. Second cutting alfalfa—No. 1, \$21@23; No. 2, \$17@19. First cutting alfalfa—No. 1, \$15@16; No. 2, \$13@15. Sound sample grassy hay, \$9.50@11. Straw—Wheat, \$8.50@10; oats, \$8.50@9.50; rye, \$13@14.

NEW YORK.

Mar. 5.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons.....	1,274	82
Receipts last week	1,072	80
Receipts from Sept. 1.....	33,600	596

The market has been very weak and inactive all week. Receipts have been in excess of demand, supplies have accumulated and with trading very light values on the whole show a further decline. Toward the close, however, with rail holdings tending toward a decrease, the feeling on the better qualities of timothy is toward an improvement.

Small bales and low grade large bales show the greatest weakness. All classes of medium bales, with the possible exception of top qualities, are in extreme light demand.

Large bales of strictly No. 1 timothy and of a top No. 2 quality are in very light offering, and while the values on these grades are more or less affected by the very large assortment of low qualities, sales are being made readily at quotations. The bulk of the stock on hand consists of a very common variety, receiving secondary consideration at the hands of the buyers, the poorest of which is dragging and meeting with a very slow outlet.

Rye straw in plentiful supply, light call, moving off under difficulty around \$17.

New invoices are reported light.

Federal grade quotations for large bales: Timothy—No. 1, \$25@26; No. 2, \$22@23; No. 3, \$19@21. Light clover mixed—No. 1, \$22@23; No. 2, \$19@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$19@21; No. 2, \$17@18. Light grass mixed—No. 1, \$22@23; No. 2, \$19@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$17@18. Rye straw, \$17.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges of the Pacific Coast as of Mar. 4, are as follows:

Portland — Merchants' Exchange, noon session, Mar. 4:

	March.	April.

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs, and sheep at seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk.	227,000	640,000	280,000	1,147,000
Prv. wk.	226,000	779,000	296,000	1,301,000
1924	210,000	872,000	217,000	1,299,000
1923	209,000	873,000	272,000	1,354,000
1922	226,000	650,000	250,000	1,126,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925..	2,238,000	8,940,000	2,506,000	13,774,000
1924..	2,292,000	9,850,000	2,542,000	14,684,000
1923..	2,364,000	8,814,000	2,625,000	13,803,000
1922..	2,203,000	7,023,000	2,558,000	11,784,000

CHICAGO PROVISION REVIEW.

CHICAGO, March 9.—Higher prices for hogs with an advance to the best level in five years, \$14.30, made on Friday, with lighter receipts brought more active trading in provisions with heavy covering by shorts and larger commission house buying from the outside. Profit taking on the advance gave a moderate setback to values but closing trades were at gains on lard of 32½ to 40c, short ribs \$1.25 to \$1.30, dry salted bellies \$1.60 to \$1.65 and hogs \$1.90 as compared with a week ago.

Lard stocks showed a big increase for the month of February and are the largest at this time in recent years. Supplies of meats were ample with 141,944,000 lbs. at the first of the month, an increase of 41,000,000 bus. during February and a loss of 8,000,000 lbs. from last year.

Domestic trade in meats was fair and in lard picked up slightly. There is also

a little more export buying of the latter and prices abroad were advanced sharply. The week's shipments of lard were 6,875,000 lbs., a fair gain for the week, compared with 15,293,000 lbs. last year. Meat shipments were 14,900,000 lbs., a decrease of nearly 1,000,000 lbs. from the previous week and of almost 4,000,000 lbs. from last year. Outside packing points are shipping in lard to Chicago at an unusual rate and storage room is none too plentiful. So far there has been a materialization of the expected scarcity of hogs, which have been the basis for buying of product for some time past. Prices for the week follow:

		Close— Mar. 7, Feb. 28, Mar. 8, 1925. 1925. 1924.

"FISHING" DENIED FEDERAL TRADE COMMISSION.

One of the seaboard correspondents of
 the PRICE CURRENT-GRAIN REPORTER wires
 that the United States Supreme Court,
 Washington, on March 16th, sustained
 the decision of Judge Rose in the Dis-
 trict Court, Baltimore, on an appeal by
 the Federal Trade Commission from the
 latter's ruling in December, 1922, deny-
 ing said commission the right to inspect
 the books and private papers of a num-
 ber of export grain firms of Baltimore.
 This is in pursuance of an order passed
 by the Senate authorizing the commis-
 sion to make a study of present methods
 of handling grain for export; profits;
 price paid by ultimate foreign buyer, etc.
 Judge Rose at that time decided the
 Federal Trade Commission was without
 authority to compel private corpora-
 tions engaged in interstate and foreign
 commerce to submit their books and
 papers merely to gratify "fishing" expe-
 ditions upon which the commission
 might embark and especially where
 those firms whose papers it sought to

BUSINESS AND TRADE CONDITIONS

WE admit a keen interest in all that pertains to the paternalistic control of business by the Government, the very basis of which is wrong and the results usually bad. A series of events is now transpiring in Washington which may not be entirely circumstantial, starting with certain fundamental truths laid down in the inaugural address of the President and cropping out in the early activities of our new Secretary of Agriculture, Mr. Jardine. President Coolidge flatly contradicted the teaching of socialism and the paternalistic tendency of the Government to make the people of the country dependents and objects of its charity.

As so frequently stated here, because this subject is admittedly close to our hearts, it is the people who own the Government rather than the reverse. In applying this to matters of taxation, the President appreciates full well the frequent bad practice of governing bodies fixing rates of taxation on property which are viciously unjust.

Government in Business.

Therefore, although it is presumed that there is no direct association in the President's comments and the activities of Mr. Jardine immediately thereafter, it is only natural that they as straight thinking men should act along similar lines. It is a start in the right direction to see the Department of Agriculture pay roll reduced, procedure which will undoubtedly carry into other governmental offices as well, lopping off many useless officials and clerks. Economy in government of a sincere and worthwhile character means the reduction of political jobs and "pork-barrel" appropriations; "cleaning out the snipers," as one of our leading newspapers says.

Economic Conditions.

The course of business continues satisfactory, and the complaints registered here and there relative to the small volume of new business may be classed with the pessimism which is usually heard in some quarters when business is not at boom stages. Today we have just enough competition and industrial production a little ahead of consumption (some say that stocks are accumulating too fast). Industry must remember that all too many price and wage advances occurred in the Spring of 1923, the adjustment of which has been going on ever since. The thought is becoming firmly implanted in the minds of men that today's conditions are more nearly right for a profitable exchange of goods and services than for a long time.

In specifically considering the interests of most of our readers, there is this to be said concerning the seriously out-of-line price situation of 1920 as compared with today's farm products scale. The January 1925 price-table shows an advance of 63 per cent for farm products over the 1913 level, as compared with the advance over the entire list of the many commodities figured, averaging 60 per cent. Since January, furthermore, we have had important and rather unexpected price advances on grain and hogs so that the situation as of the middle of March is decidedly more favorable to the grain, livestock and allied trades.

The Senate's Short Session.

Each day brings up business of special interest before the short session of the Senate, stringing out what had expected to be simply a perfunctory meeting of a few days, as in times past.

It now appears that certain important treaties re-

lating to the Lausanne agreement and world court participation are up for action. It is presumed that these documents will be bitterly contested because there is admittedly much uncertainty and restlessness not only in official circles but back among the people over our foreign affairs. The hand of power in the Secretary of State's office is about to be changed and Mr. Hughes' earlier arrangements and discussions may be altered.

It may be expecting too much of a short session of the Senate to give to these important matters the

WHEAT futures in Chicago last Friday showed the largest volume of sales for future delivery of any previous single day in the history of the trade—149,398,000 bushels. During the session, May wheat sold at 43 $\frac{7}{8}$ cents lower than the previous high point of the season and May rye dropped to 60 cents under the best figure on the crop.

Of the total futures sales for Friday—256,161,000 bushels, corn reached the surprising figure of 63,285,000 bushels. Both the grand total and the corn trade are sensational items, as of the largest single day's trading and because corn showed such great activity in sympathy with wheat. The other days of the week showed a total volume for corn ranging from twenty-one to twenty-six million bushels only.

In spite of the tremendous futures volume, it is quite apparent that the market is largely controlled by developments in cash grain, both domestic and export. The visible in store and afloat does not reflect an acute shortage of wheat, and foreign purchases of moderate volume are only in evidence on the breaks and entirely absent on the bulges.

attention they deserve and the reflex of public opinion, so vitally interested as it is in domestic affairs, cannot be soured for its reaction on foreign problems. Therefore, as much as all desire an early and satisfactory adjustment of our present and future relationship with foreign powers, it seems to us unwise in the "short session" to hurriedly and without proper mature discussion settle such important administrative details.

Then, also, the guiding of the ship of state seems to be vested in one who is not biased by the Senate's action in the course he is steering. The President has kept the upper house gentry on the jump.

American Manufacturers and Foreign Financing.

It is believed by many that the financing of foreign governments in a manner similar to the recent German loan should at the same time safeguard the interests of American manufacturers and merchants in their development of foreign trade. This idea is not new, although the actual results of our failure to take such precautions, predicted at the time of the German loan, are now being experienced in keen German competition for world trade which is bobbing up as a result of the loan-funds provided. The old-time plan of long extended credit has been revived by the German export trade, sometimes as long as a full year, whereas American industries endeavor to restrict credits to ninety days or less. In Germany the banks closely co-operate with and often control

her industries, whereas in America we conduct our banks on a strictly banking basis and our industries on a merchandising basis.

A writer, unknown to us personally but using preferred position in a national medium of authority, speaking on the above subject, says this in substance: Imports, not only from Germany but from France and England showed a sharp increase during the past three months, and jobbers acquainted with foreign competition, both within and outside of the United States, comment upon its marked increase.

This subject is worthy of close attention, and as a remedy of the evil discussed, it is proposed to make part of future loan contracts a provision that the funds available therein shall be subject to a thirty-day limit upon trade loans, thus agreeing with the customary American rate of financing our own industrial exports.

Railroad Financing

The customer-ownership idea has been carried into the new railroad financing of the New York, New Haven & Hartford. A distinctly novel and yet entirely practical plan has been proposed in financing \$23,000,000 in bonds maturing next month, in which the road has asked its New England patrons to come to its assistance through subscribing for a succeeding bond issue of the above sum. This direct appeal to the people avoids the cost of an underwriting syndicate, estimated at \$2,000,000. It is thought that similar railroad financing is contemplated by some of the other carriers, no doubt along exactly the same lines which have become deservedly popular in public utility ownership.

United States—The Capitalist

There is an angle of the rapid assumption of our position as the world's capitalist which far-sighted financiers recognize. They realize full well that the fact that we are so deeply into the matter entails our continuance so that we shall not suffer large losses on foreign loan commitments already made. It is from this position that the PRICE CURRENT-GRAIN REPORTER has rather felt a more definite policy should be laid down concerning our help in the straightening out of European tangles. Can we afford to conduct the office and furnish the funds of the world's banker and remain aloof from the closely associated problems of world trade?

Those who contemplate governmental reductions of our foreign holdings are suffering a delusion, for that we shall undoubtedly find ourselves forced to increase both governmental loans and the volume of foreign securities held by our citizens is certain. However, in concerning the latter business, greater discretion will be exercised by American investors concerning the stability of such investments, and a stale condition as to the slow response from the buying public of certain foreign issues, which possibly do not deserve success, is already noted.

Related Industries.

Associated with the grain, livestock and allied markets, there is always a close relationship of basic industrial lines.

The steel industry is working to full capacity, practically—railway equipment orders are continuing on a good scale—since the first of January, carloadings have surpassed such period for any previous year—lumber production is substantially the same as last year—the consumption of cotton by mills is increasing somewhat each month and shows a greater consumption than last year—the automobile industry has been carrying relatively small stocks of raw mate-

rials, operating on a conservative policy, reducing prices and tending towards standardization on closed cars. In commenting upon the business of one of its service stations, which we happen to know is entirely normal and not enjoying a boom, a vice-president of a public utilities company states, "Our sales of gas and power for industrial purposes went up swiftly in December, in January held its own, and February has been without exception the biggest selling period in all our history." Of all our great national activities, the coal trade is notably in the dumps.

A SPECULATIVE BLACK FRIDAY

THE vividness of current affairs is likely to overshadow past performances, but it is doubtful if even the old-timers can recall any period, even during the war, when a single day's decline in grain was more serious than experienced last Friday, the thirteenth. The day preceding had also been hectic, a dependable forerunner of the Friday to follow.

Without presuming any uncanny knowledge of the future trend of the market, we are unable to forego the opportunity to remind our readers of caution expressed in this column during the latter months of 1924. We urged the recognition of certain fundamental facts, stating for instance, that "No material change in the world's statistical position is shown of late and all indications are that surplus wheat will fully take care of importers' needs."

Other comment in this same vein from time to time was published thus: "Owing to high prices, it is probable that more wheat will be brought into sight this season than is suggested by the crop figures."

Suggestion is heard relative to the improper emphasis which has been given the reputed world shortage of wheat, but the market's action last week impresses us rather with a strictly technical weakness and not one that was truly reflective of agricultural crop figures, carry over, farm reserves or what-not.

The fact is that the unexpected decline of Friday was the result of widespread liquidation, associated with an entire absence of important buying and coupled with the failure of foreign demand for cash wheat which would have ordinarily developed on the breaks.

TRUE CO-OPERATION

IF poor seed corn is used by a single farmer in the whole country this spring, it will certainly be due to the fact that he could not or would not read, for warnings as to just what the situation is have been printed in literally hundreds of newspapers, trade papers and farm magazines. Furthermore, the U. S. Department of Agriculture has given the matter publicity, as have also numerous state agricultural departments, colleges, county agents and many farm organizations.

This is a record not only of splendid co-operation but also of a real desire to be helpful to those who would otherwise be in serious trouble.

FIRE PROTECTION

GRAIN elevators are in many cases located on the edge of the town and frequently, therefore, some distance from the fire department and it may be, even from fire hydrants.

We have a very vivid picture of one elevator fire where it was necessary for the fire department to lay a full half mile of hose before the fire could be reached, and as it was necessary for a second alarm to be responded to before that much was available, the loss was practically a complete one.

We assume no reader of this paper, who is an elevator man, fails to arrange for periodic inspection of nearby fire hydrants, etc., but if there is one, we are sure this word of warning will result in his going into the whole matter of fire protection

thoroughly and at once. Lightning protection comes under this same heading and should be installed during April, if not already on the country elevator.

THE SIXTY-EIGHTH CONGRESS

WE are told that the session of Congress which ended on March 4 passed more laws in the two years of its existence than any previous one, the total number being 996.

Many of the bills were of a private nature and many others were more or less routine in character, but some of them were nation-wide in importance and several were of particular interest to the grain and allied trades.

Among the last was, of course, the so-called Arbitration Act, referred to in our March 4th number, the amendments to the farm loan act and agricultural credits act of 1923, and the new revenue law.

As we study the work of this Sixty-eighth Congress, we are more and more impressed with the magnitude of this great country of ours and with the diversity of its needs and activities, and we realize as never before how increasingly difficult it is for this great legislative body of ours to always get at the real facts with respect to many of the matters presented to it.

We also realize, as never before, the need for real men as our representatives, and the danger which arises from our choosing men who are small, or lazy, or perhaps even crooked.

It has been said that the man who has been a good "horse trader" makes the best Congressman, because many of the bills that are introduced only become laws through the trading of votes among the members.

Be that as it may, the task of a member of Congress, if it is well done, is a big one, as is emphasized by the fact that this Sixty-eighth Congress, to which we have just referred, appropriated a total of \$7,898,765,000.

UNDER THE SIGN

IN a recent number of *Price Current-Grain Reporter* we printed a story telling of plans for painting 5000 elevators a battleship gray, with green trimmings and carrying the legend, "There Is No Substitute for the Farmers' Elevator."

The idea appeals to us as being a good one and we hope it may be carried to a successful conclusion.

We should like, however, to warn each man who manages an elevator bearing the above legend, that the sign itself is not an elevator life insurance policy, for while most people will agree that the legend is true in a general way, no single elevator ever is a necessity.

There was a time in the early history of the country, when roads were so poor and elevators so few and far between, that farmers may, perhaps, have been compelled to market their grain in some specific elevator. There may be isolated cases where that is still true, but as a rule, the farmer now has his choice of half a dozen or more, and with the prevalence of good roads, he is pretty sure to go to the man who renders good service, who shows an interest in his problems and who is not a "grouch."

As we have already said, painting this sign on the elevators appeals to us. It is a method of advertising and we believe in that.

May the sign be an inspiration, to every last man who works under it, and if it proves to be that, the person who first conceived the idea will have builded better than he realized.

EDITORIALETTE

The Sears-Roebuck Agricultural Foundation has just announced that the winner of the thousand dollar prize for the best ear of corn, in the National Seed Corn Show, was an Illinois woman, Mrs. Elsie M. Paluska of Waverly. The judges, of course, did not

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

know that this exhibitor was a woman, and that fact therefore had no influence on the award, and thus we again see superiority in what has always heretofore been considered a man's job, shown by one of those who, in days gone by, were spoken of as the "gentler" sex.

Some of the things that have been happening in Washington during the past two weeks lead us to believe that insofar as a good many members of the present U. S. Senate are concerned, they are not only not earning the increased pay they recently voted themselves, but they are really earning absolutely nothing. Writing "doggerel" and taking up the time of the Senate to read it, certainly is not profitable for the country and it lessens our respect for those who engage in it and for those who peacefully permit such things to be done. A ten-year-old school boy would be stood in a corner or sent home for indulging in that kind of a prank, and quite properly, too. Why should such a thing go unrebuked when it happens in the Senate?

Out in Iowa, last week, a man was refused American citizenship when he told the judge that the only part of the newspapers he read was the market reports, and by way of comment, the judge advised him to read the political news as he did the market news, as his prosperity depended just as much on one as on the other. We are inclined to feel that the judge must have been passing up the market page during recent weeks or his statement concerning the applicant's prosperity would have been different.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, MARCH 18, 1925.

GRAIN TRADE REVIEW

The unexpected happened in the grain markets, with drastic declines in prices, the break in wheat being assisted along by extremely heavy hedging sales for foreign account, apparently a large quantity of southern hemisphere grain afloat not having been placed, and as the limits were reached, the buyer protected himself by sales of futures both here and in Liverpool. The liquidation has been of a most drastic character, and whereas a short while ago the trade was almost unanimously bullish, sentiment veered to the bear side, and for a time the markets received limited support. Technically the market position has been weak for sometime past due to the protracted advance which lifted the May to \$2.05½ at the end of January on the theory of a shortage in the supply developing later in the season, but the failure of the theories of the bulls to work out rapidly, and the steady increase in supplies on ocean passage, as the result of continued heavy exports from the southern hemisphere, undermined the confidence of the bulls and with few exceptions they were out of their lines at the close of last week, and waiting for new developments. At the inside figures May wheat was off 43½¢ and July 28¢ from the recent high and the technical position had been materially strengthened, as was shown by the rally over 9¢ from the low point on the May on Saturday.

The break put American hard winter to below a parity with grain from Argentina with the result that a liberal export business was put through, and should the latter continue those who sold the May so heavily during the past week, both foreigners and local operators, may have a hard time of it when they try to cover, as statistically there is little wheat available in the United States for export after allowing for domestic bread and seed requirements and for a normal carryover. Any material export business from now on may have to be at the expense of the theoretical carryover, but confirmation of recent sales in the way of actual clearances is needed before many operators will be willing to take the buying side for an extended campaign on that side of the market. Considerable irregularity in the market is to be anticipated.

No change in the statistical position has taken place in recent weeks, but the efforts of the southern hemisphere to take advantage of the high prices is

fully reflected in the large quantities now afloat on the ocean. The break may check the clearances to some extent, but this is doubtful if there are to be very high prices, as some still expect, they will come the latter part of the season or not at all. The domestic visible supply is decreasing rather slowly, as the movement from the interior is holding up much better than usual at this season, although with field work getting under way in the Southwest and gradually extending northward the run should fall off considerably in the near future. The Government report suggested total holdings of around 259,000,000 bus. in all positions against 306,000,000 bus. last year, indicating that there was around 25,000,000 bus. available for export after allowing for domestic bread and seed requirements and for a carryover of 75,000,000 bus. at the end of the season. There are many sections in the Southwest, especially in parts of Texas and in western Oklahoma where moisture is commencing to be needed, and it may be necessary to revise estimates as to the extent of the losses due to winter killing or early drought unless the dry situation is relieved. The drought in Texas is also likely to affect the acreage planted to corn. Indications are, however, that the average condition of winter wheat for the country in the Government April report will be somewhat higher than was shown in December. Foreign crop reports remain decidedly spotted, and while rain is needed in some sections, dryness would be beneficial in others. There seems to be little likelihood of any material quantity of wheat being available for export from the new Indian crop due to the failure of rains to materialize at the critical period.

Coarse Grains.

While both corn and oats have resisted pressure to a considerable extent the heavy discount of cash grain as compared with May corn has had a decidedly depressing effect. At one time No. 6 grades were around 44¢ under the May, an almost unheard of figure, but the readjustment which was certain to come got under way and with a decline in futures and an advance in the cash, the two came closer together during the closing days of the week. Further readjustment is absolutely necessary between now and May 1. Elevator interests are making contract grades for delivery, and moderate sales have been made to go to store already. The Government report showed the smallest farm holdings in many years with one exception, while on the other hand the stock of oats is considerably above normal. The domestic demand for the latter has been relatively slow despite the very low price in comparison with corn. Seeding is making comparatively rapid progress in parts of the Southwest.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
Wheat	4,534,000	4,692,000	4,689,000
Corn	8,281,000	7,989,000	7,432,000
Oats	3,569,000	2,790,000	4,343,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	16,384,000	16,464,000
Preceding week	15,471,000	19,908,000
Since July 1	876,921,000	819,476,000

Drastic liquidation was on in wheat the past week, and with general selling, including that by foreigners, prices declined in a most sensational manner, May at the low point showing 43½¢ under the high in January, and while the close was on a strong rally from the low point net losses were 7½¢@11¼¢, with September showing the most strength. A heavily overbought condition was disclosed on the way down, and a great quantity of grain went out on stop loss orders. Rains in the Southwest and a record quantity of wheat on ocean passage were depressing influences. More rain is needed in parts of the Southwest

as the moisture received was inconsequential in many sections of western Oklahoma and Texas where it is needed the most.

While corn showed stubborn resistance to pressure for a time, it finally yielded and liquidation developed which carried values down to the lowest price for May since late in November. A strong rally followed the decline but the close was at net losses of 5½¢@6¼¢ with May leading, the latter going to 3¼¢ under the July. Cash corn showed relatively more strength than the May, and the basis on spot was much narrower at the last with indications of a better domestic demand.

All deliveries of oats sold at a new low on the crop, the Government report showing burdensome stocks in all positions and the liquidation in other grains bringing in heavy selling which carried prices off sharply, and the close was at net losses of 3½¢@4¼¢, with July leading. Domestic demand improved on the decline, and there was a little export business put through at the seaboard. The break in rye was the most severe in any of the grains, with net losses of 11¼¢@22¢ for the week, the latter on May, which showed around 60¢ under the high point of the season, and July and September sold at a new low on the crop. Range of prices the past week follows:

	High.	Low.	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
Wheat—					
May	\$1.89½	\$1.62	\$1.69½	\$1.80½	\$1.06½
July	1.66½	1.45½	1.51½	1.62½	1.07½
Sept.	1.53½	1.36½	1.42	1.49½	1.07½
Corn—					
May	1.30½	1.18½	1.22½	1.28½	.77½
July	1.33½	1.20½	1.25½	1.31½	.78½
Sept.	1.33½	1.20½	1.25½	1.30½	.79½
Oats—					
May	.52½	.44½	.47	.51½	.46½
July	.53½	.46½	.48½	.53	.44½
Sept.	.53	.46½	.48½	.52½	.41½
Rye—					
May	1.53½	1.22	1.28½	1.50½	.67½
July	1.38½	1.14	1.20½	1.33½	.69½
Sept.	1.23½	1.05½	1.10	1.21½

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on March 6:

	Mar. 6, 1925.	Feb. 27, 1925.
Wheat	1,410,900	1,458,319
Oats	1,710,343	1,710,343
Barley	315,646	334,594
Rye	3,756,210	3,784,450
Corn	1,203,179	1,085,653
Total, bus.	8,396,278	8,373,359

WHEAT IN PRIMARY MARKETS.

Receipts of wheat the past week at 14 primary markets, compared with the corresponding week last year and also for the period beginning July 1 to Mar. 14 (000 omitted):

	Mar. 14, 1925.	Mar. 15, 1924.	Mar. 14, 1924-25.	Mar. 15, 1923-24.
Chicago	326	482	64,782	46,476
Sioux City	50	20	1,721	1,266
Milwaukee	108	40	8,027	1,996
Minneapolis	1,679	1,946	90,193	87,983
Duluth	277	296	97,626	32,180
St. Louis	583	382	37,096	27,267
Toledo	43	181	10,931	14,232
Wichita	103	15,894
Detroit	23	33	1,691	1,625
Kansas City	782	837	81,418	52,580
Peoria	7	25	1,800	1,958
Omaha	310	257	26,846	11,567
Indianapolis	53	48	3,829	5,125
St. Joseph	177	126	10,406	6,502

Shipments	3,788	2,939	325,402	151,709

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
American	7,644,000	5,616,000	7,384,000
Argentine	4,522,000	4,902,000	5,202,000
Australian	5,792,000	6,016,000	1,736,000
Indian	1,080,000	800,000
Russian	1,496,000
Others	312,000
Total	19,038,000	17,334,000	16,130,000

Of the above total wheat from America there cleared in the form of flour 2,450,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	307,373,000	297,291,000	310,304,000
Argentine	85,870,000	81,007,000	73,496,000
Australian	63,320,000	44,698,000	29,168,000
Indian	28,840,000	5,864,000	6,836,000
Russian	328,000	25,192,000
Others	2,544,000	13,620,000	4,151,000
Total	488,275,000	467,672,000	424,058,000
Season	753,195,000	662,698,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
American	314,000	456,000	394,000
Argentine	938,000	1,645,000	700,000
Others	100,000
Total	1,252,000	2,101,000	1,194,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	16,148,000	13,865,000	24,982,000
Argentine	33,441,000	20,821,000	16,687,000
Russian	180,000
Others	1,714,000	920,000	3,490,000
Total	51,303,000	35,786,000	48,851,000
Season	75,500,000	65,765,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
American	20,000	16,000	788,000
Argentine	292,000	960,000	676,000
African	476,000
Russian	705,000	314,000
Others	443,000	800,000	433,000
Total	1,460,000	2,252,000	2,211,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	403,000	7,691,000	35,134,000
Argentine	44,680,000	19,412,000	51,252,000
African	1,343,000	4,629,000
Russian	2,466,000	1,765,000
Others	13,734,000	16,392,000	922,000
Total	62,626,000	49,889,000	90,558,000
Season	229,932,000	205,235,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
Wheat	10,474,000	11,237,000	13,581,000
Oats	1,000,000	1,056,000	1,616,000
Rye	972,000	1,005,000
Barley	866,000	1,058,000	110,000

FIELDMEN'S ASSOCIATION MEETING

Important Meeting at Which New Lightning Specifications Were Adopted, Officers Elected and Membership Applications Approved.

The eighteenth annual meeting of the Mill and Elevator Fieldmen's Association, which was held at the Hotel Sherman in Chicago last week, was an unusually interesting and important one.

The program of addresses, papers and discussions as well as the one of inspections, sight-seeing tours and other entertainments were followed with pleasure and profit to all.

Among the important accomplishments was the adoption of new installation specifications for lightning protection of grain elevators, warehouses and flour mills. These specifications, which are known as "Standard No. 437," show how grain elevators and warehouses that are completely iron-clad may be made lightning proof, how frame buildings should be rodged, how non-iron clad buildings with metal roof must be protected, proper methods of protecting flour mills, brick, concrete or tile stacks, etc.

Another important accomplishment was in approving the use of the new enclosed ventilated motor, which is being put on the market by Fairbanks, Morse & Co.

One of the principal points brought up at this convention was the necessity of preventing back fires on carburetion engines and a method was proposed whereby this could be done.

On Wednesday the association was fortunate enough to be addressed by Mr. A. P. Husband and Mr. Sidney Anderson of the Millers National Federation. Mr. Husband discussed in a general way the objects of the federation and what they were trying to do.

Among those whose applications for membership were acted upon favorably were Wm. Littlefield of the Mill Owners' Mutual Fire Insurance Co., C. H. Ferguson and G. E. Richey, Jr., of the Central Agency, Michigan Millers' Mutual Fire Insurance Co., O. K. Lamb and W. D. Frick of the Pennsylvania Millers' Mutual Fire Insurance Co., R. L. Galbreath and D. L. McClurg of the Grain Dealers' National Mutual Fire Insurance Co., W. C. Weishaar and R. E. Bruner, Jr., of that company's southwestern agency, J. M. Brown, H. J. Smith and L. E. Adams of its northwestern agency, Benjamin Vine and James Schoonover of the Millers' Mutual Fire Insurance Association, H. E. Evans and C. A. Moorhouse of that company's Pacific department, and A. B. Simmons and Kenneth White of its southeastern agency.

Officers elected for the ensuing year were: President, C. R. McCotter, Omaha; vice-president, V. R. Johnson, Chicago; secretary, H. C. Lee, Chicago; treasurer, R. A. Backus, Lansing; chairman executive committee, F. F. Burroughs, Chicago.

Frank J. Delany, of the Chicago Board of Trade, addressed the meeting on "Grain Marketing in America." After a preliminary discussion of the origin and history of present methods and institutions in the grain trade, Mr. Delany said further:

"The whole system of American grain trade is predicated upon trade in grain for 'future delivery.' Trade in grain for future delivery is in turn dependent upon speculative interest in grain. Therein arises the importance to all of us of the speculator. The activities of the speculator as reflected in his operations in the trade for future delivery interject a competitive factor of great importance. His activities constitute an economic service in that in the first place he carries the hedges (which as you know, represent sales for future delivery against stocks of grain which may not be located in the terminal center).

"Speculators' activities are competitive with each other and competitive with the grain merchant, the miller, the exporter,

All of this competition is concentrated in the pits or other trading points established on grain exchanges. Competition has always been the basis of grain trading. Competition between millers for grain, between grain merchants and millers, between grain merchants and each other, between the merchant of one market with those of the other competitive markets, between speculators with each other and with all the others.

"Now economists of late years have been ponderously discussing 'co-operation' versus 'competition,' trying to determine which is the better method. Strange to say, in the grain trade 'co-operation' first developed in an effort to stimulate 'competition.' Farmers organized co-operative country elevators in order to make added competition for their products and to collect the merchant's profits for themselves.

"I submit this thought: You, because of your calling, are conservative. You do not want undesirable risks. You want to insure only prosperous merchants. You want to eliminate the moral hazard. As helping to this you can lend your influence in your daily work to the combatting of radicalism and half-baked socialistic theories, no matter by whom they are proposed. Let us hold fast to what we know functions. Let us not impair security by testing theory."

WHAT ABOUT OUR PROGRAM OF ECONOMY?

James Hartness, president of the American Engineering Council, declares that the signing of the Temple bill by President Coolidge would enable the Government to rush to completion its biggest map of the country, which will cost approximately \$50,000,000 and will consist of 6,000 sheets covering more than an acre.

Mr. Hartness said the bill would remove delays that had marked the 45 years of spasmodic efforts to complete the map and should enable its completion during the present generation. Only about a third of the country has been adequately mapped, he said.

The atlas, he said, would show every acre of the country, including "every road and railroad, every bridge, every house, and every work of man exactly where they belong, as well as every natural feature—every river, creek and lake, every mountain, hill and slope, each in its exact relation to everything else."

CORN IN MINNESOTA.

From Wilkin county, Minnesota, comes an interesting story and a striking photograph, indicating that the farmers around the town of Campbell in that county had a remarkably successful year with their corn.

J. H. Campbell, manager of the Farmers' Elevator there, states that many of the farmers are shelling the corn on the farm, thus saving much hauling and giving them, at the same time, the cobs for fuel, the latter being no small item in the prairie country.

It is estimated that 25,000 bushels of corn will have been handled through the two elevators at Campbell by the time the crop is all sold, and while it is not all sound, it is above the average and the price has been around 75 cents a bushel.

MINNESOTA CORN, AN INCREASINGLY IMPORTANT CROP.

CANADIAN GRAIN MOVEMENT

Comprehensive Summary of Canadian Grain Movement for February.

The Board of Grain Commissioners for Canada have issued the following statement concerning the movement of western Canadian grain crops for February, 1925.

"When due allowance is made for the size of last year's crop as compared with the production of previous seasons it will be seen that the movement from country points to the terminals during February is heavier than usual. The total number of cars passing inspection—12,544 of all grains—has only been exceeded three times before in the month of February, in 1916, 1921, and 1924, respectively. Deliveries by farmers at country points have also kept up extremely well and the two facts would suggest the desire of producers to take advantage of continued high prices.

Much of the wheat that is now moving forward is being graded "No grade" on account of excess moisture and a further reduction of the percentage of contract grades is noted. 8,974 cars of wheat were inspected during the month, compared to 9,097 a month ago and 13,758 a year ago; and of these 3,366 or 37.5 per cent graded into contract grades as compared to 4,264 or 46.9 per cent of a month ago and 11,871 or 86.3 per cent a year ago. 2,545 or 28.4 per cent were graded "No grade." The movement of barley and flaxseed both continue in excess of a year ago, inspections totalling 1,058 cars of barley and 318 of flaxseed as compared with 906 and 130 a year ago.

In spite of the fact that large stocks remained in store or afloat at Georgian Bay and Lake Erie ports and Montreal, the all-rail movement both for export and to domestic points has been quite substantial. It is worthy of note also that all of the rail shipments for export were destined via U. S. A. Atlantic seaboard ports. The movement of grain via the Canadian seaboard has been very small indeed during the past two months but it is reported tonnage engagements for March shipments are substantial.

The movement via Vancouver has also been exceptionally light, principally owing to the fact that high prices and high rates for ocean tonnage render competition with wheat from the southern hemisphere impossible. Rates for berth space are quoted at 37/6 to 40/- per ton, March-April shipment, while even at distress rate 35/- was reported for a recent shipment to U. K. Continent.

The continued high level of prices and in particular the higher quotations in Winnipeg as compared to Chicago, have largely been responsible for the very small export demand for Canadian grain. As the season advances it becomes more evident that while there is an insistent demand for wheat and rye in Europe to make up for the deficiency in last year's home production, and while the advent of Russia as a large buyer of wheat and flour has further increased the total re-

quirements of importers; yet there is every assurance of a sufficiency of supplies to beyond the time when this year's crops in the Northern Hemisphere will be harvested.

It will undoubtedly be necessary to draw heavily upon the surplus available in the Southern Hemisphere and may result in a comparatively small carry-over on Aug. 1, next. This should stimulate an increase in spring wheat acreage wherever such can be sown—whether in Europe or America—having in view an increased production this year to offset the heavier drain on present supplies and to insure a sufficiency for the 1925-26 season. One effect of the very close adjustment of supplies to requirements should be to suggest the danger, in the event of a poor harvest in both hemispheres in the same season, of a real shortage of breadstuffs. Such a condition is hardly likely to eventuate, but the steadily increasing consumption of wheat and rye, due partly to increasing population and partly to the gradual increase in the consumption of wheat flour in the Orient, can only be properly provided for by a continued increase in acreage and production in the principal exporting countries.

WHEAT CONTROL IN FRANCE.

The French foodstuffs market continues to be disturbed by the shortages in the last crop and the continued rise of prices quoted for wheat for future delivery, say advices to the Department of Commerce.

French prices for wheat continue to mount and the cost of bread is rising. Needs to the end of this wheat year will necessitate a purchase of about five million quintals.

To meet this situation the government, on the suggestion of the Ministry of Agriculture, has asked authority to set up a comprehensive system of wheat control. It is planned to take a census of all the stocks of wheat in France and to give the public officials the power to requisition wheat in cases of inexact or fraudulent declaration by the holders. A credit of 100,000,000 francs in addition to the 50,000,000 granted by the Parliament at the end of December is asked for the purchase of wheat, which will be put on the market at a loss in order to keep down the local price level. This wheat will be purchased from importers or secured by any other means the Ministry of Agriculture may judge effective. At the same time the government is asking authority to require a raising of the percentage of substitutes to be put into flour from 8 to 12 per cent. Various other measures are under discussion for restricting consumption, such as the closing of bakeries one day a week, requiring the use of stale bread and the prohibition of using wheat flour for pastry making.

The proposals of the government have met sharp criticism from the agricultural committees of the Chamber of Deputies to which the project has been submitted. They are particularly opposed to any building up of a government wheat stock. Farming interests have voiced their opposition to any wheat census. They declare that any interference with the wheat market is unfortunate at this time when wheat planting should receive encouragement.

In short, dealers in wheat and producers feel that the interference on the part of the government is to remedy what is only a passing crisis and that none of the measures proposed are reasonable except those which refer to better utilization of bread grains.

RUMANIA MAY IMPORT WHEAT.

In many quarters it is felt that there is a strong probability of Rumania importing wheat before the next harvest becomes available. Recent estimates indicate considerable stocks on hand, but even if these are sufficient to supply domestic consumption it is felt that foreign wheat will have to be imported into the country, due to the reluctance of the peasants to release such stocks at the maximum prices fixed by the Government.

DISPOSE OF 1924 HAY CROP

John H. Devlin, Pres. Chicago Hay Exchange and Mgr., Hay Dept., Albert Miller & Co., Very Properly Urges Drastic Action on the Old Hay Crop.

A critical situation confronts the hay trade as we are about to enter the new grass season to which I have given much thought and submit certain ideas that seem to me basically important.

When the 1924 hay crop was gathered the government report showed the same to be six million tons greater than that of 1923, and the report just issued by the government shows that the surplus on the farms Mar. 1st exceed that surplus of 1924 by four million tons. Add this to the average surplus of hay on the farms at this time of the season and you will readily realize that there is still an enormous amount of both the 1923 and the 1924 hay crop to be disposed of. What to do with this big surplus of hay

JOHN H. DEVLIN, Chicago.

is the most serious problem that the farmer and his friend, the terminal market hay dealer, has to face at the present time.

It would possibly be an easy matter to market this large quantity of hay if it were of a good quality, but the greatest drawback to the satisfactory marketing of the surplus hay this season is the fact that a large percentage of it is low grade and a considerable percentage is damaged and unmerchantable. This came about through the unfavorable weather conditions that prevailed at the time such hay was being gathered.

A good deal of the hay stood until it became over-ripe, while a goodly portion was rained on after being cut; also a considerable portion of the hay that was apparently put away dry is now found to be damaged when the stacks and mows are opened up. This is due to the fact that the hay apparently was not properly cured when stored away.

Reports being received from the hay producing states would indicate a disposition on the part of the farmer to plow up his meadows this Spring and to carry over the surplus from the 1924 hay crop. This I believe will be a grave error. The poor quality of the hay of the 1924 crop has made it very difficult to market the same satisfactorily and has been the main contributing cause of the low prices at which the hay has sold. If this low grade hay of the 1924 crop is carried over it will simply mean a repetition of the same conditions that have prevailed during the marketing season of the 1923-1924 crop.

The best thing for the farmer to do is to market (not carry over) all the merchantable hay he has. Prices may not be just to his liking, but I believe it better to get rid of it at some price than to hold it over and to destroy or

turn into fertilizer any damaged hay that he may have and start the 1925 season with a clean slate. The 1924 hay crop has been the most unsatisfactory to handle in my experience; it has been the cause of disagreements and of ill feeling. There has been nothing but dissatisfaction all along the line. Is it not the sensible procedure to wipe out this source of dissatisfaction and then the results of the 1925 crop I am sure will be satisfactory.

A STATISTICAL STUDY OF FARM LANDS

The time is not far distant when it will be necessary for the United States to substitute a policy of trying to find land for people in place of its traditional policy of finding people for land and handing out large pieces of the public domains to them, says an article in the American Bankers' Association Journal. The executive departments at Washington, particularly the department of agriculture, are working on the determination of the probable future needs and a classification of the land.

"The consciousness of the land problem has not yet developed in this country as it has in England and on the Continent of Europe," Dr. L. C. Gray, in charge of the division of land economics is quoted as saying. "The subject of land economics has not yet become in this country, as it has become abroad, the central theme of agricultural economics.

"Our problem in this country has been largely one of disposing of a great reserve area of public land, attracting people to the land and keeping them on it, rather than a problem of providing land for clamorous multitudes of people who are seeking to become farmers. This, of course, has prevented the subject of land economics from being foremost in the consciousness of those who are interested in the agricultural problem. But we are entering this newer phase of the land problem, and so rapidly does our population increase that this other aspect of the land economic problem is just around the corner."

The objective of the division according to Dr. Gray, is to provide information that will enable the people to understand thoroughly the situation as to the agricultural land resources of the nation and to see the situation in its true light, divested of temporary considerations, propaganda and sentimentality. The article says:

"As rapidly as possible we must be able to answer such questions as: 'How fast should our agriculture expand?' 'What proportion of our surface area should it occupy?' 'What should its relation be to the other great usages—pasturage and forestry, and what areas are best suited for those various uses.'"

"A statistical study of the rate of return on investments in farm land has been completed and published as a contribution toward a satisfactory basis for framing policies for land appraisal, for taxation and for rural credit. Other projects include a survey to measure the effect of such factors as yield per acre, distance to market and road type on land value, and extensive data have been collected on trend of land values in relation to prices of farm products, rates of interest and improvements. A system is being developed whereby upwards of 60,000 selected correspondents will report four times a year on land values and turnover, land tenure and occupancy, land utilization and farm labor conditions."

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 424,000 bus. last week; oats, 440,000 bus. and barley 26,000 bus. Corn increased 774,000 bus. and rye 40,000 bus. Details follow, last three ciphers omitted except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	1,341	3,557	5,598,000	15,761,000
Corn	4,337	8,430	14,051,000	6,474,000
Oats	6,849	12,549	20,911,000	5,142,000
Rye	1,994	289	2,364,000	1,714,000
Barley	166	166	230,000	

*Includes 700,000 bu. wheat, 284,000 bu. corn, 1,513,000 bu. oats and 81,000 bu. rye afloat.

COSTS AND MARGINS IN MARKETING

Interesting and Important Figures on Grain Marketing Costs.

By John D. Black and H. Bruce Price, University of Minnesota.

Under prevailing usage, margins include out-of-pocket costs, plus interest upon the proprietorship investment, plus depreciation and the like, plus proprietor's wages of management, plus or minus any conjunctural gains or losses. Costs, as distinguished from margins, may include simply out-of-pocket costs and depreciation, or they may include the interest item in addition, the procedure in this respect depending more upon the bias of the accountants than anything else. In the economic sense, of course, proprietor's wages of management are as much costs as hired management or hired labor. And so is the interest on the investment. But in this article, which is to be principally a report upon the cost and margin studies as made in the field of marketing, the usage will have to be based upon practice rather than upon principle. The general practice in certain types of studies of the marketing of farm products is to consider interest on the investment as a cost, and also proprietor's wages of management, the reason given being that some of the marketing is by co-operatives, and co-operatives borrow practically all their capital from members or elsewhere, and hire practically all of their management. Costs as reported in such cases are, therefore, costs according to economic terminology rather more than according to accountants' terminology. The difference between costs and margins, according to this usage, is merely that margins include the conjunctural losses and gains due to price or cost changes, spoilage and waste and the like. In other types of studies, only interest on borrowed capital is counted as a cost, and profits include return to the proprietor and the proprietorship investment. This applies especially to studies in costs of merchandising and conversion.

The term margin is also used in another sense, namely, that of the difference between prices in local, wholesale and retail markets. A substitute for it in this use is the term "spread." The term margin is also sometimes applied to the difference between purchase and sale price for a given commodity. Thus an elevator may have one "margin" for wheat, another for rye, another for corn, etc. In this sense, it is distinguished from "gross trading profit," which may include something more than the margin, as will be illustrated presently.

Objectives.

In the last analysis, cost and margin studies in the field of marketing can have but one practical objective, namely, to lead to a reduction in the costs or margins associated with the rendering of a given amount or quality of marketing service. There are, however, at least three approaches to this goal by way of cost and margin studies. One of these is to work out the cost-structure at any given time, discover the variations in costs, both in the aggregate and by cost categories and by processes, as between different business units at any given time, and thus as a result of actually seeing how some business units have kept their costs low, point out how other business units may reduce their costs in the future. This method means the making of cost studies with a view to discovering from them the best kind of marketing organization and management.

An approach somewhat related to this is to set up some sort of costs as standards for the various business units to attain to as norms of reasonable accomplishment, and by this means improve the practice of the more inefficient. The only norms ordinarily set up, however, are simple average costs, which must perforce include as much bad practice as good practice. Furthermore, if production standards are to be useful for a

period of years, they must separate physical data from cost-rate data, so that they can be corrected whenever cost-rates change.

Another approach is that of determining if possible what costs or margins are "necessary" or reasonable, and using this information in publicity campaigns or various related ways as a means of forcing or inducing middlemen to reduce their margins. Studies of variations in costs among different middlemen have little value for such purposes. They merely show a range in costs, and do not in any way indicate what costs are necessary or reasonable. The "bulk-line" analysis is nearly futile for such purposes—it simply restates the query in other language. The best that can be said of such studies from the point of view of necessary costs or margins is that sometimes they show costs or margins that obviously are higher than is reasonable. The more promising attack is to analyze variations in costs and margins over a period of time, discovering to what extent the variations from month to month or year to year are due to changes in cost-rates for labor, equipment, supplies, rent and the like, or to variations in turn-over or utilization; and to what extent they represent lags or maladjustments between purchase and sale prices. Studies of this latter kind with such an objective have thus far proved of little immediate value so far as reducing margins are concerned, but they have helped us to understand how our marketing system behaves in various phases of the business cycle, and thus have had great scientific value. Of course, if some way could be found of forcing costs or profits down or up, when they are temporarily out of line, such results would be immediately useful. But there is a problem of control here which has not yet been solved.

Another objective in cost-marketing studies is frequently given much importance, namely, to secure information that can be used in bringing the public to realize that most of the present high marketing costs are really necessary, or in getting the consumers to co-operate in various plans for reducing costs along lines that require their co-operation.

A Sample Analysis—Grain.

Figures show the range and distribution of costs of 109 grain elevators in the Minneapolis-Duluth grain marketing area for the crop year of 1922-23 was from less than 2 cents to over 13 cents per bushel. The average was 4.7 cents per bushel. Here, apparently, is abundant opportunity for a better economy in organization and management.

The first and most obvious cause of these variations in unit costs is volume of business. The decrease in cost with volume is rather rapid under 125,000 bushels, and gradual above this volume. The reason for this is that there is roughly a minimum-sized elevator building with a minimum of equipment and labor and management; and costs per bushel decrease until this minimum is economically utilized. Above this point, labor is increased, equipment is increased, buildings are enlarged somewhat, insurance and interest are increased, and particularly the salaries of management are increased. They are not increased, however, as rapidly as the volume, with the result that unit costs are apparently still decreasing at 500,000 bushels.

It cannot, of course, be argued safely from such evidence that all elevators should be larger and that there should be fewer of them. The reason that some elevators are handling so small a volume is that this is all the grain that is produced in their territory, and if the elevator were not there, the extra hauling cost to other shipping points would more than offset the extra elevator costs due to the small volume of receipts at this point. In many cases, however, one elevator at a shipping point, if properly equipped and manned, could handle all the business now handled by the two or three. If hauling costs could be determined, it would be possible to com-

bine a curve of variations in hauling costs with volume with a curve of variations in elevator costs with volume, and so construct a curve of variations in the two costs combined. In most cases, such an analysis would show volumes of between 125,000 and 350,000 bushels, giving lowest combined hauling and elevator costs, the particular volume in any case depending more upon the density of grain production than upon anything else.

Although the variations in costs with volume are most obvious, they are probably not the most significant. The 16 elevators with volumes between 100,000 and 125,000 bushels have costs ranging from 2.5 to 9.0 cents per bushel; the 12 elevators with volumes between 150,000 and 175,000 have costs ranging from 3.0 to 9.0 cents per bushel; and even the 15 with volumes between 200,000 and 250,000 bushels have costs ranging from 2.5 to 6.0 cents per bushel. To explain all these variations is the first task of such an analysis. Of course, there is not space enough for it in this article. One important reason for the variations is differences in the amount of management hired, or the quality of it, or in the salaries paid for the same grade of management. Thus the salaries of the managers for the elevators in the 135,000 to 145,000 group ranged from \$1,475 to \$2,317. Other causes of differences are difference in type of construction of the warehouse, in adjustment of size of warehouse to volume of business, in type of equipment, in completeness of equipment, in utilization of the labor, or in wages paid. Extra labor costs vary from \$207 to \$923 for the same group. Some elevators follow a close policy in providing the manager with clerical assistance, office supplies and equipment and the like; others are liberal in this respect. Differences in types of insurance carried produce a variation in the unit cost of this item of over 50 per cent. Different methods of financing produce wide variations in the cost of this item; some of these, however, represent differences in service rendered.

Building costs per bushel vary partly because not all elevators are equally well adjusted to volume of business, and partly because different grain marketing conditions permit different rates of turn-over of bin-space. The Federal Trade Commission's study of 2,229 elevators in eight states showed an average turn-over of 3.9 times. But the average for elevators handling corn and other grains was 5.3 times, and for those handling no corn, only 2.8 times. The marketing period for corn follows that for small grain and extends the period when the elevators are in full or nearly full use. On the other hand, increasing the number of small grains handled reduces the turn-over because it makes more bin-space necessary. Maladjustments of capacity to volume of business may be merely temporary, due to such things as a short crop and the like; or they may be the result of over or underestimating future receipts. In the former case, accurate accounting would adjust the changes each year to suit the volume received.

Another important cause of variation in costs, especially between elevators in different territory, is difference in types of grain handled, or proportion of different types of grain. Wheat costs, for example, are higher than oat costs, and flax costs higher than wheat costs.

Two things must be said about these variations in the several cost items. One is that some of them are high or low because others are high or low. For example, a high equipment cost may mean a lower extra labor cost, or vice versa. But there will be for any elevator a particular combination of labor and equipment that gives lowest unit costs—a combination with not too much equipment and not too much labor. There will be a similar least-cost combination of management and labor costs, of management and office costs, of power and labor costs, etc. The other thing is that some of the differences in costs, as already indicated in the case of interest, represent differences in the quality of service. High salaries for

management may be justified by the success of the elevator. High office costs may be justified by the better records and accounts that are kept.

Cost Variations.

The analysis of cost variations naturally resolves itself into two phases: one, that of variations in utilization of the cost elements, and the other, that of variations in the cost-rates. Thus it will be found that some elevators have high labor cost because they employ too much labor or utilize it poorly; and others because they pay high wages. Building costs will similarly vary, either because of differences in size of buildings or turn-over, or because of differences in type of construction involving different annual costs per cubic foot of bin-space. All costs can thus be separated into two functions, one the physical units of input, and the other the cost-rate per unit of input.

When such an analysis of variations in costs has been completed, it is possible, first to point out all the reasons for high and low costs; second, to show how the costs of high-cost units can be reduced; and third, to plan new units in such a way that their costs will be as low as possible. From such an analysis, it is also possible to set up standards that are really possible of attainment, but which include very little bad practice. The standards will, of course, have to be different for different sets of conditions.

But which particular level of costs can be considered as necessary cannot, of course, be stated with any definiteness. In the first place, what particular quality of management can be considered necessary at any time?

Variations in Margins of Country Elevators.

The average gross trading profit of these 109 elevators was 6.7 cents per bushel, or 2.0 cents more than the average cost per bushel. Most of them are between 2 and 10 cents per bushel. These gross trading profits are not quite the same as margins, because they include income from sidelines and other sources, but they are nearly the same as margins and will be considered in this analysis.

Included in this 6.7 cents per bushel is 1.7 cents per bushel of income realized from sidelines and from elevator services rendered grain patrons. It is proper to do this since nearly all their costs have been charged to grain handling.

The margins vary first of all because costs vary. In general, those with higher costs have higher margins. Second, they vary because of different marketing policies. For example, those that do not hedge are liable to realize large gains or losses. Third, those that misgrade, or mis-weigh, or mis-dock have either gains or losses in consequence. Fourth, certain types or grades of grain normally carry wider margins than others because of greater marketing risks or uncertainties.

The range in net operating gains or losses is equally significant. Of the 109 elevators 21 had net losses ranging upward to 4.6 cents per bushel and 22 had net gains of 4 cents and over, ranging as high as 10 cents.

Year-to-Year Fluctuations in Costs of Country Elevators.

There are two principal causes of variations in total costs; one the variations in volume of business, depending upon the size of the crop, and the other, the variations in the prices of the cost elements. Volume (for a group under analysis) fell from 146,570 bushels in 1918-19 to 78,490 bushels in 1919-20, and costs per bushel rose from 4.13 cents to 9.01 cents. But part of this rise in bushel costs was due to a rise in prices of supplies, in wages and salaries, in interest and insurance, etc., since even with the lower volume of business, the average operating expenses were \$1,024 higher in 1919-20 than in 1918-19. The higher prices of grain from 1918 to 1920 made the interest and insurance costs higher in those years.

Beginning with 1920-21, the elevators began to reduce costs. In 1921-22 the re-

duction is particularly apparent. The large volume of 1922-23 raised total costs again, but made low unit costs. The years 1918-19 and 1922-23 are interesting to compare. With the same volume of business, the bushel costs are over half a cent higher in the latter year. This is principally because management, general office, wages of extra labor, and power and light are apparently not back even to the level of 1918-19 in the country elevator business. Interest and insurance are lower because of lower values for grain. Miscellaneous and direct sideline costs have been pared considerably. Thus, although there have been appreciable reductions since the flourishing years of 1918 to 1920, when money was spent rather freely because margins were high, the reduction process is by no means completed and may never be completed.

Fluctuations in Margins.

In five years out of six, the elevators had an adequate net profit as follows: In 1917-18, gross profits, 8.8 cents per bushel; expenses, 5.5; net profits, 3.3; in 1918-19 gross profits, 5.9; expenses, 4.1; net profits, 1.8; in 1919-20, gross profits, 15; expenses, 9; net profits, 6; in 1920-21, gross profits, 2.4; expenses, 7.4; net loss, 5; in 1921-22, gross profits, 7.8; expenses, 6.5; net profits, 1.3; in 1922-23, gross profits, 6.7; expenses, 4.7; net profits, 2. The heavy loss of 1920-21 was almost entirely offset by the large profit of the year previous. The net profits of 1918-19 and 1922-23 are really large when one considers the large volume of grain handled in these years. In general, margins are high in years of short crops, as in 1917-18, 1919-20, 1920-21 and 1921-22, and especially in 1919-20. But market conditions are an even more important cause of fluctuation in margins. It was advancing prices that principally produced the margin of 15.0 cents in 1919-20, and declining prices that produced the low margins of 2.4 cents in 1920-21.

In ordinary years, margins and expenses seem to be fairly well adjusted to each other, and leave a fairly regular net profit not far from 2 cents per bushel. Thus, after throwing out the abnormal years of 1919-20 and 1920-21, flax margins vary by years from 6.2 to 22.0 cents per bushel, oats from 2.8 to 6.6 cents, barley from 3.3 to 12.0 cents, and corn from 3.8 to 11.7 cents. It is only the circumstance that these elevators handle several kinds of grain that keeps their average margins somewhere nearly regular—this and the fact that wheat, the main crop of this region, has rather regular margins. In a major corn-growing region, no doubt corn margins are more regular.

What values there are in studies of year-to-year fluctuations in margins and costs should now be apparent. If margins or net profits are unusually high or low at any given time, the presumption is that a maladjustment has developed which will right itself in time, but which righting can perhaps be hastened if it is understood, or especially if some means of control can be developed. Or any particular costs which are out of line at any time can be handled in the same way.

Year-to-year fluctuations also serve to point out occasional opportunities for improving marketing organizations and management and thus reducing costs—but for such a purpose they have a rather limited usefulness.

WESTERN GRAIN DEALERS' CONVENTION.

The annual convention of the Western Grain Dealers' Association will be held at Des Moines, Iowa, on April 21st and 22nd, with headquarters at the Hotel Fort Des Moines.

COTTON NEWS

AUTHORIZED TO FIX STANDARDS.

Specific authorization for the Secretary of Agriculture to make arrangements with foreign cotton associations, exchanges and other cotton organizations for the use of the universal cotton standards is carried in the agricultural appropriation bill signed by President Coolidge February 10.

It has been held by officers of the Department that authority for entering into these agreements was conferred upon the Secretary of Agriculture by the text of the Cotton Standards Act. In order to remove all doubt about the legality of the department's action in entering into these agreements, Congress added the language of the amendment to the appropriation bill. The action of the Secretary in making agreements with respect to arbitrations and to the preparation, distribution, inspection and use of the practical forms of the standards is specifically mentioned.

At the beginning of February, the visible supply of grain at the head of the lakes was 40,000,000 bushels, of which about 22,000,000 bushels was wheat. There is something like 20,000,000 bushels of wheat still in the hands of the Alberta farmers, and, all told, the quantity of wheat still in Canada, available for export, is not far short of 100,000,000 bushels. Since the Dominion Bureau of Statistics estimated the value of last year's wheat crop at \$325,332,000, using as average price of \$1.20 per bushel, the price of wheat has increased by nearly a dollar. The average farm price increase, however, would not be more than something between 50 and 75 cents, considering the lowness of the grades. Taking the lowest estimate, 50 cents, the hundred million bushels still remaining has appreciated in value by \$50,000,000. But the products of wheat that are produced here also take advantage of the price rise. The most important of these is flour. During the past three crop years the average volume of flour produced by Canadian mills was 18,000,000 barrels, and the monthly average price over the same period was \$7.78. The increase in value between this average and the present price of flour accounts for difference of more than \$40,000,000 on the average output of the past three years. These figures show in a general way how valuable to the country has been last year's relatively small wheat crop at relatively high prices.

ESTIMATE ON WORLD COTTON.

The International Federation of Cotton Spinners estimates world consumption of American cotton for the six months ended Jan. 31, at 6,232,000 bales. If this rate is maintained the current half year total for year will be 12,464,000 bales, against 11,088,000 in 1923-24. Consumption of all kinds of cotton for the first half year was 11,177,000 bales against 9,989,000 year previous or at rate of 22,354,000 for year against 20,404,000 in 1923-24.

Cotton stocks held by mills showed a substantial increase, American descriptions Feb. 1 totaling 2,324,000 bales against 1,324,000 August 1, 1924. Cotton stocks of all kinds held by spinners Feb. 1 totaled 3,905,000 bales against 3,569,000 Aug. 1, 1924. English spinners using Egyptian cotton showed a decrease of 700,000 spindles. A striking feature is the great reduction in consumption of East Indian cotton. This is one reason for the bigger consumption of American cotton.

For some months the price in the world's market has been adjusted to an enlarged supply of the fiber balanced by a demand expanded in part by the attractiveness of the new price level itself and in part by an improvement in the purchasing ability of many people who use cotton. The world at large does not use cotton goods to the same ex-

tent as do the people of the United States but the gradual growth of world population since 1913, estimated in 1922 at about seven per cent, makes it appear likely that even this season's crop would be inadequate did we not have to reckon with the inability of many people to purchase cotton goods with the same freedom as before the war.

Furthermore, an abundance of competing fibers is not available, wool and flax for instance being notably scarce and the present production of silk and artificial silk together amounting in point of poundage to only a little over one per cent of that of cotton. But reports from the cotton goods trade and for manufacturing centers emphasize the conclusion that the adjustment to more liberal supplies will be made only gradually and that the end of the season will witness a visible supply somewhat larger than that with which the season began.

The present outlook indicates an easy situation as far as current cotton requirements are concerned, but one crop doesn't make a supply, especially not a supply to what appears likely to be a gradually expanding demand. This crop depended to a large extent upon weather, which was unfavorable to the boll weevil and favorable to late cotton picking. Although cotton is selling much cheaper now than it did last year it is still at a fairly satisfactory level and it does not appear that there will be any large reduction in the land put to cotton this year. The lack of the usual moisture in Texas and Oklahoma may seriously affect the development of another crop if not soon relieved and uncertainties as to weevil infestation in the coming season emphasize the nature of the hazards to which the American crop will be exposed and the corresponding uncertainty as to the course of cotton prices.

KANSAS WHEAT TO ARGENTINA.

The Argentine embassy has advised the department of agriculture that 200 tons of cereal Kanred wheat had been purchased by the Argentine minister of agriculture in Kansas for planting.

This amount would be enough to plant over 7,000 acres and will be distributed among farmers in the southern republic.

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to Mar. 14 (final 000 omitted):

Globe Combination Truck and Wagon Dump

Globe Machinery & Supply Co.

Des Moines, Iowa

1874-1924

Isaac C. Pratt.

In 1874 Isaac L. Pratt and Geo. E. Pratt began handling lumber and building material in Roseville, with offices just east of the C. B. & Q. depot. Shortly after, within a year or two, the former was succeeded by his son, Seth F. Pratt, and nephew, Jerome B. Pratt, and this firm, known as Pratt & Pratt, began to handle grain. Seth F. Pratt continued with the firm until his death, after

ment 1863-79). It has bought grain from men whose sons, grandsons and great-grandsons have since hauled grain to the same office.

It has passed through half a dozen periods of expansion, inflation and speculation and weathered the panics and severe depressions which have always followed. It has passed through the more recent period of extreme inflation and speculation during and following the World war. It has withstood the later collapse of credit and confidence in much which was thought to be conservative and gilt edge. And today, it has less than fifty dollars of accounts receivable on the books over thirty days old. Today its notes receivable are \$00.00.

In this half century of business experience with its panics, depressions, speculations and uncertainty, a dozen competitors in the grain business in Roseville have come and gone. Some of these, after a few years of experience

"We believe our particular form of country grain buying firm, benefited by this fifty years of experience, is the most economically operated of any form of country grain buying firm in existence, and therefore in a position to give better service at less cost than any other kind of country grain buying firm.

"Grain prices fluctuate constantly during the sessions of the grain exchanges and naturally we cannot make our offers good for an indefinite time, but we are always ready to quote prices on the market at any time."

FEBRUARY GRAIN FUTURES

The volume of trading on the Chicago Board of Trade for the month of February was the second largest for the period for which records are available. Trading in all grain futures for the month amounted to 2,597,246,000 bushels against 2,791,330,000 in January which was the largest. However, since there were but

UP-TO-DATE ELEVATOR AT ROSEVILLE, ILL.

which the firm was carried on by J. B. Pratt and Geo. E. Pratt. This firm was dissolved in 1919 by the death of Geo. E. Pratt, who had been in business at the same office for 45 years, and Isaac C. Pratt has since conducted the grain business at the same office.

One family has thus been in business continuously at the same office in Roseville for over half a century. To have survived fifty years of continuous business at the same location indicates that such business must have been conducted on sound policies, with integrity and confidence. We therefore feel that we are warranted at this time in calling the attention of the public to some of the policies that have been worked out in this half century, and which have made this record possible.

This family was carrying on business at its present office when the United States Government could not meet its obligations (suspension of specie pay-

with the hazards, pitfalls and grief in the grain business have retired to become the firm's best customers.

In speaking of the business, Mr. Isaac C. Pratt says:

"We of the younger generation do not work as hard, physically, as our elders worked, but we do endeavor, to the best of our ability, to preserve the standards of integrity and confidence on which their success was established.

22 trading days in February the average daily trading during the month was 118,156,000 bushels against the daily average during January of 107,359,000 bushels. In wheat futures the total for the month was 1,581,584,000 bushels, or a daily average of 71,890,000 bushels.

The largest trade in all futures during a single day occurred Feb. 11, when 192,700,000 bushels were sold. The largest single day's trade in wheat was 125,758,000 bushels on Feb. 5.

Combining the trading for all "contract markets" the total sales of wheat futures for February amounted to 1,781,067,000 bushels, or a daily average of 80,958,000 bushels. For all grains the total was 2,903,336,000 bushels, or a daily average of 131,969,000 bushels.

Revised figures showing the total volume of trading in grain futures, on the Board of Trade of the City of Chicago during the month of February, 1925, together with monthly totals for all "contract markets" as reported to the Grain Futures Administration of the U. S. Department of Agriculture. The figures listed represent sales only, there being an equal volume of purchases (expressed in thousand bushels [i. e., 000 omitted]), as follow:

DEPARTMENT OF AGRICULTURE HOUSE CLEANING

Department Heads Presenting Resignations to Secretary of Agriculture.

Considerable interest has been aroused over the resignation of various bureau heads in the United States Department of Agriculture. Where there is much smoke there must be some fire and the logical guess is that the officials who "beat it" when the new Secretary of Agriculture, W. M. Jardine, of Kansas, stepped in realized that their methods didn't or wouldn't suit the new chief. Here is how the Kansas City Drovers Telegram analyzes the situation:

"Whatever may have been the true motives for resigning, it is known that some of the policies of the departing heads were at variance with the ideas of the new secretary of agriculture.

Mr. Brand is the author of the McNary-Haugen bill, and Mr. Jardine was the first and only president of an agricultural college who had the nerve to come out in a public denunciation of such a piece of ostensible farm legislation. The breach between Jardine and Brand was further widened when the president's agricultural commission, of which Jardine was a member, refused to endorse the bill.

What misunderstanding, if any, exists between Chester Morrill and the secretary that would call for the resignation is not known. We can only presume. Mr. Jardine, starting business life as a cowboy, and on up through his various activities, has been conversant with conditions surrounding the market end of the live stock business. Through all the years he has been aware of the beneficence of the live stock exchanges, and has noted the safeguards they have thrown around the shipper of live stock. He has been conversant with the rules governing the conduct of the agents of the shippers, and has seen how the smooth operations of the market machinery to dispose of the property entrusted to the care of the commission man for its expeditious disposal, has been coincident with the highest type of integrity of the agents themselves.

And his being aware of all these things, one cannot but wonder if it ever has occurred to the Honorable Secretary, either before his appointment or since, that a considerable part of the activity of the bureau of which Chester Morrill has been the head, the packers and stock yards administration, has been the harassment of the fine institution that has been built up to expedite and safeguard the marketing of meat animals. Shall we not conclude that the Honorable Secretary, who is observing and watchful, is aware that the federal courts many times have upheld the exchanges, and that the packers and stock yards administration in attempting to force at law a commission man to barter with other concerns which he does not wish to have dealings with, has been extravagantly spending the people's money to accomplish an end which the constitution says can't be accomplished. The Honorable Secretary never has evidenced a belief in or desire for a sort of government of the kind called bureaucracy, and this may have some weight in explaining Mr. Morrill's resignation.

The truth of the business is, the Honorable Secretary may have had cause to wonder just what laudable end is served by the very expensive organization which Mr. Morrill has been heading. What does the packers and stock yards administration accomplish that the live stock exchange does not accomplish in getting to the stock owner receipts from sales at the earliest possible moment?

Anyway, whatever may be in the mind of the new secretary he will appoint men as chiefs who may be expected to get out of their respective positions all the good possible under the law authorizing them. And the public has sufficient confidence in Mr. Jardine to believe that if there is anything useful in the laws creating the bureau he will find it, and that if he doesn't find anything but bureaucratic harassment of established, useful and praiseworthy institutions, he will tell us candidly."

ARGENTINE CROP SITUATION UNEVEN.

Crops in certain sections of the northern provinces of Argentina are good, but losses in the south reach in some cases up to 80 per cent, according to a cable to the Department of Commerce. Drought has been a serious menace to cattle. Exports have been in excess of those of last year, and import trade is more active. Grain exports for November amounted to 95,000 tons of wheat, 361,000 tons of corn, 74,000 tons of linseed, 44,000 tons of oats, 1,000 tons of barley, and 11,000 tons of flour.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
March 9.....	89	..	19	47	45
March 10.....	24	1	27	62	13
March 11.....	38	2	17	26	36
March 12.....	56	3	13	19	15
March 13.....	31	3	6	20	18
March 14.....	49	3	9	28	29
Total	287	12	91	202	156

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Mar. 9.....	\$0.95@1.02	Mar. 12.....	\$0.95@1.02
Mar. 10.....	.95@1.02	Mar. 13.....	.85@.98
Mar. 11.....	.95@1.01	Mar. 14.....	.85@.98

Receipts of barley at Chicago for week ending Mar. 14, 1925, were 178,000 bus., compared with 165,000 bus. same week 1924; shipments, respectively, 58,000 bus. and 92,000 bus.

BARLEY MARKETS.

MILWAUKEE—The Milwaukee barley market continued dull throughout the past week and receipts were low and demand slack. Quotations, however, declined but 4@5c for the period, the lowest of any grain. Poorer grades moved very slowly with black oat mixtures especially neglected, while choice was scarce but saleable as seed. Receipts for the week were 156 cars as compared with 124 the previous week and 109 during the same week of 1924. Choice to fancy, 48 to 50-lb. test, quotable at 97@98c; fair to good, 44 to 47-lb. test, 92@97c; light weight, 40 to 43 lb. test, 88@94c; feed, 78@88c. Iowa quoted 88@98c, as to quality; Wisconsin, 88@98c; Minnesota, 88@98c; Dakota, 88@98c; and rejected, 78@90c.

KANSAS CITY—Four cars of barley comprised the week's receipts. They sufficed to meet a moderate demand from local and outside feed manufacturers. Prices were affected by weakness in other grains. A net decline of 2@3c a bushel was recorded, with No. 3 closing at 87@91c and No. 4 at 84@87c. Stocks decreased 1,000 bus. to 10,000, as compared with 245,000 a year ago. Favorable reports were received regarding seeding operations. Farmers were encouraged by the general rain of Thursday night.

DULUTH—Buyers' interest in barley was slow on this market during the last week. Receipts were straggly, amounting to just eight cars in the six days. About half the cars were applied on sales, and the rest were taken by dealers to fill orders. Closing prices are unchanged to 2c off at from 80 to 92c.

CHICAGO—Barley steadier market. Confidence returning, and, with lighter receipts, buyers inclined to anticipate future needs. Seaboard reports a good export demand for both oats and barley. Local receipts for week, 178,000 bu.; last year, 165,000 bu.; shipments, 58,000 bu.; last year, 92,000 bu. New York sold 300,000 bu. barley for export. Malt, 85@98c, with fancy mellow higher; feeding and mixing, 80@86c; screenings, 40@80c. Local inspection, 9 cars.

MINNEAPOLIS—Barley, like all of the other grains, came in for a few days of very hectic markets, going up and down the scale and finally showing a considerably firmer tone the last day of the week. Feeding quality was generally in poor request but malting and pearling barley was in fair to good demand throughout the week. Today's range of sales was 70@88c, as compared with 67@92c at the beginning of the week. Local elevator stocks, reported today, totalled 2,120,269 bushels vs. 2,110,535 last week and 514,019 a year ago.

Don't let your subscription lapse; you may lose valuable numbers.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending March 14:

	Mpls.	Dul.	Chi.	Win.	Mil.

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending March 14:

	Mar.	May.	July.	Sept.
9.150	@1.52 1/4	1.34	@1.36 1/2	1.21 @1.23 1/2
10.149 3/4	@1.53 1/4	1.35 1/2	@1.38 1/2	1.21 1/2 @1.23 1/2
11.144 1/2	@1.50 1/2	1.31 1/2	@1.36	1.19 @1.22
12.141 1/4	@1.46 1/4	1.28 1/2	@1.33 1/4	1.17 @1.20 1/2
13.125	@1.40 1/2	1.15	@1.26	1.06 @1.15 1/2
14.122	@1.30 1/4	1.14	@1.22	1.05 @1.11

Receipts of rye at Chicago for the week of Mar. 14, 1925, were 32,000 bus. vs. 65,000 bus. same week of 1924; shipments were 2,000 bus. vs. 10,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Mar. 14 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Mar. 9.	\$1.41 1/2	\$1.42 1/2	\$1.45 1/2	\$1.46 1/2	\$1.45 3/4
Mar. 10.	1.43 3/4	1.45	1.47	1.48 1/2	1.45
Mar. 11.	1.38 3/4	1.39 3/4	1.42 1/4	1.42 1/2	1.42 1/2
Mar. 12.	1.33 3/4	1.35 3/4	1.38 1/2	1.39 1/2	1.37 3/4
Mar. 13.	1.18	1.19	*	1.23 1/2	1.25
Mar. 14.	1.21 1/2	1.22 1/2	1.26	1.28	1.25

*No sales.

RYE MARKETS.

DULUTH — A precipitate drop of 22c was staged in the rye market here during the last week, of which 16c was accounted for in the record break of Friday. The acute weakness in rye was attributed to foreigners backing away at the previous higher levels and claims that holders of rye in the East are feeding it out to exporters at substantially below the prices asked on the Western markets. Spot No. 1 rye closed 22c off at \$1.22 1/4.

MINNEAPOLIS—Although the futures markets were off very sharply during the week, there was not much of any change in the comparative premiums and discounts for the cash article. The choice quality grain was sought after by milling interests each day but the medium and poor quality was very slow sale. Today No. 1 rye was quoted at 1 1/2 @1 1/2 c over the May and No. 2, 1c under at 1c over. Local stocks totalled 1,161,787 bushels vs. 1,154,358 last week and 7,924,819 a year ago.

NEW YORK—Late in the week there was some improvement in the export demand for rye and total sales for the week were estimated around 1 1/2 million bushels. Cash rye premiums were much firmer with a good demand in evidence for May shipment.

MILWAUKEE—Rye quotations declined 23@25c in the Milwaukee market last week but movement was good in response to an active shipping demand. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Dry and choice was scarce and in request. Considerable Wisconsin sold on a forward shipping basis but on arrival grades were lower and resulting settlements made accordingly. Receipts were 18 cars as compared with 18 the previous week and 24 cars in the same week of 1924. Market closed at \$1.20 1/2 @1.22 1/4 for No. 2, inside for Wisconsin, ranging at 6@8c under May price.

CHICAGO—Closed with gains of 3@5c for futures and steady on car lots. Trade was moderately large and the market firm, due to covering by "shorts" and extensive buying, which was influenced by reports of large export business. Seaboard reported 800,000 bu. to 900,000 bu. accepted since the close yesterday. Selling was light and scattered. Car lots were in fair demand at 3 1/2 @4c under May for No. 2. Offerings light. Local inspection, 3 cars. Seaboard clear-

ances none. No. 2 sold at \$1.26. No. 3 sold at \$1.16 1/2 @1.18 1/2. No. 4 sold at \$1.16.

The source of greatest wonder was the wide break in rye, which led to the belief that the European bread shortage, so much talked about by the bulls, is far from being as serious as has been advertised. Rye, as a bread grain, is fully as popular with Europeans as wheat, but at the low point on Friday May rye was approximately 57 cents a bushel cheaper than the best level of the season, while wheat showed only 39 cents decline.

Beans and Potatoes

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Mar. 14:

Beans—

Chicago—Fair trade. Good demand exists, but supplies light and decreasing rapidly. Prices right and shipments advised. Per 100 lbs.—Spot Navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.

Boston—Car lots, per 100 lbs., N. Y. and Mich. Choice hand-picked pea beans, \$7@7.15; fair to good, \$6.75; California small white, \$8.35@8.50; yellow eye, extras, \$7@7.25; red kidneys, choice, \$10.75@11; fair to good, \$9@9.50; California limas, \$14.50@15; native green peas, \$7@7.50; Canada, \$5.50@5.75; split, \$5.50@5.75. Jobbing prices 25 to 50 cents above car lots.

Portland, Ore.—Small white, 8@9 1/2 c; pink, 3 1/4 @9 1/4 c; bayo, 8 1/4 c; lima, 14 1/2 c; red, 9 1/4 c.

New York—Trade continued of small proportions yesterday with feeling easy and prices showed no material change. Pea beans sold mostly at the inside figure. Red and white kidneys moved slowly. California limas held about steady. Black eye peas unchanged. Beans —Domestic—100 lbs.: Marrow, \$9.75@10.25; pea choice, hand-picked, \$7@7.15; pea, screened and prime, \$6.50@6.75; red kidney, \$10.50; white kidney, \$9; lima, Cal., \$14.75@15. Imported, 100 lbs.—Marrow, \$9.25@9.50; white kidney, \$8.25@8.50; lima, Mad., 1924-25, \$12.75; 1923-24, \$12.25@12.50; 1922-23, \$9.50; lima, Europe, large, \$11.75; medium, \$11.25; small, \$10.50. Lentils—Chile, \$7.50@7.15; Russia—Giant, \$8; Avg., \$6.25@6.50. Peas—Domestic, 100 lbs.—Black Eye, \$11; yel. split, \$6.25@6.50; gr. split, \$8@8.25. Imported—100 lbs.—Green—Japan, \$6.50@6.75; Holland, \$5.75@6; yel. split, \$5.50@6; gr. split, \$8@8.25; Chick, Mex.—Imperial, \$12@12.50; Monster, \$11@11.50; large, \$9.50@10; small, \$7.50. Chic., Alg.—Large, \$7.50@8.

Potatoes—

Chicago—Idaho Russets, \$2.25@2.60; Wis., bulk, 100-lb., \$1.10@1.25; frozen and poor, 75@90c; Wis., round white, sacks, \$1.10@1.20; poor, 75@90c; Minn., \$1.05@1.15; Early Ohio, Red River, \$1.40@1.45. New potatoes—Idaho box, \$2.25@2.50; Fla., bbl., \$12@12.50. Sweet potatoes—Tenn., N. Hall, \$2.25@2.75; E. Jersey, kiln-dried, \$3.25@3.50; Ill. Jersey, hpr., \$2.50@2.75; Ill. Nancy Hall, hpr., \$2@2.50; bushel, \$2.25@2.50; soft and poor, \$1.50.

New York—Receipts yesterday included at Pennsylvania Railroad pier 29, 6 cars Florida barrel and 1 car Florida crate potatoes, 6 cars Southern lettuce, 2 cars Delaware basket sweet potatoes. Quotations are as follows: Me., bulk—150 lbs., \$2.10@2.50; 165 lbs., \$2.10@2.50; carlots, cwt., \$1.10@1.25; 150-lb. sk., \$1.85@2.15; state, bulk, 180-lb. sk., \$2@2.25; 165-lb. sk., \$1.85@2; 150-lb. sk., \$1.50@1.85; L. Sweet potatoes—Jy., bsk., 75c@1.50; Del. and Md., bskt., 75c@1.25.

SOY BEANS.

In addition to a growing demand for soy bean meal, a new form of feeding has developed, but it is certainly pref-

GOOD HOUSE

Write Us—COYNE BROTHERS
119 W. South Water St. CHICAGO

erable to use standardized properly ground soy bean meal, although the following item is at least interesting:

Though the work and equipment needed to cook soy beans might not appeal to most Ohio hog men, the practice ought to be profitable to men who produce pork on an extensive scale, in the judgment of J. F. Lyman, professor of agricultural chemistry at the Ohio State university.

"At present prices," Professor Lyman points out, "there is a saving of something like 70 cents a bushel when soybeans are cooked, and the extra labor and equipment should not offset more than half of the gross saving. Cooking the beans increases palatability more than digestibility. For that reason soybeans can take a larger place in the ration than usual, an important consideration in this time of high corn prices and a short supply."

BEAN STOCKS IN MICHIGAN.

Trading in Michigan beans has been exceptionally limited for five or six weeks as far as wholesale groceries are concerned and perhaps 90 per cent of our shipments have gone to the canners. In all of our experience we have never seen so little call for beans from the grocery trade as we have had for six weeks, and it is very hard to understand how the trade can continue for such a long period without replenishing stocks.

We are rather inclined to the belief that outside prices for several weeks to come will be \$6 to \$6.50 f. o. b. Michigan and above \$6.50 feel that sufficient offerings will be available from farmers and speculative holdings to supply any unusual increased demand, at the same time any decline to or below \$6 will influence further speculative purposes.

We do not believe the distribution of Michigan beans on this crop has reached the scope that was expected in considering the fact that our state controls perhaps 80 per cent of all white beans and we know that our own concern has been disappointed in the lack of orders from the far West and Southwest states, including Texas and Oklahoma. It seems that this business is going elsewhere and apparently there is no hope aside from advertising for Michigan if we get back into this Southwest trade in any sizeable volume.

The effort to raise funds in Michigan for putting on a national advertising campaign is progressing slowly but on the whole, in a satisfactory manner.—*Christian Breisch & Company, Lansing, Mich., by J. E. Maloney.*

BUCKWHEAT MARKETS.

MILWAUKEE—Current buckwheat quotations in the Milwaukee market are: Silver hull, per 100 lbs., \$2.10@2.15; Japanese, \$2.20@2.25.

BUFFALO—Buckwheat flour steady. 60-lbs. sacks holding 12 5-lb. bags, \$2.75@3.

MINNEAPOLIS — Buckwheat, Japanese, spot, \$2.10; silver hull, \$2.05; mixed, spot, \$2.05.

CHICAGO—Fancy Jap, \$2.50, and fancy silver hulled, \$2.35.

Crop Reports

Compiled by GEO. A. WELLS

OHIO.

Lima, O. (1): Corn and oats movement is very slow.

Bucyrus, O. (4): Farmers are not inclined to sell corn and oats now.

INDIANA.

Decatur, Ind. (7): No corn for sale here. Oats moved some time ago. Not much grain moving now.

Rensselaer, Ind. (1): Grain back on farms now in strong hands and will be marketed when price suits.

Frankfort, Ind. (2): Very little grain being marketed.

Tipton, Ind. (5): The disposition of the farmers is to sell corn and oats before spring work begins.

Winchester, Ind. (8): No corn or oats for sale by farmers. Corn rotting in cribs. Will be 25 to 35 cars of corn or substitutes shipped into this country for feed before new corn will do to feed.

Angola, Ind. (7): No corn and few oats for sale at any time. Barley acreage will be increased 100%.

Jasper, Ind. (3): Corn and oats were marketed very freely in the last 30 days. Need nice weather now for sowing oats.

Lawrenceburg, Ind. (9): Wheat generally looks good. No spring wheat here. Not much corn moving.

Bloomington, Ind. (3): Feeding and not selling both corn and oats. Lots of oats in farmers hands but very small amount of corn.

Winamac, Ind. (1): Very little corn and oats for sale.

Marion, Ind. (5): Very little corn for sale. Most farmers buying corn. No oats coming to market.

ILLINOIS.

Freeport, Ill. (4): Will have very little grain to ship until after corn planting.

Eureka, Ill. (1): Movement of corn and oats is light.

Princeton, Ill. (4): Most of the farmers will hold corn and oats until after spring work is done.

Ashton, Ill. (4): Farmers are not inclined to sell corn and oats at present time and prices.

Sidell, Ill. (8): Oats and corn are all gone.

Earlville, Ill. (4): Very light selling of corn and oats from now on until after corn planting.

Odell, Ill. (7): No wheat will be sown. Very little corn and oats will be sold until after seeding.

Vermont, Ill. (2): The farmers are slow sellers of both corn and oats.

Morris, Ill. (7): Movement of corn and oats is over for spring.

Highland, Ill. (6): Have very little corn to sell and no oats for sale.

Paris, Ill. (8): Wheat has come through the winter in good shape. There will be no corn moved before planting. Some farmers are selling oats.

Belleville, Ill. (3): Not much oats here. Always some corn moving about. Most of the farmers are holding for higher prices.

Mt. Pulaski, Ill. (5): Movement of grain about over. Very little until after spring work.

Riggston, Ill. (5): Will sell very little corn before next summer. No oats here for sale.

MISSOURI.

Harrisonville, Mo. (1): Some corn moved. New oats to move.

Carrollton, Mo. (2): No oats shipped in. Selling corn rather freely for the limited amount now to ship.

Lamar, Mo. (3): Movement of corn and oats will be light. 80% of the surplus corn and oats have been sold.

Springfield, Mo. (3): Some tendency to sell corn and oats but prices are firmly held.

Richmond, Mo. (2): No corn here to sell.

Chillicothe, Mo. (1): No corn or oats to sell.

Marionville, Mo. (3): Farmers not selling corn and oats. The majority of the farmers raised enough corn and oats for home consumption.

IOWA.

Marcus, Ia. (1): No corn or oats to be had. Many that had corn are now starting to feed cattle on account of higher priced cattle prospects. Farmers expected to run their cattle over but now feeding for June & July markets.

Indianola, Ia. (6): 90% of the wheat is sold. All other grain marketed only as between neighbors.

Belmond, Ia. (4): Farmers not disposed to sell corn and oats.

Randolph, Ia. (3): No corn and oats for sale here.

Jefferson, Ia. (5): Very little corn will be sold now before spring work.

Henderson, Ia. (3): Farmers will not sell corn or oats before summer, what is left is in strong hands.

Lowden, Ia. (8): All the grain growing here will be wanted in this territory. Corn and oats are not being sold.

Wall Lake, Ia. (2): Very little grain moving at present. No movement before spring work.

Whitten, Ia. (4): Oats movement very light. Corn considering the crop, a fair movement.

Gilbert, Ia. (5): Most of the farmers are holding for a little higher price. Not moving any more than necessary.

Moulton, Ia. (6): We have had a fine winter to feed stock, generally dry and cold.

North Liberty, Ia. (8): No corn for sale here.

New Sharon, Ia. (5): Plenty of corn for home demands if marketed as needed. Otherwise some will ship out and then ship in later.

Corydon, Ia. (6): Farmers have been selling corn and oats freely at Chicago prices.

Onawa, Ia. (2): Farmers are disposed to hold all grains at present.

Guthrie Center, Ia. (2): There is no rush to sell corn or oats at this time. The surplus is nearly all sold.

Oakville, Ia. (9): Corn and oats nearly all sold.

Clemons, Ia. (5): Very little corn or oats left in farmers hands to be shipped.

MINNESOTA.

Albert Lea, Minn. (6): There is very little corn left. It is mostly all fed up. Farmers are holding and storing their oats for higher prices.

Prior Lake, Minn. (6): Corn and oats are being held for over market value.

Donnelly, Minn. (2): Corn is all sold. There is no increase in the selling of oats.

Hutchinson, Minn. (6): There is no oats sold now and there will not be any for less than 50c.

Eden Prairie, Minn. (6): Oats and corn are all sold.

Warren, Minn. (1): Farmers selling oats and corn sparingly.

London, Minn. (6): Farmers are not selling their oats at present prices. They are holding for better prices. No corn for sale here.

NORTH DAKOTA.

St. Thomas, No. Dak. (7): No surplus of corn or oats for sale.

Ashley, No. Dak. (6): No corn to be sold here and spring work will begin about April 1st.

SOUTH DAKOTA.

Bridgewater, So. Dak. (8): Movement of corn and oats over until after seeding. Seeding will start this week if weather continues warm.

Beresford, So. Dak. (9): Not inclined to sell corn or oats at present market price.

Canton, So. Dak. (9): There is but little corn or oats for sale by farmers.

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

Brookings, So. Dak. (8): Farmers not selling on this break.

Brentford, So. Dak. (7): All of the corn and oats are sold.

NEBRASKA.

Nebraska City, Neb. (9): Very little corn being offered. Oats about all sold or fed.

Beatrice, Neb. (9): If market steadies and roads get in shape look for largest receipts of this crop.

Humboldt, Neb. (9): All grain will be consumed locally.

Roseland, Neb. (9): Farmers are holding wheat and corn for higher prices.

Neligh, Neb. (7): Farmers not selling corn at present prices. Those that have held this long will hold longer. About 15% of the crop left to sell.

Humphrey, Neb. (8): Not much grain for sale. Mostly fed up. No surplus on account of short crop in 1924.

Harvard, Neb. (9): Very little corn coming to market. Feeders taking all that is offered and hard to satisfy local demand at present.

McCook, Neb. (6): We do not anticipate a heavy movement of corn until after spring work is finished.

Superior, Neb. (9): Movement all grains now over for season. No oats and very little wheat. Not much corn left. Corn left will be held until next summer.

Orleans, Neb. (6): Selling corn freely. Holding their small supply of wheat.

Superior, Neb. (9): No movement of grain. Need rain badly.

Central City, Neb. (9): No oats. Our territory has been shipping in a lot from Iowa and South Dakota. Don't look for much corn until after planting.

KANSAS.

Concordia, Kans. (4): No grain moving.

Pleasanton, Kans. (8): Some corn moving.

Belleville, Kans. (4): Most all the farmers are holding what little corn and oats they have to market until after spring work is over.

Hillsboro, Kans. (5): Very little corn moving. Not many oats. Holding for higher prices.

Wellington, Kans. (6): Wheat seems O. K., but needs rain. Little early to tell about damage, if any.

Plainville, Kans. (4): General conditions dry. No corn and oats for sale. Uniontown, Kans. (9): Farmers holding back on corn since the slump in prices.

Neodesha, Kans. (9): Farmers are busy, not much corn moving. No oats to sell.

Mahaska, Kans. (4): Farmers would

sell corn and oats if the price was right but are holding for a higher market.

Greensburg, Kans. (6): There has been some damage to wheat estimated as high as 15%. We think it is too early to tell. Spring wheat not sown here.

Waldo, Kans. (5): Wheat crop practically lost over a large area.

Ashland, Kans. (3): No corn or oats to be marketed. Wheat was winter killed and is now being hurt by drought.

OKLAHOMA.

Enid, Okla. (4): Farmers will not sell corn and oats before spring work commences.

Geary, Okla. (2): Wheat damage cannot be estimated with any satisfaction until we have moisture and can note effect of moisture.

El Reno, Okla. (5): No grain of any kind moving at present.

Kingfisher, Okla. (4): It is getting very dry and need rain badly.

Marshall, Okla. (5): Only enough corn and oats to supply local needs. Farmers selling to each other freely. No stocks on hand in elevators.

Oklahoma City, Okla. (5): No serious damage yet but must have rain by 18th or serious damage will follow.

TERMINAL MARKETS.

[Concluded from page 25.]

Co., operating a grain, flour and feed business at Frederick.

Work has been completed on the last unit of the elevator of the Kimbell Milling Co. by the Jones-Hettelsater Construction Co., Kansas City, which erected the entire structure. Capacity of the complete elevator is 900,000 bushels.

The directors of the Texas Grain Dealers' Association, in session here March 7, selected Fort Worth as the place and Friday and Saturday, May 22-23, as the dates for holding the annual meeting. This decision was made by the directors in the face of a resolution adopted at the last annual meeting requesting the directors to select Houston as the place for the next annual meeting, in view of the preponderance of requests from members in response to my recent circulars requesting expressions from the members as to the place of holding this meeting being very largely in favor of Fort Worth. The Texas Hotel will be headquarters.

SIOUX CITY.

The terminal Grain Corp. of Sioux City has voted to reduce its capital stock 50 per cent.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

The Sioux City grain dealers appreciate very highly the assistance rendered by D. L. Kelley, of the South Dakota Railroad Commission; various dealers in and producers of grain in surrounding territory, who actively supported them in their efforts to obtain a fair and reasonable readjustment of the present rates, and also the sympathetic attitude of the representatives of certain railroads and markets.

Sioux City has asked only for rates from the territory tributary to Sioux City, in Nebraska, South Dakota and Minnesota, which are not higher than those voluntarily maintained by the carriers to Minneapolis, Omaha and other competing markets, for and outbound proportional rates from Sioux City to the southwest which are reasonable and properly related to the rates from Omaha.

Receipts—	Today.	Last week.	Last year.

PEORIA.

L. L. Eckard, Correspondent.

The general rains of last week were of great benefit to the winter wheat. Moisture was badly needed in many places.

Farmers report their ground in fair condition for sowing of oats, and the coming week will see many busy at this work.

Oats receipts continue light, with 5 cars on the market. Prices were fully 2 cents higher, No. 3 white selling at 47 cents.

Cattle and calves receipts were very light, with the tone about unchanged. Best calves were selling at \$12.50 and down.

No. 5 yellow, \$1.05@1.06; No. 5 mixed, 90c; No. 4 yellow, \$1.08; sample yellow, 82c@85c; No. 5 mixed, 90c@98c; No. 6 mixed, 86½c@88c.

Receipts of corn at Peoria have decreased considerable the past week with 39 cars Saturday. Prices were extremely irregular but said to range from 3 to 5 cents higher. There was only a moderate demand.

Country elevators report the movement of grain in this district at a standstill. Roads have been in bad condition and the continued drop in prices has caused the farmers to forget the market at the present time. There is a very small amount of wheat left in the farmers' hands in this section.

Hogs at the local yards were quoted 15¢ 20¢ lower Saturday after showing a steady advance all week. An extreme top of \$13.85 was paid for the best heavy hogs, with the bulk of 200 to 250-pound average selling from \$13.65@13.75. Hogs at \$20 to 160 pounds were quoted at \$12@13, with packing sows \$12.75 down. Trading was fairly active, with receipts around \$12 a head.

Grain receipts and shipments at Peoria for week ending March 14, as compared with same week last year, as reported by the secretary of Peoria Board of Trade:

Receipts—	1925	1924
Wheat	8,400	20,400
Corn	501,450	220,750
Oats	194,400	205,600
Rye	1,200	
Barley	9,800	35,000
	715,250	481,750
Shipments—	1925	1924
Wheat	8,400	18,000
Corn	433,100	149,050
Oats	237,600	178,200
Barley	7,000	16,800
	686,100	362,650
Flour—	1925	1924
Receipts	46,100	56,600
Shipments	47,400	51,600

CHICAGO.

S. H. Jones was observed as one of the visitors to the Buffalo Corn Exchange last week.

Frank G. Ely was a recent visitor on the floor of the Boston Grain and Flour Exchange.

C. E. Fox was noted as a recent visitor on the floor of the Baltimore Chamber of Commerce.

Logan & Bryan of this city announce the opening of a branch office at Hollywood, Calif., under the management of Henry Nelson.

Beginning Monday, March 30th, the enlarged customers' room of Chas. Sincere & Co. will be open for business. The former

MEN!

Write for FREE Booklet upon the Peerless System of Better Grain Bookkeeping

Business Equipment

120 South Jefferson Ave. Peoria, Illinois

address and general offices at 231 South La Salle street are maintained but the customers' room will be in rooms 679-81-83 in the same building, which is the Illinois Merchants Bank.

George H. Tanner, member of the Board of Trade, and connected with the grain department of Wm. H. Colvin & Co., was a visitor in Philadelphia recently.

Sydney Anderson, president of the Millers' National Federation, made an address to the members of the Chicago Flour Club on March 12, urging the co-operation of milling executives, members of the various clubs and the flour trade in general as the thing more than any other to settle the questions effecting the industry.

Armour & Co. has placed in operation a new division of its business, known as the Analysis and Control Division. It will be the function of this department to make every branch of the big packing organization a money earner. One of its chief functions will be the smooth welding of the Morris units into the parent organization.

George C. Bryant of Indianapolis, for many years agricultural statistician for Indiana of the United States Department of Agriculture, has been selected as crop expert for the Jackson Brothers' Co. Mr. Bryant entered the service of the Federal government in 1900 with the agricultural division of the Census Bureau. He later became identified with the Department of agriculture and served for 14 years as statistician and crop expert for the Federal Government in Indiana with headquarters in Indianapolis. He retired from this position in August, 1924, to direct Federal census work in Indiana. With the completion of this work now at hand, Mr. Bryant has accepted the position with Jackson Bros. Co.

Quaker Oats Co. stockholders, at a meeting last week, approved a change in the authorized common stock capitalization from \$25,000,000, consisting of 250,000 shares of \$100 par value, to 600,000 shares of no par value. It is the intention of the company to issue four new shares for each share of common stock outstanding. In order to make no change in the relative voting power of the common and preferred shares, the latter will have four votes for each share.

There are several details to be worked out yet before the actual exchange of securities is made, according to officials of the company here. As soon as these matters are adjusted, the executive committee will meet and decide upon a date when the exchange will be made effective.

Directors of the company have announced that the new common will be placed on a \$3 annual dividend basis, or equivalent to the \$12 rate paid on the old stock. Special dividends will be declared, it was announced, as earnings of the company and its surplus over capital requirements.

All retiring directors were re-elected, with R. Douglas Stuart, vice-president in charge of advertising, being chosen as a director to fill a vacancy caused by the death of R. W. Roloson of Chicago. The officers were re-elected.

Trade Opinion.

The break in futures for various grains has established a more reasonable range of prices; more in keeping with natural conditions that normally bear on values. The break in wheat encouraged free purchases for foreign account. The volume of the corn movement from the country stations will for the time be an important factor. There should come a very much more active trade for distribution to maintain important advances in futures. Only by further liberal rye sales abroad can the big stocks in North America be reduced to a comfortable volume.—Pope & Eckhardt Co.

Wheat opened irregularly and after holding momentarily again encountered liquidation and heavy eastern selling which carried prices down to a new loss on this turn, but meeting enormous short covering and heavy buying, evidently against a very large export business which worked on the break. Bad weather over the corn belt will interfere with the movement and it is likely that the cash situation will show further betterment. We believe that liquidation has pretty well run its course in oats as in all other grains and that a more settled feeling exists at the close today.—Bartlett, Frazier Co.

The wheat market had a weak undertone during the past week, influenced largely by a declining tendency in Liverpool, where prices declined an equivalent

of about 10 cents within a week. The condition of the growing wheat is nearly though not quite average in the United States and about average in Europe, being better in western than in eastern and southeastern Europe. The world acreage is about 3.1 per cent larger than last year. The supply of corn eating animals has been reduced, but not in proportion to the reduction of corn supplies.—Clement, Curtis & Co.

Wheat cables rather heavy after the early bulge, with big world's shipments effecting sentiment abroad. However, North American clearances are largest for any week in some time, at 7,644,000 bu. If our wheat continues to clear at same rate as last week, when it was double a year ago, our stocks will soon show the result. While nervous and violent fluctuations are to be expected, we favor the buying side.—Logan & Bryan.

A renewal of export inquiry, about a million bushels being reported as having been taken at the seaboard, caused a much better tone in the wheat market after renewed liquidation, which was present at the opening, influenced by the weak Liverpool cables. The technical market has unquestionably been bettered by the drastic decline. After renewed liquidation in rye, a firmer tone developed and more outside interest was present, due to reports of from 700,000 to 800,000 bu. of rye being taken at the seaboard.—J. J. Badenoch Co.

SEED HELP FOR CANADIAN FARMERS.

Authority for the Government to grant aid to farmers in distress in unorganized territory by supplying seed grain on credit, has been granted through a bill introduced by Hon. Albert Prefontaine, minister of agriculture, for that purpose.

In committee of the whole considering the bill, C. A. Tanner, Kildonan-St. Andrews, raised the question of assistance to farmers in organized districts, claim-

ing that some municipal officers had refused to furnish seed without cash. Mr. Prefontaine said there was legislation to deal with the organized territory and a municipality that took that stand was not dealing fairly by the people. F. Y. Newton, Conservative, Roblin, said the same thing existed in Roblin and suggested the minister inquire into the matter. He also expressed the fear that the limit of credit provided in the bill was not sufficient.

Mr. Prefontaine said the limit was fixed after receiving numerous petitions for aid. All the requests were for small quantities of seed and he did not think there would be many cases when the limit of \$150 would be reached, the average in the petitions being about \$75. R. G. Willis, Conservative, Turtle Mountain, said the municipalities should accept the responsibility for supplying seed to the people of the municipality who required it. Where the notes were not met it was the fault of the municipal authorities. He felt the minister should explain to the municipalities what authority they had and see that they took some action.

A building is to be erected at once at the Manitoba Agricultural College for use in research work in connection with grain rusts.

One acre has been offered to the Dominion Government as a site for the building on the Agricultural College grounds, and twenty-five acres on which experimental work can be carried on in the study of the growth and propagation of rusts.

FARM RESERVES OF GRAIN.

Reserves of grain in farmers' hands on March 1 for a series of years as arranged by THE PRICE CURRENT-GRAIN REPORTER from data published by the Agricultural Department, all figures being adjusted to Census and revised crops:

Wheat			Corn			Oats		
% of crop.	Bushels.		% of crop.	Bushels.		% of crop.	Bushels.	
1925.....	13.0	113,928,000	32.9	801,609,000	35.6	550,342,000

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Mar. 14:

Terminal Markets

TOLEDO.

S. M. Bender, Correspondent.

Grain inspections for the past week were as follows: 28 cars of wheat, 178 cars of corn, 45 cars of oats, 2 cars of rye. Total, 253 cars.

Mark N. Mennel, president of the Mennel Milling Co., returned last week from a trip to several eastern cities where he called on their representatives.

Toledo's flour production as reported by local mills for the past week was 27,350 bbls. equal to 57 per cent of capacity. The week before it was 28,200 bbls. and a year ago last week was 35,200 bbls.

Ohio's farm reserves of corn on March 1st were less than half those of a year ago at 26,572,000 bus. Reserves of wheat at 6,343,000 bus. compare with 11,120,000 bus. a year ago. Oats were 24,277,000 bus. vs. 18,329,000 bus. a year ago.

The Ohio grain dealers' association will meet in Toledo on June 24-25. The Chamber of Commerce Building will be headquarters for the convention and banquet. Toledo dealers will be hosts to the visiting grain men and are planning some excellent entertainment for their amusement.

Such wild markets as have been witnessed the past week have attracted many traders and those curious to see the markets to the local exchange floor. Commission firms say such trading and wide fluctuations have been passed since the war days. Local offices have been busy figuring margins and getting traders in and out without making any serious errors.

A feature of the week in this market was a slightly improved demand for soft wheat following the break. A better trade is expected when the market becomes steadier. The flour sales have been slow with mills and buyers seeing the uncertain trend in grains have backed away from purchases. Receipts of corn have been heavy, most of it coming from western markets that have been under Toledo. Off-grades have been selling at wide discounts under the contract grades. Oats have been under heavy pressure and prices the lowest since harvest. Large stocks are a continual hoodoo to buyers in all parts of the country.

MILWAUKEE.

D. K. Steenberg, Correspondent.

W. O. Goodrich, Jr., of the W. O. Goodrich Co., lined crushers, Milwaukee, has purchased a membership in the Minneapolis Chamber of Commerce.

Annual membership dues for the ensuing year will be continued at \$100 according to a recent decision of the board of directors of the Milwaukee Chamber of Commerce.

Shipments of grain from Milwaukee last week were 214,331 bu. oats, 68,575 corn, 61,550 barley, 40,550 wheat, 9,060 rye; total 394,066 bu., against 541,715 the preceding week and 742,130 a year ago.

Receipts of grain at Milwaukee last week were 156 cars barley, 301 corn, 101 oats, 100 wheat, 18 rye, 1 flax, 13 miscellaneous; total 690 cars, against 543 the week before, 637 a year ago and 774 in 1923.

J. L. Bowles, one of the most prominent traffic men in the United States, has recently been reappointed as manager of the traffic department of the Milwaukee Chamber of Commerce for the ensuing year.

Prices for the week are again lower together with the losses sustained in futures and wheat is 11@12c lower for this period. rye 23@25c, corn 5@7c, oats 6@6½c, and barley 4@5c. Offerings and demand moderate.

Theft of two tons of medium red clover seed, valued at \$1,500, from its warehouse at Hillsboro, Wis., has been reported by the Vernon County Milling Co. The milling company is offering a reward of \$200 for information leading to the conviction of the guilty.

LeRoy LaBudde of the LaBudde Feed & Grain Co., Milwaukee, spent two days at Chicago last week. Mr. LaBudde says he made the trip to look over some goslings and ducklings but in our experience most men interested in poultry go to Chicago for chickens.

The Ladish-Stoppenbach Co. has commenced operation of a feed mill in the building erected for the Parry Products Co. on National avenue, Milwaukee. The mill will have a capacity of ten to fifteen cars a day and replaces the company's mill at Jefferson Junction which was destroyed by fire last December.

The Vernon County Milling Company's warehouse at Reedsburg, Wis., was destroyed by fire on Thursday, March 12, in a blaze which wiped out most of the business section of the village. It was the second disastrous fire which the city has experienced in two years and caused an estimated property loss of \$50,000.

Milwaukee milling output last week consisted of 7,500 bbls. of wheat flour as compared with 7,400 bbls. the previous week and 2,000 bbls. in the same week of 1924. Receipts of flour at Milwaukee last week were 16,500 bbls. as compared with 24,150 bbls. last year and shipments were 20,820 bbls. last year as compared with 21,630 bbls. during the same week of 1924.

Election of officers of the Milwaukee Chamber of Commerce will be held on Monday, April 6, at which time a president, two vice-presidents and a secretary-treasurer will be chosen for one-year terms; three directors for three-year terms and three members of the board of appeals for two-year terms. Initial election caucus will be held at noon on Saturday, Mar. 21, and the primary election will be held from 10 a. m. to 2:30 p. m. on Saturday, Mar. 28.

Joseph Straub, Lomira, Wis.; Charles Nummedor, Waupun, Wis.; Henry Menger, Allenton, Wis.; J. T. Zaske, Green Bay, Wis.; K. B. Jeffris, Janesville, Wis.; R. H. Jones, Cambria, Wis.; T. Nelson, Hartland, Wis.; F. J. Anderholm, Clear Lake, Wis.; C. H. Peterson, Minneapolis, Minn.; E. L. Kabot, Menomonee, Wis.; R. Edward Schley, Beaver Dam, Wis.; J. M. Blair, Topeka, Kans.; Frank Turow, Menominee Falls, Wis.; E. Stewardt, Beaver Dam, Wis.; A. Kroehneke, Grafton, Wis.; J. A. McIntosh and Fred Ehling, Eyau, Wis.; Fred Iverson, New Holstein, Wis.; Burton Huebner, Forest Junction, Wis.; and M. R. Gannon, Sioux City, Ia.

BUFFALO.

Fire in the elevator of the General Milling Co. on March 4 caused a loss of \$100,000. The building was a five-story wooden structure and contained about 20,000 bus. of corn, oats and wheat used in making dairy feed.

Visitors to the Buffalo Corn Exchange during the past week included: A. W. Woods of Woods & Sprague Milling Co., Albion, N. Y.; T. P. Gaines, flour and feed, Sherburne, N. Y.; S. H. Jones, grain dealer, Chicago; F. T. Benjamin, flour and feed, Canastota, N. Y.

The Niagara, Lockport & Ontario Power Co. has purchased the plant of the Cataract City Milling Co. at Niagara Falls. The milling firm will continue operation as at present except that its water power rights will be taken over by the power company and electrically driven equipment will be installed.

The Marine Elevator Co. announced this week that it would erect a 2,000,000 bu. grain elevator on the Buffalo River, between the American and Dellwood elevators, where it has a seven-acre site. Work will be started immediately and completed this fall.

An entire train of 20 cars of oatmeal, the largest single shipment ever sent across the Continent, was shipped last week by the H-O Cereal Co., Inc., of Buffalo, to San Francisco. It is stated that the shipment is for the trade of San Francisco and its environs. H-O products were first introduced in California last June. The H-O company is now a subsidiary of the Standard Milling Co.

OMAHA.

Leigh Leslie, Correspondent.

Edward Porter Peck, vice-president and general manager of the Omaha Elevator Company, was in Chicago on business last week.

The twelve-year-old son of Hugh A. Butler, president of the Butler-Welsh Grain Company, died at the home of his parents here Wednesday, of pneumonia. The funeral was Saturday.

The Omaha Grain Exchange has received hundreds of telegrams and letters from grain dealers and farmers in western Nebraska and in Colorado congratulating it on its radio market reports. Since the government increased its wave length to 354 meters, station WAAW has been able to send its reports to the western territory without the least difficulty.

Anderson, statistician in Nebraska for the Bureau of Crop and Livestock Estimates, said, "The fall sown grain was not suffering greatly from want of moisture, but the rain Friday night, followed by snow, will prove valuable. The drop in temperature by which the storm was accompanied need cause no alarm. Winter wheat and rye are in a healthy condition in this state except in the southeast part, where the snowfall was unusually heavy."

In further connection with comment in the Price Current-Grain Reporter on the customary waste experienced in municipal power plants, the following Nebraska changes are interesting—Dalton, Nebr., citizens are considering disposing of their municipal plant to the Public Service Co. at Scott's Bluff. Similar negotiations are under way at Greeley and the city council at Fullerton has signed contracts with the Nebraska Gas & Electric Co. for their service. Scotia has discontinued its municipal electric plant and is now securing service from Loup City. Hampton is buying electric service from Aurora.

E. Stockham Grain Co. is discontinuing business.

Receipts and Shipments.

	February—	1925.	1924.
Receipts—			
Wheat	1,520,400	1,731,800	
Corn	1,183,000	4,683,000	
Oats	1,028,000	1,244,000	
Rye	60,200	54,600	
Barley	28,800	88,000	
	3,820,400	7,801,400	
Shipments—			
Wheat	2,048,200	1,353,800	
Corn	1,244,600	4,477,200	
Oats	1,718,000	1,800,000	
Rye	29,400	42,000	
Barley	32,000	84,800	
	5,072,200	7,757,800	

CINCINNATI.

George Mosbacher, Correspondent.

The demand for oats was somewhat better, but not urgent. Receipts were larger and stocks increased, but the market was easier and about 5c lower with options.

Chas. B. Hill, who has been connected with several of the leading hay firms of Cincinnati, and who is regarded as one of its best hay salesmen, has entered into a partnership with Elza Gabriel, of Elza Gabriel & Co. of Prospect, Ohio, effective March 15. Charley believes the prospects for his personal success will be improved by a large percentage as Mr. Gabriel is one of the largest handlers of hay in Ohio. He leaves with the best wishes of the entire trade.

CHAS. B. HILL.

Total stocks of grain in Cincinnati elevators for the week ending Friday, March 6, and week previous are as follows:

	Mar. 13, 1925.	Mar. 6, 1925.
Wheat	273,855	280,733
Corn	277,999	240,620
Oats	119,426	135,136
Rye	5,688	5,888

The elevation of Joseph Wilshire to the presidency of the Fleischmann Co. as a result of the recent death of Julius Fleischmann was received here with much gratification by his friends, who believe him deserving of the promotion through his many years of faithful service. Mr. Wilshire has supervised virtually all the activities connected with the sale and distribution of

The Rocky Mountain Grain Co.

Always in Market
All Grain

yeast, and is especially fitted for his new post.

The fondest hopes of Cincinnati Chamber of Commerce supporters are to be realized within the next twelve months according to E. H. L. Haefner, chairman of the Chamber Building Committee, who announced the acquisition of properties at the southwest corner of Fourth and Sycamore streets as a building site for a new Chamber of Commerce edifice. The contemplated improvement will involve an outlay of upwards to \$1,000,000.

Of that amount the Real Estate Board of the Chamber of Commerce now holds \$615,000, obtained through the sale of the old Chamber of Commerce property at Fourth and Vine streets to the Union Central Company in 1911.

The cash wheat market here was hardly deserving of mention insofar as the amount of business transacted was concerned, and little resistance was offered to the sharp option declines. Mills were practically out of the market because of the erratic changes in prices, and excepting a few spot purchases for contract shipment to mills there was nothing doing. Declines were the severest of the crop showing a loss of 19c a bu. on Friday and 14c for the week.

The corn market was influenced a great deal by the action of wheat but displayed some strength early on the government report on farm reserves, and particularly on the scarcity of good seed corn. The daily concessions recorded in Western markets was also a weakening factor in local cash values, which at the end showed losses of 7@10c for all kinds. The demand was slow at all times, and the bulk of the rather liberal receipts were absorbed by elevator interests.

Members of the Grain and Hay Exchange will enter the dining hall of the Hotel Sinton on April 1st to celebrate the seventh anniversary of its withdrawal from the Chamber of Commerce as an independent business and financial institution. Just what the officials of the organization will suggest for the meeting has not been announced, but an elaborate program is being arranged by President Frank L. Watkins and Executive D. J. Schuh and able speakers and a good dinner and music will be provided to entertain the members and make the evening an enjoyable one.

The J. Charles McCullough Seed Co., who occupy a most prominent position among the seed houses of the Middle West, and who are deserving of much credit for their progressive business methods, will, owing to the increase in the volume of their trade, begin the construction of a new building with a frontage on three streets, Eggleston Ave., Fifth and Lock Streets, to represent an investment of about \$1,000,000. The new building will be of steel, concrete and brick construction, and will have switch trackage with an eight-car capacity on Eggleston Ave. Work will begin this week and it is expected to be completed by next December. The plant will be equipped with the most up-to-date machinery for cleaning and handling grains and seeds. All of the activities of the firm, which now maintains several warehouses in the bottoms section of the city, will be housed in the new building, except the salesroom, which will be maintained at 288 East Fourth Street.

MEMPHIS

George Williamson, Correspondent.

H. W. Blasler, of Gardner, Kans., was a recent visitor at the Merchants Exchange.

Receipts for the past week were 171 cars of corn, 166 of oats, 73 of hay and 31 of alfalfa meal.

The slump in grain did not catch many of the local people long of the chalk marks, but most of them suffered because of the large stocks of corn and oats on hand.

On March 14 track quotations were nominally \$1.16 for 3 white corn, \$1.12 for 3 mixed, and \$1.17 for 3 yellow. Three white kafir was quoted at \$1.90 and 3 yellow milo at \$2.15. Oats are very unsettled but track 3 white are quoted at 51 to 51½c.

The membership of the Merchants exchange is now down to 191, only nine under the present limit of 200. Since the recent change in rules and regulations as to memberships 33 resignations have been

Rain, sleet and snow, accompanied by a high wind and lower temperature, fell over Nebraska Friday and Friday night, and reports received here indicate that the moisture was of distinct benefit to the growing wheat and rye crops. Aaron E.

The board of directors of the Merch. Ex. at its last meeting ratified the applications of the Chase Bag Co., represented by Jos. D. Crump, and of E. R. Gardner, Jr., Frank J. Gillespie has asked to be named floor representative of the Gillespie-Clark Hay and Feed Co.

Weather conditions have been favorable throughout this territory for farm work nearly all the week and progress was satisfactory. The rain Friday night followed by the cold wave, however, put a stop to work. With the return of warm weather some planting of corn will be started, and early advices point to a fairly large acreage.

Business was slow enough, according to the local dealers in grain and feed, but is badly upset now, due to the wildness of the grain markets. Buyers are taking just as little as possible, and the slight improvement which was just getting started has been given a setback and must now come again. Quotations have been almost impossible to make for the past couple of days and are entirely nominal.

NEW ORLEANS.

M. L. Davis, Correspondent.

Standard Blackstrap Molasses is firm at 13c per gallon f. o. b. tank cars New Orleans; light blackstrap is quoted at 14c per gallon.

Stocks in elevator as of today are: Wheat, 1,186,000 bu.; corn, 489,000 bu.; oats, 301,000 bu.; rye, 20,000 bu.; barley, 3,000 bu. Cars on track, wheat, 23.

The recent sharp declines in the grain markets have served to increase the inquiry for domestic corn and oats and in the past few days there have also been numerous export inquiries from Mexico, Cuba, and the West Indies.

Alexander Legge, president of the International Harvester Co., accompanied by H. L. Daniels, manager of the Twine & Fiber Department, spent some time in New Orleans this week upon their arrival from Havana. Mr. Legge and Mr. Daniels while in the city inspected the extensive twine plant of the company, which is located in one of the buildings of the Army Supply Base.

From the appearance of the Public Grain Elevator's wharves this week it would seem there has been a real revival of River traffic. Fifteen barges, containing approximately 700,000 bushels of wheat, of the Mississippi Warrior Service, Goltra Barge Line, and the West Kentucky Coal Company, were in port at one time. The Public Grain Elevator is working night and day in order to facilitate the unloading of barges and no delay is being experienced with the River movement.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were one hundred and twenty-two cars.

Albert F. Conrad of the Updike Grain Corporation at Sterling, Colorado, was a recent visitor in Denver.

T. M. Clark of the Security Elevator at Hutchinson, Kansas, stopped in Denver on his return trip from the coast where he has been vacationing for the past month.

At the annual meeting of the Denver Grain Association the following officers were elected: O. M. Kellogg, president; R. P. Quest and H. D. Williams, vice-presidents; F. R. Houlton, treasurer, and C. B. Rader, secretary. The secretary's report showed that the fiscal year just closed was the best in the history of the Exchange. A little over 10,000 cars were handled which is an increase of about 1,300 over last year. Among the out of town members of the Exchange who attended the meeting were W. Carey Cook, G. B. Irwin and R. M. Strang of Fort Collins, Harry Kelly and Ray Couzens of Greeley, Harry Williams of Berthoud, C. B. Seldomridge of Colorado Springs, and J. R. Forsythe of Longmont.

NEW YORK.

J. M. Nugent, Correspondent.

The co-partnership of MacWatty and Flahive has been dissolved by mutual consent, but John Flahive will continue in the grain brokerage business under the name of Flahive and Company.

During the past week the following visited the floor of the New York Produce Ex.: J. T. Neal of St. Louis; H. B. Smith of London; W. L. Reno and E. W. Place, both of Chicago; E. C. Starr, Charles Varga and B. L. Wells, all of Boston; L. Barrett of Buffalo, and J. W. Daniels of Minneapolis.

Early in the week, there was a fair demand for wheat for export, which was followed by a period of dullness, but when futures in Chicago and Winnipeg broke sharply on Friday, it was noticeable there was some improvement in the export demand the following day. The export business in wheat for the week could be roughly estimated around three to four million bushels of wheat in all positions.

Flour.

Sharp reductions approximating fifty cents to seventy-five cents per barrel occurred in flour during the week, this being the second big cut made in as many weeks. Business came to a complete standstill as a result of the demoralized state of this market, as well as wheat.

There were rumors of some pending export business with Russia, but the big

break in the market shut off actual trade. Spring Patents were quoted at \$8.65 to \$9.00, soft winter straights \$8.40 to \$8.75, and hard winter straights \$8.50 to \$9.00 per 196 lbs.

DULUTH.

S. J. Schulte, Correspondent.

The Occident Elevator Co. has completed the shipment of 175,000 bushels of No. 2 durum from its elevator here for delivery at Philadelphia and St. John, N. B. The grain was for export on account of the Ward-Ames Co.

Thomas Gibson, the veteran grain commission man, left at the end of last week to join the Duluth contingent of grain trade vacationists at Florida winter resorts. The list still down there includes Charles F. Haley, H. S. Newell, C. T. Mears and Ward Ames.

The Duluth Board of Trade adjourned at 12 o'clock noon last Monday out of respect for Martin L. Jenks, a former president who died in Florida where he was endeavoring to recuperate his health. Mr. Jenks' funeral, held last Monday afternoon, was largely attended.

James F. Graves, V.-P. of the Capitol Elevator Co., has returned from a vacation trip at San Diego and other Southern California points. He came back bronzed, and as he expressed in good shape to withstand any excitement in the grain marketing game that may develop during the next few weeks.

The movement of grain from the country to the elevators here was light during the last week and from present indications dealers here are of the opinion that sufficient space will be afforded to take care of receipts up till the opening of lake navigation. Stocks in the houses now approximate 30,750,000 bushels and all of the companies with the exception of the Consolidated are finding it necessary to conserve their space as far as possible in order to be able to carry through. The heavy recessions in grain quotations recently is expected to lead to a tightening up in offerings on the part of farmers and interior elevators holders.

Commission men on this market are feeling decidedly hazy regarding probable conditions in the trade during the next few weeks on account of the severe jolts that have been sustained by the public through the slide in prices. Dealers here would feel well satisfied to see quotations held at around their present level between now and the harvesting of this year's crops. They realize that the prosperity of the Northwest is dependent upon the crop outputs during the coming seasons and the prices realized by growers. Grain men here propose to do everything in their power to promote diversified farming in the Northwest states, feeling that farmers would be flying the face of fate if they persisted in the one-crop game. Companies with line elevators over the West are advancing the diversification idea in every way possible and they are hopeful that the movement will continue to gain ground.

Flour Prices Weaken.

Flour market sold off during the last week in line with the course in wheat. Trade was light with jobbers doing little and disposed to hold back. Family patents closed 65 cents off at \$8.60, and bakers' patents 65 cents off at \$8.35.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Local wheat prices show ten cents decline for the week ending March 14th, on hard winters; soft is 13 to 15c lower. Corn has declined 1 to 5 cents, with top grades mostly 4 to 5c lower. Discounts for lower grades have narrowed, and Nos. 4 and 5 are quoted today about the same as a week ago. Oats prices are four to 5 cents lower for the week. Arrivals of all grains moderately good for this season.

The Burlington Public Elevator has under construction at this time eighteen new concrete storage tanks, which will increase the capacity of that plant about 400,000 bushels, and bring the total capacity to about 900,000 bushels. The new storage unit is being built south of the engine house, whereas all present storage is in the north unit. The piling work is well toward completion, and it is expected to finish the entire job by July 15th, in time for the new wheat movement. The Burrell Engineering and Construction Co. of Chicago is doing the work.

Visitors on the St. Joseph Grain Exchange during the week ending March 14th included: J. Hadorn, Savannah, Mo.; H. C. Bailey, Quitman, Mo.; J. T. Patten, Higgins, Texas; M. D. F. Whittaker, Troy, Kans.; C. P. Raiser, Forest City, Mo.; W. H. Creamer, Stewartville, Mo.; C. L. Cline, Maryville, Mo.; E. W. Beekland, North Platte, Nebr.; C. L. DeLong, Nebraska City, Nebr.; S. Richards, Orleans, Nebr.; J. S. McCaull, Minneapolis, Minn.; T. P. O'Neill, Beattie, Kansas; A. Marleson, Maysville, Mo.; H. C. Gregory, Diller, Nebr.; F. Woolridge, Bigelow, Mo.; Wm. Steinfeldt, Hanover, Kansas; J. B. Lw.

Tarkio, Mo.; T. J. Nauman, Craig, Mo.; E. Stockham, Omaha; M. Murray, Denton, Nebr.; W. H. Stipp, Plattsburg, Mo.; Thos. Hickey, Stewartsville, Mo.

LOS ANGELES, CALIF.

O. G. White, Correspondent.

Grover Hill, of the J. B. Hill Company, Fresno, was a business visitor in Los Angeles this week, a guest of Smith & Scott, Inc., on the floor of the Exchange.

Brazil is making large demands for Northwest flour. The Swayne & Hoyt steamer West Cactus, due at Los Angeles March 9th, has been supplied with about 10,000 barrels as part of its cargo.

W. F. Heck, of the W. F. Heck & Company, Pittsburgh, Pa., and president of the Pittsburgh Grain & Hay Exchange, was a visitor on the floor of the Exchange this week. Mr. Heck has been in the city for the past three weeks, spending a much needed vacation and will return east about the 15th, going by way of San Francisco and Salt Lake City.

The Atlantic Coast Committee of the U. S. Intercoastal Conference held a meeting in New York last Friday and decided on several changes in the westbound schedule, among them being the following: The carload rate on copra cake, cotton seed cake, peanut cake, soya bean cake, etc., was cut from 50c to 40c. Minimum weight on cereals was reduced to 10,000 pounds, expiring at seaboard on June 30th next.

Final figures submitted by cotton ginners in Imperial Valley indicate a total of approximately 95,000 bales of cotton ginned this season. Of this total 70,000 bales were grown in lower California and the remaining 25,000 bales were produced in Imperial county. The value of the Imperial county crop is given at \$4,000,000, while that in lower California was worth \$8,000,000. The yield on the smaller acreage farmed in this county was declared to have been higher than on the larger plantations in Mexico. Planting for the new season is said to indicate a decrease of acreage in this county, with an increase in lower California.

There has been but little activity among the traders on this market for grain and grain products. The demand has been light owing to the consumer having been well stocked for the past several weeks. The receipts have been normal for March, and while they have been light there still remains some cars on track at the week end. Considerable wheat has arrived, the greater percentage going direct to the mills. The country dealers are now using grain sorghums, corn and oats in making their balanced rations for the poultry trade which is a great factor in this market. No. 3 yellow corn is quotable at \$2.60, No. 2 kafir corn \$2.20, Colorado millrun is being offered at \$35.00 with \$36.00 bid. Kansas bran, \$35.00. There has been no change in barley and can be quoted at \$2.25 to \$2.30 per hundred pounds. April barley has shown a decline and is quoted today at \$2.07½. Alfalfa meal, medium ground, \$34.00, and alfalfa molasses \$31.00. Rolled barley, \$52.00. Beet pulp unchanged at \$40.65.

BALTIMORE.

Robert C. Neu, Correspondent.

Total stocks of all grains in Baltimore elevators on March 10 were 11,106,389 bushels, in which quantity there were 6,901,000 bushels of rye.

The suit brought by Louis Blaustein for the appointment of a receiver for the Atlantic Flour Mills Corporation, of this city, has been dismissed, as the matter has been settled out of court.

The fall wheat is described as being in good condition. The weather has been very mild for this time of year, but as these lines are being written there is an inch of snow on the ground.

The late Martin L. Jenks, former president of the Duluth Board of Trade, whose funeral took place in Duluth on March 10, was a member also of the Baltimore Chamber of Commerce.

The receipts of new water-borne corn in the Baltimore market so far this season amount to only 21,000 bushels, compared with 161,343 bushels arrived up to the corresponding time last year.

The Federal Crop Statistician for Maryland is authority for the statement that the farm price of corn in this State on February 15 was \$1.33 per bushel, against 90 cents a bushel a year ago.

Mrs. Richardson, daughter of N. J. Thomas, manager of the Granite Grain and Seed Co., Sugar House suburb, died the other day of heart trouble. She was only 19 years of age and was married last fall.

Another full cargo of Canadian flour, 40,964 barrels, was shipped from Baltimore last week by the Maple Leaf Milling Company, of Toronto, Canada, per Swedish steamship "Hedrun" to the Soviet Government of Russia.

J. N. McCosh, a well known member of the Baltimore Chamber of Commerce, and representative of the Bay State Milling Co.,

March 25, Maryland Day, is a legal holiday in the State of Maryland, but the rooms of the Baltimore Chamber of Commerce will remain open as usual, since the occasion is merely a local holiday and all

of the other exchanges of the country will function as usual.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were D. H. Wilson, of Chicago; M. L. Hensley, representing the Lindsborg Milling & Grain Co., Lindsborg, Kas.; H. C. Warden, of Winchester, Va.; Wm. C. Duncan, of New York City.

To obtain more active participation by the port of Baltimore in the commercial progress of the Island of Porto Rico, a delegation of representative business men of this city left here last week on a trade mission to the Island. The voyage will be made through the courtesy of the Porto Rico-American Steamship Company.

Flour.

In sympathy with the lower prices for wheat, there has been a further revision

W. M. BELL COMPANY

downward in the flour market, and domestic trade is quiet and featureless. Export business from this part has been given a further stimulus by the shipment of a full cargo of 40,964 barrels of flour to the Soviet government of Russia. Quotations per 98-lb. cotton or jute sacks follow: Spring patent, \$9.75@10; spring straight, \$9.25@9.50; hard winter patent, \$9.50@9.75; hard winter straight, \$9.25@9.50; winter patent, \$9.25@9.50; winter straight, \$8.50@8.75; rye flour, medium to white, \$7.50@9.

SALT LAKE CITY, UTAH.

Fred L. W. Bennett, Correspondent.

The Los Angeles Feed Co. of Delta is expecting to commence operations immediately. It will make molasses feed.

The National Alfalfa Seed Growers' Ass'n has been formed at Oasis. Dudley D. Crafts of Deseret is president, and A. I. Tibbotts, Hinckley, secretary.

The Volger Seed Co. is now located in the building that has been occupied by the Booth Fisheries Co. on the opposite corner from the Porter-Walton store.

The Porter-Walton Co. is back in its retail store at corner of Richards Street and West First South. This store was badly damaged by fire some months ago.

Heber C. Cutler of this city, local flax authority, has gone to Bear River City in Boxelder County to address a gathering of farmers on the growing of this article.

Howard Henderson of the Blackfoot Milling and Elevator Co. of Blackfoot, Idaho, has resigned. He had been with the milling company for the past 12 years.

Harden Bennion, former secretary of state and a prominent farmer, has been selected by Governor Dern to succeed A. A. Hinckley as commissioner of agriculture.

Lester F. Whitlock, manager of the Ogden Union Stockyards, Ogden, says these yards are now the largest in the West. The growth has been rapid during the past eight years.

It is understood that there is or is about to be an early date a movement started to increase the warehouse facilities in Ogden owing to the heavy demands made by the grain industry.

The Pure Seed Bill has been passed with an amendment permitting growers to exchange seed among themselves without first having it tested at the state laboratory provided for in the bill.

The agricultural staff of the Union Pacific Railroad are testing a new kind of alkali grass for Utah. It will, if successful, be planted on ground of an alkali character that has heretofore produced indifferent crops.

Salt Lake is becoming an important stock center. Nearly 50,000 hogs were received at the Salt Lake Union Stockyards at North Salt Lake in February, a considerable increase over January and the corresponding month of last year.

Very little grain is reported to be in the hands of the growers. P. C. Richardson, feed man of Ogden, said feeding stuff prices were from \$3.00 to \$3.50. Hay was retailing at \$15.00 to \$16.00. Conditions were good for the time of year.

Many farmers at Hinckley, Utah, are irrigating their alfalfa crops following a talk by Prof. L. M. Windsor, an agricultural authority, in which he spoke of the benefits to be derived by the irrigation of alfalfa in the spring of the year.

Alfalfa growers and dealers are delighted with the action of California in lifting the ban on this product. Eighteen other states which have also banned Utah alfalfa are expected to follow suit. The alfalfa mills at Ogden and Delta are busy again.

More chickens have been placed on the market here as a result of the higher price of feeding stuffs than usual at this season, but it would not be correct to say, however, that the market has been flooded or the feeding business seriously affected.

P. C. Richardson, prominent 24th Street, Ogden, feed man, has just returned from a three weeks' trip to the Pacific Coast, accompanied by his wife. The trip was in the nature of a vacation. "I almost forgot about business whilst I was away," said Mr. Richardson.

L. C. and M. E. Neeley of Delta have recently sold their 1924 alfalfa seed crop from 100 acres of ground for 20 cents a pound, believed to be the best price for which seed in that section sold during the past season. The total received for the crop was \$11,000.

The packing industry is said to be in good shape, though it is stated that hogs are higher now than they have been at any time in past five years, higher in proportion than the prices obtained for the finished product. It is still impossible to get enough hogs locally to supply the demand. Live cattle are said to be a little short right now.

Alden N. Nichols, a member of the office force of the Globe Grain and Milling Co. of Ogden was found dead a few days ago in

an automobile parked near the foot of a mountain near that city. A bullet wound was discovered in his forehead and a pistol on the floor of the machine, causing police authorities to conclude that he had committed suicide. The man's wife said financial difficulties had doubtless been the cause.

A public hearing will be held at Ogden on March 25 in connection with the proposed adoption and specifications of alfalfa grades. The hearing will be conducted by the state and federal authorities, with W. A. Wheeler, head of the hay, seed and feed division of the United Board of Agriculture in personal charge. The place of meeting will be the Stockyards. Producers and shippers, it is stated, are specially invited. If the grades are adopted the work will be under a joint agreement between the state and Washington authorities.

L. S. Beckett of Alred-Beckett Co., this city, says the slump in grain prices on the Chicago market has caused a slump here. The trade is buying only from hand-to-mouth. There has been a slight recovery, but confidence is still lacking. The farmers are practically cleaned up now and there is an acute shortage of turkey wheat in the Utah-Idaho territory. Brokers are bidding 13c more for this wheat than for white wheat. It is going for \$1.86 per bushel Utah-Idaho loading points. Last fall white wheat was selling for more than turkey wheat. Mr. Beckett said he was looking for a fairly active demand for good milling wheat before next harvest. Some one was going to get on his hands and knees for turkey wheat before the 1925 crop is ready. Millers at present are buying from hand-to-mouth. Some of the smaller country mills are closing down.

MINNEAPOLIS.

By H. A. Paul, Correspondent.

C. C. Bovey of the Washburn-Crosby Co. is touring California.

C. C. Fields of the Norris Grain Co., Winnipeg, was seen on 'Change Saturday.

G. W. Hales of Hales & Hunter, Chicago, was a Minneapolis caller Saturday.

William Dalrymple of the Wm. Dalrymple Co. is back from a vacation trip through Florida.

D. D. Tenney, president of the Tenney Co., is visiting points in Florida and South Carolina.

B. H. Woodworth of the E. S. Woodworth Co. is expected back from California this week.

Frank E. Ryer, president of the Ryer Grain Co. of Portland, Oregon, was a Minneapolis visitor Tuesday.

E. P. Mitchell, representing the Washburn-Crosby Co. in Kansas City, spent a few days in Minneapolis the past week.

H. L. Beecher, president of the Eagle Roller Mills of New Ulm, Minn., stopped over here Saturday, while en route home from Boston.

C. H. Peterson, flax buyer for the American Linseed Co., is back after a four-day conference of department heads, held at New York.

A baby girl was born to Mr. and Mrs. F. C. Lyman this week. Mr. Lyman is one of the cash grain representatives for the Bartlett-Frazier Co. on the Minneapolis Exchange.

Colonel Bellows, well known to the northwest grain and milling trade, has been chosen as director of the Gold Medal station, WCCO. He will have charge of making up all of the programs.

Among the visitors on the Minneapolis trading floor during the past week, were the following: A. J. Oberg of Syracuse, N. Y.; Chas. Allen of Rochester, N. Y.; Harold Rodgers, W. B. Fritz and A. Christy of Winnipeg; W. J. McCabe of Duluth; A. J. Eberhart of La Crosse; H. M. Stratton, C. E. Dingwall and Walter Rice of Milwaukee.

Cash Grain Markets.

Wheat.—The very unsettled state of the futures market seemed to affect the local cash market as well during the past week and in consequence, things were in a rather hectic state throughout. For the week, the cash market was off from two to five cents, as compared with the futures. Country car loadings were reported fairly light but for some reason or other, receipts seemed to hold up remarkably well. The rapidly declining option market undoubtedly had some effect in hurrying supplies to market and then besides that, if any considerable quantity of the current receipts were pooled wheat, it is easy to see why the holders

We Buy and Sell
Ear Corn

RICHTER GRAIN CO.
Cincinnati, Ohio

should want to get it off their plate and onto someone else's for the simple reason that unhedged wheat on a declining market has a very bad effect on the pocket-book.

Shipping sales were of just fair volume, averaging around 30,000 bushels per day. Mills were willing to take the high protein wheat, as always, but backed away from anything testing less than 12½%. The bulk of today's sales were made on the following basis: No. 1 hard spring, 2 at 41c over May; No. 1 dark northern, May, at 40c over; No. 1 northern spring, 1c under at 35c over.

Durum offerings were of fair volume one day and very light the next but demand continued firm right through. Today's sales show the following basis: No. 1 amber, 1c under at 32c over Duluth May; No. 1 durum, 4c under at 24c over and No. 1 mixed, 5c under at 30c over.

Local elevator stocks today showed 13,416,603 bushels vs. 13,410,409 last week and 14,973,541 a year ago.

Corn.—The local cash corn market was much the same in character as the wheat. High moisture content was hard to dispose of most any time and especially so, when the futures market dropped away so sharply. Light receipts helped matters out during two sessions of the past week but otherwise, things were very unsettled, especially on Thursday, when it was anybody's guess. When the futures market was at its lowest ebb, some buying showed up and relieved things to some extent. Today, with a slight improvement in demand and light receipts expected, bids were raised from one to two cents compared with the option.

The bulk of today's sales were made on the following basis: Yellow, No. 3, 12@15c under Chicago May; No. 4, 20@25c under; No. 5, 30@38c under, and No. 6, 40@45c under; mixed, No. 3, 18@20c under; No. 4, 26@30c under; No. 5, 33@39c under, and No. 6, 42@48c under.

Today's elevator stocks reports showed a total of 1,245,992 bu. vs. 1,051,073 last week and 1,529,037 a year ago.

Oats.—There was a pretty fair shipping demand reported for oats early the week but when the futures market slumped away, there did not seem to be any demand to speak of, except for the real choice quality. Taken all together there must have been around a half million bushels worked out of this terminal during the past seven days. At present levels, oats has a great deal more merit than they had when nearly twenty cents a bushel higher. With output of mill offal at a very low figure, feeders can better afford to use corn and oats than they can bran and shorts.

Today's sales were made on the following basis: No. 3 whites, ¼c under @ ¼c over May, and No. 4 whites, 1@2c less. Local stocks are: 2,012,417 bu. vs. 22,155,070 last week and 5,027,579 a year ago.

hand; in 1923, 8 per cent, and in 1922, 13 per cent. During the current season 81 per cent, or 44,448,000 bushels of last year's production, has been or will be shipped out of the counties where grown. The percentage shipped this year is more than that of any year since statehood, 1907.

PHILADELPHIA.
Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending March 13th were: Wheat, 1,105,479 bushels. Exports of corn, none in January and February, 1925; 591,437 bus. in February, 1924. Exports of oats in February, 1925, were 108,833 bus., none in January, 1925, or February, 1924. Exports of barley in February, 1925, were 16,629 bus. and in January, 1925, there were 99,839 bus. Exports of rye were 127,992 bus. in February, 1925, against 154,286 bus. in January, 1925, and 19,286 bus., February, 1924. Ellis McMullin of the hay and grain firm of David McMullin & Co. has just returned from his annual vacation of two weeks spent at Miami, Florida. Exports of flour during the month of February, 1925, were 36,768 bbls., compared with 59,039 bbls. in January, 1925, and 41,863 bbls. in February, 1924. Receipts of flour and grain for the week ending March 14th were: Flour, 51,643 bbls.; wheat, 810,162 bus.; corn, 21,250 bus.; oats, 21,606 bus.; rye, 20,226 bus. Exports of wheat in the month of February, 1925, were 4,759,717 bus., compared with 4,339,942 bus. in January, 1925, and 2,866,118 bus. in February, 1924. Samuel H. Young, who has been in the grain brokerage business here for the past thirteen years, has accepted a position with Samuel C. Woolman & Co. to go on the road. Sam is so popular among business men that his host of friends on 'change predict him great success. On Tuesday last, March 10th, David H. White was elected president of the Hancock Grain Company, exporters of grain at this port, and he has taken charge of his new duties. Mr. White has been connected with the company for 4 years. He succeeds the late Geo. G. Omerly, who became president after the death of the founder, Major Elisha A. Hancock, formerly of Wilkes-Barre, Pa. The following out of town visitors were registered during the past week: D. W. Steelman, State College, Pa.; E. W. Neville, Winnipeg, Canada; O. F. Patterson, Buffalo; Samuel H. Beek, Townsend, Del.; L. W. Johnston, St. Louis; H. Anderson, Toledo; A. P. Seabrook, W. H. Stokes, Jr., Watertown, South Dakota; L. P. Phillips, Baltimore; Wilbur Houseman, Wilmington, Del.; E. N. Fleming, Kansas City, Mo.; G. W. Flounders, Chicago; A. B. Spaholtz, H. E. Tweeden, Buffalo; D. W. Steelman, State College, Pa. Flour. The wild fluctuations in wheat have demoralized the flour market and prices are very unsettled with buyers operating only when compelled to do so for urgent wants. Quotations are lower and especially spring wheat patents. Early in the week there was considerable business worked in these at \$9.25@9.50 put in 98 cotton. Following the sharp break yesterday there was a lot of business worked at \$8.75@9.15 for standard spring wheat patent. Receipts were 51,643 barrels for the week just closed. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.75@9; soft winter straight, near-by, \$8.25@8.75; hard winter straight, \$9@9.50; hard winter short patent, \$9.50@10; spring first clear, \$8.75@9; spring patent, \$9.25@9.75; spring short patent, \$10@10.25; fancy spring and city mills patent family brands, \$10.50@11.25. Rye flour—\$8.65@9 per bbl. in sacks, as to quality. Buckwheat flour—\$4.25@4.50 per 98-lb. sack.

PORTLAND, ORE.
C. W. Hodson, ex-president of the Chamber of Commerce in 1907-08, is dead. Prevailing open rates on wheat from Pacific coast ports to Japan will extend to May 31 on lines holding membership in the Pacific westbound conference. The time was fixed by the conference at New Orleans, where the members have been in joint session with those of the North Atlantic far east conference. A new era of progress has opened for eastern Oregon. Reclamation and settlement of arid lands on all sides of the central plateau will be accompanied by construction of railroads through the southeastern section, to connect with the through lines on the east, west and south. The days of isolation and stagnation are past.

This is reclamation brought down to a business basis. It will cover large tracts of arid land with prosperous farmers, and will return money expended on them to the reclamation fund to be employed again in the same manner. Portland has become the Northwest headquarters of the Sperry Flour Co. F. B. Burke, Northwest manager, with headquarters in Spokane, moved to this city and opened headquarters at the Portland mills. It is announced that Richard Clagett, Northwest sales manager of the Sperry interests, now located in Tacoma, is moving to Portland. Rough weather en route to Queenstown, where she arrived last week, was responsible for damage to the Norwegian steamer Hercules. Her hatches being stove in, water found its way into the wheat cargo, so advices to the Merchants Exchange yesterday made known. The Hercules was under charter to Kerr, Gifford & Co., and was dispatched Jan. 11. There were reports last week that two grain carriers had been taken for wheat loading at Vancouver, B. C., for the United Kingdom, one at 37s 6d and the other at 40 shillings, the latter being a small or handy-sized carrier. In grain circles it was understood that several cargoes had been disposed of by British Columbia dealers during the last ten days. Irrigation in Oregon will now advance at double speed to make up for the long years in which the government has done little or nothing. Construction is to begin on the Baker, Vale and Owyhee projects this year and is to continue on the Umatilla and Klamath projects. This is the reward of co-operation on the part of the interested communities, the Oregon irriga-

O. F. Plummer of this city addressed the
Pacific Northwest Live Stock Conference
in Seattle last week on how the farm may
be made more attractive to boys and girls.

Wheat shipments last month in this dis-
trict were 212,842 bus. and from Puget
Sound 8,885 bus. During the correspond-
ing month last season the river district
floated 1,626,877 bus. and Puget Sound
775,235 bus. For the cereal season to date
the river district has sent away 14,586,118
bus. and from Puget Sound have gone
3,784,733 bus.

Columbia and Willamette river flour ship-
ments to all ports in February aggregated
208,361 bbls. and from Puget Sound 107,189
bbls. were floated, the monthly summary
of the Merchants' Exchange sets forth.
For the same month last season the Co-
lumbia river district shipped 322,615 bbls.
and Puget Sound 319,003 bbls. For the
cereal season to date Puget Sound has dis-
patched 1,505,543 bbls. and the Columbia
river district 1,346,800 bbls.

Flour movement to Europe in February
was 36,530 bbls., against 7,084 bbls. for the
same month last year. For the present
cereal season the European markets had
drawn 285,252 bbls. up to the last of Feb-

ruary and for the same time in the pre-
ceding season the total was 48,918 bbls.
Some wheat will figure in the March ex-
ports to Europe, though only a limited
quantity. So far this season European
wheat exports have reached 10,045,205 bus.
and for the corresponding period in the
previous season they were 7,388,584 bus.

Little wheat has moved to Japan of
late and shipping interests do not expect
much change in advance of the new crop.
Japan bought heavily in Australia at the
beginning of the season and the assump-
tion is her needs are being supplied from
that direction now. Little export wheat
moved anywhere in February and in Jan-
uary the Orient drew 149,999 bushels com-
pared with 1,608,314 bushels in January,
1924. Including January's shipments the
showing for the cereal season was 2,667,151
bushels to the far east, while for the cor-
responding months in the 1923-1924 cereal
season 10,165,993 bushels had been floated.

Terminal receipts, in cars, were reported
by the Merchants' Exchange for the season
to March 12 as follows:

	Portland—	Wht. Bar.	Flr. Cn.	Ots. Hy.

KANSAS CITY.

T. J. Tanner, Correspondent.

The Staley Milling Co. of North Kansas
City has incorporated under Missouri laws,
with a capital stock of \$100,000. A large
corn meal and feed mill has been completed
by the company and operations are about
to begin.

With P. P. O'Connor of Denver in
charge, the Grain Marketing Co. of Dela-
ware and Illinois has opened a stock-selling
office in rooms 1407-10, Board of Trade
building. Kansas and Oklahoma farmers
will be canvassed.

The Kansas City Chamber of Commerce
is urging the re-election of C. W. Lonsdale
of the Simonds-Shields-Lonsdale Grain Co.
as a director of the Chamber of Commerce
of the United States. Mr. Lonsdale has
served one term of two years on the di-
rectorate.

By a vote of 53 to 52, Kansas City Board

of Trade members defeated on Monday an
amendment to the rules which would com-
pel the country seller to furnish car num-
bers on grain to arrive and to apply on
such contracts only grain originally billed
to Kansas City. A majority of two-thirds
was required.

F. G. Horner, president, and Charles
Quinn, secretary, of the Grain Dealers' Na-
tional Association, spent several days in
Kansas City this week. They made pre-
liminary arrangements for the annual con-
vention of the association, to be held in the
Hotel Meuhlebach October 12, 13 and 14.
The officials will spend the coming week in
Kansas, visiting Wichita, Hutchinson and
Salina. Mr. Quinn said new members were
joining the association in liberal numbers.

The Supreme Court of Missouri has af-
firmed a judgment of \$1,796 against James
T. Bradshaw of Kansas City, former state
grain and warehouse commissioner, and his
bondsmen in favor of the state for fees
illegally paid employees in the department.
In the original suit against Bradshaw the
state asked \$13,933. However, the attorney
general later modified the petition, asking
judgment for only \$1,796. Mr. Bradshaw
hopes to recover the amount of the judg-
ment from Kansas City elevator companies
for whom deputy weighmasters and inspec-
tors worked overtime and were paid from
funds of the grain inspection department.

New Kansas Grain Inspector.

W. B. Dalton of St. George, Kan., is the
new chief of the Kansas Grain Inspection
and Weighing Department. His appoint-
ment by Governor Paulen was influenced
by J. S. Hart, chief under Governor Allen,
now a member of the Kansas City Board
of Trade. Mr. Dalton is well respected by
Board of Trade members. He has been a
grain dealer in St. George many years. He
succeeds J. J. Wilson. His assistant will
be F. M. Fink of Emporia, who has been
the deputy inspector at that point. Mr.
Fink has a reputation for competence.
Headquarters of the department will re-
main in Kansas City, Kan., with a labora-
tory in Kansas City, Mo.

Board of Trade members here are pleased
with the service of the Missouri Grain In-
spection and Weighing Department, under
Roy Monier, newly appointed warehouse
and grain commissioner.

Ralston-Purina Plant Opens.

The new grain and hay feed grinding
plant of the Ralston-Purina Co., at Roch-
ester and Scott avenues, in the East bot-
toms district of Kansas City, was visited
Wednesday by a party of 300 grain and
hay dealers, bankers and other business
men, conducted by W. H. Danforth of St.
Louis, president of the company. Mr. Dan-
forth, who spoke at a luncheon given by
the Chamber of Commerce before the trip,
said the Kansas City mill would be known
as the Ralston-Purina Mills. He said \$1-
000,000 had been invested in the enterprise,
which consists of a three-story building to
be used for grain grinding, a six-story
building for storage and office space, two
buildings for the manufacture of molasses
feeds and a grain elevator with a capacity
of 550,000 bus. The grain grinding capacity
is between 600 and 700 tons daily and 180
tons of alfalfa meal can be turned out in
ten hours. L. B. Stuart is the local man-
ager. F. H. Udell, secretary, is the grain
buyer and Tanner Stephenson will buy the
hay. All products of the plant will be sold
under Ralston-Purina brands. The mill
was formally opened Thursday, March 12.

Crops Helped by Rain.

Rain of fair to heavy volume, sometimes
turning to snow, gave moisture to most of

tion congress, the Portland Chamber of
Commerce and the Oregon senators and
representatives.

Under the Kendrick law the work of the
government will not end with putting water
on the land. It will also select settlers who
have the ability and a reasonable propor-
tion of the necessary capital to succeed,
will lend them the remainder of the capital
needed and will give them expert advice
in selecting crops and in forming co-opera-
tive association. The three new Oregon
projects will not stop with providing water;
they are complete colonization projects to
be worked out to the point where the land
will produce the money to repay the cost
of its reclamation.

Kansas, Missouri, Nebraska, Iowa and Oklahoma Thursday night, affording relief from drought in nearly all territory. There was some precipitation in Texas. There is no doubt that the crop situation as to wheat, rye, oats and barley was greatly improved. In discussing the wheat position of Kansas, J. C. Mohler of Topeka, secretary of the state board of agriculture, said on Saturday:

"The Kansas wheat crop this spring has a better start toward a big crop than in several years. Except in two limited sections of the state, where there were light snows in the winter, the wheat prospects are unusually good, with a larger acreage sown than for several years."

Cash Grain Markets.

Wheat—Receipts for the week, 540 cars, against 639 a week ago and 609 a year ago. A sharp recovery from the previous week's decline featured the first two days, but a heavy slump followed which was especially notable on Friday, the day of the great break in futures. There was a moderate upward reaction on Saturday. Net weekly losses in hard and dark wheat were 11@13c, while the soft variety was 8@16c lower. Final prices were: No. 1 hard and dark, \$1.58@1.80; No. 2, \$1.58@1.80; No. 3, \$1.57@1.79; No. 4, \$1.56@1.77; No. 1 red, \$1.64@1.75; No. 2, \$1.64@1.75; No. 3, \$1.61@1.71; No. 4, \$1.60@1.68. Though flour trade continued dull, local and outside millers were fair buyers, and elevator men were always ready to take supplies on a basis relative to the May delivery. Holders followed the policy of withdrawing samples from the tables when prices were slumping. Stocks in Kansas City decreased 287,000 bu. to 8,018,000, against 11,751,000 last year.

Corn—Receipts, 565 cars, against 751 a week ago and 582 a year ago. Price changes were narrow and irregular until the wheat market had its big break on Friday when corn tumbled also. The decline brought corn to a level that invited heavy buying for feeding account. A better basis was established, which cut off the hedging demand except on the lower grades. Saturday's market was strong, exhibiting some recovery from the bottom. Prices at the close were 2@7c lower than a week ago, with No. 2 white at \$1.09½@1.10½; No. 3 at \$1.06@1.08; No. 2 mixed at \$1.08@1.10½; No. 3 at \$1.05@1.08; No. 2 yellow at \$1.10@1.12, and No. 3 at \$1.07@1.08. Local corn stocks increased 297,000 bu., to 7,619,000, as compared with 1,948,000 a year ago.

Oats—Receipts, 46 cars, against 46 a week ago and 106 a year ago. The market held fairly steady until Friday's break in other cereals, when a drop of 4@5c occurred. Saturday witnessed a fair reaction. Closing quotations were 2½@3c down on white oats, while red seed showed a net recession of 4@5c, as follows: No. 2 white, 49@50c; No. 3, 47½@48½c; No. 2 red, 49c; No. 3, 48c. Shipping and local demands were fair, involving liberal withdrawals from store, especially on old orders. Stocks decreased 241,000 bu., to 2,206,000, against 780,000 last year.

Kafir and Milo—Receipts, 133 cars, against 182 a week ago and 123 a year ago. Inward and outward movements were evenly balanced, though shipments were mainly on old bookings. New buying was largely for hedging account, as feed manufacturers were conservative because of the downward tendency of corn and other grains. In sympathy with the action of corn, both kafir and milo slumped after some early advance. A slight recovery marked the closing day. The net loss in kafir was 8@12c per cwt., while milo was off 2@3c. Milo was much less evident in the offerings than kafir. Closing prices were: No. 2 white kafir, \$1.61@1.63; No. 3, \$1.60@1.61; No. 4, \$1.57@1.59; No. 2 milo, \$1.93@1.96; No. 3, \$1.91@1.93; No. 4, \$1.88@1.90. A decrease of 1,000 bu. was recorded in elevator stocks, leaving 404,000 in store, against 440,000 a year ago.

DES MOINES.

J. H. Owens, Correspondent.

E. G. Cool visited the Omaha Exchange last week.

Ed Wagner of Wagner Grain Co., Ankeny, was a visitor here Friday.

"Eddie" Hymers of Jackson Bros. Co., Chicago, spent last Friday in Des Moines.

Arvid Sterner of Weikel & Sterner Co., Jordan, was a visitor here the first part of the week.

George A. Wells and his wife returned from Florida where they have been spending the winter.

PRICE CURRENT GRAIN REPORTER, 327 So. La Salle St., Chicago, Ill

A. R. Hendrickson, formerly with the Mason City office of J. C. Schaffer Grain Co., is now connected with the Uptake Grain Co. here. Mr. Hendrickson succeeds H. W. Mott who has accepted a position selling "Town Crier" flour in northeastern Iowa and Wisconsin.

ST. LOUIS.

F. P. McMillan, sales manager for the George P. Plant Milling Co., was in Columbus, Ohio, recently calling on the trade.

William Engle, formerly president of the J. H. Teasdale Commission Co., St. Louis, and now a pit operator in Chicago, visited friends in St. Louis last week.

New members in the Merchants Exchange during the past month include Wayman McCreery Allen of Curlee, Hill & Co., John E. Sherry and Oliver Lipe, and William V. Peters of J. H. Teasdale Commission Co.

D. L. Boyer, secretary, Missouri Grain Dealers' Ass'n, has opened a downtown office at 204 Merchants' Exchange building for the Provident Chemical Co., where he will handle a general line of phosphates, but will continue as secretary of the grain dealers' association.

The Ralston Purina Co., St. Louis, announces the purchase of the 700,000-bu. grain elevator, located at the foot of Chouteau street, from the J. H. Teasdale Commission Co. The price paid for the plant has not been made public, but the property has been appraised at nearly \$500,000.

The elevator is situated favorably for both railroad and river transportation, and it is thought that the Ralston Purina Co. will make increased use of the barge line. The plant will be taken over by the Purina Mills from the J. H. Teasdale Commission Co., which is now operating the 2,000,000-bu. Missouri Pacific elevator, on May 1.

The grain trade of St. Louis was shocked to learn of the death of Eugene Gissler, following a very short illness. Mr. Gissler was vice-president of the Moffitt-Napier Grain Co. Practically all his business career was spent with Moffitt-Napier, where he came to them direct from college, 21 years ago. Mr. Gissler had been a member of the St. Louis Merchants Exchange for 21 years and for many years was secretary of the St. Louis Grain Club.

satisfy immediate requirements. Both Ashcroft, B. C., and Green Mountain, N. B., potatoes are on sale in Winnipeg today.

Oats and barley are now on an export basis and flax considerably below the price at which Argentine flax could be delivered at Buffalo. On the whole, sentiment at the close was friendly to the buying side. There is thought to be still a large short interest in the market and a scared bear makes the best kind of a bull. Trading the last few days has been on a large scale in large lots and quite orderly, very different in character than when a host of small speculators were in the market and brokers overwhelmed with a multitude of small orders.

There is now a heavy snow blanket over most of the west and a sudden thaw would mean high water and wet land for seeding. On the whole, this may be considered favorable. There is plenty of subsoil moisture in Manitoba and with an average start in seeding the acreage, crop will not be less than last year. Acreage can hardly be maintained with a late start as very little fall plowing was done. About one-third of the wheat land was summer fallowed. Generally throughout the west about one third of the land available for wheat is summer fallow.

The question of seed grain supplies now looms up as one that requires a watchful eye by the provincial governments. Manitoba legislature on Friday passed an emergency bill to enable the government to purchase and distribute seed grain in unorganized territory. Where the country is organized in municipalities, municipal authorities have the machinery for supplying farmers with seed grain when conditions warrant. There is really a scarcity of good seed. Most farmers have enough for themselves but few have any for sale. Home grown seed corn is practically nonexistent.

May wheat opened Saturday at \$1.69, that is 5c below Friday's close. It looked like the foundering of the ship to those who had given support to the market on Friday's sensational break. It was, however, the culmination of the bear campaign. There is little doubt but wheat profit taking by shorts turned prices upward. Bulls took heart and once the price got on a level with the previous close stop loss covering by shorts carried May to \$1.79. Part of the gain was lost, however, on some profit taking by longs. However, a gain there was and as a whole the market gave a good account of itself. The course grains were firm from the opening and flax recovered 10c on a fair trade without setbacks. It looks as though Friday's break had thoroughly liquidated the coarse

grains and they today showed independence of wheat.

George B. Quinn, popular local broker, has made a connection with Wheeler & Kenly and will henceforth act as their chief wheat trader and floor manager on the exchange. The firm of Wheeler & Kenly has been prominent in stock and cotton circles for a number of years and is now enlarging their facilities for trading in grains. With Mr. Quinn looking after their interests on the floor they will be in a position to render high class service to their customers.

BOSTON.

H. P. Bell of Denver, Colo., representing the Kansas division of the Colorado Milling & Elevator Co., was a visitor this week. He was introduced on the exchange by Elmer E. Dawson.

Frank G. Ely, of Chicago, grain shipper, was noted on the floor of the Boston Grain & Flour Exchange this week. Another visitor noted on the floor was O. N. Fleming, Eastern representative of the Kansas Flour Mills Co., Kansas City.

Roland W. Boyden, a Boston attorney, who, during the war, was head of the enforcement division of the Food Administration at Washington, was this week elected president of the Chamber of Commerce, succeeding Howard Conoley.

Recent applications for membership in the Grain & Flour Exchange include the following: William Beebe of Russell-Miller Milling Co., Jacob Thurman, Isaac Heiler of D. F. Silbert & Co., F. K. Hatfield, Philip J. Baird of Baird & Co., Leon H. Davis of Dawson-Davis Co., and Edwin A. Thompson of the Federal Mill & Elevator Co.

George O. Proctor, chairman of the grain inspection committee of the Chamber of Commerce for some years, and a partner in the grain business in Cambridge, known as Proctor Brothers, died March 4, at his home in Somerville. He was a former mayor of Somerville and a former state legislator. Born in Rockingham, Vt., Feb. 23, 1847, he came to Boston in 1874 and formed a partnership with his brother in the grain and hay business.

FORT WORTH.

Mrs. Olive Rall, aged 29, wife of Marvin C. Rall, secretary-treasurer of the Rall Grain Co., died recently.

Leo Potishman of this city and Carl Cassidy of Frederick, Okla., are reported to have purchased the Billingslea Grain [Concluded on page 19.]

News of the Country Grain Trade

ARKANSAS.

Walnut Ridge, Ark.—D. L. Gray of Morilton will conduct a grocery and feed business here.

Ft. Smith, Ark.—The Ft. Smith Cereal Co. will soon start construction of a new factory building.

Arkadelphia, Ark.—The Arkadelphia Farmers Union Whse. Co. will replace their warehouse which was destroyed by fire last December.

Fulton, Ark.—Four store buildings, a grist mill owned by E. U. Roberts and two large hay barns full of hay and feed-stuffs, the property of J. J. Battle, were destroyed, causing a loss of approximately \$25,000. McCulloch & Parker, grocers, carried no insurance. The other firms were partially insured.

CALIFORNIA.

Madera, Cal.—An office will be opened by Stanley & Kirkman.

Salinas, Cal.—The K. M. Swearingen Co. has been incorporated with capital stock of \$100,000 to deal in feed and produce. The company will take over the Blackie Co. and contemplates the erection of a large feed mill, equipped with the latest machinery.

CANADA.

Prince Rupert, B. C.—A privately owned terminal elevator financed by English capital, will be erected by M. P. McCaffery.

Vancouver, B. C.—Plans are being drawn by a Liverpool, England, and a Glasgow, Scotland, firm for erecting elevators of practically 1,500,000 bushels each.

Calgary, Alta.—The Alberta Wheat Pool directors are not contemplating the erection of elevators as are the Saskatchewan and Manitoba wheat pools, but will continue contracts with present elevator companies.

Winnipeg, Man.—The Manitoba Pool Elevators, Ltd., will be formed with capital of \$1,000,000 for the purpose of erecting one hundred elevators this year in Manitoba for the storing of wheat. The Saskatchewan pool directors will form a similar company with \$2,500,000 capital to build two hundred elevators in Saskatchewan.

COLORADO.

Akron, Colo.—The Akron Farmers' Union Elevator, managed by L. L. Knox, has made extensive improvements in their storerooms.

Walsenburg, Colo.—The Walsenburg Milling Co. has purchased an electric flour bleacher, with which they can grind green wheat and produce the same kind of flour that is made from cured wheat.

Ft. Morgan, Colo.—Fletcher Harshman suffered a loss of \$500 when fire, originating from heating in a pile of hay, burned the hay, valued at \$150, and fifty bushels of corn and barley, a cane stack and several small buildings.

Fruita, Colo.—The following directors were elected at the annual meeting of the Fruita Potato Growers' Ass'n: Mack district, Blair McTaggart; Loma, C. T. Hatcher and Frank Columbus; Fruita, W. H. Harker, Fred H. Groves and George Reed; Grand Junction, D. W. Aupperle.

IDAHO.

Buhl, Ida.—The Farmers Grain & Seed Co. has incorporated with a capital of \$50,000.

Blackfoot, Ida.—Howard Henderson, secretary and treasurer of the Blackfoot Farmers' Milling Co., severed his connection with that concern Feb. 28th and will establish himself in another business.

ILLINOIS.

Jonesboro, Ill.—The Little Red Mill was damaged by fire.

Milmine, Ill.—O. N. East is operating the P. B. Rollings elevator.

Utica, Ill.—C. K. Graham of Princeville now manages the Utica Elevator Store, succeeding Archie Dysart.

Verona, Ill.—John H. Schumacher will succeed Wm. T. Kasten as manager of the Verona Farmers Elevator Co.

Sterling, Ill.—Gaulrapp & Flock have discontinued the grain, seed and feed business and are succeeded by Bley & Warner.

Media, Ill.—The Farmers Elevator will dispose of their elevators, coal sheds, etc., following the discontinuance of their business.

Champaign, Ill.—New members of the Illinois Grain Dealers Ass'n are: Claudin Grain & Coal Co., Gridley; Sullivan Grain Co., Sullivan; De Laney Grain & Lumber Co., Wapella.

Vermont, Ill.—The grain elevator sites have been sold at auction by the Vermont Co-op. Co., who will not build because of the high cost of materials.

Urbana, Ill.—John B. Noodin, formerly with the grain office of J. P. Sledge, is now manager of the cash grain department of the Wegeng-Hills Co.

Pana, Ill.—The contract to erect a large concrete hay and grain storage building for the Farmers Milling Co. was awarded to John Hinden, Jr. Work will begin as soon as the weather permits.

Ransom, Ill.—The following officers were re-elected at the 21st annual meeting of the Farmers Elevator Co.: A. J. Gahm, Pres.; Jacob Geheber, Vice-Pres.; E. E. Stevenson, Sec'y; Edward Strobel, Treas. C. W. Wellman is manager. A net gain of \$9,638.23 for the year was reported.

INDIANA.

Linnsburg, Ind.—Additional storage is being added to the elevator of the Linnsburg Grain Co.

Summitville, Ind.—The Hinshaw Grain Co. has increased its capacity by remodeling and installing new machinery.

Summitville, Ind.—E. R. Montgomery, formerly manager of the Urmston Grain Co., is now with the Service Lumber Co.

Sedalia, Ind.—J. C. Miller and C. R. Paul have purchased the Sedalia elevator from I. W. Burkhalter who will continue, however, as manager.

Vincennes, Ind.—Fifteen thousand bushels of potatoes from the Red River valley, Minnesota, arrived here March 3 to be used by farmers for seed.

Cumberland, Ind.—The Cumberland Elevator Co. has installed a large hammer type feed grinder with Cyclone collectors placed on third floor of the mill.

Ilene (Lyons p. o.), Ind.—The Ilene elevator, owned by Geo. Morgan and Mrs. Retta Blackwood, has been purchased by John L. Morgan who is now in possession.

New Castle, Ind.—The Eminence Milling Co. has been incorporated for \$200,000, officers of which are J. C. Dunaivent, president (who formerly owned and operated the company as a private concern); George Fremd, vice-president; A. D. Hudson, secretary-treasurer, and they constitute the board of directors.

Lafayette, Ind.—Officers were elected as follows at the meeting of the Farmers Grain Dealers Ass'n of Indiana: M. P. Hill, president; Matthew Maroney, Lucerne, first vice-president; Samuel Foster, Otterbein, second vice-president. Directors: O. A. Pulley, Warren, William Hager, Chalmers, and John Nelson of Wolcott. The total registration of farmers and co-operative elevator and grain men from all parts of Indiana exceeded 125.

IOWA.

Sheffield, Ia.—The Farmers Elevator was badly damaged when it was struck by lightning March 9.

Shenandoah, Ia.—The Blanchard mill, owned by D. G. Danner, was destroyed by fire. No insurance was carried.

Oakville, Ia.—The Johnson elevator and Hawkeye lumber office were entered by thieves and money drawers emptied.

Humboldt, Ia.—H. C. Mundhenk has started the reconstruction of the Roller flour mill building which was damaged by fire.

Oakville, Ia.—A truck dump is being installed by C. A. Johnson in his elevator, also a 20-horsepower motor which will operate the entire elevator.

Altoona, Ia.—Through an agreement with the newly formed Grain Marketing Co., the entire \$300,000 indebtedness of the U. S. Grain Growers is to be liquidated, so local newspapers say.

Sioux City, Ia.—The Terminal Grain Corp. has reduced its capital stock from \$100 to \$50 per share, which will leave a capital of \$625,000 and ample working surplus, fully paid in.

Leon, Ia.—The Biddison-Graham Grain Co. will hereafter be known as the Graham Coal & Grain Co., following the purchase of C. G. Giddison's interests in the former company by C. O. Graham.

Oakville, Ia.—The F. E. Jamison elevator has started the erection of a modern 13,000-bushel elevator, replacing the one that burned. A sheller, scales in dump, leg, automatic scale, 15-h.p. Fairbanks-Morse engine, man hoist, etc., will be installed.

KANSAS.

Winchester, Kans.—Lum Pool of Circleville, Kans., has purchased the Winchester elevator from C. N. Bunds for his son-in-law, J. O. East.

QUALITY and SERVICE

Kansas City, Missouri

Pratt, Kans.—The Kansas Flour Mills Co. will rebuild their mill office which was destroyed by fire Feb. 24.

Simpson, Kans.—The Borne Mill was sold at a sheriff's sale to the Simpson State Bank of Simpson for \$27,471.63.

Sublette, Kans.—C. D. Jennings, Hutchinson, Kans., is erecting a 60,000-bu. elevator which will be ready for the new crop.

Isabel, Kans.—A. F. Roberts has a contract to replace the Farmers Co-op. Equity Co. elevator, which they are wrecking.

Wright, Kans.—A modern elevator building is being built by the Farmers Co-op. Elevator Co. to replace the one lost through fire.

Athol, Kans.—The Shannon Grain Co. secured the Smith County Farmers Union Elevator at bankrupt sale but did not open it this year.

Glascow, Kans.—D. D. Nuss of Miltonvale has purchased the interests of Watson & Sheets and taken over the lease held by them on the Glasco mill.

Moran, Kans.—The Cox Grain Co. has purchased W. W. Perea's interests in the Perea Grain Co. and will combine it with its Elsmore elevator business.

Penalosa, Kans.—The Dickhut Grain Co., with headquarters at Collison, has purchased the Magruder elevator here. They also operate at Preston and Wellsford.

Wheeler, Kans.—Paul H. Barnhouse, manager, will operate the recently acquired Nye-Schneider-Jenks Co.'s elevator under the name of Barnhouse Lumber & Grain Co.

KENTUCKY.

Poole, Ky.—C. F. Kuntz, Jas. Thornberry and Joe Tapp contemplate erecting one of the best mills in this part of the state.

Volga, Ky.—A grist mill at Red Bush has been purchased by Charles and R. W. Picklesimer which they will move here.

Bardstown, Ky.—The Lynn Roller Mills, owned by G. W. Beard, was destroyed by fire causing a loss of approximately \$20,000.

MARYLAND.

Hampstead, Md.—Leading citizens, headed by John Sweitzer, purchased the mill, warehouse and merchandise of the Malco Milling Co. at public auction for a sum slightly under \$50,000, and will continue the flour milling business.

MICHIGAN.

Brown City, Mich.—Plans are under way to establish a co-operative farmers elevator in the near future.

Cassopolis, Mich.—A federal license by the U. S. Government has been given the Carpenter Grain Co., whose 40,000 bus. of grain will hereafter be under the supervision of the government. The official inspector is M. W. O'Toole, the present manager.

MINNESOTA.

Richmond, Minn.—The newly built flour mill, managed by L. L. Nerlin, has begun grinding operations.

Mapleton, Minn.—The J. H. Dobie elevator property has been purchased by A. W. Wicks of Montgomery, Ia.

Lakeville, Minn.—The Claro Mfg. Co. has installed two Fairbanks-Morse engines, one 300 h.p. and the other 200 h.p.

Wheaton, Minn.—An elevator owned by the Kellogg Com. Co. of Minneapolis was destroyed together with about \$25,000 bus. of grain. The money loss was \$10,000.

Houston, Minn.—The Houston Co-op. Elevator Co. properties have been taken over by the Houston Farmers & Merchants Elevator Co., recently incorporated for \$25,000.

Northfield, Minn.—G. A. Lomen has terminated his services as manager of the Northfield Farmers Co-op. Elevator.

Duluth, Minn.—F. D. Lewis and W. G. Philp are newly elected members to the Duluth Board of Trade. The memberships of E. R. Balfour and E. J. Lawler have been transferred.

MISSOURI.

Lamar, Mo.—Ed Hargrove has purchased the B. C. Lockwood custom mill.

Easton, Mo.—Lightning protection is being contemplated by the Easton Elevator Co.

Polo, Mo.—The Polo Elevator Co. recently added more floor space to its building.

Mexico, Mo.—The Producers Grain Co. went out of business March 1 because of financial difficulties.

Maysville, Mo.—The DaKalb County Farm Bureau will have a seed exchange in the Farm Bureau office and will carry samples of seeds grown in this county and elsewhere.

Curryville, Mo.—The old board was re-elected at a meeting of the stockholders of the Curryville Elevator. Buford Noel was re-elected manager. An 8 per cent dividend was declared.

Troy, Mo.—F. H. Hanni, Bertha M. Hanni, Marie Rosalie Hanni, Bertha Trail and H. M. Maire have started the Troy Mills with a capital of \$15,000, to manufacture and mill flour, ground corn and the products of wheat and corn.

Farley, Mo.—The Farley Co-op. Elevator handled \$290,075.15 worth of wheat last year and \$29,913.96 in farm merchandise, making a net profit of \$6,595.07, according to report of Artie Fleming, manager. An 8 per cent dividend was declared.

MONTANA.

Fairfield, Mont.—Otto Wagnild is succeeded by Oscar Gaare as manager of the Montana Elevator.

Cascade, Mont.—The Cascade Mfg. & Elvtr. Co. has engaged G. F. Judd, formerly with the State Mill & Elvtr., Grand Forks, N. D., to become chemist in the laboratory they will install.

NEBRASKA.

Sidney, Neb.—The cereal mill being built by Sitz & Sitz will be in operation within two months.

Mead, Neb.—The Farmers Co-op. Co.'s business and property, including a 16,000-bu. elevator, was purchased by the Scott Grain Co. Henry Hanson is manager.

Ord, Neb.—W. J. Hather has severed his connections with the Farmers Grain & Supply Co. Clifford Flynn, who has charge of the Arcadia store for the company, will succeed Mr. Hather.

NEW MEXICO.

Roswell, N. Mex.—The Pecos Milling Co. will build a \$100,000 alfalfa mill and cotton seed warehouse.

NORTH DAKOTA.

Forbes, N. D.—The Forbes Equity Exchange suffered damage in their recent fire amounting to above \$3,000. No insurance.

Valley City, N. D.—Lynn Cowell has resigned as secretary of the Greater North Dakota Ass'n.

Watford City, N. D.—A frame addition and a concrete vault will be added to the elevator of the Farmers Co-op. Elvtr. Co.

Grand Forks, N. D.—The Russel Miller Mfg. Co. plan extensive improvements, including the erection of a brick warehouse.

office and elevator building, increasing their capacity to about 150,000 bus.

Loma, N. D.—About 12,000 bus. of grain were destroyed by fire in elevator belonging to the Woodworth Elevator Co., Minneapolis.

Essex (Mail to Devils Lake), N. D.—T. E. Ibberson Co. has a contract for the erection of a modern 30,000-bushel elevator for the Farmers Grain Co. of Devils Lake.

OHIO.

Polk, O.—J. C. Bryan will install a motor driven mill and electrify the recently purchased Polk elevator plant.

Oakwood, O.—The J. W. Whitney & Sons 30,000-bu. elevator will be sold at Paulding, O., March 21, at 2 p. m.

Pittsburg, O.—Wm. Toman has purchased the Hammel Elevator and is operating it under the management of Marian Utz.

Rosewood, O.—John Adlard of Lockington purchased the buildings and business of the Rosewood Farmers Exchange Co. for \$7,200.

Alpha, O.—The Alpha Seed & Grain Co. is rebuilding its elevator, which will have 15,000 bus. capacity and be driven by electric power.

Ada, O.—J. I. Baransy, coal and hay dealer, and Earl Wolfson have formed a partnership and will conduct business at Buckeye and Johnson streets. They will install a heavy duty wagon scale.

Columbus, O.—Harry G. Beale has resigned his position as treasurer of the Ohio Farm Bureau Federation and general manager of the Ohio Farm Bureau Service Co., both to take effect April 1. Mr. Beale will become vice-president of the American Milling Co. at Peoria and will open offices in Columbus.

OKLAHOMA.

Burlington, Okla.—The Burlington Grain Co. is adding a new warehouse and office at a cost of \$2,500.

Vineta, Okla.—A grain elevator will be erected in early summer by T. F. Loneragan and associates.

Union City, Okla.—The El Reno Mill & Elevator Co., El Reno, has sold the elevator here to the Farmers Co-op. Ass'n.

El Reno, Okla.—The Farmers Mill & Grain Co. is improving its plant to the extent of \$10,000, mostly for additional grain storage.

Blackwell, Okla.—The Wheat Growers Ass'n will hold a meeting to elect officers and delegates to the convention to be held in Tonkawa, March 28.

Hammon, Okla.—Fire destroyed the W. E. Lambert Dray, Feed & Poultry Co. warehouse. Several tons of feed were burned. Loss estimated at \$10,000.

El Reno, Okla.—The El Reno Mill & Elevator Co. is increasing the capacity of its mill and elevator with an expenditure of more than \$100,000. The company is building 225,000 bus. additional elevator capacity in two large concrete elevators and will erect a seven-story building for a mill cleaning plant.

OREGON.

Amity, Ore.—G. B. Abraham is planning a large nine-bin grain and seed warehouse costing close to \$20,000.

Portland, Ore.—This city has become the Northwest headquarters of the Sperry Flour Co. F. B. Burke, Northwest manager, has opened headquarters at the Portland Mills.

PENNSYLVANIA.

Chambersburg, Pa.—The William Hayden Mfg. Co. is making improvements in its mill.

SOUTH DAKOTA.

Hazelton (Mail to Mecklin), S. D.—The Younglove Construction Co. will rebuild the Steele-Simon Co.'s elevator which was destroyed on Feb. 3 at a loss of \$60,000.

Tulare, S. D.—Siberz Bros. & Craig, appreciating the need of lightning protection, have let contract to rod their elevators at Spottswood, Bonilla, Crandon and Tulare.

TENNESSEE.

Memphis, Tenn.—The Vitagram Milling Co. has surrendered its charter.

Lancaster, Tenn.—A new storage house is being erected by the R. Fisher Grain Co.

Nashville, Tenn.—The court has ordered the sale of the Liberty Mills to the highest bidder which will probably be held within the next 60 days, the mill having been closed under the receivership. Randall Gurrell and Maurice Werthan are receivers.

TEXAS.

Waco, Tex.—The Crouch Grain Co. is closing its office here.

Lockney, Tex.—The elevator of the Lockney Farms Co-op. Society is for sale.

Waco, Tex.—The Saunders Lone Star Seed Co. was chartered with \$10,000 capital by J. Lee Davis, J. W. Mann and T. C. Westbrook.

Lindsay, Tex.—The Lindsay Elevator Co. has incorporated with a capital stock of \$5,000 by T. H. Hemphill, G. N. Simon and J. C. Bengfort.

Marshall, Tex.—James Caswell has purchased the interests of L. B. Finley in the Stedman Grain Co. and will be associated with Pope Stedman.

Galveston, Tex.—Thos. F. Shaw, associated with the E. F. Newing export business, has been admitted to membership in the Texas Grain Dealers Ass'n.

Ralls, Tex.—P. B. Ralls has been appointed by the Ralls Chamber of Commerce to secure new industries for Ralls. Among the things needed is a flour and feed mill.

Dallas, Tex.—J. J. Cleveland, formerly a supporter of the development of the cotton trade in Chicago, has charge of the office just opened here by McKenna & Dickey, Chicago.

UTAH.

Salt Lake City, Utah.—Geo. D. Walker was killed when he fell headlong down a five-story elevator shaft in the Husler Mfg. Co. elevator.

Ogden, Utah.—Fire of unknown origin damaged the plant and grain products of the Utah Cereal Products Co. to the extent of \$150,000. Much of the damage to the grain was caused by water.

WASHINGTON.

Vancouver, Wash.—Victor Fuqua of Forest Grove has purchased the Vancouver Flour Mills from the Northern Flour Mills for \$25,000 as indicated from the value of stamps on the deed. It is reported that the new owner will convert it largely into a feed mill.

Coulee, Wash.—The directors of the Farmers Corp., a co-operative wheat buying concern, have decided upon voluntary bankruptcy proceedings and business has been suspended. The company owns a 25,000-bu. elevator and two warehouses with a combined capacity of 125,000 bus. of sacked grain.

Spokane, Wash.—The Seed Wheat Corp. is being incorporated to extend aid to drought stricken farmers of central Washington. Direct relations with prospective borrowers are to be maintained in their respective districts by Dan Khebbiel of Lind, in charge of general field work, and by J. M. Moulton, Waterville; N. H. Dugan of Ephrata, and A. G. Roston of Wilson Creek.

WISCONSIN.

Augusta, Wis.—Geo. N. Hilts has purchased the Lay grain and coal business of G. W. Vanderburg.

Livingston, Wis.—The Ernest Biddick & Co. elevator has been taken over by the Livingston Lumber Co.

Casco, Wis.—The B. & H. Milling Co., formerly known as the Casco Milling Co., has reduced its capital stock from \$40,000 to \$25,000 and its directors from five to three.

MAIL CARRIERS ASSIST ACREAGE SURVEY.

Rural mail carriers are to be used by the Federal Bureau of Agricultural Economics in making an acreage survey of crops. The marked success of the pig surveys made through the rural carriers during the last few years suggested the further use of this method in making an acreage survey. In cooperation with the Postoffice Department, the Department of Agriculture will send out nearly 1,000,000 survey cards, covering all the important crops grown in the country, the latter part of August. It is expected that the returns will be tabulated in time for use in making the final acreage estimates for the year in December.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending Mar. 7, 1925 (000 omitted):

Articles and countries.	Week ending		July 1, 1924, to Feb. 28, 1925.
	Mar. 7, 1925.	Mar. 8, 1925.	
Barley	287	507	17,028
To United Kingdom	34	507	7,947
Other Europe	253	8,242
Other countries	839
Corn	136	973	5,211
Oats	87	2	4,663
Rye	430	24	30,278
Wheat	*2,296	1,276	162,346
To Italy	1,320	381	20,149
United Kingdom	328	93	35,185
Other Europe	647	30	51,103
Canada	1	48,487
Other countries	1	771	7,422
Total U. S.	3,236	2,782	219,526
Canadian in transit:			
Barley	147	144	10,219
Oats	115	273	8,929
Rye	14	205	2,573
Wheat	1,516	4,621	39,499
Total Canadian	1,792	5,243	61,220
*Including via Pacific ports this week: Wheat, 7,000 bus.; flour, 15,000 bbls.			

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Mar. 6:

	Mar. 6, 1925.	Feb. 27, 1925.	Mar. 7, 1924.
Wheat	1,410,900	1,458,319	348,455
Oats	1,710,343	1,710,343	1,984
Barley	315,646	334,594
Rye	3,756,210	3,784,450	826,178
Corn	1,203,179	1,085,653	48,837
Total, bus.	8,396,278	8,373,359	1,225,454

MEXICAN BEANS.

I handle Mexican beans which have advanced considerably in Mexico on account of short crops due to a severe drought which prevailed during the last growing season.—J. Armengol, Laredo, Tex.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Mar. 14, 1925.	Mar. 7, 1925.	Mar. 15, 1924.
Wheat	36,026,000	33,631,000	55,483,000
Oats	18,763,000	18,208,000	9,690,000
Rye	2,203,000	2,160,000	1,981,000
Barley	7,091,000	6,973,000	1,982,000
Afloat—Wheat, 3,440,000 bus.; oats, 848,000; rye, 140,000; barley, 130,000.			

MEXICO NEEDS WHEAT.

Mexico will need to import increasing quantities of American wheat before the domestic harvest of July, 1925, according to Alexander V. Dye, American Commercial Attache at Mexico City. The tariff imposed on wheat and flour early in 1924 has raised prices so high as to create widespread dissatisfaction. Flour imports have fallen from 35,000 barrels per month to practically nothing. A normal importation of 40 per cent of the national wheat requirements has been curtailed through the prevailing high prices, but the shortage eventually will stimulate imports.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending March 14 (000 omitted):

	Wheat.	Corn.	Oats.	Rye.	Barley.
In store at					
Baltimore	3,217	70	271	6,784	403
Boston	14	442
Buffalo	4,321	1,512	2,291	533	429

Field and Grass Seeds

CLOVER SEED IN VIRGINIA.

Our section raised all of the clover seed they will need for seeding this spring and there is very little demand here but do not think there will be any surplus to carry over; selling here today very good; country feed at \$18 to \$20.—
S. F. McClure, Spottswood, Va.

Will Entertain Delegates.

Price Current-Grain Reporter: We would like to have you and your associates as our guests for one day on your way to the American Seed Trade Association Convention to be held in Los Angeles June 9 to 11.

We plan to entertain at least 125 people for one day and promise you an exciting time and no rain. We will meet you with automobiles and make a tour of the Valley, showing what is grown 100 feet below sea level; the geysers; the largest artificial river in the world; the largest irrigation system in the west; thirty thousand acres of cantaloupes being shipped at the rate of 400 cars daily; the earliest grapes on the market being harvested; five thriving towns; Mexicali, the largest city in Baja, Cal., and the capital of that state. It is the most modern city in Northern Mexico. Here we plan to serve a real Mexican dinner.

Our aim is to give brother seedsmen a good time and we are putting forth every effort to that end.—Cuff-Archias Seed Company, Brawley, Cal., by J. C. Archias, Vice President.

KANSAS CITY SEED MARKET.

KANSAS CITY, March 14—Features of trade in field seeds this week, as reported by local houses, were an active demand for grass seeds generally, and a fair inquiry for forage seeds, though southern bids for the latter were mostly out of line. There was a good distribution of both red and sweet clover seed for planting with oats. Blue grass seed was well taken, and this seed is destined to become more active as spring progresses. There was less interest in timothy than in other seeds. Carlot business in alfalfa seed kept up and some local trade in this was noted. Southern bids for cane seed were numerous, but generally too low for acceptance. Black amber was wanted at \$1.65 per cwt., basis of cleaned seed, in sacks. Carlots, as from first hands, are quoted as follows: Red top and black amber, \$1.40@1.45; orange, \$1.40@1.50. Feed manufacturers and mixers are taking some of the arrivals, which continue liberal. Demand for millet seed is not large. Country offerings are light. Dealers are willing to pay \$3.50@4 per cwt. for German, \$2.50@3 for common, \$2.30@2.50 for Siberian, and \$2@2.25 for the hog variety. Sudan grass seed is quiet. In a wholesale way it is quoted at \$5.50@6 per cwt. It is too early to sow Sudan. Soy beans and cow peas will not be wanted until after corn-planting time. Bids to the country on soy beans are unchanged and receipts are light. Virginia is wanted at \$2.50@2.75 a bushel, Black Wilson at \$2.25@2.50, and Morse and Midwest Yellow at \$1.65@1.75.

Kansas City houses quoted recleaned and sacked seeds to the trade as follows: Blue grass, per cwt., \$17@28; timothy, per cwt., \$6@7; red clover, per cwt., \$20@34; sweet clover, per cwt., \$9@15; alfalfa, per cwt., \$15@23; cow peas, per bushel, whippoorwill, \$15; new era, \$4.

TOLEDO SEED MARKET.

TOLEDO, O., Mar. 16—Clover seed was lower this week, cash and March closing twenty to forty cents, compared with a week ago. Cash seed houses were the largest buyers this week, many of them removing hedges after sales of cash.

Old and new prime seed are meeting with a good demand and quite a large amount has changed hands lately. Foreign clover of good quality is also being sought by many dealers who have been unable to find domestic stocks to fill their requirements. An excellent trade is being done by cash seed dealers and they expect the purchases to increase when the weather breaks. Many farmers are holding off expecting a further break in clover before they buy. Other field seeds are receiving attention, report many dealers, and on account of the high price of red clover will be bought by many buyers. October clover at \$13.50 is considered fairly cheap at the discount under March and the possibility of damage during the hot summer months. Trade is more active and buyers becoming more numerous now that seed has had a fair break. No deliveries on March as the premium for cash still prevails. Stocks of clover will be materially reduced during the next few weeks and the carryover may be small enough to make the new crop futures more active. Receipts last week, 1,104 bags; shipments, 857 bags; prime inspected last week, 200 bags.

Alsike was lower in sympathy with clover and offerings showed a liberal increase. Dealers say they are having a very good trade in alsike at the wide discount under clover. Receipts last week, 159 bags. Shipments, 453 bags.

Timothy was twenty cents lower with selling orders more numerous. Not much activity in the trading. Warmer weather is needed to bring some buying power into the market. A few deliveries were made on March contracts and more are expected before the end of the month. Receipts last week, 264 bags, and shipments 483 bags.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending Mar. 14, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1924.....	198,290	532,320	75,597	37,648
1923.....	120,000	28,676	112,355	298,450

SEED CORN FOR 1925

Preliminary reports obtained by the U. S. Department of Agriculture on the seed corn situation in the spring of 1925 indicate that what might well have been a catastrophe has been averted. The situation still is serious, but with care and foresight, adequate supplies of viable seed corn should be available in nearly all sections of the United States.

The backward spring of 1924 throughout most of the corn growing territory was followed by unfavorable growing weather. These conditions combined to delay the maturing of the corn crop so that in August the seed corn prospect for 1925 was the most threatening that has occurred in many years. A concerted drive was made by the Department and the State Agricultural Colleges to avoid disaster. Press notices and circulars were distributed giving advice on the selection and care of seed corn and every effort was made to insure adequate supplies of the best seed possible. The extreme gravity of the situation in itself aided. The suggestions made met with a prompt response and more seed corn was field selected and dried artificially than ever before.

It is doubtful whether corn fit for seed can be obtained from any crib in the Corn Belt this spring. With the exception of certain sections which habitually rely on silage corn seed from elsewhere, there probably is enough viable seed corn within each state to supply the needs of that state, but the supplies are not uniformly distributed. There are many localities into which

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Mar. 14:

	Range for wk.		Close Mar. 14.	Close Mar. 13.
	High.	Low.		
Clover—				
Cash	\$18.50	\$18.05	\$18.10	\$18.50

seed corn will have to be brought from more favored districts. The State Agricultural Colleges have been making every effort to determine the sections within their states where a seed corn shortage exists and the sections where surpluses are available. Farmers should lose no time in determining whether or not their seed corn will grow and in getting in touch with their county agents or State Agricultural Colleges if they need assistance. If they have a surplus of good seed they should advise these agencies of the fact.

Although the seed corn situation is not as threatening as it was last fall, it nevertheless is serious. Only by immediate care and the fullest cooperation can farmers avoid losses due to planting poor seed.

MINNEAPOLIS FLAX MARKET.

MINNEAPOLIS, Mar. 14.—Rather liberal offerings of seed helped to ease off the local market on several days during the past week. Crushers did not seem inclined to compete for the offerings on those days. The balance of the week, however, they were after the choice quality but had not much of any use for the other kind. There was some rather poor Minnesota seed early in the week and demand for this was very slow. Today's sales were made on a basis of 1½c under at 2c over for the No. 1 seed, on track, and 2c under at 2c over for the arrive. Local stocks total 348,429 bushels vs. 373,465 last week and 245,567 a year ago.

DULUTH FLAXSEED.

DULUTH, March 14.—Flaxseed market was under persistent selling pressure during the last week. Acute weakness developed on Friday in sympathy with the course in the wheat market, prices going off in chunks. On the net result of the six days' trading, spot and March seed broke 8 to 11 cents and the April, May and July futures from 6½ to 8 cents. Recoveries up to 7½ cents were made on Saturday.

Receipts continued on a limited scale, no car arrivals at all being reported on three days. They aggregated 11,971 bushels, and with shipments of 55,819 bushels to interior crushers, stocks in the elevators were brought down to 571,000 bushels.

The heaviness in the market was attributed by operators to fundamental conditions. Demand for linseed oil over the country was said to be showing a falling off, so that crushers have been backing away from the offerings on the tables lately, taking a little seed occasionally at price recessions. With considerable supplies of seed being carried in the East and approximately 6,000,000 bushels of Canadian flaxseed estimated as likely to seek an outlet in this country after the opening of lake navigation the outlook is regarded as bearish. Intimations were in fact made to the effect that charters are under negotiations to move some seed over there from Fort William as soon as ice conditions will permit. In some quarters it is thought that in response to representations by

Feedstuffs

The Gardner Roller Mill, Gardner, Ia., has installed a 50-h. p. feed mill.

The sales department of the Buffalo branch of the Quisenberry Feed Mfg. Co., is now managed by Russell Ward.

New machinery has been installed in the Fairland Cereal & Feed Mill and they are now manufacturing seven products.

F. H. Nesmith, formerly operating in the Louisville market, is now traffic manager of the Ralston-Purina Mills at the new Kansas City plant.

Mill feed prices, while somewhat easier recently, have begun to firm up and the demand is very good from dealers and jobbers, as well as mixers. In fact, sales with us have been so heavy that we have had to withdraw from the market.

The Emporia (Indiana) Grain Co. is replacing its grinding equipment with a hammer type feed grinder and has recently installed electrical power to take the place of its oil engine. This installation was furnished and placed by L. J. McMillin.

The Ladish-Stoppenbach Co. has commenced operation of a feed mill in the building erected for the Perry Products Co. on National avenue, Milwaukee. The mill will have a capacity of ten to fifteen cars a day and replaces the company's mill at Jefferson Junction which was destroyed by fire last December.

K. M. Swearingen, W. C. Theile, I. O. Koue, John McMichael and Anton Schmidt are directors in the recently incorporated K. M. Swearingen Co., Salinas, Cal., with capital stock of \$100,000, divided into 1,000 shares. The company will take over the interests of the Blackie Co., and contemplates the erection of a large feed mill with modern machinery.

It is rather significant how, in the face of recent sharp declines in wheat markets, the price of corn held up so well. We believe this is going to have an important bearing on feed values for the balance of this crop year. Some of the trade, noticing this situation, are asking for bids on round lots to be shipped into June and July, apparently thinking that feeds bought at present levels will prove good investments.

The approach of spring weather, as usual, is having some bearish effect but, on the other hand, consumers' stocks of feed supplies are being exhausted and in most cases are quite low and on top of that many mills are operating lightly, making for a reduced production of mill feeds for the time being.—Eagle Roller Mill Co., New Ulm, Minn., per J. B. Groebner, Feed Dept.

Through the purchase of stock holdings of C. H. Black and H. S. Hunter in the Southard Feed and Milling Co. of Kansas City, Kan., G. W. Selders and F. W. Crane have acquired an interest of 85 per cent in the company. Mr. Selders is president and Mr. Crane is vice-president. The sum paid for the Black and Hunter stock was \$134,000. Two feed mills are owned by the company—one in Kansas City, Kan., the other being the old plant of the Kornfalfa Manufacturing Co., in the East bottoms district of Kansas City, Mo. The company is said to be the largest manufacturer of poultry feed in Greater Kansas City. It also makes horse, cattle and hog feeds, including molasses products.

OIL MEAL MARKET.

Linseed oil meal has ruled irregularly lower during the week. The prices today are at the lowest level since last spring. Demand continues light but on the other hand production is being cut quite radically. This is especially true in Minneapolis, where some of the mills have cut their production as much as 50 per cent, therefore, the pressure to sell is not as heavy as it was when the mills were making more meal. Shipments are easier to get out but while we cannot ship pea-size immediately we can give excellent service on fine-ground meal.

Our above price is for prompt shipment. We would also be willing to sell at \$39 for last half March, April or May.—The Bertley Bulletin, Chicago, March 14.

WEEKLY LINSEED REVIEW.

NEW YORK, March 16.—United Kingdom: The linseed situation in the United Kingdom remains dull with prices somewhat lower. Shippers appear more inclined to meet the market to effect sales.

Linseed oil displays a slightly steadier tone and there is rather more inquiry in evidence.

Cotton oil continues easy with the demand quieter.

India: Weather continues dry. Shipments of linseed this week amount to 308,000 bushels compared with 272,000 bushels the week previous.

Argentina: Clearances of linseed continued moderate, around one-half million bushels weekly, but port stocks are gradually increasing and now aggregate 3,600,000 bushels compared with 3,200,000 bushels last week and 6,400,000 bushels at this time a year ago. Markets continue heavy. There are larger country offers in evidence, while the foreign demand continues disappointing. We estimate the surplus of seed for 1925 at forty million bushels plus a carryover from the old crop of six million bushels.

COTTONSEED MEAL.

KANSAS CITY, Mar. 14.—Though Arkansas and Texas mill prices were sharply higher this week, Kansas City dealers continued to quote cottonseed meal at \$41.80 per ton for carlots. The market here remained at the previous week's level because Oklahoma offered freely at \$36@37, about the same as a week ago. Offerings from Arkansas were held at \$36.50@37.50, or about \$5 higher. The Texas price went up 50¢ to \$36. Demand was called normal for the time of year, keeping distributors fairly busy. Ton lots sold here were quoted \$4 above the carlot basis.

Selling pressure was more evident than buying orders in the linseed meal market. Kansas City handlers said the mills were hunting business, Minneapolis offering carlots at \$41.50 per ton, or \$2 less than a week ago. Resellers asked \$41. The Kansas City price was reduced \$1, to \$45.80 for carlots and \$49.80 for tons. There was a moderate feeding demand.

Hog strength and better buying by feeders started talk about an imminent advance in the price of tankage, but sales were on the old level, \$55 a ton for carlots and \$60 for ton lots. Manufacturers said their raw materials were costing more than a few weeks ago.

There was a good demand for meat scrap, due to the approaching season for young chicks and a favorable market for eggs. Prices ruled firm at \$60 a ton for carlots and \$65 for ton lots.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

CATTLE RAISERS NEED HELP.

Recommendations for the immediate relief of cattle raisers were made by the Agricultural Commission in its preliminary report to President Coolidge. The recommendations follow: Inauguration by the Federal Farm Loan Board of a campaign for the organization of discount agencies as a means of obtaining loans from intermediate credit banks to assist live stock raisers; a review of the personnel of the intermediate credit banks to make it certain the employees include persons conversant and sympathetic with the needs of agriculture, including live stock; a special report by the chairman of the Federal Farm Loan Board by July 1, 1925, indicating such progress as has been made in meeting the emergency in the live stock industry; an early and thorough revision of freight rates to relieve the raw products of agriculture and live stock from a disproportionate share of transportation costs.

The report states that the cattle industry is suffering through the lack of tariff protection from competition with hides and meat products from foreign countries produced by cheap labor and under different standards of production. A uniform grazing policy on public lands and in the national forests also was recommended.

SPAIN IMPORTS FEED.

Spanish flour mills have cut down production to the point where there is a serious shortage of millfeeds. This reduction is due to the government restrictions upon the price of bread and uncertainty over government action respecting fixed flour prices. Prices of feeds have risen to such a figure as to make importation possible, despite the penalties imposed against bringing in mill offals from abroad. A number of large purchases have already been made from mills in northern Morocco and southern France, and if the condition continues importations from the United States are not improbable.

THE FEED MARKETS.

Duluth, March, 14.—Groundfeeds broke from \$1 to \$2.25 on this market during the last week and cornfeeds receded \$2.25, but millfeeds are unchanged though their price tendency is easier. Dealers' buying of feeds was for immediate needs only, as a result of the general unsettlement and the readjustments in prices going on in the grain markets. Closing prices per ton follow: Bran, \$24.50; shorts, \$35.50; Boston mixed, \$25.50; red dog, \$38; flour middlings, \$31; ground oats, \$32.50; No. 1 ground feed, \$39.75; No. 2 ground feed, \$41.50; No. 3 ground feed, \$36.75; cracked corn, \$43.50; coarse cornmeal, \$43.50.

BALTIMORE.

Baltimore, Mar. 14.—The demand for wheat feeds is limited to the supplying of actual or near wants, and stocks on hand are therefore ample for all requirements. Hominy feed slow sale. Demand for gluten feed is slow, although prices on this line show no further change. Alfalfa meal is steady. Dried beet pulp unchanged. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$30.50@31; Western middlings, per ton, 100-lb. sacks, \$31.50@32; hominy feed, per ton, \$45@46; gluten feed, per ton, \$38.50@39; alfalfa meal, per ton, \$31@32; dried beet pulp, per ton, \$38.

NEW YORK.

New York, Mar. 14.—Both Western and city feeds were reduced from 50c@1 per ton and even in view of the fact that prices now compare very favorably with former years, consumers apparently are not interested outside of actual requirements. Most of them are covered for March shipment. City bran is quoted at \$31, middlings \$31.50 and red dog \$45; while Western bran rules at \$30.75, middlings \$31.50 and red dog \$45 per ton.

MEMPHIS.

Memphis, Mar. 14.—Demand for feed continues light, but as stocks in the hands of feeders are so small there must be sustained buying, even though orders are much below normal. Millfeed continues firm, despite the break in wheat, as offerings are light. Demand for shorts is unusually light, and local selling prices are still \$2 or more under what mills are asking for shipments. Wheat bran is quotable at \$28@29, while asked prices for gray shorts range from \$33.50 to as high as \$35. Cottonseed meal is steady, but in light demand, quotations at \$36 for 41 per cent and \$38 for 43. Hulls are still moving slowly, loose quotable at \$7.75 a ton. Alfalfa meal quotations are nominal at \$28 @28 for one.

MILWAUKEE.

Milwaukee, Mar. 14.—Millfeed quotations generally ruled slightly firmer during the past week, but no improvement was noted in demand from the consumers and most dealers were offering concessions whenever necessary to make sales. The only active demand in the market was for oil meal, which is being used by many farmers for fattening their hogs. Current quotations are: Winter bran, \$26.20@26.70; spring bran, \$25.50@26.50; standard middlings, \$25.50@26; flour middlings, \$30.50@32; red dog, \$37.50@38.50; rye feed, \$26@26.50; linseed oil meal, \$42@43; cottonseed meal, \$38.50@43.50; hominy feed, \$39@40; oat feed, \$8@9; gluten feed, 30 days, \$33.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

CINCINNATI.

Cincinnati, Mar. 14.—The drastic changes in wheat prices apparently had little effect on mill feeds here; in fact, worse conditions prevailed and bran and middlings advanced \$1@1.50 per ton. Smaller track offerings and sharply higher prices asked by western and northwestern mills and reports of curtailed production because of dullness in flour was held as the reason for the strength. The demand for spot offerings was only fair, but was considerably better for future shipment. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$30.50@31; hard winter wheat bran, \$30.50@31; standard middlings, \$30.50@31; soft wheat middlings, \$35@35.50; gray hard middlings, \$35@35.50; mixed feed, \$32.50@33; No. 1 alfalfa meal, \$30; hominy feed, \$43.50@44.

MINNEAPOLIS.

Minneapolis, Mar. 14.—The local feed market is such a narrow affair that it is a mighty difficult thing to secure accurate quotations. Outside demand is almost nil, but with almost the lightest output in the history of the Minneapolis milling industry, it has been a rather difficult matter to bear the market. One of the large local mills bought a fair quantity of bran to fill their contracts and this could hardly be construed as being very bearish. The break in coarse grains was expected to have a little sympathetic effect on the situation but apparently it failed of its purpose.

For the week ending today shipments totaled 11,912 tons vs. 10,503 last week and 17,217 a year ago. Season shipments total as follows: Since January 1 this year, 118,917 tons vs. 144,975 last year; since Sept. 1, this year, 364,430 vs. 415,679 a year ago.

Today's quotations were as follows: Standard bran, \$23@23.50; pure bran, \$23.50 @24; shorts, \$23@23.50; red dog, \$36@40, and flour middlings, \$28@29.

PHILADELPHIA.

Philadelphia, Mar. 14.—The market for feedstuffs is very dull and prices weak and lower. Receipts and offerings are light, but fully ample for all requirements, which induces more pressure to sell. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$33.50@34; winter middlings, \$35@36; spring bran, Western shipment, \$31@32; standard wheat middlings, W. S., \$31@32; flour middlings, W. S., \$36.50@41; red dog, W. S., \$44@45; low grade flour, W. S., \$55@56; rye middlings, W. S., \$30@31; reground oats feed, \$16@17; fine yellow hominy, W. S., \$43@44; fine white hominy, W. S., \$44@45; cottonseed meal, 36% protein, W. S., \$41.50@42; cottonseed meal, 41% protein, W. S., \$44@45.

DEPARTMENT OF AGRICULTURE RESIGNATIONS.

Chester Morrill, assistant to the Secretary of Agriculture, and officer in charge of the packers and stock yards administration and grain futures administration, on March 5 tendered his resignation to Secretary Jardine and it was accepted effective on March 12.

Dr. E. D. Ball, head of the scientific work of the department has also resigned and it is said that other resignations may include that of Henry C. Taylor, head of the bureau of farm economics and Dr. Charles Brand, the consulting specialist on marketing.

WORLD DAIRY PRODUCTION CHANGING.

With the elimination of Russia from the European dairy products market, supplies from other sources were obtained and heavier production encouraged. To a great extent New Zealand, Australia, and Argentina have supplied this demand, but Russia again is returning to the export field.

MOLASSES—VITAMIN B.

Considerable interest was created through a recent item in this column on "Molasses as a Source of Vitamin B."

The authors, professors at Iowa State College, Ames, Ia., prepared this article for Industrial and Engineering Chemistry, February, 1925, issue. Since the information given in the paper indicates that cane molasses is much richer in vitamin B than previously assumed, the facts are of particular interest. We quote in part from the article, in which Dr. Carl S. Miner of Chicago and the C. U. Snyder Co. of Mobile, Ala., collaborated.

"The general opinion prevails that molasses as a food is of value from the energy standpoint only. This is to be expected from the analysis, since the greater portion of the solid matter is composed of sugar and only a comparatively small amount is crude protein (calculated as N x 6.25). It was deemed advisable to ascertain the degree of concentration of vitamins in this material because of the wide use of molasses in animal feeds and in the human dietary.

Since the vitamins cannot be determined chemically at the present time, the only means available to reveal their presence and concentration is the so-called biological method, which involves the use of small laboratory animals under carefully controlled conditions and

vigorous rats weighing from 50 to 70 grams each were used.

The diets used for the determination of the amount of vitamin A had the following consumption: purified casein, 20 per cent; salt mixture, 185, 3.7 per cent; yeast, 5 per cent; various amounts of molasses from 5 to 20 per cent; and the remainder of the ration to 100 per cent was composed of dextrin.

The experiments showed that there is considerable difference in the vitamin B content of cane and beet molasses and sorghum. Cane molasses (black strap) is much richer in this vitamin than either beet molasses or sorghum.

With a ration of 15 per cent cane, the best results were obtained with fair results from a 10 and a 7.5 per cent ration, while even a 5 per cent cane ration showed better results than a ration carrying as much as 25 per cent of beet or sorghum, a quick pickup being noted in both of the latter when yeast was added, thus indicating a deficiency in both of them of vitamin B.

It was shown that yeast is a good source of vitamin B and that reproduction was possible on levels of yeast corresponding to 1.5 per cent and more, but that the mortality of the young was high even when yeast composed as much as 8 per cent of the ration. On the latter quantity of yeast the mortality was 75 per cent. Apparently, yeast is richer in vitamin B than cane molasses, but the results on reproduction and rearing of young are not so good with yeast. The females on cane molasses as the sole source of vitamin B produce more litters, more young to the litter, and rear a larger percentage than do the females on yeast as the only source of this vitamin."

FEEDSTUFF SITUATION.

With the major trend of the grain market downward, feed buyers are absolutely uninterested in purchasing feed except where it is absolutely necessary to fill their immediate requirements. The unusual situation now existing with many feed commodities entirely out of joint with the intrinsic value of the grain from which they are made has caused a very unusual condition. Feed consumers are more or less perplexed as to how to figure out what might happen either in the immediate or distant future for the balance of the feeding season. Hence they prefer to go along on a hand to mouth basis rather than take any chances on purchasing feed for long-time delivery with the possibilities of losses confronting them later on when they figure it should develop into profits. It is conjectured that the feed business for the balance of this season may be of normal gross volume but widely scattered and of small proportions to each consumer.

MINNEAPOLIS.—Bran, \$23.50; standard middlings, \$23.50; flour middlings, \$29; red dog, \$37 to \$38.

CHICAGO.—Bran, \$26.10; standard middlings, \$26.10; flour middlings, \$31.60; red dog, \$39.60 to \$40.60.

KANSAS CITY.—Bran, \$23.50; gray shorts, \$27.

ST. LOUIS.—Bran, \$25.90; gray shorts, \$29.40.

ALFALFA MEAL.

Very little buyers' interest more sellers than buyers and what little contracting interest exists is small in volume and from 30 to 60 day scattered shipments. Second hand bag basis, nominally quoted, choice, \$27.50; No. 1, \$26.50; No. 2, \$23. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Sellers in excess of buyers. Very little exchanging hands

except where strong discounts are offered at prices enabling the purchaser to warehouse the feed for his future use and the price must be made so that they are able to carry it and pay storage charges.

HOMINY FEED.—Hominy feed is marking time on price with the supply and demand limited with the supply a little in favor of being in excess of buyers' wants; consequently, spotted conditions exist where discounts are offered in order to move the feed quickly. Nominally quoted, sack basis, white, \$39.50; yellow, \$39. In bulk, where available, \$1.50 to \$2 a ton less.

LINSEED OIL MEAL.—Absolutely featureless from the standpoint of demand. Prices steady with a complexion of declines looked for unless demand increases immediately. Nominally quoted sack basis, Chicago, \$40 to \$41. In bulk, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—With production cut down sharply, stocks on the market are less than they have been within a number of months and prices are steady. Demand is very satisfactory and market cleaning up in good shape. Baby chick raisers are buying heavily just now. Quotations are as follows: Creamery in carlots at 6½¢ per lb. and L. C. L. up to 7½¢.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop, but with a present reduction in meal production has given the market a somewhat better tone. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$43.30.

GLUTEN FEED.—Demand is good and most of the orders received are for immediate shipment. The market, however, is looking for a slump at almost any time now, as the season is about ended. Quotations follow: Gluten feed in bulk \$31 a ton, sacked \$33.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slackening somewhat but at the lowered prices all packers' products are moving in fair volume, last week's movement being unusually good. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

EARLIEST PLANTING SPRING WHEAT.

A surprisingly early report on spring wheat planting comes from Ashton, Ill. Thirty acres there were seeded March 9 and 10, and when old residents get to discussing previous early plantings, it is quite possible the present dating will come pretty close to the record. Ashton is in northern Illinois and, in view of the below average temperatures of the winter and the fact that the spring season is not early, it is indeed a courageous farmer who got his wheat in this early.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, Mar. 14.—Owing to a drop in hay prices, all grades of alfalfa meal, except choice, were lowered 50c to \$1 a ton this week. Carlot quotations were: Choice, \$27@28; No. 1, \$24.50@25.50; No. 2, \$20@21; No. 3, \$19.50@20.50. Instead of selling, the mill interests were seeking shipping instructions on old bookings, some of which were made two or three months ago. Mixed feed manufacturers evidently are having difficulties of their own and shipments of meal held back as much as possible. Small alfalfa mills here are doing little business.

In the grain-molasses feed business good reports are made concerning the demand for poultry feeds, due to the spring season, when people acquire the chicken-raising fever. Southern orders for horse and mule feeds are fair and might be better except for the drouth in Texas, which threatens to curtail cotton planting. Demand for hog and cattle fatteners is improving, due to higher prices for live stock. There were a few price changes, some up and some down. Carlot quotations were: Dairy feeds, \$37.50@47 per ton; cattle feeds, \$39@46; hog feeds, \$46@52; pig meal, \$71; horse and mule feeds, \$33@45; alfalfa-molasses feeds, \$28@34; scratch poultry feeds, \$49.50@56; mash poultry feeds, \$50@80.

ALFALFA A MONEY MAKER.

That many of the ills that the Minnesota farmer has experienced in recent years might have been mitigated by a change in crops is the belief expressed by the Blue Valley Creamery institute in a statement concerning alfalfa on the dairy or general stock farm. The statement concludes with a plea for increased alfalfa acreage as a means for making the farmer more prosperous.

"Of the estimated 60-odd millions of acres in tame hay last year, only a little more than 10 millions were in alfalfa," says the institute's statement.

"Alfalfa is a moneymaker. Recent studies of farms growing alfalfa showed them to have almost double the net profit shown by non-alfalfa raising farms. As a breakfast food and evening ration for cattle it has no equal, and as a resistant to drouth, a soil enricher and a weed eradicator it is the peer of all hays.

"In spite of these advantages, however, the last census showed that while seven out of every 10 farms had dairy cows, less than one in 10 was growing alfalfa."

HISTORY OF ALFALFA.

The original home of alfalfa appears to have been southwest of central Asia but from there it has been carried to practically all parts of the world. It is now one of the staple forage crops of every continent of the old world and easily takes front rank as the most important leguminous forage crop of the western hemisphere.

The Persians were apparently the first nation to grow this plant. They took it with them when they invaded Greece in 490 B. C. Alfalfa was introduced in Italy about the first century. The introduction of alfalfa in Spain was probably during the Moorish invasion in the eighth century. The Spaniards in turn took it to Mexico and South America during the 16th century. It is reported to have been carried northward from Mexico into what is now the southern portion of the United States but it was not until 1854, when it was taken to San Francisco from Chile, that its rapid extension over the irrigated sections of the western states commenced. Attempts on

the part of early American colonists to establish it were unsuccessful. The oldest field is in South Carolina. It is reported to be 75 years old. The cultivation of alfalfa is set forth in detail in Farmers' bulletin 339 which can be obtained free by writing direct to "Division of Publications, U. S. Department of Agriculture."

LIBERAL FEEDING FOR DAIRY COWS.

Liberal feeding is the secret of success in handling dairy cows. Given dairy cows of the right type, success is sure to attend the man who feeds with a free hand, according to the best authorities. It is impossible to get something for nothing, at least in the dairy business. How long will it be before all the farmers in this country learn that a poorly fed calf means a small, undeveloped cow, and that a runty cow poorly fed means no profit? Cows that have been well fed and well developed and are able to make good use of large quantities of feed are the kind of animals needed on dairy farms. A cow that can subsist on small rations is not wanted. Find the cow, or the type of cow that turns feed into milk, and then give her plenty of feed to work on.

CHANGING CONDITIONS IN DAIRYING

Important changes are going on in territory adjoining large cities among dairies and milk distributors. Bulk milk is coming in ever increasing volume to such markets from distant points, showing consequent changes in dairy herds adjacent to our large consuming markets. Herds are being sold and transporting facilities for milk changed. In this connection the General American Tank Car Co. has perfected new equipment with two glass tanks to each car with a combined capacity of 6,000 gallons. They are insulated and refrigerated and it is presumed will gradually replace the present five gallon can plan. It may have been some milk tank cars of this sort that one of the widely circulated farm papers was inspired to use in a recent cartoon showing train loads of country milk passing through the environs of Chicago with envious dairy herds looking on and milk stations and creameries idle. If an ever-increasing volume of milk is produced on twenty-five to fifty dollar acreage in territory where dairy hay is also heavily produced, it must be apparent that radical changes in the hay and feed business in city trade will follow.

BRITISH DRY HAY ARTIFICIALLY.

The British government is taking a keen interest in a process for artificially drying hay that has recently been perfected by the institute of agricultural engineering at Oxford University. The process is very simple and inexpensive, costing only \$200 for installation and \$2.30 a ton for operation. This cost remains constant while the cost of natural drying the hay is \$2.70 a ton in a good year and may be \$3.60 in a bad year. Air is heated by paraffin fuel and driven into the center of the hay stack by fans. By this means a stack of from 20 to 25 tons may be dried in eight hours.

H. E. Surface, formerly with the B. S. Constant Company of Bloomington, Ill., has joined the sales force of the Webster Mfg. Company and will handle the Webster line, calling on the grain trade in Illinois.

GOOD DEALERS PROPOSITION.

Hay Department

HAY DEMAND LIGHT IN GEORGIA.

We beg to advise that never in our experience have we seen the demand for hay as light as it is now. Under ordinary conditions demand for hay should be good from all over the South, but it is evident that there are much less live stock to feed as there has been in past years. Dealers everywhere complain of lack of demand. Stocks in dealers' warehouses are low in spite of slow movement.

While there was considerable pastures during the fall of the year it has been all consumed several months ago.

We do not anticipate much improvement in conditions.—*M. H. Haym & Co., Atlanta, Ga.*

HAY TALK OVER RADIO.

Harry Whiteside, the Government representative in Chicago, spoke again last week over the radio, his subject being "How Hay Is Handled in the Chicago Market."

ADDITIONAL HAY AND BEAN GRADE HEARINGS.

Dates and places for additional hearings on the proposed grades for alfalfa, Johnson and wild hays, and dry edible beans, have been announced as follows:

March 28—1:30 p. m., Ogden, Utah; Stock Yards—Alfalfa.

March 30—10:00 a. m., Twin Falls, Idaho; Episcopal Parish Hall—Alfalfa.

March 31—10:00 a. m., Twin Falls, Idaho; Episcopal Parish Hall—Beans.

April 1—10:00 a. m., Hermiston, Ore.; City Library Building—Alfalfa.

April 2—10:00 a. m., Yalima, Wash-

ington; Y. M. C. A. Building—Alfalfa.

April 3—10:00 a. m., Seattle, Wash.; Assembly room of Port Commission, Bell Street Dock—Alfalfa.

April 6—10:00 a. m., Billings, Montana; Billings Commercial Club—Alfalfa.

April 7—10:00 a. m., Billings, Mont.; Billings Commercial Club—Beans.

April 9—1:30 p. m., Denver, Colo.; 158 New Postoffice Building—Alfalfa.

April 10—10:00 a. m., Denver, Colo.; 158 New Postoffice Building—Beans.

April 11—1:00 p. m., Lexington, Neb.; Courthouse—Alfalfa and Wild Hay.

April 11—8:00 p. m., Cozad, Neb.; Alfalfa and Wild Hay.

April 13—10:00 a. m., Omaha, Neb.; 1134 North 14th Street—Alfalfa and Wild Hay.

April 15—1:30 p. m., St. Louis, Mo.; Directors' Room, Merchants' Exchange—Alfalfa and Wild Hay.

April 16—1:30 p. m., Kansas City, Mo.; 1513 Genesee Street—Wild Hay.

April 17—1:30 p. m., Kansas City, Mo.; 1513 Genesee Street—Alfalfa.

April 21—1:30 p. m., St. Paul, Minn.; Old Dairy Building, University Farm—Alfalfa and Wild Hay.

April 24—10:00 a. m., Lansing, Mich.—Beans.

April 25—10:00 a. m., Lansing, Mich.; Agricultural College—Alfalfa.

April 27—10:00 a. m., Rochester, N. Y.; Powers Hotel—Beans.

April 28—10:00 a. m., Syracuse, N. Y.; Room 4, Slocum Agricultural College, Syracuse University—Alfalfa.

HAY MARKET REVIEW.

The hay market ruled practically unchanged during the week ending March 14, although the market tone was slight-

 Receivers—Shippers
Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

NORTHERN 92 Corn Exchange Minneapolis Minn.
HAY & FEED CO. N
HAY Shippers Write for Quotations
 WESTERN UPLAND ALFALFA AND TIMOTHY

ly easier, according to the weekly hay market review of the United States Department of Agriculture. Arrivals of top grades continued light and moved readily, but medium and low grades clogged the markets and sold at wider discounts. Timothy and prairie held steady but alfalfa was easier on account of the weakness in California alfalfa.

Stocks on farms March 1 were 3,691,000 tons greater than a year ago, totaling 37,146,000 tons against 33,455,000 last year and 36,610,000 tons March 1, 1923. About 1,579,000 tons more have disappeared from farms than during the same period last year and 1,705,000 more than for this time in 1922-23. Farmers have been pressing their surplus on the market and prices have sagged, especially toward the end of the winter since the rather open season favored light hay consumption. The heavy stocks are located in the states which had a large crop in 1924. Pennsylvania has 93 per cent more on hand than a year ago; Michigan 79 per cent, Indiana 77 per cent, Ohio and Illinois 60 per cent and New York 25 per cent more; while South Dakota has 40 per cent less than a year ago, Nebraska 18 per cent less and Kansas 8 per cent less.

Timothy averaged steady. The Boston market was practically unchanged but receipts at New York were in excess of trade needs and the market was weaker. Receipts were lighter at Pittsburgh and the market was firmer. Good hay was steady at Cincinnati but inferior hay was almost unsalable and the movement continued heavy. Light receipts strengthened the Chicago market, although low grades were not wanted and the St. Louis market held steady. Trading was of fair volume at Southern markets for good hay but there was an over-supply of low grades.

Alfalfa was slightly easier at Omaha but steady at Kansas City. Damaged hay was slow sale at both markets. California markets were weak as stock was being turned out to grass and demand was slack. California alfalfa was being offered on the Atlantic seaboard cheaper than the all-rail shipments from interior points.

Prairie held steady with light receipts equal to trade needs. Demand was inactive at Chicago on account of the low prices of fair quality tame hay, but other markets were practically unchanged.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.
 James P. Campbell, hay and alfalfa meal dealer, spent the week in Colorado. The cutworm, which has done some damage to wheat in southwestern Kansas, is also a menace to alfalfa fields, according to a report by Prof. E. G. Kelly, extension entomologist of the Kansas State Agricultural College.

"If I were a farmer with some high-grade alfalfa hay," said W. L. Gordon of the Boynton Hay Co., "I would sell it now, as the dairies are paying good prices for the kinds needed. Grass is coming, and a little later the new harvest will be in sight."

R. C. Bell, in discussing the hay market Thursday, said: "Most of the hay dealers thought the short corn crop would increase the feeding demand for alfalfa and other kinds of hay. However, the high-priced corn reduced the number of cattle on feed, and this curtailed the demand for hay."

The Government report for March 1 shows 1,203,000 tons of hay in Kansas farms, as against 1,301,000 a year ago. The Nebraska farm stocks were 1,826,000 tons, as compared with 2,222,000 in March, 1924. In Missouri the farmers held 1,891,000 tons, against 1,465,000. Oklahoma farmers had 550,000 tons.

"The percentage of sour, rotten, stink-

ing alfalfa hay from Nebraska this year is so high that I often wonder how the commercial demand can absorb the offerings," said N. C. Campbell, president of the Kansas City Hay Dealers' Association, Wednesday. "Of course, the alfalfa mills, in making low-grade meal can take a great deal of poor hay, but some is too bad even for that use. Considering the discounts that have to be made on damaged hay, it seems that farmers would see the great disadvantage to themselves in putting up grassy and imperfectly stacked hay. Well stacked hay should not suffer from the weather."

Tanner Stephenson, for nine years connected with the Carlisle Commission Co. as a hay buyer and salesman, has been engaged by the Ralston-Purina Mills as track buyer of alfalfa hay. Mr. Stephenson will assume his new position March 16. His place with the Carlisle Commission Co. will be taken by William G. Zimmerman, who has been in the office for several years.

D. B. Tilson of Dyer & Co. expects an up-and-down market for alfalfa hay during the remainder of the old-crop year. "This week," he said, "the market was broken by a recurrence of big receipts, which were caused by the higher prices and decreasing movement noted during the previous two weeks. There is a large surplus of hay yet to come in, especially from Nebraska, and the demand, except for dairy grades, is not broad. Shippers will watch every upturn in the market and try to catch it with consignments. Gluts and declines will be followed by scarcity and upturns. However, I think dairy grades will hold up well, at least until green grass becomes plentiful."

The Faris Hay and Grain Co., which handles much straw on direct purchases from the country, gave out this information about the product this week: "Receipts of receipts in Kansas City do not cover all of the arrivals. Much straw is billed direct to the stock yards company. Consignments are sold to the stock yards, the packers and local feed dealers, as a rule, but an occasional car is shipped out. There is not much money in handling straw, which is a cheap commodity. All that reaches Kansas City is wheat straw. The oat and rye straws are valuable as feed and are kept by farmers. Oats straw is said to be as nutritious as prairie hay."

Coincident with the formal opening of the new feed plant of the Ralston-Purina Mills, at Rochester and Scott avenue, Kansas City, Mo., fire threatened on Thursday to destroy the million-dollar institution built by the Ralston-Purina Co. of St. Louis. The blaze started during the forenoon in the hay warehouse, a fireproof structure, with a concrete floor and a galvanized iron roof. It was attributed to spontaneous combustion. Firemen and 50 employees of the mill extinguished the flames after an hour of fast work in the smoke-filled room. There were 1,500 tons of alfalfa hay in the warehouse. Though the actual fire loss was light, there was great damage to the hay by water. An estimate of \$10,000 was placed on the hay loss, but the building was not hurt.

CHICAGO HAY NOTES.

There is no let up in the number of calls for good hay, with very few cars offered. Nearly everything common but on account of the scarcity of good hay this is meeting with a fair demand although at low prices. There is but little demand for prairie. Packing is in fair demand and there is considerable demand for alfalfa and all kinds of straw is wanted at firm prices.—*Bridge & Leonard.*

 Consignments solicited. Market information furnished.
 61-65 Board of Trade, Chicago, Ill.

meeting ready sale, also No. 1 and No. 2 mixed. The hay that is hard to move is No. 3 heavy mixed, both clover and grass and sample grade hay. Such hay should not be shipped. It is worth more on the farm. All kinds of straw are wanted and green alfalfa will bring a very fair price.—*Albert Miller & Co.*

Receipts 20 cars. These arrivals are more in harmony with the requirements of the demand and should help to buoy up prices on the better grades of tame hay. The lower grades are hopeless and should not be shipped to this market. Prices on prairie, both feeding and packing, unchanged. Straw market steady.—*Walters Brothers.*

We look for lighter receipts for some time now and hope that this will clean up the market. It is, indeed, very hard to dispose of the medium and low grades of hay, the trade calling for only good timothy. Good clean soft packing hay scarce and wanted.—*Van Wic & Moorhead.*

HAY MARKETS.

CINCINNATI.

Mar. 16.—The large amount of inferior hay consigned to this market was again a subject of uneasiness among receivers because of the difficulties of distributing poor hay and the consequent unsatisfactory results to shippers. The market was fairly steady and demand good for any kind showing No. 1 and No. 2 grade, but very dull and draggy for ordinary and common quality, which liberal concessions failed to move. Cars re-plugged from day to day almost equaled the number of fresh arrivals, which continued large with no signs of abatement. Timothy and light mixed were in best demand, clover and heavy mixed slow, and no grade stuff a drug. Receivers foresee little betterment in conditions so long as consignments of poor hay so largely exceed the good, as the glut of inferior always tends to drag down the price of the best. No. 1 timothy, \$17.50@18; No. 2 timothy, \$15.50@16.50; No. 3 timothy, \$13@14.50; threshed timothy, \$8.50@10.50; no grade timothy, \$8@10; No. 1 heavy clover mixed, \$15@15.50; No. 1 light clover mixed, \$16@17; No. 1 clover mixed, \$14.50@15.50; No. 2 clover mixed, \$12.50@13.50; no grade clover mixed, \$10@11.50; No. 1 clover, \$15@16; No. 2 clover, \$11@14; no grade clover, \$8@10; No. 1 second cutting alfalfa, \$21@23; No. 2 second cutting alfalfa, \$17@19; No. 1 first cutting alfalfa, \$15@16; No. 2 first cutting alfalfa, \$13@15; sound sample grassy hay, \$9.50@11; wheat straw, \$8.50@10; oat straw, \$8.50@9.50; rye straw, \$13@14.

BALTIMORE.

Mar. 14.—In comparison with the moderate demand prevailing for hay, present receipts and offerings are fully ample for all needs and there is no particular firmness to prices. What little call that is heard is confined to top grades of timothy and choice light clover mixed. Low grade and inferior hay goes a-begging. Straw of all descriptions steady and unchanged. Quotations follow: Hay—No. 2 timothy, \$20.50@21.50; No. 3 timothy, \$17@19; No. 1 light clover mixed, \$19.50@20; No. 1 clover mixed, \$19@19.50; No. 2 clover mixed, \$17@18; No. 1 clover, \$19@19.50. Straw—No. 1 straight rye, \$18@19; No. 1 wheat, \$16@16.50; No. 1 oat, \$17@17.50.

PHILADELPHIA.

Mar. 14.—Baled hay and straw—Hay is quiet and unchanged with moderate but ample offerings. Straw was in small supply and steadily held but demand limited. Hay: Timothy—No. 2, \$19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$18.50@19; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$13@15. Heavy clover mixed—No. 1, \$15@16. Light grass mixed—No. 1, \$17@18. Straw—Straight rye, \$16@16.50; wheat, \$15@15.50; oat, \$14@14.50.

KANSAS CITY.

Mar. 14.—Heavy expansion of alfalfa and prairie receipts brought the total arrivals of hay this week up to 743 cars, despite some reduction in the offerings of timothy and other varieties. A week ago only 370 cars were on sale and the total a year ago was 695 cars. The market had to handle 554 cars of alfalfa, as against 236 for the previous week. This was too much, especially as to the damaged and low grades from Nebraska. Demand for the dairy grades was good, but the entire price list began to break on Monday and Tuesday and there was no recovery. Inferior hay was a drag from first to last. The market closed with net losses of \$1 to \$3 a ton, except on some sales of choice and No. 1. Country shippers had become too enthusiastic over recent advances. All tried to unload at once. The movement was surprising in the face of lower farm reserves in Nebraska than a year ago, as reported officially. Except for the milling outlet there might have been a more serious smash in prices. Prairie offerings were more than doubled. They ran up to 140 cars. Good to choice prairie was readily absorbed by shipping and local interests, but the lower grades were hard to sell. No price changes were quoted.

Timothy and other tame hay, aside from alfalfa, made total receipts of 49 cars, or 25 less than a week ago. There was a fair request for the better grades of timothy, while poor qualities were dull. Prices were unchanged. Clover mixed was taken at previous price levels, but clover dropped \$1 to \$1.50 a ton.

An increase of 3 cars made a total of 9 cars in the straw receipts. Most of the arrivals were applied on contracts, but a few cars sold at the former price. Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City: Alfalfa—Select dairy, \$24.50@29; choice, \$22@24; No. 1, \$18.50@21.50; standard, \$14.50@18; No. 2, \$12@14; No. 3, \$6@11.50. Prairie—No. 1, \$10.50@11.50; No. 2, \$9.50@10; No. 3, \$6.50@9; packing, \$5@6. Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13. Clover—No. 1, \$12@14; No. 2, \$7@11.50. Straw—Wheat, \$7.

NEW YORK.

Mar. 12.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Receipts for week.....	Hay. 1,488	Straw. 18
Receipts last week.....	1,274	82
Receipts from Sept. 1.....	35,088	614

With supplies continuing to arrive all week in excess of needs and fair trading, the situation on the whole at the close holds fairly steady with the undertone somewhat better than a week ago. Stocks on hand consist mostly of a quality ranging from a fair No. 2 down, a very large proportion of which is of a common and mixed variety.

At Thirty-third street the offerings are about evenly divided in large and small bales of an average quality, with strictly No. 1 scarce. Brooklyn stocks consist mostly of small bales of a medium grade, large bales being in comparative light supply and of poorer quality. No. 1 timothy and top No. 2 timothy in large bales find a ready outlet at quotations.

With rail holdings gradually decreasing receipt of new invoices reported light and fair trading toward the close, the feeling at the moment shows slight improvement. The straw situation is dull. Some small lots of rye moved off with difficulty at quotations.

Federal grades quotations for large bales follow: Timothy—No. 1, \$25; No. 2, \$22@23; No. 3, \$19@21. Light clover mixed—No. 1, \$22@23; No. 2, \$19@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$19@21; No. 2, \$17@18. Light grass mixed—No. 1, \$22@23; No. 2, \$19@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$16@18; No. 2, \$14@15. Rye straw—No. 1, \$15@16.

PITTSBURGH.

Mar. 14.—There is no life or snap to our hay market. Receipts, while moderate, are sufficient for the trade requirements and prices are lower. The demand for clover and clover mixed hay, even the best, has fallen off materially the last week. The season for these grades will soon be over and dealers are only buying for their immediate needs and no improvement is looked for for the remainder of this crop. Poor clover and heavy clover mixed hay are almost unsalable and in our opinion shippers will do well by keeping it away from this market.

Quotations—No. 1 timothy, \$19@19.50; standard timothy, \$17@17.50; No. 2 timothy, \$15@15.50; No. 3 timothy, \$12@14; No. 1 heavy clover mixed, \$16.50@17; No. 1 light clover mixed, \$16@16.50; No. 1 clover mixed, \$16.50@17; No. 2 clover mixed, \$12@14; No. 1 clover, \$16.50@17; No. 2 clover, \$11@14.

Straw—Receipts of straw, while not excessive, enough arriving for the limited demand. Market barely steady.

Quotations—No. 1 wheat straw, \$12@12.50; No. 2 wheat straw, \$11.50@12; No. 1 oat straw, \$11.50@12; No. 2 oat straw, \$11@11.50; No. 1 rye straw, \$13@13.50; No. 2 rye straw, \$12@12.50.

DULUTH.

Mar. 14.—Apart from timothy and mixed timothy being shaded \$1, hay prices were sustained during the last week. The tendency was easier with light buying from any quarter.

MINNEAPOLIS.

Mar. 14.—Local receipts during the past week totaled only 535 tons vs. 837 tons a week ago and 736 a year ago. Trade has been fair under the lighter receipts and prices are a trifle higher than a week ago. Tonight's figures show: Timothy—No. 1, \$17; No. 2, \$16. Upland—No. 1, \$16.50; No. 2, \$15.50. Midland—No. 1, \$13; No. 2, \$9.50. Alfalfa—No. 1, \$21; standard, \$19.

MEMPHIS.

Mar. 14.—Receipts were 73 cars, a fairly good amount for this time of the season, and large when compared with the present demand. A large proportion was low grade, so they are slightly easier. Buying is still of hand to mouth sort, but better grades are holding steady. Quote: Timothy—No. 1, \$22.50; standard, \$21@21.50; No. 2, \$20. Alfalfa—No. 1, \$28; standard, \$26; No. 2, \$21@21.50.

MILWAUKEE.

Mar. 14.—The Milwaukee hay market continued its merely nominal status during the past week with practically no receipts or shipments recorded. Current quotations continued unchanged as follows: No. 1 timothy, \$15@16; No. 2 timothy, \$13

@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

TOLEDO.

Mar. 16.—The hay market is unchanged for the past week with trade very light and prices about the same. Hay dealers are about convinced that the price trend will be lower until some of the huge stocks disappear. Farmers may haul their surplus hay to market when the weather permits and this will add to an already overloaded market. Receipts and shipments are light and buyers taking only the better grades at widely varying prices.

Prices per ton last week were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8, f. o. b. Toledo.

MINNEAPOLIS.

Mar. 14.—There was not much change in the hay situation during the week; the report of hay stocks on farms was bearish, showing a total of 37,386,000 tons, or about 3,931,000 tons more than last year; this should mean a good supply for the spring and summer months.

Minneapolis prices have been mostly a little stronger during most of the week with fair trade. Chicago reports larger arrivals and a fair demand. St. Louis hay is about unchanged, with prices mostly firm.

Quotations follow: No. 1 timothy, \$17; No. 2 timothy, \$16; No. 1 mixed, different grasses, \$16; No. 2 mixed, different grasses, \$14.50; No. 1 clover, mixed, \$15; No. 2 clover, mixed, \$12; No. 1 upland, \$16.50; No. 2 upland, \$15.50; No. 3 upland, \$13; No. 1 midland, \$13.00; No. 2 midland, \$9.50; packing hay, \$7.50; No. 1 rye straw, \$7.50; No. 1 oat straw, \$7; No. 1 wheat straw, \$6.50; No. 1 alfalfa, \$21; standard alfalfa, \$19; No. 2 alfalfa, \$15.

PORTLAND, ORE.

Mar. 12.—Hay—Buying prices f. o. b. Portland: Alfalfa, \$18.50@19 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$16@16.50; oat, \$19@20; oat and fetch hay, \$18.50@19.50; straw, \$7.50@8.

BOSTON.

Mar. 14.—Hay—Perton No. 1 timothy, \$25@26; No. 2 timothy, \$23@24; No. 3 timothy, \$18@20; eastern, \$16@23; clover mixed, \$20@22. Straw—rye straw, \$20@21; oat straw, \$13@14.

LOS ANGELES.

Mar. 11.—The hay market in sympathy with the grain and feed market shows little activity, while the prices are lower than one week ago. No. 1 alfalfa is now selling at \$23.50@25 per ton, f. o. b. cars Los Angeles. No. 2, \$2 less. No. 1 barley hay, \$28; No. 1 oat, \$33. Dealers claim very little movement in hay and do not see any prospect for higher prices in the near future. Rains have started the pastures which will lessen the sale of dry feed. The crop report in many sections of the state is very favorable and in some parts there will be a bumper crop of both hay and grain, while in some sections it is predicted there will be a shortage.

ST. LOUIS, MO.

Mar. 16.—The arrivals of hay on both sides of the river were rather liberal. The market continues to be dull on all grades except real choice qualities of timothy or light clover mixed.

Clover.—Very little demand. High grades only qualities that will sell. Other grades neglected and extreme low prices taken in order to move.

Alfalfa.—High grades in fair demand. Medium and low grades difficult to sell.

Prairie.—Very dull and no demand to speak of. Medium grades unable to place.

Straw.—Steady. No. 1 timothy, \$21@22; standard timothy, \$19@20; No. 2 timothy, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2 clover mixed, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2 clover, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$14@15; No. 2 prairie, \$9@10; rye straw, \$9@10; wheat, \$8.50@9.50.

COMING CONVENTIONS.

Mar. 24-26.—North Dakota Farmers' Grain Dealers' Assn., Bismarck, N. D.

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

Last year.....	237,901	54,308	73,644
Shipments—			
Past week.....	42,179	15,722	19,133
Preceding week.....	65,403	15,600	25,832
Last year.....	47,237	15,925	23,307

CHICAGO PROVISION REVIEW.

CHICAGO, Mar. 16.—Provision trading was active at times, with a good advance followed by liquidating sales by speculators in sympathy with the decline in grains and by a fair rally toward the last. At the close lard was 2½¢ higher to 12½¢ lower, and short ribs 35 to 40¢ higher and bellies 22½¢ to 30¢ higher as compared with a week ago. Packers were good buyers on the breaks absorbing the offerings that came out under stop loss sales. New York cottonseed oil interests were credited with being liberal buyers of July lard toward the last.

A decline in hogs led to a little selling by longs, but packers wanted product every time the market showed weakness. In the cash trade there was a

better tone with a little export business in lard and a fairly good domestic trade in cured and fresh meats. Lard stocks on March 1 at Western packing points were 103,056,000 lbs., compared with 67,181,000 lbs. at the end of January, 34,029,000 lbs. on February 29, last year, and 22,885,000 lbs. in 1923.

A small increase was made in stocks of short ribs and of dry salted and pickled meats, the former aggregating 54,723,000 lbs., against 69,175,000 lbs. two years ago. Stocks of all meats increased 44,462,000 lbs. last month and 333,804,000 lbs., against 336,221,000 lbs. last year, when there was an increase in February of 33,968,000 lbs. The gain in stocks the past month was the largest in February since 1921, when it aggregated 74,879,000 lbs. Prices for the week follow:

“.....it costs no more” TYPE “S” Auto Truck Scale

Years of use have proved the outstanding superiority of the Type "S" Scale—first, in railway service; then, under the huge hoppers in hundreds of grain elevators. But the astonishing thing to engineers has been that with all the superiority of Type "S," it costs no more.

Now this world-famous scale is available for the severe conditions of your auto-truck service—the tremendous weights, the concentration of loads on the rear wheels, the impact and shock of getting the truck on and off the platforms. Type “S” was designed for just such conditions. Thousands of these scales in use show that they are fast in operation and easy to keep in adjustment. Upkeep can be forgotten.

If the same money will give you better results, you want to know it. Our engineers will be glad to give you facts and figures, without obligation. Or mail the coupon for the booklet, "A Talk on Scales." It contains valuable information every scale owner should have.

*Are you taking chances
when you weigh motor
trucks?*

Hundreds of scale owners are taking chances whenever they weigh a motor truck. Horse-drawn loads are practically evenly divided between the front and back wheels—motor truck loads are doubly severe because the weight is concentrated on the rear wheels. Wagon scale parts are subjected to strains they were never designed to withstand. Distortion and error are almost certain to follow. Even complete failure may occur.

Motor trucks are here to stay. Type "S" Scales are built to weigh them. Send the coupon for complete information and the booklet, "A Talk on Scales."

The groundwork is being laid by the
Bureau of Agricultural Economics for a
systematic study for determining the var-
ious factors in crop production which
bring about a change in condition of
crops as the season advances. When
these influences are determined and the
relative effect of the various influences
measured, a mathematical interpreta-
tion of those factors which are known
in advance will assist materially in se-
curing a closer approximation of the
probable size of a crop.

LEATHER BELT, TWO-PLY, 66 FT.
LONG, 22 in. wide, guaranteed to be as
good as new, also a 220 h-p. Allis Corliss
steam engine. **THE CENTRAL MINNE-
SOTA POWER & MILLING CO.,** Sauk
Center, Minn.
AD HAY

FOR SALE OR EXCHANGE—Valuable
East Tennessee modern water power, 40
bbbs. flour, 400 bu. meal and feed mill. Good
water power and a market for all products
with a well established trade. Situated
near town of 8,000 on good pike road. A
bargain on liberal terms to suit buyer.
Good reason for selling. Write "B. M. C.,"
Box 37, care Price Current-Grain Reporter,
309 S. LaSalle St., Chicago.

MACHINERY BARGAINS.

WE OFFER you a select list of eleva-
tor and seed equipment, in new and used
machinery. Write for our bargain prices.
STANDARD MILL SUPPLY CO., 501
Waldheim Bldg., Kansas City, Mo.

ELEVATORS FOR SALE.

FOR SALE—Terminal elevator and Kan-
sas Line. Terms. Bargain. **ALLIN GRAIN
CO.,** Coffeyville, Kans.

NORTHERN INDIANA—10,000 bu. iron
clad elevator for sale, nearly new, with feed
house attached. **LOCK BOX 241, LaGrange,
Ind.**

INDIANA—ELEVATOR, well located in
city of twelve thousand, in good dairy and
farm country. Well established feed busi-
ness, which will show handsome profit
every year in connection. Owners have
too many irons in the fire. A genuine busi-
ness. Address **IND. ELEVATOR**, Box No.
36a, care Price Current-Grain Reporter, 309
So. LaSalle St., Chicago.

FOR SALE OR LEASE—Complete grain
elevator plant and two large warehouses.
Plant consists of: Modern reinforced con-
crete construction, new head house and
tanks, latest type of machinery. Head
house capacity 50,000 bushels, tanks 250,-
000 bushels. Also ironclad elevator adjoin-
ing, 100,000 bushels capacity, and two ware-
houses of about 150,000 bushels sacked
grain capacity. Will sell on favorable basis
or lease to responsible party. Write **J. C.
HUNT**, Post Office Box 1006, Wichita Falls,
Texas.

FOR SALE—10,000-bu. cap. iron clad ele-
vator with coal, feed, seed, salt, etc., in
connection. Two warehouses for feed and
salt, also grinder with 14 hp. gas engine in
separate building. Modern residence on
four lots with barn and two chicken houses
with room for 1000 chickens, ground plant-
ed to fruit trees, grapes and strawberries.
This elevator property is located in
northern Iowa, handles 200,000 bu. of grain
yearly and no competition.
Price \$15,000.00 cash, no trades. Address
ELEVATOR, Box No. 36, care Price Cur-
rent-Grain Reporter, 309 So. LaSalle St.,
Chicago.

PLANT FOR RENT.

FOR RENT—Our plant which we oper-
ated as a feed store for 40 years and until
October 1, 1924. 1923 sales \$175,000.00.
CONKLIN AND CUMMINGS, Goshen,
N. Y.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future deliv-
ery on the Chicago Board of Trade for the
days indicated, subject to correc-
tions of minor importance, as reported
by J. W. T. Duvel, Grain Exchange Su-
pervisor, were as follows (last three
000 omitted):

	Wheat.	Corn.	Oats.	Rye.	Total.
Mar. 2...	93,571	34,669	10,955	6,263	145,458

BUSINESS AND TRADE CONDITIONS

THE good business sense of President Coolidge will not permit carrying too far the unfortunate controversy with the Senate of the last week or so. It has been only natural to hear from certain timid sources suggestions that this Senate resistance to Presidential wishes implies a menace to business.

Broadly speaking, however, there are present no greater dangers to this country today than have existed for some time, through the influence of International circumstances, arising from uncertain conditions the world over and mainly concerning reconstruction problems.

The Senate will adjourn shortly for the Spring and Summer, reconvening next December and there is no reason why the present status of business should not carry on satisfactorily. There is not the slightest possibility of a "split" between a popular President and a balky Congress. It appears that the reactionary Republican group in the Senate does not wield the powerful influences for harm as they did during the past year or so.

It is true, when considering the plaint of our pessimistic friends, that there are certain important business matters pending, such as tax and tariff adjustments. The fact that the citizens in just a few states are paying most of the country's taxes and that Senators in the other states are desirous that this condition of affairs shall continue is nothing new. Neither is it unusual to see the seaboard half of the Senate encouraging President Coolidge towards allegiance with Eastern interests and in efforts towards the further reduction of taxes in such heavily populated Eastern states. It is an old game and in our judgment carries less ominous possibilities, as it may affect general business these days than for a long time past.

The Status of Trade

Underlying factors have been relatively unchanged during the past two weeks with production and distribution of manufactured products at levels about normal and the business outlook good. Broadly averaged, retail trade has been satisfactory since its recovery from the buyers' strike of 1920. The American people have been comfortably housed and fed, clothed and entertained. Our industries show a more elastic range than do the personal affairs of our people. Many industries have during certain periods operated too strongly; built plants that were hardly warranted and later on suffered the natural reaction from such unwise expansion. This condition very naturally reflects back to the raw material markets and when production exceeds the demand, price reductions are inevitable. Buyers, particularly in food stuffs, will take just about so much and if accurate details were available, the percentage up or down from any given year would be revealed as exceedingly small.

As an export nation of first rank in food and feed stuffs and of lesser importance in other lines, we have just gone through, in the year 1924, an exceptionally favorable period, during which foreign nations came to our shores for bread stuffs. The outlook for the crop season of 1925 is not determined, but in manufacturing circles it is expected that the year will show increased production and prosperity. It is becoming more and more realized, however, that increased profits depend more upon production and distribution economies than in the attempt to create demand which has usually proven to be both artificial and superficial.

Shake-Out in Stocks and Grain

The upheaval in the grain markets sympathetically affected the stock market and a "shake-out" of the small fellows followed last week. Brokerage houses over the entire country welcomed the respite from their arduous labors of the past several months. There have been few instances even in the war-markets with such heavy trading and violent fluctuations, as experienced during this period. The grain futures market established new records for volume day after day and the stock market for the past four months

NORTH AMERICAN WHEAT EXPORTS

NORTH AMERICA, as near as can be figured on the basis of official returns, cannot at a maximum export over 100,000,000 bushels of wheat during the last four months of the crop season. What little export business the United States does from now on, will probably be at the expense of the carry-over and the latter is likely to be relatively small at the end of the season.

The fact that the country failed to sell cash wheat despite the break of nearly 55 cents, suggests either that the grain is not back in the country, or else it is in such strong hands that there is little possibility of any large movement to terminals until the fate of the new crop has been definitely decided.

has been conducted at a correspondingly heavy volume. The bookkeeping detail of such business is enormous and memorandums on grain, for instance, usually in the clearing house during the afternoon of the same day on which trades were made, have frequently been delayed until midnight or beyond.

The financial side of such business has been entirely satisfactory with plenty of funds available, to those entitled to such credit, through their banker or brokerage house. Margins have, of course, been heavy and those unable to advance them have been closed out which is most unfortunate for them but a valuable lesson perhaps on the evils of shoe-string speculation.

The receivership proceedings of the St. Paul Railroad, which will be terminated at an early date, stand out as one of the notable events of the week in stock circles. Public confidence was however expressed in railroad shares, principally due to the fact that such issues had suffered more in a blanket consideration with St. Paul railroad finances than was warranted. Although railroad earnings have been none too satisfactory, due in part to legislative heckling, the carriers are, in the main, in a satisfactory condition.

A slight but broad downward tendency has been apparent in bonds, apparently due to a large although bearish demand from permanent investors who have rather disregarded potential speculative bond profits. The week end brought a most favorable financial

report from the United States Steel Corporation, unexpected in a way because the steel industry has gone through and is even now facing a reactionary period. Depressed conditions in steel began during the Spring of 1924 and continued through the Presidential election. Commenting on this situation, Elbert H. Gary, chairman of the company's board of directors, states:

"Concurrently with diminution in the domestic demand for products there was a gradual weakening in prices of a number of leading products. For the entire year, however, the prices received in 1924 for the total tonnage of rolled and finished steel products shipped to the domestic trade netted \$3.17 a ton more than the average price received in 1923 for an equivalent tonnage of similar products respectively. The export business for the year, while of fairly good volume as to tonnage, was largely conducted under severe price competition and the average price received in 1924 for all such products was 74 cents less a ton than the 1923 average for a similar tonnage of the respective products shipped in 1924."

American Protection of Patentees

A wide interest attends the removal of the affairs of the patent office from the Department of Interior to the Department of Commerce, under Sec'y Hoover. Discriminatory rulings in many foreign countries against American patentees prevail, which it is Mr. Hoover's plan to remedy at the next conference on the subject in October at The Hague. He says:

"A foreign patentee, by registering his patent in the United States can hold it for seventeen years and prevent manufacture of the article in the United States, whereas American patentees, in order to protect their patents in other countries, have been driven to the establishment of a large number of factories abroad."

Money Rates

The seasonable Spring demand for funds has firmed up the money market. A recent announcement appeared that \$50,000,000 in gold was moving to Germany and a continued large volume of foreign floatations in American markets prevails. Bankers expect further gold exports to exert a strengthening influence on money rates. A detail in this is the probability that the gold standard will be re-established in Great Britain before long. Our readers will recall that in the early months of 1924, New York money was cheaper than London funds and since that time and for this reason, large amounts of American funds have been used in the London market. On Feb. 27th of this year, the New York Federal Reserve Bank raised its discount rate from three to three and one-half per cent but on March 5th, the Bank of England similarly advanced its rate from four to five per cent. Thus, London continues to offer attractive investment opportunities, and the American money market is influenced accordingly.

Northwestern Situation

For some time the eyes of the country have been turned with a kindly and sympathetic interest on our Northwestern states. It has been felt recently that a marked improvement was going on there, both in rural and city affairs. Reassurance to this effect is found in an exceedingly favorable report just issued by the Federal Reserve Bank of Minneapolis which, among other comment, carries this significant statement:

"The money value of business transacted in this federal reserve district during February, as shown by the individual debits at banks in seventeen selected cities, was fully one-fifth greater than a year ago."

The statement further says that the increase in business was due both to price advances in grain and live stock and to greater speculative activity. This latter approval reminds us of the January first report of Dr. Duvel, in charge of the Grain Enforce-

ment Act in Chicago, wherein his department commended the protective and balancing features of grain futures, with particular application to the needs of country grain elevators.

In further discussing price movements, the above mentioned bank statement says:

"Prices for agricultural products exhibited mixed tendencies during the month of February. Live stock prices moved upward rapidly, but grain prices declined, as compared with the previous month. The most noteworthy event of the last twelve months is the great advance of agricultural products prices."

WHY THE SLUMP?

AMONG the many reasons that have been given for the recent slump in the wheat market is one which comes in a special press dispatch from Liverpool and which says it was due to the hurried dumping of 10,000,000 bushels of wheat on the market by the Canadian wheat pool.

This dispatch adds that it is believed that the future course of prices for wheat will depend largely on whether European buyers will pay for the wheat which they bought on contract from the Canadians and on whether they buy the still unsold portions of the Canadian shipments.

PROTECT YOUR ELEVATOR FROM LIGHTNING

WE have pointed out from time to time editorially the advantage to be gained by having every country elevator properly rodded as a protection against lightning. Spring is on the way. With it, we will have thunder storms and lightning. Protection against this hazard may be had at a nominal cost and it works to the advantage of the elevator owner in two ways; first, by giving him an advantage in the insurance rate and, secondly, practically insures the house against destruction by fire caused by lightning. The elevator is the grain man's business home. Its destruction means that he is out of business until the plant can be replaced. Now is the time to get busy and have this installation made.

SEED CORN, A PROBLEM

CORN planting time will soon be upon us. The country elevator will be called upon perhaps this year more than usual to supply its farmer patrons with good seed corn of high germination test. As the country elevator's profit depends upon not only the quantity but quality of grain passing through the owner's plant each season, a service can be rendered not only to his business but to his farmer patrons in seeing that they have seed that will grow as near a 100% crop as possible. Recent test of two hundred samples of farmers' seed corn shows that only 52% tested from 80 to 90%; 21% from 70 to 80%; and 5% from 60 to 70%. It would seem, therefore, that there is a real need for unusual care in the selection of seed corn this spring. Grain dealers who have not proper facilities for making germination tests should secure the necessary equipment. Advertise in your local papers that you are prepared to render this service. It will pay.

WAS IT MANIPULATED?

SECY. OF AGRICULTURE JARDINE has given instructions that the recent price fluctuations of grain be investigated so as to determine whether there has been any attempted manipulation of prices or a corner of any grain by any dealer or operator upon the Board of Trade and has invoked the provisions of the Grain Futures Act of Sept. 21, 1922, with respect to contract markets.

Since the outcome of the 1924 wheat crop became known prices have had a steady and consistent advance until recently but did not reach the high level expected by many which world conditions may have warranted. Growing wheat is in itself a speculative

enterprise from the time the seed is planted until harvest. Buyers of Europe have been the bidders which caused the advance. Ample supplies had to be provided. The Liverpool market has been the price barometer and the buying orders were mainly executed in Chicago, the hub of the American grain trade. Investigations will, as they have in the past, reveal that the price fluctuations have been the opinions of buyers and sellers registered in the pit based primarily upon supply and demand. It is a natural law that which goes up will come down. It would have been just as logical for the government to have started an investigation when the prices were rising as to wait until they started to recede. Why wasn't it done? Perhaps the political effect is better on the decline, even though consumers wish to buy their food products as cheaply as possible. However, when the investigation is completed it will reveal just what has always been revealed and that is that the market has registered prices which reflects the opinion of the majority whether they be buyers or sellers. It is a hard matter for the public to manipulate prices—their action registers them.

ITALIAN CLOVER

WITHIN the inner circles of the American seed trade discussion is always heated when the subject of Italian clover, or in fact French or Northern African clover, comes up. During the past week or so, this has been again laid upon the table for those who choose to pick the subject to pieces, and it has been decidedly unfair to certain markets and certain firms. The thorough manner in which imported clover of doubtful parentage has impregnated the American market is related by those who receive offers of such high-priced, but diluted, domestic seed from remote interior points in Illinois, Minnesota, etc. Just what can be done about it, no one seems to know but in accordance with the fixed principle of defending and protecting the American farmer and in the maintenance of a heavy yield per acre and a hay crop, free from weeds, the seed trade will be well repaid cleaning their own house rather than "letting the Government do it."

LINSEED TARIFF

JOHAN B. GORDON, of the Bureau of Raw Materials for the American Vegetable & Fats Industries, is again in the limelight in connection with the application filed with the Tariff Commission for lower rates on flax seed and linseed oil products.

This gentleman was at the bottom of similar activities several years ago and his allegiance to certain interests back of the present complaint is at least consistent if not commendable.

From the viewpoint of the farmer who raises flax and the linseed oil meal crushers, Mr. Gordon and his ilk are "outside of the pale." It has seemed sound farm economics to note the increased production of flax in this country from seven million bushels to twenty-nine million bushels annually, a movement that has worked towards the South from the original flax producing areas of the Northwest until today we find flax very generally grown both with wheat and with coarse grain in Iowa and other comparable states.

In 1920, the United States crop of flax seed was 200,600 tons; in 1922, 305,950 tons and in 1923, 435,725 tons. Figuring 40 bushels to the long ton, this can be readily translated into bushels, and it is estimated that the United States will require some forty-five million bushels all told this year. The export tables show a varying tonnage shipped out of Canada, increasing for 1923 about one million bushels over 1922, and indications point towards a record Canadian movement when lake navigation opens of 4,750,000 bushels. The South American flax seed crop harvested in February is now arriving at our Eastern seaboard. Partially influenced by the sympathetic strength of other grain, flax seed established new high level prices early in February, and is now

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

roughly twenty per cent higher than a year ago. World flax production in 1924 for thirty-one reporting countries is 132,388,000 bushels, six per cent over 1923.

The proposal, therefore, to reduce the tariff from 40c to 25c has found farming interests registering strong objection, and making some headway, but paint manufacturers, seeking an inexpensive base for their product, are holding a strong position "in court."

It is understood that President Coolidge has refused particular intercession in the interests of the flax raiser although stating that "he has fully in mind the necessity for a tariff on agricultural products."

EDITORIALETTE

Lightning struck the state house at Springfield, Ill., a few days ago, and because the building was protected by lightning rods no damage was done. If it had not thus been protected—but why speculate on that? All we need to say is that we are sure the installation paid for itself in this one critical minute, and un-rodged country grain elevators should be governed accordingly.

The *Chicago Journal of Commerce* "patly" says: "Those farmers who listened to false political teachers and sold their wheat before the election because they were led to believe the advance in price was a Wall Street lure, have a rod in pickle for those who deceived them."

CHICAGO, MARCH 25, 1925.

GRAIN TRADE REVIEW

LIQUIDATION in May wheat apparently has run its course for the time being, and according to some very good judges of market conditions the lowest prices that are likely to be witnessed for some time have already been made. The domestic situation has come to the fore as the main bullish influence, and while statistics have been suggesting for some time past that neither the United States nor Canada had any great amount of grain left for export after allowing for the quantities sold for forward shipment, the effect of this condition commenced to be felt the past week, after the market turned upward, after one of the most sensational declines in the history of the trade, with a drop of 2 1/4c in two days, and a recovery of 20 1/4c from the low point. North America, as near as can be figured on the basis of official returns, and also on the assumption that they are correct, cannot at a maximum export over 100,000,000 bu. during the last four months of the crop season. What little export business the United States does, from now on, will probably be at the expense of the carryover, and the latter is likely to be relatively small at the end of the season. The fact that the country failed to sell cash wheat, despite the break of nearly 55c from the recent high point, suggests either that the grain is not back in the country or else it is in such extremely strong hands that there is little possibility of any large movement to terminals until the fate of the new crop has been definitely decided. Export demand on the break, while not as large as some of the bulls would like to have witnessed, was sufficient to place a few more millions abroad for forward shipment and thereby further reduce the pressure on the market. Millions of bushels of grain afloat were hedged by foreigners the past week, and ultimately the hedges will have to be removed. In fact, there is unquestionably grounds for the belief that almost regardless of the action of the leading bulls, the May is rapidly getting into a position where it might congest. Millers have been taking fair quantities of wheat from day to day and the visible supply is now rapidly decreasing as it usually does at the end of the winter storage season at lake ports. If there has been any quantity sold for shipment via Montreal a heavy reduction is almost certain to be witnessed shortly after navigation opens. Minneapolis and Duluth at the

present time have about the only large quantities of wheat at terminal markets available for export, a good part of the ordinary hard winter at Chicago, Kansas City and Omaha having been sold, the bulk of it to seaboard and Gulf exporters. If there are to be liberal deliveries on May contracts at Chicago, the grain may have to be brought here from some outside points. The Canadian estimate suggesting that there is only 35,000,000 bu. available for export is regarded by many as entirely too low, but the American Government's figures seem correct, even though suggesting an abnormal disappearance during the first eight months of the crop year.

Winter Crop a Factor.

From now on the outlook for the new American winter wheat crop will be a factor in the market, and if the leading shorts in the May have covered the spread between the May and the July, is likely to narrow. Fresh outside business coming into the market shows a tendency now to go into the new crop futures rather than into the May, as the deferred deliveries are more likely to respond to the character of the crop news. At the same time even the present price seems high to many and should rain occur over the sections of the Southwest that have been complaining of dry weather of late, they would probably have a decided effect on values. A Government report suggests a 13.9 per cent increase in the spring wheat acreage, or around 2,500,000 acres. The winter wheat acreage, after allowing for normal abandonment due to winter killing and other factors, increased 1,300,000 acres, so that the total for the country seems to be around 3,800,000 acres larger than last year. It is still somewhat too early to tell what percentage of the area seeded last fall will be abandoned and weather conditions and the price will determine how much increase there is in the spring wheat area. Foreign crop reports continue decidedly mixed. Russia is reported after further supplies of wheat and flour, and the continent as a whole shows a tendency to buy on all sharp declines. The total winter wheat acreage in 16 leading Northern Hemisphere countries as officially reported is about 3 per cent in excess of last year.

Coarse Grains.

Corn prices have been rather steadily on the downgrade the past few weeks, and have gone to a profitable feeding basis as compared with hogs. The slow eastern consumptive demand is the main bearish influence at the present time, and has been of late, while those who favor higher prices expect that the demand will increase materially in the immediate future, and that ultimately the present supply, which seems excessive at terminal markets, will give place to a scarcity. Oats prices are sufficiently low to cause investment buying to appear on the breaks, and there is a tendency on the part of cash interests to turn over hedges from the May into the July. The new crop needs rain in the Southwest, while seeding has made rapid progress and with favorable weather should get under way in parts of Iowa next week.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
Wheat	3,871,000	4,534,000	4,073,000
Corn	4,063,000	8,281,000	5,946,000
Oats	2,865,000	3,569,000	3,060,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	10,799,000	13,079,000
Preceding week.....	16,384,000	16,464,000
Since July 1.....	887,720,000	832,555,000

Liquidation was on in wheat early with a decline in the May to \$1.51, or 54 1/4c under the high point made in January, but the selling movement ran its course and with heavy short covering prices advanced 20 1/4c from the in-

side figure by Saturday after having broken 21 1/4c in two days, and at the last net losses were 1 1/4c. Deferred deliveries failed to rally as strongly as did the May and closed 6 1/4@7 1/4c lower with September showing the most weakness. Unfavorable crop reports are coming from the dry sections in the Southwest and unless the drought is relieved the new crop futures may commence to be affected. Part of their weakness the past week was due to spreading operations.

Corn values declined in sympathy with wheat with September selling at a new low on the crop, and while the inside figures were not maintained the undertone was decidedly heavy, and net losses for the week were 5 1/2@5 5/8c, with May 3 3/4c under the July at the last. The continued slow demand for the cash grain was the main depressing influence, and more than offset the effect of a material letup in the movement to terminal markets.

All deliveries of oats sold at a new low on the crop the past week, with liquidation quite heavy during the early days, but the finish was on a rally with net losses of only 1 1/2@1 3/4c, prices declining below those prevailing at this season last year. Domestic cash demand showed some improvement and there was a little export business in Canadian grain. The bullish theories regarding the foreign demand for rye have not worked out to anywhere near the extent they have in wheat, and at the last prices were 7@9c lower with the deferred deliveries at a new low on the crop. Range of prices the past week follows:

	High.	Low.	Close	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
Wheat—						
May	\$1.72 3/4	\$1.51	\$1.68 1/2	\$1.69 3/4	\$1.05 1/2

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
American	6,371,000	7,644,000	7,284,000
Argentine	4,902,000	4,522,000	6,485,000
Australian	6,080,000	5,792,000	3,296,000
Indian	280,000	1,080,000
Russian	360,000
Others	120,000

Total

Of the above total wheat from America there cleared in the form of flour 2,190,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	313,744,000	304,575,000	315,987,000
Argentine	90,772,000	87,492,000	78,058,000
Australian	69,400,000	47,994,000	31,648,000
Indian	29,120,000	5,864,000	6,940,000
Russian	328,000	25,552,000
Others	2,544,000	13,740,000	4,359,000
Total	505,908,000	485,217,000	437,095,000
Season	753,195,000	662,638,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
American	16,000	20,000	723,000
Argentine	312,000	292,000	492,000
African
Russian	110,000	705,000	374,000
Others	876,000	443,000	153,000

Total

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	419,000	8,414,000	35,870,000
Argentine	44,992,000	19,904,000	55,092,000
African	1,343,000	4,623,000
Russian	2,576,000	2,139,000
Others	14,610,000	16,545,000	999,000
Total	63,940,000	51,631,000	92,211,000
Season	229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of lots last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
American	469,000	314,000	214,000
Argentine	714,000	938,000	1,091,000
Others

Total

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	16,617,000	14,079,000	25,434,000
Argentine	34,155,000	21,912,000	16,967,000
Russian	150,000

Total	52,486,000	37,091,000	46,581,000
Season	67,500,000	65,765,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Mar. 13:

	Mar. 13, 1925.	Mar. 6, 1925.
Wheat	1,303,784	1,410,900
Oats	1,710,343	1,710,343
Barley	207,146	315,646
Rye	3,726,638	3,756,210
Corn	1,161,665	1,203,179
Total, bus.....	8,209,576	8,396,278

NAMED ASSISTANT SECRETARY OF AGRICULTURE

A Dirt Farmer, Formerly Secretary Ohio State Board of Agriculture.

RENICK W. DUNLAP of Pickaway county, Ohio, long identified with farming and live stock improvement, has been appointed Assistant Secretary of Agriculture by President Coolidge. He comes directly from his work of managing his farm and those of his father to his work at the Department of Agriculture.

Mr. Dunlap has spent practically all his life in farming. Nelson J. Dunlap, his father, began farming on one of the farms he now owns soon after his return from the Civil War and is known as one of the most successful farmers in that section of Ohio, his farms now including more than 1,000 acres of excellent crop land after gifts of three farms to his children. All of this land was acquired with the profits derived from farming.

The new assistant secretary was born on a farm in 1872. Most of his ancestors, his uncles and many of his cousins on both sides of the family, were or are farmers, breeders and feeders of live stock.

Mr. Dunlap received his early education in a district school, and later attended high school while he lived on the farm and spent his spare time in helping carry on the farm work. He entered the College of Agriculture of Ohio State University in 1890 and was graduated in 1895. Since then he has spent most of his time on his farm near Kingston, Ohio. Until 1923 he operated this place as a grain, cattle and hog farm, and since then has added a dairy. He was one of the early members of the Grange and of the Farm Bureau in the United States.

Long experience in the live stock business has given Mr. Dunlap an opportunity to visit many of the live stock markets in the country. He has either bought or sold stock on the markets at Chicago, Buffalo, Pittsburgh, Kansas City, East St. Louis, New Orleans, Jacksonville, Fla., Fort Worth, Cincinnati and Columbus. He has owned herds of purebred Shorthorn cattle and Duroc hogs and has exhibited animals of his breeding at county fairs and at the Ohio State Fair. He has acted as judge of horses, cattle and hogs at many fairs and expositions.

For several years he was state dairy and food commissioner, and while holding this office did much to eradicate impure and misbranded foods, drinks and drugs from the market. After retiring from this office he again went to farming and continued until 1915, when he was chosen by the State Board of Agriculture of Ohio as its secretary. Following this work he took charge of a 60,000-acre range in Florida. It was in June, 1923, when he again took up farming in Ohio, and he was thus engaged when asked to accept the position of Assistant Secretary of Agriculture.

JARDINE'S VIEWS ON FARM ILLS

Secretary of Agriculture W. M. Jardine states that the American farmer is a business man with a greater capital investment and more complex problems than the average business man. He holds the same views as expressed by President Coolidge and feels that the farmer should pay more attention to marketing methods. In a recent address he reflected the following viewpoint:

"The farmer doesn't want the government constantly monkeying with his business. He doesn't want to be babied or pitied by other people. What the farmer wants is just this: He wants his business to have an equal opportunity with other businesses.

"The sound farmer-business man does not seek legislation to fix prices or to regulate details. He knows that legislation cannot annul economic laws. The only legislation he wants is legislation

that will assist him in getting reasonable credit on sound security; legislation that will help him build up machinery for marketing his products successfully; legislation that will put him on a par with other business men.

"There are certain special statutes dealing with banking; with corporations, with labor. The farmer does not demand legislation any more specialized from his point of view than those laws are from the point of view of the men particularly interested in them.

"Another thing—there are now 5,000 co-operative grain marketing associations in the United States and about the same number of co-operative live stock shipping associations.

"If applied in the right way, co-operation can make of American farming a big, voluntarily unified, permanently and dependably profitable business, in a way that no paternalistic legislation could possibly do.

"What we all need to do is to talk less tommy rot and throw fewer monkey wrenches into other people's machinery."

TO INVESTIGATE WHEAT DROP.

Secretary of Agriculture Jardine has directed the United States grain futures administration division of the Department of Agriculture to conduct an investigation of the recent drops in the price of wheat on Chicago and other grain exchanges.

Jardine's announcement said the investigation has been ordered "in response to many inquiries made by various branches of the grain industries."

Many of the "inquiries" were said to be statements of knowledge of "manipulation" of the market made by important figures in the grain industry.

The grain futures administration, created under a special act of congress, was asked by the secretary to make "a thorough and immediate investigation and careful study of the situation which has existed in grain futures on exchanges during the past few days."

SPRING PLANTINGS.

Farmers of the United States expect to plant 2,500,000 acres more of spring wheat this year, an increase of 13.9 per cent over that planted last year, according to the federal crop reporting board estimate.

Other estimates of intended acreage include: Corn, increase of 2.3 per cent over last year; potatoes, increase of 5.6 per cent; tobacco, increase of 10 per cent; sweet potatoes, increase of 29 per cent; barley, increase of 2.3 per cent.

MARKETING CONDITIONS.

The Government report of March 1 shows 801,609,000 bushels of corn on farms as compared with 1,153,847,000 same date 1924. 550,342,000 bushels of oats as compared with 447,366,000 bushels last year and 113,928,000 bushels wheat as compared with 137,717,000 bushels last year. These facts are important to be considered in connection with the new crop prospects.

The general reports indicate that there will not be much of a movement of corn or oats from farmers' hands until after seeding and that the farm reserves of corn are very low.

ACREAGE.

According to reports of our correspondents there will be an increase in the acreage of spring wheat in the states of Minnesota, North Dakota, South Dakota and Nebraska, and an increase in the acreage of oats in all of the oats producing states. Likewise of corn.

WINTER WHEAT.

The growth condition of winter wheat that has not been abandoned is reported generally "favorable" throughout the states of Indiana, Illinois, Missouri, South Dakota, and to a considerable extent unfavorable in the states of Iowa, Nebraska, Kansas and Oklahoma.

Secretary Dorsey of the Texas Grain Dealers' Ass'n reports very unfavorable

condition of the winter wheat crop in Texas, also of oats. The crops in the southwest seem to have been unfavorably affected by the drouth conditions of last fall. General participation, however, during the last few days may improve such unfavorable conditions and this is undoubtedly reflected in the recent decline in price levels.

FARM SURPLUS.

The percentage of the marketable farm surplus of oats that has been sold by the farmers is reported as follows: Ohio, 83; Indiana, 73; Illinois, 71; Missouri, 90; Iowa, 82; Minnesota, 67; North Dakota, 83; South Dakota, 81; Nebraska, 85; Kansas, 88, and Oklahoma, 78.

HEDGING vs. SPECULATION

Many Lack Understanding of the Use of Hedging for Protection Purposes.

IN my work among country and terminal grain firms and companies, I find a wonderful lack of proper understanding as to what the term "hedging" really means. Very few seem to be able to grasp the difference between hedging and speculation, and oftentimes they speak of hedging, when in reality what they have been doing is just plain speculating.

Hedging means that as soon as you buy or sell a lot of cash grain, you put out your hedge, and leave it out until you make the other end of your cash grain transaction, when you immediately remove the hedge.

Hedging is done to make secure the margin at which you made your cash grain purchase or sale, and in order to remove that transaction from the realm of chance, you maintain the hedge, and thereby are not interested in the ups and downs of the market, but in the relative price, compared to the hedge, at which you can sell the cash grain, compared to the basis at which you made the purchase.

If you are going to use your judgment as to whether or not to hedge, you are plainly speculating, for your judgment is not any more reliable with cash grain behind it than without any, as you are simply being influenced by each day's conditions, which are very unreliable.

Hedging to the grain trade, is about the same as security to the banker who loans money. Both are for the purpose of making as sure as humanly possible, the safety of the transaction. If the banker gives up his security before the loan is paid, he takes a chance, and may lose, and if the grain man does not hedge, or removes his hedge before selling his cash grain, he also takes a chance, and that chance is what is termed speculation, but the sure thing is called hedging.

A bank loans money as a source of gain of the interest. The grain merchant hedges to secure his margin, and if he has the room and cash, when a premium exists for future delivery, as has been the case during this season, he makes an additional gain of what is termed the carrying charge. This is

wherein they make the elevator space earn charges.

The past season unusual carrying charges have existed in wheat, corn and oats, and those grain merchants who have the space and credit, have made several cents per bushel, regardless of the fluctuations of the market.

Let us suppose that you stored and hedged fifty thousand bushel of oats last harvest time. By selling them for September, and then transferring them to December, later into May and now into July, you have made a gross gain of about fourteen cents per bushel, regardless of market fluctuations, and the interest, insurance and shrink being deducted, would leave a net gain of about ten cents per bushel.

To be sure, oats had a big advance and you might have made more if you had not hedged. Yes and you might have lost a lot also, for there has been a big break in the prices. What is the use of taking the big chance, when you have the opportunity to make twenty to thirty per cent interest, and sleep nights, knowing the interest is yours when delivery day comes, no matter what the market does.

If you are going to speculate, what is the use of going into the cash grain business and making a property investment, when the speculative houses maintain nice comfortable offices, with fans in summer and steam heat in winter.

Look over the past fifty years' history of the grain trade and you will find that the grain merchants who died with their money intact, were the ones who were consistent hedgers, and some of the most successful of them never speculated.—*Grain Auditor.*

CIVIL SERVICE EXAMINATION.

The U. S. Civil Service Commission announces an examination for junior marketing specialist.

Receipt of applications will close April 25. The date for the assembling of competitors will be stated on the admission cards sent to applicants after the close of receipt of applications.

The examination is to fill vacancies in the Bureau of Agricultural Economics, Department of Agriculture, Washington, D. C., at an entrance salary of \$1,860 a year. Advancement in pay may be made without change in assignment up to \$2,400 a year. Promotion to higher grades may be made in accordance with the civil service rules.

Full information and application blanks may be obtained from the Civil Service Commission, Washington, D. C.

PRICE TREND OF WHEAT AND CORN.

The accompanying chart shows in a graphic way the price trend of both May wheat and May corn on the daily closing prices at Chicago since last September. The chart does not indicate the recent break in these options but gives a good idea of the gradual rise in May wheat until the present break. These prices are through the 12th of March.

SWISS WHEAT MONOPOLY.

According to Commercial Attache Jones, Paris, the Swiss wheat monopoly has now run for eight years, during the latter part of which period it has been subjected to great criticism on the part of all classes except the farming interests. In October, 1924, the Federal Council decided to suppress it, but a month later, due to rising prices in the producing areas, discussions turned in favor of continuing the monopoly at least for 1925. As a result, the price of wheat in Switzerland has been higher than in the surrounding countries. On Jan. 12, 1925, for example, bread in Paris cost the equivalent of 0.42 Swiss francs, while at Berne, the seat of the Swiss monopoly, it cost 0.57 Swiss francs. These higher Swiss prices are due partly to the fact that the monopoly suffered losses totaling 200 million Swiss francs at their peak, which losses it has since tried to recover. To this end, it advanced its selling price, but was at once met with a demand from Swiss farming interests that the price of wheat locally produced be correspondingly raised, a demand which was conceded. The monopoly's wheat prices, therefore, became higher than those on the world market, a circumstance which has not made the organization popular with other than the wheat producing classes, especially as at one time, with declining world prices, the monopoly had on hand 27,000 carloads of wheat, or sufficient to supply a seven months' demand. The monopoly prices did not cross those on the world market from 1921 to 1924, and then only did so due to the rise in the price level which occurred in the fall of the latter year. Under these circumstances, while the farming population in Switzerland is anxious to have the monopoly continue and has used the rising world prices as an argument to support that position, the commercial and industrial classes wish to bring wheat control to an end at the earliest possible date.

RATES ON CANADIAN GRAIN TO UNITED KINGDOM.

John Denholme, president of the Chamber of Shipping, in a recent address in London, gave some interesting figures on costs of carrying grain from Canada to the United Kingdom.

"As a tramp shipowner myself," he said, "I have often admired the liner man for the service he gives, but never envied the risks and responsibilities he carries with his work. His ships are more costly. He must be prepared to carry all kinds of goods and to take the responsibilities of forwarding agent, warehouse keeper and stevedore, and, perhaps, incidentally, of the payer of claims, which is no small part of the disbursements of the regular liner. He must be content to run with a part empty ship more or less permanently outward or homeward or even both ways.

"He has to call at expensive ports for little or no cargo, and I have often wondered at the unreasonable criticism directed against him by those whose best interests he serves. It is more easy to understand criticism directed from political or other motives, but the criticisms are none the less deplorable because the motive is different.

Replies to Canadian Complaints.

"As the most recent criticisms of the work of liner companies come from Canada I have been to the trouble of taking out one or two examples showing the sea freight from Canada to the United Kingdom.

"If you take the westward year-round route, the rail freight Calgary-Vancouver for 500 miles is 21s per ton. Then the ocean freight Vancouver-London (via Panama) is nearly 8,880 miles, and the average may be taken at 37s 6d.

"Now if you take the eastward summer route (by which most of the grain comes), and possibly this is the best comparison, the rail freight Calgary-Fort William, 1,200 miles, costs by rail 24s 6d. By the Lake steamer freight, Fort William-Montreal, 1,100 miles, the

JAMES M. ADAM, ST. LOUIS.

CHARACTERISTIC of the change in trade affairs has been the activities of Anheuser-Busch, Inc., of St. Louis, Mo., in these days of prohibition. It has been logical for them to divert their enormous properties to the processing of grain in their cereal beverage business and corn products plant. It is equally logical for them to cast about for a competent manager of their grain department and to have secured the services of James M. Adam of Chicago, for thirty-one years, in a similar

capacity, with Rosenbaum Bros., the large grain elevator house and feed manufacturers, and more recently with the Grain Marketing Co., of which Rosenbaum Bros. is now a part. In addition to functioning as purchasing agent for their grain requirements, such as barley and corn, Mr. Adam will handle an extensive business in by-products, including gluten feed, brewers dried grains, corn germ meal, etc. He is well qualified to handle the business of this large concern.

cost is 19s. But the ocean freight Montreal-London, 3,241 miles, costs 14s.

Startling Comparisons.

"More striking results are shown in the eastward winter route (by which, of course, little grain comes). The rail freight, Calgary-Fort William, 1,200 miles, costs 24s 6d a ton. The rail freight Fort William-St. John, N. B., 1,500 miles, costs 33s 6d, and the ocean freight St. John-London, 2,970 miles, costs 14s.

"If you take these figures, the ocean freights are, I believe, well above the average obtained by liners throughout the year. The dollar has been taken into sterling at 4.75 exchange. Thus the railway rate per mile is nearly six times as much as the sea freight, and even the water rate on the inland lakes is four times as high.

"Public interest in Britain was centered this winter on the increased cost of wheat and the consequent rise to 11d in the price of the four-pound loaf. You will have seen from the figures I have just given you that during the winter months wheat from Calgary has to be carried 2,700 miles by rail to St. John, and then 2,920 miles by liner to London. The total cost of the carriage is 72s, of which the liner gets 14s.

"In other words, cost of transport in winter is equal to a penny halfpenny on the four-pound loaf, and of this the liner, which carries for more than half of the whole distance, gets 1 farthing, and the others get 5 farthings between them. I do not think it can be said here that the liner is robbing anyone or enhancing the price of the bread for the poor man. In summer it is about a penny farthing, of which the sea carrier still gets 1 farthing, while the railway gets a little more than 2 farthings and the lake boat a little more than a farthing and a half.

"I marvel as to how shipowners can continue to exist and carry on their trade and do it all at such fractions of the cost of the article."

PREDICTS LOWER PRICES.

An analysis of the world wheat market by a British expert, made public March 16, would indicate that the course of prices in the next few months is likely to depend largely on the extent to which the European Continent resumes buying on a heavy scale. The immediate trend of prices probably will be to lower levels, in the opinion of the expert, mainly because of the large ship-

ments of grain now on the way to Europe.

However, the belief is expressed that Russia probably will be compelled to buy large quantities of wheat to avert famine and that Germany also will require more grain than she has purchased so far.

A feature of the situation that is attracting considerable attention here is that the demand for wheat flour is far below what had been expected.

VISIBLE SUPPLY OF GRAIN.

Following is the visible supply of wheat, corn and oats by weeks (final 00 omitted), with comparisons:

The Letter Box

Will Meet in May.

Price Current-Grain Reporter: Tuesday and Wednesday, May 19-20, are the dates definitely decided upon for the next annual convention of the Grain Dealers' Association of Oklahoma.—C. F. Prouty, Sec'y, Oklahoma City, Okla.

Out of Business.

Price Current-Grain Reporter: I am out of business. Have retired. There is lots of good things in your paper that is a great help to anyone that is able to make use of it.—A. D. Allgood, Perry, Ohio.

Meeting Dates Changed.

Price Current-Grain Reporter: We recently advised you that the date of our midsummer meeting would be Wednesday and Thursday, June 24 and 25.

It now transpires that the Indiana Grain Dealers' Association had selected the dates for their midsummer meeting of June 25 and 26, therefore we will change the date for holding our meeting and set it for Wednesday and Thursday, June 17 and 18 at Toledo, Ohio.—J. W. McCord, Sec'y, Ohio Grain Dealers' Ass'n, Columbus, Ohio.

To Meet May 7.

Price Current-Grain Reporter: Our board of directors have selected May 7 as our next annual convention meeting date, and the place is St. Louis. We are only going to have a one-day meeting this year, with a morning and afternoon session. It will be a strictly business meeting, with the entire time confined to discussions pertaining to the grain and milling industries.

Thanking you in advance for giving this the customary announcement in your publication, I am, D. L. Boyer, Secretary, Missouri Grain Dealers' Ass'n.

Wheat Looks Bad.

Price Current-Grain Reporter: Winter wheat is looking pretty bad in our section of Oklahoma. Lots of it froze out, many fields bare, cannot get over a half crop in this locality. Windy and dry weather does not help the conditions any. We need a lot of rain to give the stunted plant a little life.

Our last crop was an extra good one. Oats are looking good, fields are green, some few sowing oats at the present time in abandoned wheat fields.—Waukomis Grain Co., per Fred Atherton, Waukomis, Okla.

Paper Pulls.

Price Current-Grain Reporter: We wish to congratulate you on the fact that the ad. in your paper is a wonderful, good, drawing proposition.

There is not a single mail that comes to us since we placed the ad. in your paper that does not have from one to as high as five inquiries for our radio.

We appreciate the personal interest you have taken in us, and thank you for the letters you have sent to us that came through your office.

We are more than pleased with the results we are getting from the ad. in your publication.—F. A. Holmes & Co., Waterloo, Ia.

Crop Summary.

Price Current-Grain Reporter: The writer has lately made a trip by auto visiting counties through which the Rock Island traverses from Manhattan north to Belleville, and west to Limon Junction, Colo., returning through the counties via the main line of the U. P. Much to my surprise, I found that the wheat sown north half of Riley, Clay, west half of Washington, Cloud, Republic, Mitchell, Jewell, east half of Smith, Osborne, Lincoln, Russell, Ellis, Rocks and Graham counties, having an estimated acreage sown to wheat in the fall of 1924 of nearly two million, or nearly one-fifth of the total acreage sown in Kansas, failed to germinate during the

fall. Some of this wheat sprouted after the snow melted and the sprout appeared dead. It is impossible to determine with any degree of accuracy what the final outcome will be, but I believe that at least one million acres in the above territory will be abandoned and planted to spring crops. Since my trip, this entire territory has had good rains and within a week to ten days we should know whether the wheat in those counties has had sufficient moisture and vitality left to come through the grain and form the crown. Excepting the counties above referred to, I found conditions clear to Limon, Colo., as near perfect as possible to be at this season of the year.—E. J. Smiley, Secy, Kansas Grain Dealers' Ass'n, Topeka, Kans.

Doesn't Favor Metric System.

Price Current-Grain Reporter: Observing your editorial concerning the metric system, in line with your suggestion we are writing you our views. To be frank with you, somehow the writer doesn't feel that his opinion would look well in print unless he restrained himself. When it comes to expressing my feelings on this question I have to invoke the principles of the Gospel in order to keep from saying just what ought really to be said about any who would want to change our present system for the metric system. If our congressmen don't like the American standard of weights and measures we suggest that they emigrate to Europe. We will gladly help pay their way to help get such fools out of the country. These fellows who believe that everything foreign is better than what we have in America ought to leave the country, and they should not try to inflict America with foreign system about which we know little, thus junking all of our knowledge and all of our investments by legislative enactment.—A reader from the Southwest.

Cost of Operating Country Elevator.

Price Current-Grain Reporter: In the March 4 edition of the PRICE CURRENT-GRAIN REPORTER, you called attention to various studies now being made in Wisconsin and expressed the hope that similar studies might be made within the grain trade.

Since the Kansas Agricultural Experiment Station has conducted some studies along this line, I thought you might be interested in having them brought to your attention. The attached sheets give some of the results of our studies. These sheets, of course, give only a portion of the materials collected but indicate the lines along which we are working. We have found the elevators very much interested in this sort of work. We hope to continue this work and prepare a more formal report dealing with it at an early date.

In cooperation with the United States Department of Agriculture, we have made a more detailed study of a number of elevators. In these studies we have gone to the elevators and taken their books to secure the needed information. A mimeographed report on this work has been prepared by the Bureau of Agricultural Economics and a request to Mr. A. V. Swarthout, of the bureau, would secure a copy of the report.

If there is additional information concerning our work in which you would be interested, we shall be glad to supply it. Quite naturally, our studies in grain marketing are of considerable interest to the grain trade. Many elevator and mill men have been keeping in close touch with our work and inform us that it is of great value to them. If you have suggestions or we can be of further assistance, I shall be glad to hear from you.—W. E. Grimes, Professor, Agricultural Economics, Manhattan, Kans.

AVERAGE OF ALL INDEPENDENT ELEVATORS REPORTING.

	1920.	1921.
Insurance on plant	\$ 55.30	\$ 69.02
Depreciation at 4%	278.98	306.91
Taxes	241.60	278.66

Salary of manager	1,400.00	1,272.00
Labor	1,084.80	1,099.76
Insurance on grain	55.30	139.32
Telephone, telegraph, office, etc.	144.00	169.84
Shrinkage	648.82	480.70
Fuel, power, heat	192.00	170.38
Repairs	172.80	219.35
Miscellaneous and undistributed	217.00
Total	\$4,273.60	\$4,422.94
Bushels of grain sold....	86,077	100,712
Operating cost per bushel, excluding interest and terminal marketing costs	4.96c	4.39c
Cost of fixed capital at 8%32c	.32c
Cost of working capital at 8%72c	.59c
Total cost on track....	6.00c	5.30c
Terminal costs if half grain is consigned87c	.87c
Total costs	6.87c	6.17c
Reported margin on which buying was done. Average	5.50c	5.50c
Elevators	75	38

SUMMARY — ELEVATOR COSTS, ALL ELEVATORS.

	1920.	1921.
Average cost per bushel	6.75c	5.97c
Average margin on which buying was attempted.	5.90c	5.58c
Average margin actually realized by 59 elevators as shown by detailed profit and loss statements	6.00c

In general, there seems to be a tendency to keep buying margins under costs and depend upon turns in the market, mixing, premium wheat, and other good fortune to make up the difference.

Wheat for Export and Carryover.

Price Current-Grain Reporter: Since the publication of the government report of stocks of wheat remaining on farms and in country mills and elevators on March 1, various calculations have been made by persons in the grain trade to determine how much wheat remains for export and reserve. A caution should be given of some misleading interpretations that have been issued. The most common improper method of calculating domestic requirements for the four months, March 1 to July 1, is to assume that domestic disappearance is uniform throughout all months of the year, and hence, that the domestic food requirements in the four months is one-third of the year's requirements, and such amount deducted, together with estimates for spring seed, and feed from the March 1 stocks, the remainder being assumed to be the amount left for export and carryover. Such calculation would leave a very small amount for export and carryover. However, if such method of calculation were adopted in past years, the remainder for export and carryover would always be decidedly too small, when checked up at the end of the year.

There are probably three reasons for such differences. First, the consumption of wheat by mills is not uniform throughout the year, but much smaller in the last months of the season, than in the early months of the season. Second, it is probable that March 1 stocks are constantly underestimated to a moderate extent; and third, no account is taken of new wheat consumed before July 1.

Stocks of wheat in the three positions (on farms, country mills and elevators,

and visible, as reported by Chicago Board of Trade) on March 1 were 254 million which compared with 300 million the year before and 306 million two years before. Subtracting the exports and carryover last year from stocks would leave 168 million as the amount used for all domestic purposes during the four months March 1 to June 30, from the 300 million stocks on March 1, and two years ago, 165 million. If 160 million were assumed for this year it would leave from the 254 million 94 million for export and carryover. If 170 million be allowed for comparable domestic needs this year, 84 millions would be left for export and carryover. Last year, 132 millions were exported and carried over and the year before 141 millions.—Nat. C. Murray, Chicago.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 849,000 bu. last week and oats 639,000 bu. Corn increased 413,000 bu., rye 10,000 bu. and barley 26,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Total.*	Last yr.
Wheat ..	932	3,217	4,749,000	15,663,000
Corn	4,496	8,684	14,464,000	6,756,000
Oats	6,744	12,015	20,272,000	4,903,000
Rye	2,025	268	2,374,000	1,790,000
Barley	192	192,000	194,000

*Includes 600,000 bu. wheat, 1,284,000 bu. corn, 1,513,000 bu. oats and 81,000 bu. rye afloat.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending March 14, 1925 (000 omitted):

Articles and countries.	Week ending Mar. 14, 1925.	Mar. 15, 1924.	July 1, 1924, to Mar. 14, 1925.
Barley	182	47	17,210
To United Kingdom	20	47	7,967
Other Europe	162	8,404
Other countries	839
Corn	141	710	5,352
Oats	52	1	4,735
Rye	570	30,848
Wheat	*2,681	292	165,027
To Italy	1,665	90	21,814
United Kingdom	426	35,611
Other Europe	563	112	51,666
Canada	2	48,489
Other countries	25	90	7,447
Total U. S.	2,626	1,050	223,152
Canadian in transit:			
Barley	8	8	10,227
Oats	263	112	9,192
Rye	41	35	2,614
Wheat	1,355	1,555	40,864
Total Canadian ..	1,667	1,710	62,887

*Including via Pacific ports this week: Wheat, 2,000 bushels; flour, 49,700 barrels.

WHEAT VIA HUDSON BAY.

A plan to export Red River Valley wheat through Hudson Bay has been launched by Col. R. W. Webb, mayor of Winnipeg. Business men and legislators who attended the Red River Valley winter show are enthusiastic about the possibilities. Hudson Bay is open to navigation the year around, the mayor said. A railroad soon will be completed to Fort Nelson, allowing an outlet to the Bay.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending Mar. 21:

WHEAT— CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	M'POLIS.

CHICAGO COTTON MARKET

By Edward Jerome Dies.

THE time is propitious to tell the story of the new Chicago cotton market. How it functions to the advantage of the entire cotton industry. And how it links the North and the Southwest in close commercial ties.

After three months of operation the infant cotton market on the floor of the Chicago Board of Trade gives greater promise than had been expected by even its most enthusiastic proponents.

It is growing steadily. While the volume of business is not yet large as compared with the two older markets, there is a gradual increase that can point only to success.

When the market came into being on Dec. 1, amid a huge gathering of business leaders from all over the country, it was hailed as one of the most important commercial events of the year. Creation of the market, with its sound basic principles, was the logical course of the exchange, whose 1,600 members are financially responsible.

The board has one of the oldest and widest charters in the United States, with rights to trade in all non-perishable agricultural products. For sixty-five years the board has been authorized to trade in cotton if it so desired.

Chicago is the leading grain market of the world, and the chief market center for live stock and packinghouse products. Chicago quotations receive world-wide circulation, serving as the basic price on which the value of such farm products are calculated. It is not surprising that Chicago should add to its fame as the "farm capital" through establishment of a cotton market.

As the empire has gradually moved westward, so has cotton production. In 1873 states east of the Mississippi River produced 2,467,000 bales, of which 2,356,000 were shipped North or for export. Fifty years later, in 1923, production in the same states was 4,369,000 bales, all but 361,000 bales being consumed in southern mills.

Production of cotton west of the Mississippi in 1873 was 1,473,000 bales. In 1923 it was 5,570,000 bales. Of this latter amount, 5,143,000 were available for export. And as a matter of fact the exports through the ports of Houston and Galveston for the last named year amounted to approximately 3,500,000 bales.

Such a quantity of cotton is by far the largest available supply in any port of the world. Further, the price of cotton at Houston and Galveston may be said to represent the export value of our surplus production. The price of American cotton sets the price for the world. Chicago quotations resting directly on the value of cotton at Houston and Galveston where the world values of the commodity are largely determined, should represent world values for cotton.

Better hedging facilities for western cotton had seemed desirable. While New York offers a contract based primarily on Carolina cotton, and New Orleans on Mississippi and Louisiana cotton in the port of New Orleans, there seemed to be no future contract reflecting accurately the value of Texas and Oklahoma cotton. And such western cotton composes by far the greater part of the exportable surplus of the American crop. It was believed, therefore, that a Chicago contract market reflecting the value of Texas cotton would add appreciably to the country's marketing machinery and facilitate the merchandising of the greatest money crop of the country to the benefit of cotton shippers, spinners and dry goods distributing houses.

Chicago has one of the largest private wire systems of any city of the world, extending from the Atlantic to the Pacific. These wires closely cover those portions of the United States primarily interested in grain. Through putting cotton quotations on these wires new interest in cotton will develop in regions where it was comparatively unknown. Most speculators who enter the market prefer the buying side. They would rather buy something they do not

need than to sell a commodity that they do not possess. An increased volume of new business in cotton at Chicago, will have a steady influence on the market during the heavy movement of the crop from the farm in the late summer and early fall.

Through establishment of trading at Chicago with Houston-Galveston sole point of delivery, a proposal of the Federal Trade Commission for southern warehouse delivery on future contracts was put into effect. However, there is quite a difference between the proposal of the commission and what was actually done by the Board of Trade. The recommendation of the commission was that the New York Cotton Exchange should permit deliveries on its contracts to be made at Norfolk, Savannah, New Orleans, Houston and Galveston.

Such terms in a contract from the Chicago point of view would have been detrimental to the value of the contract and entirely undesirable. The multiplicity of points of delivery would certainly have been highly undesirable to most buyers and would doubtless have resulted in a low-priced contract as compared with the value of spot cotton.

On the other hand, through confining deliveries on the Chicago contract to the ports of Houston-Galveston, both of which handle the same kind of cotton under identical conditions, and which are located not more than fifty miles apart, it gave Chicago the opportunity to establish southern warehouse delivery where stocks of cotton are abundant, and without the fatal objection of a multiplicity of delivery points.

Outstanding factors in the Chicago contract are attracting wide and favorable comments.

For example, Houston-Galveston basin has been established as the only point of delivery. Thus the contract is based on Texas or western cotton, which has superior spinning value, and appeals especially to American spinners preferring to use western cotton.

This is the greatest cotton exporting point in the world. In 1923 it handled about three-fourths of the cotton exported from the United States. Future contracts based on such cotton offers exceptional advantages to American exporters, foreign merchants, and foreign spinners.

A broad market is assured by the enormous quantities of actual cotton always available at that joint port. Where cotton is so plentiful, hedging business may be conducted with minimum risk.

Modern warehouses of Houston-Galveston have a combined capacity of over 1,500,000 bales. There are incoming tracks on one side and outward bound ships on the other, thus affording minimum costs for handling.

Each contract is a unit and must be delivered at one time from one regular press or warehouse located within the Houston-Galveston port area.

In event other grades than middling are delivered allowances or deductions are made on the average established in the ten designated markets as provided in the United States Cotton Futures Act under which the Chicago market operates.

The grades tenderable on Chicago contracts are the same as those at New York and New Orleans.

Notices of the seller's intention to deliver will be issued in Chicago, and deliveries are made through the transfer of warehouse receipts at Chicago.

Sworn inspectors and weighers are maintained by the Chicago Board of Trade at Houston and Galveston.

All cotton is classified by the United States Department of Agriculture the same as is done at New York and New Orleans.

Trades in any month are not permitted to be made at an advance or decline of over two cents from the previous day's close, or at an advance of over two cents from the lowest quotation registered during the day. The two cent limitation is removed from transactions in the current month on and after the fifteenth day thereof.

Trading in a current month ceases at noon on the last transferable notice day of such month which is usually about

CROSS WORD PUZZLE

This week Price Current-Grain Reporter offers its subscribers a cross word puzzle in which some trade words are used. This is an easy puzzle.

No prizes are offered for solving this puzzle, but the name and address of every person who sends a correct solution to The Price Current-Grain Reporter by letter will be printed by us in the next available issue.

If the returns indicate that our readers are interested, the puzzles will be continued.

We will pay our readers \$5.00 for each Cross Word Puzzle sent in which is used.

Any person who submits a puzzle is requested to include in it several words relating to grain seeds or feed or grain elevator equipment. Names or parts of names of companies may be used, or names of men living or deceased who have been prominent in the grain trade.

Puzzles should be eleven to thirteen spaces square. A complete drawing is not necessary, only a sketch showing half-inch spaces properly numbered with the solution written in, accompanied by a list of definitions of the words.

Address each letter to PUZZLE EDITOR, Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

HORIZONTAL.

1. The state where hard wheat comes from.
6. Prefix meaning two.
7. Belonging to us.
8. Machine gun. Abbr.
10. The city of Abraham.
11. A beverage.
12. A Swiss riding master who married an American girl.
14. One hundred five.
15. To go swiftly.
16. A girl's name.
18. A liquid fuel. (Phonetic.)
19. The scene of one of Napoleon's battles.
20. Prefix meaning in.
21. Right hand. Abbr.
22. Good advice for every grain dealer.
23. Personal pronoun.
24. Interjection.
26. Pertaining to birth.
28. Peavey elevator.
29. Coordinate conjunction.
30. Measure of land.
31. Military police.
32. Short for boy's name.
33. Jumbled type.
34. A measure of weight. Pl. abbr.
36. Point of compass.
37. Same as 36.
38. The initials of a famous president.
39. What we want when we sell land.

VERTICAL.

1. The heaven of the Hindu.
2. Frozen dew.
3. Where some grain trading is done.
4. An open space for combatants.
5. To atone.
6. A good thing for grain dealers to avoid.
9. A piece of farm machinery.
12. What all machinery needs.
13. A railroad that hauls a lot of grain.
18. Born.
22. Assists.
25. A bay window.
26. Negation.
27. A land measure.
28. What all grain raisers have to contend with.
35. The kind of grain raised in No. 1 horizontal.

the 23rd to the 26th of the month specified in the contract.

Chicago's cotton market is here to stay. It has the whole-hearted support of the Southwest. It is growing steadily, soundly.

And it has linked the North and the Southwest in closer commercial ties than any other single forward step in history.

SENT IN CORRECT SOLUTIONS.

Those sending in correct solutions to the cross-word puzzle appearing in the March 4 issue of THE PRICE CURRENT-GRAIN REPORTER were Bill Watson, representing the Eureka-Invincible Grain Cleaners of Silver Creek, N. Y.; Clifford G. Belz of Charles Belz & Sons, Conrad, Ia.; R. G. V. Decker, Citrus Belt Mfg. Co., Chino, Cal.; M. E. Eckman, Lancaster, Pa.; Paul Skarstad, Adams, N. D.

The Puzzle Editor received quite a few cross-word puzzles from our readers, one of which is used in this issue. It was submitted by Paul Skarstad, of Adams, N. D., who received our check for \$5 for his effort.

We hope other readers will be able to work up puzzles and send them in, which if used, will be paid for.

Puzzles to receive the most consideration will be the ones which contain the most names of our advertisers where possible, and the names of the products they manufacture.

MONTREAL GREATEST AMERICAN GRAIN PORT.

Montreal was North America's greatest grain shipping point in 1924, with a new record of 165,139,396 bus. handled in that year, according to a shipping report of the Canadian Pacific Railway. In the first 11 months of last year Montreal handled 94,366,508 bus. more than New York, its nearest competitor, and 17,332,709 bus. more than New York, Galveston, New Orleans, Philadelphia, Boston and Norfolk, Va., combined.

In the April number of The Nation's Business, William M. Jardine, the new Secretary of Agriculture, presents the farmer as a business man with greater capital investment and with vastly more complex business problems than the average retail merchant.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Origin of fire held for jury. Evidence held sufficient to make a case for jury on theory that sparks from defendant's locomotive set fire to plaintiff's warehouse.

Brief definitely stating points relied on, though arrangement informal, considered by Supreme court. Defendant's brief, containing a statement of principal facts followed by assignment of errors, then brief and argument, though points sought to be made were not set out separately with citation of authorities under a head of "points and authorities," but embodied in argument certain definite points in numerical order with citation of authorities and a discussion of each, would be considered by Supreme court, though arrangement was not strictly formal.

Instruction properly refused as not submitting any issue of fact raised by pleadings. In an action for damages to plaintiff's warehouse, located in part on defendant's right of way under a lease, by fire started by its engine, instruction that plaintiff could not recover for loss of any part of building or personal property situated on right of way described in lease was properly refused as not submitting any issue of fact raised by pleadings.

Instructions on liability to lessee's successor for fire held as favorable to railroad lessor as pleadings and evidence warranted. In action for damages to plaintiff's warehouse, located in part on defendant's right of way under a lease, by fire started by its engine, instruction recognizing validity of lease as between parties making it, as to parties substituted through direct or inferential acceptance of its terms as successor to lessee, were as favorable to defendant as its pleadings and evidence warranted.

Instruction on effect lease on liability for fire held not objectionable as imposing undue burden on lessor. In action for damages to plaintiff's warehouse, located in part on defendant's right of way under a lease, by fire started by its engine, contention that instruction not only required jury to find that plaintiff paid rent under lease, but that plaintiff's officers or agents had actual knowledge of its terms and conditions, not sustained.

Instruction held not in conflict with other instructions. In action for damages to a warehouse, located in part on defendant's right of way under a lease, by fire started by its engine, instruction that mere payment of rent by plaintiff to defendants would not make lease binding unless plaintiff or its officers and agents knew of lease's existence, held not in conflict with other instructions presenting same issues.

Instruction as to deduction of salvage from loss by fire held not erroneous. In action for damages to a warehouse, located in part on defendant's right of way under a lease, by fire started by its engine, instruction that salvage referable to property on plaintiff's land was to be deducted from value of property destroyed or damaged situated on plaintiff's land, held not erroneous as authorizing a deduction from total amount of plaintiff's loss of only the reasonable salvage that was left on land owned by plaintiff.—Farmers' Elevator & Grain Co. vs. Davis. (Mo. Supreme Court), S. W. Rep. 276-393.

Carrier contracting to deliver within specified time cannot plead delivery within reasonable time. Carrier contracting to deliver within specified time does not impliedly agree to deliver within reasonable time, and may not set up delivery within reasonable time as defense in action for violation of contract.

Carrier contracting to deliver within specified time, without publishing and filing schedule, guilty of discriminatory preference. Carrier fixing time of delivery of particular freight commodity by contract, without publishing and filing schedule with Interstate Commerce Commission as part of tariffs, extends advantage to shipper constituting discriminatory preference, in violation of Interstate Commerce Act Feb. 4, 1887, as amended by Act Feb. 19, 1903 (U. S. Comp. St. § 8597).

Refusal to require shipper to set forth in separate paragraphs and elect between different causes of action held error. Overruling motion to require shipper to set forth in separate paragraphs and elect between causes of action for breach of contract to deliver berries within certain time, and violation of implied agreement to deliver within reasonable time, held erroneous.

Admission of evidence of void contract to deliver within specified time held prejudicial error. Admission of evidence of carrier's contract to deliver at destination within specified time, which was void for failure to publish and file schedule with Interstate Commerce Commission, held prejudicial error as furnishing standard by which to measure reasonable time for delivery, on which right to recover was based by court's instructions.

Questions unlikely to arise on retrial not determined. Questions unlikely to arise on retrial need not be determined.—L. & N. R. Co. vs. Warren County S. G. Assn. (Kentucky Court of Appeals), S. W. Rep. 267-551.

TRANSPORTATION MATTERS.

DECISIONS OF I. C. C.

The Interstate Commerce Commission has dismissed the complaint of the Oklahoma Millers' Association against the A. & V. et al., having found that the relationship of export rates on wheat and flour from points in central, north central and southern Oklahoma to Galveston, New Orleans and other gulf ports, was not unduly prejudicial or unjustly discriminatory.

START GENERAL RATE INVESTIGATION.

A sweeping investigation on all rates, including freight, express and passenger, charged by all common carriers for transportation in interstate commerce, has been announced by the Interstate Commerce Commission. The investigation, ordered by the Smith-Hack resolution passed by the 68th congress, was urged by the administration as a principal feature of the Coolidge farm relief program.

All railroads, steamship companies and other common carriers subject to the Interstate Commerce Act were respondents in the formal summons of the commission. Every railroad and the governor of every state was formally notified of beginning of the probe.

The object of the investigation was announced by the commission as follows:

"To determine to what extent and to what manner, if any, the rates of common carriers caused undue or unreasonable advantage, preference or prejudice, as between persons or localities in interstate commerce on the one hand, and interstate or foreign commerce on the other hand, or any undue, unreasonable or unjust discrimination against interstate or foreign commerce.

"To make in accordance with law, such changes, adjustments and distribution of rates as may be found necessary to correct any evils found to exist."

The authorizing resolution directed particular attention to investigation of discriminations which may exist against agricultural products, including live stock, but the order of the commission did not mention this phase except as it was listed "as the several industries."

The commission invited the public generally, including both shippers and carriers, whether as individuals or organizations and the public authorities, state and federal, to

"1—File with the commission any desired brief or statement as to the intent of the joint resolution or procedure to give effect to it.

"2—Bring to attention of the commission any appropriate statement of fact, voiced by affidavit, deemed to bring out classes of traffic or any class or kind of commodities, or any general or special schedule of rates, fares or charges or other matters embraced in investigation within the provisions of the resolution."

Dates of hearings will be announced later. In the meantime the commission will study "known or discoverable situations" with the assistance of its experts and representatives of state utilities commissions.

DIGEST OF ARBITRATION DECISIONS.

In a decision by the arbitration committee of the Grain Dealers' National Ass'n, the following principles were announced:

Globe Grain & Milling Co., Ogden, Utah, vs. Updike Grain Company, Omaha, Nebr. (Plaintiff's broker bought five cars No. 2 yellow corn from the defendant. In confirming the purchases, the broker advised the plaintiff by letter, that the corn was sold "Omaha Terms," "Not subject to Federal appeal." Nevertheless the plaintiff did appeal the grades, as a result of which, grades of the corn were changed to No. 3 yellow. The plaintiff asks for seven cents per cwt. discount.

Held, that action of plaintiff's broker in buying the corn not subject to appeal, and his notifying the plaintiff to that effect, precludes any possibility of the plaintiff obtaining discount, inasmuch as defendant furnished Omaha Grain Exchange certification of No. 2 yellow corn on all the cars.)

The defendant furnished the plaintiff with Omaha Federal grades on the corn. That is all, according to the evidence, he agreed to do.

It is the opinion of this committee, that the claim of the plaintiff be denied, and that the plaintiff pay the costs of this arbitration.

NEW COMPLAINTS.

The Jonesville Milling Co., of Jonesville, Mich., has filed a complaint against the New York Central, with the Interstate Commerce Commission, alleging unjust and unreasonable rates on grain from Eaton, Ossion and Helmar, Ind., to Hopkins, Kalamazoo and Three Rivers, Mich., nullified in transit at Jonesville.

The Bisbee Linseed Co., of Philadelphia, has filed a complaint against the Pennsylvania alleging unjust and unreasonable rates on flaxseed from Philadelphia to Chicago Heights, Ill.

The Crown Mills of Portland, Ore. has filed a complaint against the Northern Pacific, et al., alleging that unlawful prejudice exists against mills located at Portland, in favor of mills located at Everett, Seattle and Tacoma, in that mills at the latter points are able to mill and clear in transit, shipments of grain and grain products destined to points south thereof, to and including Portland, when routed via those points, but that complainants are not given that privilege on shipments destined to points north of Centralia when routed via Portland, originating at points on the Northern Pacific lines.

The Southwestern Milling Co., of Kansas City, has filed a complaint against the A. T. & S. F. et al., alleging that in compliance with a state law, Missouri interstate tariffs have been filed which permit the stopping of cars of grain or grain products, in transit to partly unload, at the published through rate, plus a charge of \$5 for each stop, this privilege being denied to interstate shipments in violation of sections 1, 2 and 13, of the Act to Regulate Commerce.

Boards of trade are planning to challenge the privilege of membership extended by the state legislature to more than 550 cooperative grain marketing associations, in any Kansas board of trade, it was indicated today.

The move will be hotly contested by grain growers, it is said.

SUCCESSFUL SERVICE

Edwards Licensed Formula Service is backed by 30 years' experience and a thorough knowledge of feeding problems.

Let us inspect your plant, offer expert advice on manufacturing systems, supply tested formulas for quality feeds for poultry, hogs, dairy cows, calves and all animals.

We handle sales and advertising campaigns to develop your business.

75 MANUFACTURERS USE OUR FORMULAS

Early & Daniel Co., Cincinnati, Ohio
Wiedlocher & Sons, Springfield, Illinois
Transit Milling Co., Cincinnati, Ohio
Shawnee Milling Co., Shawnee, Oklahoma
and scores of others endorse our service

We can do for you what we have done for others.

MISSOURI GRAIN DEALERS' CONVENTION.

The Board of Directors of the Missouri Grain Dealers' Association, has selected St. Louis as the place and May 7 as the date for the holding of this year's convention.

It is announced that it will be a strictly business meeting with morning and afternoon sessions.

WESTERN GRAIN DEALERS' CONVENTION

Sec'y George A. Wells of the Western Grain Dealers' Ass'n, recently settled the convention dates as of April 21-22 at Des Moines, Ia. The headquarters will be at the fine, new Ft. Des Moines Hotel and a program equalling the customary high grade convention discussions is being completed. Speakers of note and trade discussions of first importance to grain dealers are assured. Advance notices indicate a large attendance from both country points and terminal markets.

NEW MEMBERS.

The following applications for membership to the Kansas Grain Dealers' Association have been received since Jan. 1: Forbes Brothers, North Topeka; Meriden Farmers' Union, Meriden, Kans.; E. E. McClure, Republic; Farmers' Union Coöperative Ass'n, Norton; Lund Grain Co., Lasita; Farmers' Coöperative Grain Ass'n, Athol; Smith Center Coöperative M. L. Co., Smith Center; Broughton Coöperative Ass'n, Broughton; Anton E. Peterson, Morganville; Iola Milling Co., Iola; Selden Grain Co., Selden; Peerless Flour Mills Co., Norton; Morris Lumber Co., Reading; Harveyville Grange Coöperative B. A., Harveyville; Kansas Terminal Elevator Co., Topeka; Harris & Haynes, Colby; Golden Belt Coöperative Elevator Co., Ellis; Farmers' Union Coöperative M. & E. Co., Monument; Farmers' Union Coöperative Ass'n, Toulon, P. O., Hays; B. W. Kynor, Wilson; J. T. Gray Grain Co., Manter; Pauline Farmers' Coöperative; Pauline; Wakarusa Farmers' Union, Wakarusa; Anstaett & Co., Osage City.

This makes a total of twenty-four new members secured out of the total 100 we expect to secure before the close of the year.—E. J. Smiley, Sec'y.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges of the Pacific Coast as of Mar. 11, are as follows:

Portland, Mar. 18.—Merchants' Exchange quotations:

Wheat—Hard white, B. S., Bart, soft white, western white, hard winter, northern spring, western red, \$1.50.

Futures: Wheat—Hard white, March, \$1.50; April, \$1.52; May, \$1.54; soft white, March, \$1.50; April, \$1.52; May, \$1.54; western white, March, \$1.50; April, \$1.52; May, \$1.54; hard winter, March, \$1.50; April, \$1.52; May, \$1.54; northern spring, March, \$1.50; April, \$1.52; May, \$1.54; western red, March, \$1.50; April, \$1.52; May, \$1.54.

Oats—No. 2, 36-lb., March, \$34.

Corn—No. 3 E. Y. shipment, March, \$42; April, \$42.

Mill run—Standard, March, \$28; April, \$29; May, \$29.50.

Seattle, Mar. 17.—Wheat bids—Soft white, hard winter, \$1.50; western white, \$1.70; western red, \$1.45; northern spring, \$1.45.

Yesterday's car receipts—Wheat, 12; corn, 5; hay, 12; oats, 1; barley, 3; flour, 15.

San Francisco, Mar. 17.—No sales were made at either session. During the afternoon session, April barley \$11.85 asked.

The grain price record book of the Grain Exchange carries the following as latest quotations:

Barley—Feed, \$2@2.05; shipping, nominal.

Wheat—Feed, \$3.25@3.30; milling, \$3.55@3.65.

Oats—Red feed, \$2.10@2.25.

Mill Feeds—Shorts, \$42@44; middlings, \$50@52; millrun, \$40@42; bran, \$35@42.

Following are the corn quotations of the past 24 hours:

Corn—California white Egyptian, \$3; eastern No. 3 kaffir, \$2.35; eastern No. 2 milo, \$2.45; No. 2 eastern yellow, \$2.45; No. 3 eastern yellow, \$2.38½.

Spot Calcutta bags—During the morning session, June and July, 12½c asked.

The Powerful Influence of Window Signs

Transfer Window Signs have every advantage—prominent position, large audience, long life, beautiful, permanent colors, easy application, no upkeep and low cost. They identify the store that sells your product and influence the buyer right at the point of purchase. There is no other form of advertising that possesses all these advantages.

MEYERCORD DECALCOMANIA TRANSFER WINDOW SIGNS

Faithfully reproduce any trademark, design, or lettering in any size, or shape, in brilliant, non-fading oil colors and gold. Open patterns or with backgrounds.

They are quickly applied by anyone, and once up, remain permanently for a long time. Our staff of artists will create new designs for you, or assist in carrying out your own ideas. Send for samples, sketches and prices—there is no obligation.

FRENCH IMPORTS.

French grain and flour imports during January, 1925, were: Wheat, 23,897 tons, against 53,474 tons in 1924; oats, 2,173 tons (2,272); barley, 1,224 tons (13,845); rye, 1,221 tons (8,756); corn, 42,706 tons (55,391); wheat flour, 91 tons (534).

Use our liner advertising department to sell or buy second-hand equipment.

COMING CONVENTIONS.

April 21-22.—Western Grain Dealers' Ass'n, Des Moines, Ia.

May 5-6.—Illinois Grain Dealers' Ass'n, Peoria, Ill.

May 7.—Missouri Grain Dealers' Ass'n, St. Louis.

May 7-9.—American Feed Manufacturers' Ass'n, New Orleans, La., Roosevelt Hotel.

May 19-20.—Oklahoma Grain Dealers' Ass'n, Oklahoma City, Okla.

May 21-22.—Kansas Grain Dealers' Association, Wichita, Kans.

May 22-23.—Texas Grain Dealers' Ass'n, Ft. Worth, Tex.

June 9-11.—Am. Seed Trade Ass'n, Los Angeles.

June 22 and 23.—Wholesale Grass Seed Dealers Ass'n, Drake Hotel, Chicago.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

August 20-21.—New York State Hay and Grain Dealers' Association, Syracuse, N. Y. Hotel Onondago.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

Terminal Markets

MEMPHIS.

George Williamson, Correspondent.

Week's receipts were 96 cars of corn, 133 of oats and 29 of alfalfa meal.

E. L. Luibel, grain and feed broker, returned from Chicago Wednesday.

W. T. Fray, of Toberman & Mallory, Kansas City, was an exchange visitor Monday.

D. S. Mullally, of the Langenberg Bros. Grain Co., St. Louis, was one of the past week's visitors.

P. S. Wilson, of Valier & Spies, St. Louis millers, was a visitor to the trade here during the week.

C. O. Arnold, Kansas City, and Charles W. Aiken, Ridgewood, N. J., were visitors on 'change Wednesday.

H. D. McDaniel, of the McDaniel Milling Co., Carthage, Mo., attended a meeting of the Traffic Club here Monday.

Austin Morton, of the Meek Milling Co., Marissa, Ill., was one of the visitors at the Merchants Exchange the past week.

F. T. DeShong, of the Arkadelphia, Ark., Milling Co., was a visitor here during the week and reported buying of flour slow.

M. A. Nelson, grain and hay shipper, of Perryville, Mo., was introduced at the Merchants Exchange Tuesday by Ferd Heckle.

Excellent weather prevailed all the week in this territory and much progress was made in farming operations. Considerable corn was planted. In the territory south of here some cotton will be planted next week if weather continues favorable, as most of the land has been prepared.

Business with the grain trade continues slow, although it is better in oats. That grain is being sold to the planters almost to the exclusion of corn, it being considered so much cheaper. Track 3 white oats were quotable Saturday at 52½¢. Cash 3 white or 3 yellow corn quotable the same day at \$1.20 and 3 mixed at \$1.10.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

M. C. McCafferty, grain dealer of Calumet, was a recent visitor here.

Thomas F. Skaw of Galveston is a new member of the Oklahoma Grain Dealers' Association.

George C. Sohlberg, president of the Acme Milling Co., Oklahoma City, has returned with his family from a vacation spent in New York and Eastern Canada.

William Wheeler of Weatherford, R. E. Nelson of Clinton, Mr. Shepherd and son of Hobart and L. O. and L. H. Street of Woodward were among recent Oklahoma City visitors in grain circles.

A tour of West Texas and sections of Mexico and Arizona recently was concluded by W. M. Black, grain dealer of Arapaho. It was replete with unusual experiences, including attendance upon a bull fight.

Failure of some middle west railroads to respond to the request of the Oklahoma Millers' League to reduce rates on flour to the Gulf to a par with rates on grain in certain instances has resulted in officials of the league ordering a complaint prepared to present to the Interstate Commerce Commission. The Commission recently suggested to railroads, but did not cover the subject in an order, that these rate parities should be made.

In only a few places in Oklahoma during March was enough moisture provided to benefit growing wheat and oats and nearly every section of the state was in need of rain at the end of the month, according to a crop-condition report recently compiled by C. F. Prouty, secretary of the Oklahoma Grain Dealers' Association. Reports as to acreage and growing conditions came from 61 points well scattered over the state. Of these, 33 showed an urgent need of rain, 14 conditions good and 14 conditions fair. Dry weather has caused an abandonment of around 25 per cent of the acreage of wheat, the report shows, and probably 15 per cent of oats. Reports from Vici and Billings showed the acreage condition to be 110 compared with last year.

May 19 and 20 have been fixed by C. F. Prouty, secretary of the Oklahoma Grain Dealers' Association, for the twenty-eighth

annual meeting in Oklahoma City of that body. The annual meeting of the Oklahoma Millers' League will be held on the same dates. Secretary Prouty was able to select dates agreeable to national association officers who expect to attend both the Oklahoma and Kansas meetings. The meeting of the Kansas association will be held in Wichita May 21 and 22. That of the Texas association will be held in Fort Worth on May 22 and 23. A joint meeting of Oklahoma and Kansas millers that was to have been held in Arkansas City, Kans., soon, has been postponed until after the meetings in April of the Southwestern Millers' League and the Millers' National Federation, Frank Foltz, secretary of the Oklahoma league, announces.

NEW YORK.

J. M. Nugent, Correspondent.

Mrs. Mary L. Stenson, widow of Samuel Stenson, wealthy grain merchant and member of the Produce Exchange, died recently at her town house in Brooklyn.

Export sales of wheat during the past week were estimated around five to six million bushels, but a fair portion of this business consisted of Manitoba wheats. The remainder comprised American hard winters, and some scattered lots of Duluth spring wheats and durums.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: M. Neal and B. J. Hollister, both of Chicago; R. A. Willett of Cincinnati; H. W. Nellis of Toronto; S. Lancaster and Paul T. Wise, both of Boston; G. B. Hubbard of Minneapolis, and T. J. McComb of Philadelphia.

Flour Situation.

New York, Mar. 21.—While early in the week the flour market was demoralized with wheat, there was quite a recovery later on with the close decidedly firm.

Locally trade was not active, but outside points were reporting a much better inquiry at higher prices.

It was rumored that Russia was in the market again for approximately 600,000 tons of wheat and flour, this being all Canadian.

Spring patents were quoted at \$8.50@8.90, soft winter straights \$8.30@8.65, and hard winter straights \$8.50@8.90 per 196 lbs.

BALTIMORE.

Robert C. Neu, Correspondent.

A rather singular coincidence in the trade here is that oats are ruling at identically the same level of prices as at this time last year.

President A. W. Mears, of the Baltimore Chamber of Commerce, returned to Baltimore on March 18 from a month's fishing trip in Florida and the West Indies.

Receipts of water borne corn in the Baltimore market so far this season amount to 31,000 bushels, compared with 189,000 bushels arrived up to the same time last year.

William E. Harris, senior member of the grain brokerage and forwarding firm of W. E. Harris & Son of this market, returned at the close of last week from a trip to Florida.

The Atlantic Flour Mills Corporation, 612 Water street, this city, has been dissolved by mutual consent, and the business will be continued by Lewis Blaustein, president of the former concern, under his own name.

Among the out of town visitors on the floor of the Baltimore Chamber of Commerce last week were: J. C. Hooper of Cincinnati, Ohio; H. H. Willis, of Winchester, Va.; C. C. Furr, of Broad Run, Va.

Chief Grain Inspector David H. Larkin and Chairman of the Grain Committee of the Baltimore Chamber of Commerce T. Murray Maynadier, attended the recent conference held in New York City with representatives of the Bureau of Federal Grain Supervision on oats grades.

The condition of J. N. McCosh, a well known flour broker and mill representative of this city, who recently underwent an operation at the Church Home and Infirmary, is reported as steadily improving.

While away on his holiday in Florida President Mears of the Baltimore Chamber of Commerce remembered the various employees of the Chamber by sending them a fine box of oranges and a box of grapefruit which were distributed among the different departments.

Arrangements have been completed for the big dinner and ladies' night to be given by the Baltimore Flour Club (J. Ross Byers, president) at the Hotel Rennett on the evening of Maryland Day, March 25. The members and their wives, together

with a few invited guests, have been given assurances of a rare musical treat in the form of instrumental and vocal numbers to be rendered by artists in their lines, and the menu will consist of all Maryland dishes served in true Rennett style. Nuff said!

Baltimore grain interests are naturally much pleased over the decision by the United States Supreme Court last week, sustaining in toto the findings of Judge John C. Rose, of the United States District Court at Baltimore in November, 1922, who at that time ruled that the Federal Trade Commission had no legal right to force certain local grain exporters to submit their records, books and private papers for examination by said Commission which was conducting an investigation into the profits of grain exporters, margins between farm and export prices, facts concerning market manipulations, etc., under a Senate resolution. A summary of the highest court's decision in this case was given in last week's issue of The Price Current-Grain Reporter, again substantiating this paper's claim of always "printing the news first."

PORTLAND, ORE.

George Albers of the Albers Milling Co., Seattle, was a Portland visitor last week.

Frank E. Ryer, president of the Ryer Grain Co. of this city, was a recent visitor in Minneapolis.

D. M. Sanson and W. B. Bartram of Toronto were here last week in connection with Oregon's infant flax industry.

The committee will investigate provisions of the Smith-Hock bill, under whose authority the survey will proceed, and inquire into its effects on Northwest industry and commerce.

Directors of the Chamber of Commerce authorized appointment of a committee of five to aid in the investigation to be made by the Interstate Commerce Commission of transportation rates with special reference to agricultural products, and President Andrews named Robert M. Irvine, George A. Westgate, E. E. Faville, W. A. Baker and W. O. Munsell to serve.

At least 100,000 acres of grain land in Gilliam county were frozen out, according to James M. Burns, merchant of Condon, Ore. The condition in Gilliam county, he reports, is even worse than he thought it was when he was one of a delegation which went to the legislature and urged that an appropriation be made for the farmers so that they could reseed their fields. The full extent of the damage in Gilliam county did not become known until quite recently.

A map of the Portland and Vancouver harbors, prepared by the United States coast and geodetic survey at the request of the foreign trade department of the Portland Chamber of Commerce, has been completed and will be distributed through the regular channels. The information in the new map should be a material aid to shipping, according to Frank Ira White, manager of the department. Channel depths, location of wharves, factories, industrial sites, tidal data and aids to navigation are charted.

Terminal receipts in cars were reported by the Merchants' Exchange as follows:

Portland—	Wht.	Bly.	Flr.	Cn.	Ots.	Hy.

ST. LOUIS.

Much grain continues to move from this city by barge for export via New Orleans.

E. T. Hall, former secretary Ralston Purina Co., is now vice president of the company and in charge of its advertising.

Eugene C. Dreyer of the Dreyer Co. has returned from a two weeks' trip to New Orleans and other points in the South.

The Mixed Feed Supply Co., of which C. A. Mahon is the owner, has closed its offices and moved to Kansas City, Mo. The company recently purchased an alfalfa plant at Kansas City which can be operated better in the new location than from here.

Among recent out of town visitors were: C. J. Schneider of the Eagle Milling Co., of Petersburg, Ill.; Lloyd Cowgill, of the Cowgill-Hill Milling Co., Carthage, Mo.; J. Browder of the Browder Milling Co., Fulton, Ky., and J. R. Davis, of the H. H. King Milling Co., Minneapolis.

Those admitted to membership in the Exchange recently include: Wayman McCreary Allen, John E. Sherry, Oliver O. Lipe, and Wm. V. Peters. The latter was admitted on the transfer of the certificate of C. Tumbach. Harris McGavock has applied for membership on transfer of certificate of F. J. Alexander, and Charles G. Randall on certificate of C. A. Mahon. The

BUFFALO.

The Electric Grain Elevator Co. announces that it is retiring from business April 1.

M. Nowak of the Nowak Milling Co., of Hammond, Ind., was a visitor on 'change last week.

H. R. Wilber of the Wilber Grain & Feed Co., of Jamestown, was a recent business caller in Buffalo.

Recent names on the visitors' register at the Corn Exchange include H. C. Elrod of Portland, Me., Lee Huntington of Condersport, Pa., and A. S. McDonald of Boston.

The Great Eastern Elevator Corp. of this city has made application for articles of incorporation. M. C. Gaetazore and T. Williams are behind the project in which there are to be 10,000 shares of preferred stock at \$100 each and 7,500 shares of common stock with no par value.

TOLEDO.

S. M. Bender, Correspondent.

Grain inspections in this market for the past week were 13 cars of wheat, 79 cars of corn, 26 cars of oats and 1 car of rye. Total, 119 cars.

The Scotland representative of the Menel Milling Co. was on the exchange floor during the past week and visited with several grain men and millers.

Flour production of Toledo mills as reported for the past week was 28,900 bbls. compared with 27,350 bbls. the week before and 35,100 bbls. a year ago.

Though there is said to be considerable wheat in the farmers' hands it is very hard to buy. Late sown wheat looks poor in spots and early sown mostly good.

C. F. Barnhouse, grain dealer of Upper Sandusky, Ohio, and brother of H. O. Barnhouse, local representative of Hulburd, Warren & Chandler, died last Monday at his home in Upper Sandusky. He was well known throughout the state and comes of a family that has been connected with the grain trade for many years.

The elevator and warehouse of J. P. Easton, Monroeville, Ohio, burned last Wednesday night. Several cars of grain on track were also burned. The loss was almost entirely covered by insurance. Phil Horn, well known grain dealer, has been at the head of the business. Mr. Easton was in Florida at the time of the fire.

Jess Young of Southworth & Co. seldom wears a coat and members of the exchange sometimes mistake him for the office boy as he is so young looking. A newcomer recently handed him a telegram and said, "Rush it," then realizing his error apologized profusely. However, Jess will soon have reason to go coatless as the mercury is slowly climbing summerward.

Declining prices for all grains have caused a light movement to this market during the past week. Cash premiums for wheat and more especially corn were im-

proved with a somewhat better demand. A very good call for high-grade oats has appeared recently. Rather quiet flour sales are reported by local mills. Millfeeds are also dragging with buying on a hand-to-mouth basis.

BOSTON.

A. S. McDonald was a recent visitor in Buffalo.

Membership of the Boston Grain and Flour Exchange is now more than 175 and it is announced that no associate memberships will be accepted until the active membership has reached 200.

Among recent visitors to the exchange were James White and N. B. Updike of Chicago, G. H. Furnace and H. A. Dahlquist of Minneapolis, and S. A. Luthill and Sydney Greenbie of New York.

A. W. Mears of Baltimore, president of the National Federated Flour Clubs, and E. S. Knighton, secretary of the Philadelphia Flour Club, attended the annual dinner of the Boston Flour and Grain Club.

Howard Coonley, president of the Chamber of Commerce, was a luncheon guest of the San Francisco Chamber of Commerce on the 17th and spoke to the members on business conditions in this section. Mr. Conley, together with his wife and two children, are touring in the West.

MINNEAPOLIS.

H. A. Paul, Correspondent.

Leo Hatch of E. P. Bacon Co. is back after several days' illness.

H. H. King of the H. H. King Milling Co. is visiting his daughter in the East.

John Mulliken, sales manager for the Washburn-Crosby Co., left for a pleasure trip through the East this week.

J. H. Riheljafer of the Tenney company has recovered from his recent illness.

A. L. Goetzman of the A. L. Goetzman Co. is leaving for an extended trip through North Carolina and Florida.

Herman Grabo, local manager of the Gould Grain Co., was greeting his friends on the trading floor for the first time in several weeks. He has been confined in a hospital for some little time.

Among the visitors on the Minneapolis Exchange during the past week were the following: A. G. Wells and A. Murray of Aurora, Canada; R. W. Babcock of Moline, Ill.; L. J. Baird of Superior, Wis.; H. L. Becher and A. O. Olson of New Ulm, Minn.; W. C. Mills of Regina, Sask.; O. Hinden of Greeley, Colo.; B. J. Lamson of Weyburn, Sask.; O. M. Williams of Spokane, Wash., and R. D. Smith of Winnipeg.

Cash Markets.

Wheat—Light receipts during the past week kept the local market all of firm and mills were after the choice quality wheat right along. Advices from the country continue to show prospect of light receipts for some time to come and line houses say that there is but very small movement from first hands. An estimate on country elevator stocks in the Northwest, made public this week, shows around 25,000,000 bushels of bread wheat in the hands of the country elevators, which is substantially the same figure as that made a month ago. These figures were as of March 1.

Shipping sales were rather light early in the week, only running around 50,000 bushels daily, but Friday they picked up and around 160,000 bushels were reported worked. The light country run has brought some of the interior mills in nearby territory into the market for elevator wheat. The recent low asking prices on flour apparently brought in some business as the mills, both local and outside, were scurrying around for the kind of wheat which they required to make their various mixtures. One small lot of 15,000 bushels was worked to the gulf for export.

Based on today's sales, No. 1 hard spring sold at 2@45c over the May; No. 1 dark northern at 1@44c over, and No. 1 northern at May price to 40c over. Durum was strong and hard to get. Today's range of prices were: No. 1 amber, 1c under at 37c over Duluth May; No. 1 mixed, 4c under at 35c over, and No. 1 durum at 4c under at 28c over.

Local elevator stocks for the week total as follows: 13,374,152 bushels vs. 13,416,603 a week ago and 14,688,283 a year ago.

Corn—The past week in the Minneapolis corn market was characterized by a marked improvement in the demand with a consequent bolstering up of the current discounts. Low grade corn, while not in exceptionally brisk demand, came in for a fair amount of request and discounts were at least 5 cents less than during the previous week. Weakness in the option did not seem to hurt the cash article any, holders refusing to drop their asking prices in line with futures.

Today's sales show the following basis: Yellow corn, No. 3, 8@11c under Chicago May; No. 4, 12@15c under; No. 5, 15@20c under, and No. 6, 21@24c under. Mixer corn, No. 3, 12@15c under Chicago May; No. 4, 16@20c under; No. 5, 20@23c under, and No. 6, 21@26c under.

Minneapolis elevator stocks made public today show 1,453,563 bushels vs. 1,245,992 last week and 1,596,860 a year ago.

Oats—There were fair shipping sales of oats right thru the week and if the quality of receipts was any good at all there was not much of any difficulty for the commission trade to find a place for it. Shippers were after heavy weight oats and paid right up for them but were inclined to go a little slow on the thin stuff. The week started out with bidders offering 1/4@

1/2c over May for the No. 3 whites but today they were paying as high as 1@1 1/2c over for the same quality. No. 4 whites were bringing 1@1 1/2c less than the No. 3 today. Local stocks show the following totals: 21,705,168 bushels this week vs. 22,012,417 last week and 4,826,488 a year ago.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending March 20 were 848,060 bus. wheat and 46,000 bus. oats.

Receipts of flour and grain for the week ending March 21 were: Flour, 42,508 bbls.; wheat, 980,150 bus.; corn, 11,153 bus.; oats, 118,668 bus.; rye, 26,666 bus.; barley, 1,883 bus., and 360 tons of feed.

The city-owned flour mill, one of the old landmarks of Bridgeton, N. J., was totally destroyed by fire of unknown origin on Tuesday morning, March 17 last. The mill was situated at the entrance of Bridgeton's 500-acre park and had been in operation 105 years, having been built in 1820 by Daniel H. Stratton. Since April, 1921, it has been owned by the city which bought it for \$18,000 to obtain first right to the water power and to make a show place. There was \$9,000 insurance on the mill.

At a meeting of the advocates of the greater port of Philadelphia, called by President Hubert J. Horan of the Commercial Exchange of Philadelphia, held in the Bourse on Friday last, E. S. Gregg, chief of the transportation division of the Bureau of Foreign and Domestic Commerce, spoke. Mr. Gregg, who was accompanied by H. V. Smith, special representative of the Department of Commerce at London, was sent to the meeting by Secretary Hoover. Mr. Gregg spoke enthusiastically of the many advantages offered by the port of Philadelphia. Among those who participated in the conference were H. DaWitt Irwin of the grain firm of Barnes, Irwin & Co., Herbert Bell of the Quaker City Flour Mills, Robert Morris of the exchange, Alfred J. Ball, foreign freight agent, Pennsylvania R. R. Co., and Geo. M. Richardson of the Tidewater Terminal, and others.

Philadelphia Flour Market.

Philadelphia, March 21.—Receipts of flour for the week just closed were 42,508 bbls. The market is still very unsettled owing to the demoralized condition of the wheat market which makes sharp advances one day only to be followed the next by just as sharp declines. Buyers are not disposed to purchase in excess of present wants, while the mills are reluctant to force business at any great sacrifice. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.50 @8.75; soft winter straight, nearby, \$8 @8.50; hard winter straight, \$8.75@9.25; hard winter short patent, \$9.25@9.75; spring first clear, \$8.50@8.75; spring patent, \$8.75@9.25; spring short patent, \$9.50@9.75; fancy spring and city mills patent family brands, \$10@10.50. Rye flour, \$7.75@8.25 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

DULUTH.

S. J. Schulte, Correspondent.

Percy Ginder of the Barnes-Ames Co. reported substantial export sales recently from supplies held afloat or in eastern elevators during the last week.

Application has been posted for the transfer of the Duluth Board of Trade membership of B. E. Baker to W. D. Jones as trustee. Mr. Baker recently retired from the commission business on this market and his membership is being held in the hands of a trustee until the liquidation of his trades has been completed.

As illustrating the improving jobbers' interest in flour, the Duluth-Superior Milling Co. here reported a good demand during the last ten days. That company established a record that has not been equaled in several years in dispatching a solid train of thirty-five cars of its patent flour to the East during the last week.

Grain men who had been holidaying at California and Florida winter resorts are coming back. H. S. Newell has returned from a vacation spent at Sarasota, Fla. Clarence T. Mears of the Itasca Elevator Co. and Dave Stocking, who are also vacationing there, are expected to return by April 1. Harry Dinham of the Duluth Shipping Co. has been welcomed back after a vacation spent at southern California points.

Elevator men here are complaining of the lack of inquiry for wheat of any other grains for opening of navigation shipment. Dealers agree in the statement that eastern buyers' interest is the slowest for the season in many years on this market. With stocks of all grains in the elevators now aggregating around 31,500,000 bushels, officials of some of the houses are pawing for air in the endeavor to continue receiving grain up to the opening of navigation. Boat space for Buffalo delivery at the opening of the navigation was reported to be offering at 3 cents a bushel.

In spite of the recent severe recessions in grain prices, elevator and commission men here have been receiving encouraging reports from over the Northwest regarding the outlook for substantially larger acreages being seeded to spring wheat, durum and rye this season. Farmers are reported to be feeling hopeful regarding the outlook for fairly remunerative prices being made upon wheat and other feed grains this spring. As a rule growers do not hope to realize the long prices they did during the late fall and winter season, but they are in some way hopeful that the wheat figure

will not sink much, if any, below \$1.50 a bushel by the time they begin to market their crops next fall. Grain handlers here are laying stress upon the point that many growers overstayed their market this season and as a result failed to realize anywhere nearly the peak figures set.

Flour Firm.

Flour trade was in better volume on this market during the last week, millers reporting good booking for nearby shipment. Patents are up 10c. Prices per bbl. in carlots at mill are 10c off, as follows: Family patent, jute, \$8.65; bakers' patent, jute, \$8.40; first clears, \$8; second clears, \$7.25.

NEW ORLEANS.

M. L. Davis, Correspondent.

Dan Mullally of the Langenberg Bros. Grain Co., St. Louis, spent several days in New Orleans this week.

Standard blackstrap molasses remains firm and unchanged at 13c per gallon, f. o. b. tank cars New Orleans; light blackstrap is still quoted at 14c per gallon.

Stocks in elevators as of today are: Wheat, 1,371,000 bus.; corn, 428,000 bus.; oats, 296,000 bus.; rye, 20,000 bus.; barley, 2,000 bus. Cars on track: Wheat, 10.

Frederick I. Thompson of Mobile, member of the U. S. S. E., was a recent New Orleans visitor. Mr. Thompson conferred with members of the gulf shipping conference with the view to placing New Orleans and other gulf ports on a rate parity with New York.

Sidney Smith, famous Chicago cartoonist, creator of "Andy Gump," accompanied by his brother, Tom Smith, Lawrence Heyworth and K. B. Harwood, were guests in New Orleans this week of Frank B. Bowes, vice-president of the I. C. railroad. The party was shown the shipping facilities of the port by members of the dock board.

The Southern Pacific S. S. Lines suffered a heavy loss this week when the palatial new steamer "Bienville" was partially destroyed by fire. Only recently the "Bienville" made her maiden trip and has just arrived from New York on the return voyage. Some trouble developed on her trip from New York and the vessel was undergoing minor repairs when fire broke out in one of the cabins. Efforts of the crew to put out the fire were unavailing and the dock board fire tub "Deluge" along with several other harbor tugs were called upon for assistance. The "Bienville" finally had to be beached about five miles below the city and while the exact loss has not as yet been determined, it is believed to be about half a million dollars.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Ground feed arrival for the week amounted to 19 cars, Colorado mill run selling at \$35; Kansas bran, \$33; alfalfa meal, \$32; molasses alfalfa, \$29; cottonseed meal, \$45; beet pulp, \$40.65; rolled barley, \$47, with the ground feed market quiet. Hay arrivals for the week amounted to 104 carloads. The demand was fairly good and prices steady. No. 1 alfalfa selling at \$23@25, No. 2 selling at \$2 less, No. 1 barley hay at \$28, No. 1 oat hay at \$32. The first car of new alfalfa arrived this week and sold at \$33.

The market conditions at this terminal are very unsatisfactory, affected largely by the radical changes on the eastern markets. There is a great uncertainty among dealers in placing orders for eastern shipments. The arrivals have been fairly good, but it is predicted that there will be a falling off until a more settled condition exists in the middle west. There has been considerable decline in nearly all the grain commodities. No. 3 yellow corn for prompt shipment is being offered at \$2.40 per cwt. April barley for April delivery has been selling at \$1.90 per cwt., while Imperial barley, carlots for May shipment, has been selling at \$1.93 1/4 per cwt.

MILWAUKEE.

D. K. Steenberg, Correspondent.

W. E. Schroeder has recently succeeded R. L. Glacier, retired, as manager of the Outagamie (Wis.) Equity Exchange.

F. G. Swoboda, well known to the trade of southern Wisconsin, has recently become manager of the Equity Feed & Supply Co. at East Troy, Wis.

Receipts of grain at Milwaukee last week were 98 cars barley, 167 corn, 41 oats, 89 wheat, 8 rye, 3 flax, 3 miscellaneous; total 409 cars, against 690 the week before, 461 a year ago, and 373 in 1923.

Shipments of grain from Milwaukee last week were 194,300 bus. oats, 121,961 corn, 37,260 barley, 27,400 wheat, 37,750 rye; total 418,671 bus., against 394,066 the preceding week and 774,540 a year ago.

The La Budde Feed & Grain Co., Milwaukee, has recently been appointed sole distributors in Wisconsin of Cream of Corn Gluten and Amalzo Germ Meal, manufactured by the American Maize Products Co. of New York and Chicago.

Violent fluctuations and irregular markets characterized the past week. The movement was smaller and demand improved at better basis. Wheat closed 2@4c off for the period, rye 3@4c, barley 2@3c, while oats are up 1c and corn improved 5@15c for lower grades while good grades are steady.

The Menomonee Falls (Wis.) Grain & Supply Co., which was recently sold to F. G. Schwenk, has again been sold to the Schaefer Milling Co., also of Menomonee Falls. The stock will be removed by the new owners and the buildings razed to

March 21. L. R. Fyfe, Edward LaBudde and P. P. Donahue were endorsed for election to fill three vacancies on the board of Directors: E. S. Terry and E. J. Koppikam to fill two vacancies on the board of arbitration: E. C. Christl, Herbert H. Ladish and James T. Mallon to fill the unexpired term of J. P. Hessburg on the board of arbitration; and J. J. Crandal, A. R. Taylor and J. V. Leuer to fill three vacancies on the board of appeals. Primary election will be held on Saturday, March 28, and the final balloting will take place on Monday, April 6. Unless more candidates enter the field before the primaries most of the positions will be filled by default.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

C. L. DeLong, for several years in the brokerage business at Nebraska City, Nebr., has sold his holdings to F. S. De Long and has made application for solicitor's card to represent the Niedorp Grain Co.

Offerings of all grains have been light during the week ending March 21. Wheat arrivals mostly contract, and flour supplies very scant. For the week hard wheat prices have advanced 2c; soft wheat about unchanged. Corn offerings moderate with bulk running to mixed. Demand improved for wheat and fairly good for corn except that corn buyers argue reduced premiums, while the tendency has been for higher premiums in wheat. Corn values unchanged to 2c lower for the week. Oats supplies very light and demand fair to good with prices about unchanged for the week.

Visitors on the St. Joseph Grain Exchange during the week ending March 21 included N. S. Kerschen, Marysville, Kans.; S. Gilmore, Highland, Kans.; D. H. Knepper, Hiawatha, Kans.; F. G. Endelman, Fairbury, Nebr.; J. G. Skidmore, Barnard, Mo.; C. R. Mayes, Jamesport, Mo.; J. W. Ostrander, Diagonal, Iowa; J. L. Ballard, Guilford, Mo.; J. S. Jones, Wymore, Nebr.; W. M. Palmer, Forsythe, Mont.; Francis Miller, Ludell, Kans.; A. R. Lusey, Rushville, Mo.; G. E. Hutson, Rushville, Mo.; R. Prebble, White Cloud, Kans.; E. M. Smith, Gower, Mo.; John Watkins, Liberty, Nebr.

KANSAS CITY.

T. J. Tanner, Correspondent.

For the first time in many years the elevators in Kansas City hold more corn than wheat. The corn stocks are the largest in local history.

R. O. McKenna, wheat buyer for the Hall-Baker Grain Co. and a member of the Board of Trade, was married Saturday to Mrs. Grace G. Wales of Kansas City.

Visitors at the Board of Trade this week included G. H. Geron, New York City; Paul S. Warden and J. J. Kelley, Chicago; J. Chilton, St. Louis; E. R. Welch, Wichita, Kans.; M. B. McNair, Hutchinson, Kans.; G. Immell, Blackwell, Okla.; O. S. Tyler, Guymon, Okla.; C. S. Humeston, Humeston, Ia.; and R. F. Eleel, Hillsboro, Ill.

A movement is on foot to unite the Soil Products Exposition and the Royal Live Stock Show. Both exhibitions may be held in the Royal Live Stock Show pavilion, recently destroyed by fire but now being rebuilt. The Royal show usually is held in November. W. I. Drummond, chairman of the board of directors of the soil products enterprise, is promoting the union of the two shows.

Without the passage of a single freak law pertaining to the grain trade, the Kansas legislature adjourned this week. E. J. Smiley, secretary of the Kansas Grain Dealers' Association, says this is a record for 25 years. The bill providing for a reduction in the cost of grain inspection, sampling and weighing in Kansas from \$1 per car for both inspection and weighing, to 60c per car of all grain when the amount in the revolving fund reaches \$80,000, was adopted and will become a law.

With the completion of the Ralston-Purina and the Staley plants in Kansas City, the position of this city as the second poultry-feed manufacturing center has been greatly strengthened. Among other heavy producers of these feeds are the Southard Grain & Milling Co., the Arcady Farms Milling Co., and the Nelson Grain & Milling Co. E. L. Barr of the latter named company said Saturday that in view of Kansas City's accessibility to the fields of corn, kafir and barley production, he expected the industry here to equal that of St. Louis within the next few years.

Local grain firms were flooded with crop news this week, most of the reports coming from Kansas, Nebraska, Oklahoma and Texas, indicating the development of serious conditions. The great need, apparently, is an abundance of rain, but in some instances wheat was declared to be dead and showing no response to recent moisture. C. A. Cooper of Lyons, Kans., who has been traveling for mills in Hutchinson, estimates that 21 per cent of the Kansas acreage will be abandoned. He makes the wheat condition 71.8 per cent as an average for the state. In Oklahoma the condition is placed at 67 per cent, with an abandonment of 15 per cent. Mr. Cooper estimates a decrease of 60,000,000 bus. in the production of Kansas and Oklahoma, as compared with last year's yield.

No Loss on Seed Wheat.

J. C. Mohler of Topeka, secretary of the state board of agriculture, who also is secretary of the Central Seed Wheat Association, reported Saturday that dividends of 90 per cent had been paid to investors in the pool formed in the fall of 1923 to finance farmers in southwestern Kansas in

need of seed wheat. The remaining 10 per cent is to be paid in April and there will be a small sum of money left after the payment of all expenses. About 1,000 farmers were provided with seed. Practically all had good crops, one-fifth of which went to the pool. The Santa Fe railroad placed \$1,000,000 in banks, available to unfortunate wheat farmers along its line.

Generally the farmers have been willing to abide by the contracts with the association, but a few sidestepped their obligations by selling wheat at different points. Two farmers took the seed furnished them and sold it. There were several instances in which growers turned over poor wheat to the pool, selling the good grain later.

Cash Grain Markets.

Wheat—Receipts for the week, 289 cars against 540 a week ago and 358 a year ago. The sharply reduced movement was due in large part to recent price declines but it also was reflective of small country supplies. At the outset the market was irregular and narrow, but on Tuesday there was a break of 8@11c in conformity to a slump in futures. Thereafter the tendency was mainly upward. Though local mills operated only 56 per cent of their capacity, making 84,500 bbls. of flour, there was a fair demand from that source and for domestic shipment, as well as from exporters to fill previous foreign sales. Usually holders of hard and dark refused to sell on drops, but on bulges they let go. Heavy shipments were made from store to the gulf ports and to outside mills, including Minneapolis. Arrivals of soft wheat were very light and all were well taken, especially on domestic shipping orders. Hard and dark closed generally unchanged to 2c higher, with premiums stronger on protein qualities, but some inferior samples of No. 4 were as much as 6c down. A net gain of 1@6c was scored in soft wheat. Final prices were: No. 1 hard and dark, range, \$1.59@1.82; No. 2, \$1.58@1.82; No. 3, \$1.57@1.81; No. 4, \$1.50@1.80; No. 1 red, \$1.70@1.76; No. 2, \$1.69@1.76; No. 3, \$1.65@1.74; No. 4, \$1.63@1.70. Elevator stocks showed a decrease of 787,000 bus., to 7,231,000, as compared with 11,516,000 last year. New crop development in the Southwest is in an uncertain state, with much depending on rains in the next few days or weeks. Notwithstanding recent moisture, many fields in north central Kansas, south central Nebraska, western Oklahoma and on down into Texas are said to be in bad shape, with considerable areas dead or ungerminated. Southwestern Kansas seems to be troubled by the army or cut worm and there is more or less Hessian fly infestation in various parts of the state. An expert traveling from Lyons through the big central Kansas wheat growing counties estimates that Kansas and Oklahoma will produce 60,000,000 bus. less wheat this year than last.

Corn—Receipts, 284 cars, against 565 a week ago and 351 a year ago. In a general way the corn market was led by the fluctuations of wheat, but the recovery from bottom prices was not complete, despite diminished arrivals. Buying for nearby feeding account was fair, though the southern shipping demand failed to develop. Elevator men were in the market when the hedging basis was favorable, and they expressed confidence that every bushel of the great stock accumulated here would eventually be wanted. One thing that inspires confidence on the part of storage interests is the superior average quality of local holdings. It is declared that Kansas City has more good corn than any other market. Reports from Texas indicating that drought has prevented a normal starting of the new crop are suggestive of a later demand from that source. However, the market closed with a net loss of 1@3c, final prices being as follows: No. 2 white, \$1.06½@1.09; No. 3, \$1.04@1.07; No. 2 mixed, \$1.06@1.08; No. 3 mixed, \$1.03½@1.06; No. 2 yellow, 1.08½@1.10; No. 3, \$1.07½@1.09. If the weather proves favorable, an increased acreage will be planted in the Southwest. Prospective abandonment of winter wheat acreage in large areas is an inducement to heavier seeding of corn. Stocks of corn in Kansas City elevators increased 232,000 bus. for the week, to 7,851,000, as against 2,079,000 a year ago.

Oats—Receipts, 34 cars, against 46 a week ago and 72 a year ago. Actual floor offerings were much less than the arrivals would indicate, as some cars had been bought to arrive. There was a good local and scattered outside demand, with elevator interests constantly moving oats from store to fill old or new sales. Price changes reflected the fluctuations of corn and wheat. White oats closed with a net recession of 1@1½c, with No. 2 at 47½@48½c and No. 3 at 47@47½c. Red seed oats were slow, owing to lateness of the planting season, most farmers having provided for needs. Final prices were 1c lower. No. 2 was quoted at 48c and No. 3 at 46c. The drought situation, especially southwestward, is a menace to the new crop, though it is too early for a widespread alarm. Elevator stocks here decreased 277,000 bus. for the week, to 1,929,000, against 706,000 a year ago.

We Buy and Sell Ear Corn

RICHTER GRAIN CO.
Cincinnati, Ohio

possible reason for a new enterprise, probably a business move.

Milwaukee milling output last week contracted 1,000 bbls. of wheat flour as compared with 1,700 the previous week and during the same week of 1924. Receipts of flour at Milwaukee last week were 2,100 bbls. as compared with 3,200 bbls. last year, and shipments were 17,230 bbls. as compared with 13,490 bbls. in the same week of 1924.

Frank Turow, Menomonee Falls, Wis.; John Cronon, Rose Creek, Minn.; A. B. Kehl, Brookfield, Wis.; David Rosenheimer, Kewaskum, Wis.; D. R. Mihls, Fond du Lac, Wis.; W. H. Damm, Collins, Wis.; A. Post, Horicon, Wis.; A. H. Mintzloff, Grafton, Wis.; E. S. Chapman, Chicago; John Swendsen, Green Bay, Wis.; E. F. Havey, Chicago; C. E. Dusenberg, Waterford, Wis.; William Schroeder, Jackson, Wis.;

A. F. Hoffman and W. E. Davies, Madison, Wis.; C. P. Randall, Chicago; A. B. and Arthur Schuler, Brillion (Wis.) Mill & Elevator Co.; George A. Jones, West Chicago, Ill.; G. E. Hellier, manager of the seed department for Pennock & Ford, Cedar Rapids, Ia.; L. M. Weisenel, Sun Prairie, Wis.; and L. H. Meyer, vice-president of the Wisconsin Milling Co., Menomonie, Wis., were among visitors at the Milwaukee Chamber of Commerce last week.

All present incumbents—A. A. Templeton of the Maple-Flakes Mill, president; Hugo Stolley of Henry Rang & Co., first vice-president; W. A. Hottenson of the W. M. Bell Co., second vice-president; and Harry A. Plumb, secretary-treasurer—were endorsed for re-election as officers of the Milwaukee Chamber of Commerce at the annual caucus of the membership which was held on 'change at noon Saturday,

Kafir and Milo—Receipts for the week, 47 cars, against 133 a week ago and 62 a year ago. Temporary weakness was attributed to sympathy with corn, but the market developed independent strength later, due to light offerings and improved buying for storage account. Feed manufacturers were not big takers, but it was assumed that they would have to buy later on the terms of local holders. All of the stocks here are held by two concerns, one being the largest grain firm in the United States. Country advices indicated that not over 15 or 20 per cent of last year's crop in the producing belt remains in farmers' hands. The Pacific coast is drawing much of its supplies from territory that normally should be shipped to Kansas City. The offerings here for some time have shown an especial deficiency of milo. Prices of this cereal scored a net advance of 12¢@15¢ per cwt., while kaffir went up 9¢@11¢. Closing quotations were: No. 2 milo, \$2.08@2.10; No. 3, \$2.05@2.08; No. 4, \$2@2.05; No. 2 white kaffir, \$1.70@1.72; No. 3, \$1.70; No. 4, \$1.67@1.70. Stocks increased 64,000 bus., to 468,000, against 501,000 a year ago.

SIOUX CITY.

No opening date has been set as yet by the Chamber of Commerce officials, but those in charge of the job estimated that the work would be finished about the middle of April.

Practically all of the heavier construction work on the new headquarters of the Chamber of Commerce in the east portion of the fourth floor of the Commerce building has been completed. Workmen now are engaged in finishing work and interior decorating.

The entire east two-thirds of the fourth floor of the building is to be occupied by the new headquarters. Offices now maintained on the west side of the floor are to be given up. The main lobby, offices of the secretary, lounge and billiard rooms will be on the south side, the dining room will remain as previously, and the kitchens are to be completely remodeled.

A decision in the grain rate case, in which the carriers seek cancellation of the through rates to the Southwest on shipments from the Sioux City gateway, is not expected for several months. The arguments are to be submitted to the Interstate Commerce Commission. Grain exchange officials claim the action would halt the movement of northwestern grain through southern terminals.

Sioux City receipts, March 21—

Late sales yesterday: 1 car oats, 2w, 35 lbs., 46c, basis Omaha.

CINCINNATI.

George Mosbacher, Correspondent.

The cash demand for oats, both retail and for shipment, showed considerable improvement and the early losses caused by the slump in futures were fully recovered at the close of the week. Receipts were materially smaller, but mostly of good heavy weight quality.

The abnormally small movement of grain continued a disappointing feature of the market but the demand was only moderately active and arrivals about equalled the immediate needs of the trade. Total receipts for the week were 26 cars of wheat; corn, 57; ear corn, 2, and oats, 31.

Stocks of grain in Cincinnati elevators for the week ending Friday, March 13, and week previous were as follows:

	Mar. 20, 1925	Mar. 13, 1925
Wheat	261,607	273,855
Corn	285,770	277,999
Oats	113,961	119,426
Rye	5,788	5,688

The Wagner Assets Realization Corporation of Chicago filed suit in U. S. District Court recently against Andrew Bender, grain broker, for \$12,706.61, with interest from Dec. 31, 1921. The corporation is receiver of assets of E. W. Wagner & Co., bankrupt brokerage firm of Chicago. It is alleged Bender bought and sold grain on the Chicago Board of Trade through E. W. Wagner & Co. and that he owes the above amount.

The erratic action of the future market for wheat with its wide fluctuations in prices again caused an unsettled cash situation here the past week. Mill buyers hesitated more than usual before making purchases, but there was a little inquiry for small lots for immediate shipment, with few sales, however, as buyers and sellers were too far apart in their views as to prices. At the close of the week No. 2 red was quoted \$1.79@1.80 per bushel.

Weather conditions favored a freer movement of corn, but receipts were disappointingly small and far inadequate to

supply the ordinary requirements of the trade. Prices early broke in sympathy with futures, but advanced on later strength. Higher hogs improved the feeding demand, and buying by industries and millers was better. Light receipts necessitated drawing upon elevator stocks. As compared with last week No. 3 closed 1c and all lower grades 2@5c higher.

Frank L. Watkins, president of the Grain and Hay Exchange, has appointed Harry Niemeyer, chairman; Geo. A. Deterle, Emmert Daniel and Earl Skidmore a committee to make arrangements for the celebration of the seventh anniversary of the withdrawal of the Grain and Hay Exchange from the Chamber of Commerce as an independent business institution. An elaborate and decidedly interesting program has been decided upon by the committee at its initial meeting held Saturday, which will include a complimentary dinner at the Business Men's Club on the evening of April 1 to the members and clerks of the various firms. A business session with interesting reports pertaining to the excellent results attained by the exchange since the severance of relations with the Chamber of Commerce will also be heard and many things of a surprising and pleasing nature will be discussed in addition to the entertainment features. The committee is also planning an outing and social to be held in May, probably at the Maketewah Country Club, to which the ladies will be invited.

WINNIPEG.

Geo. H. Measham, Correspondent.

The week closed with a firm and advancing market. There was considerable nervousness at times and fluctuations were wide but it was noticeable that no large buying orders could be executed without advancing the price.

Students of the market express the opinion that the hectic days that have figured in the last two weeks have passed into history and no fears need be entertained of their recurrence. Liquidation has been thorough and both wheat and the coarse grains are now in strong hands. Statistically wheat is in a very strong position and a tight domestic situation in the United States is already asserting itself.

On the Canadian side export business drags and the cash markets are stagnant. The wild fluctuations in the futures largely account for this condition. Once the market stabilizes, the trade looks for an active export business. There is no question but what every bushel there is to sell will be needed before any new crop of American winters are on the market and it is not improbable but what the Minneapolis mills will be here for wheat in the near future.

The smoke of the desperate battles of the week has hardly yet cleared and argument is hot as to who were responsible for the sensational breaks that carried the May down close to \$1.50. The general belief is that other big holders besides Arthur Cutten liquidated their holdings. The Canadian wheat pool emphatically denies having been in distress and comes back with a "They are trying to wreck the pool." That mysterious person known as "they" on Wall street and on the grain exchanges has much to answer for. The fact remains that holders stampeded themselves on both sides of the Atlantic and are now wondering why they did it.

We are now in for a period of weather markets. In this connection there is no prospect of early spring in western Canada. Snowfall has been very heavy and temperatures low. Even with favorable weather from now on it will be a month before any work could be done on the land on the heavy clays of the Red River valley. On the lighter soils further west work generally starts a week earlier. The snowfall is much heavier as a general rule in the country north of the main line of the C. P. R.

DES MOINES, IA.

J. H. Owens, Correspondent.

R. W. Taylor of Martinsburg, Mo., spent last Tuesday in Des Moines calling on his old friends.

J. F. Manning of Granger and P. J. Guthrie of Elkhart were both very welcome visitors here this week.

Manuel Strom spent the week-end in Des Moines. Mr. Strom was formerly manager of the Des Moines branch of Taylor & Bournique Co. and is now living in Hartley, Ia.

The Des Moines grain dealers all join in welcoming Miss Bertha Van Horn back to Des Moines. Miss Van Horn was with the Clark Brown Grain Co. when they moved their headquarters to Nevada, and has now accepted a position with the Stokely Grain Co.

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Bennet Wire Reaches Fort Worth.

T. E. Ferguson, manager, Moore-Seaver Grain Co.'s Fort Worth office, has this week achieved a long expected dream when on Thursday his office connected up with Jas. E. Bennet & Co.'s private wire to Chicago. This wire gives Fort Worth a new duplicate service with Chicago grain pit and is just another recognition of this market's capacity and importance. Moore-Seaver have always been active in Texas, maintaining for the past several years an office here to handle the large amount of business they do in Texas, and with this wire service they will be in still better position to serve their customers. Gladney-Muchmore Grain Co. Dissolves.
Announcement was made this week of the dissolution of the partnership composed of S. W. Gladney and C. E. Muchmore, who for the past two years have engaged in the grain business here as Gladney-Muchmore Grain Co. Mr. Gladney retires from the concern and Mr. Muchmore assumes all liabilities and assets of the concern. Mr. Gladney hasn't announced any definite plans for the future but will probably engage in the cash grain business here.

Drought Continues Over Texas.

We regret very much to inform our friends that the weather in Texas continues very dry with no moisture of consequence falling in the state, and this winter has proven to be the driest in the history of the state as less rain has fallen during the winter than in the records of the weather bureau.

This drought seems to cover the entire state except in the southeastern part and along the coast line and has already proved disastrous to wheat and oats, and unless rain comes soon will also hurt corn and cotton, of which there promises to be a large acreage this year. Wheat in all sections excepting northern panhandle has been damaged from 25 to 75 per cent and this damage will be increased with each day that the drought continues. In this section of north Texas some fields are holding up fairly well and will, with rain, soon make some wheat but lots of fields have been plowed up and planted to other crops. In west Texas there are some better prospects where showers have fallen, and fields are in better condition, as some reports from that section indicate close to normal prospects.

Conservative estimates of the state production of wheat this year would be around 8 to 10 million bushels, which may be increased 25 per cent with favorable conditions prevailing from now on, or may be decreased 50 per cent if drought continues unbroken much longer.

Oats are in bad shape and it is expected that the state outside of the panhandle section will not produce enough oats to replace those used in seeding this crop.

FEED MATERIALS

Elevator By-Products

WARREN F. STARKEY

Board of Trade Duluth, Minn.

The panhandle section may make a fair crop but it is too early now to make any forecasts as to what that section will do.

Wheat.

Receipts are very light and country shipments slow but demand is rather quiet and premiums today are not as high as they were last week as exporters have raised their basis while mills do not seem inclined to follow. Elevator stocks have been sharply reduced this month and one concern announce they have sold out entirely all their storage wheat. There remains, however, in store here quite a lot of mixed wheat, 75 per cent or more soft, and some dark hard of high protein, while stocks of ordinary hard are very low and it is expected that higher premiums will prevail on this character of wheat in the next two months. Country wheat is moving slowly and arrivals here are very light and it would appear that very little wheat is left in the country to move out.

Today (March 21) values here are as follows, basis delivered Texas common or Texas group three points: Soft red wheat, No. 1, \$1.90; mixed, 80 per cent soft red, No. 1, \$1.85; dark hard wheat, No. 1, \$1.83; hard wheat, No. 1, \$1.81; export wheat, Galveston export basis, No. 1 hard or mixed, \$1.77½; durum or 75 per cent durum wheat, basis 1, \$1.77, group 3.

Corn.

Corn has been extremely slow and the anticipated demand has failed to show up and sales are made with difficulty although there is some better tone to white corn for which there will doubtless be a better demand soon. Receipts of corn have been normal but consumption has been slow and stocks are still heavy of mixed and yellow. White corn stocks, however, are rather light and with better demand a sharp increase of the premiums for No. 2 white corn is expected.

March 21 values of corn delivered group 1: No. 2 white corn, \$1.20; No. 2 yellow corn, \$1.19; No. 2 mixed corn, \$1.16@1.17.

Oats.

Oats have been in good demand with a very heavy volume of trading on the recent break and premiums are sharply higher with demand steady and light receipts. Red oats are moving very slowly as the country has stopped selling since the drought and premiums are sharply higher. No. 2 red oats are now selling at

the past week, which appears to be the most attractive market for low grade oats.

Very light receipts of hogs at local yards Saturday caused little trading. There were no carloads hogs arrived. Truck hogs sold 15 to 25 cents lower than Friday's best time with a top of \$13.90 for choice weights. The decline was evident in all grades with no representative sales available to give an exact level of the market. Total receipts were less than 500 head.

Grain receipts and shipments at Peoria for week ending Saturday, March 21st, as compared with same week last year, as reported by secretary of Peoria Board of Trade:

	1925.	1924.
Receipts—		
Wheat	7,200	8,400
Corn	342,000	188,300
Oats	318,600	176,800
Rye	1,200	1,200

George C. Bryant of Indianapolis has been selected as crop expert for the Jackson Bros. Co. of Chicago.

F. S. Osgood and J. G. Linthicum of this city were recent visitors on the floor of the Baltimore Chamber of Commerce.

M. N. Mennel of the Mennel Milling Co., Toledo, was a recent visitor in the city, having been called here for a meeting of the executive committee of the Millers' National Federation.

P. A. Crane, one of the prominent young members of the Chicago Board of Trade, was married on March 18 to Miss Helen L. Johnstone and the happy couple left for a honeymoon trip to sunny Italy. Congratulations.

James F. Fones, secretary of the Board of Trade, reports the new building fund at this time to amount to \$153,598.61, made up as follows: U. S. Government Third Liberty bonds, \$90,755.64; Board of Trade 4 per cent bonds, \$55,328, and cash, \$7,514.97.

The following is a list of transfers, admissions to membership, etc., since Feb. 18, 1925: Transferred—Martin Lindsay, Est. Geo. Brenner, Jr., Chas. E. Gifford, Albert L. Wayne, Willard B. Cook, John C. Huston, Nathan J. Miller, Arthur Meeker, Est.

TRADE OPINION.

July wheat was relatively firm on unfavorable crop reports coming from the dry sections of the Southwest. Congestion in the May future was evident at times but we would exercise extreme caution in purchasing wheat, as we believe the reaction from the extreme low prices has been too rapid and has placed our market in an unnatural position. Outside interest in the corn market at the moment is small and with the weak cash situation, holders become easily discouraged.—J. J. Badenoeh Co.

The news simply confirms the approaching acute congestion in our domestic wheat situation. Cash was scarce and milling demand continued in all distributing centers. There were increasing complaints of crop deterioration in the Southwest, with one message reporting the situation as a disaster and present indications of wheat production 80,000,000 less than a year ago. The growing acuteness of the cash situation will no doubt be a prominent market factor and should drought continue over the Southwest, this condition will force itself to the trade's attention. Primary run on corn was again small and there is little likelihood of receipts increasing for the next few weeks.—Bartlett, Frazier Co.

The action of the market during the past few weeks has been described as a battle of the giants. The usual data of marketing and cash situation has had practically no influence on the movement of futures. The amount of wheat on ocean passage has reached record proportions of 91,000,000 bu. and is now expected to decrease rapidly as the big early movement from the Southern hemisphere is falling off. From a statistical point of view, the oats market is in stronger position than it has been this season. The period of heavy accumulation

BRENNAN

Means Real **GRAIN and SEED**
Commission Merchants

CHICAGO

is over. Receipts are materially smaller than a year ago, and the visible, which reached record proportions several weeks ago, is decreasing rapidly.—Clement, Curtis & Co.

Official reports and private advices confirm the lack of moisture in the Southwest. Texas is very dry. Oklahoma needs rain badly. This situation is becoming more important as a market factor in wheat. In our judgment all sharp advances in wheat are now entitled to most respectful consideration, even though this idea is contradicted by emphatic assertions of local bulls. In the meantime light receipts of corn are stimulating better cash prices, but the negligible interest in eastern distributing centers is not at all helpful to the market for cash or future delivery. Oats stocks are apt to show a fall, reduction this week, the abundance of supplies in the terminal markets and the farms checks investment and speculative support and current prices do not invite bearish tactics.—Pope & Eckhardt Co.

Violent and nerve wrecking changes in wheat prices have been seen during the week, not only in the Chicago market but in the principal markets of the world, namely, Winnipeg, Liverpool and Buenos Aires. It is difficult to fix upon a definite reason for this, except that it is due to world-wide over-anxiety over the possible exhaustion of all supplies of old wheat before availability of the next crop. However, it can be safely stated that the matter of balance between world's supplies and requirements has undergone no change and is still problematic. The enormous accumulation in elevators at terminal points, of corn and oats, have finally had their proper influence on prices. The extreme decline brought some improvement in the distributing inquiry for oats, but the quantity now in sight is so large that it will take a heavy and steady distributing demand to do anything more than steady values.—Thomson & McKinnon.

COUNTRY GRAIN NEWS.

[Concluded from page 23]

date additional storage of 500,000 bu. of wheat giving them a capacity of over a million bushels. Work commenced March 1, and will be completed June 20th.

Claude, Tex.—The Claude Mill & Elevator Co. will rebuild their elevator which burned. It will have a warehouse and mill room and a capacity of 15,000. Construction began March 15. Considerable new machinery will be installed including feed grinders, feeders, mixers, automatic trucks, scales, dumps, elevators and conveyors.

Burkburnett, Tex.—The Star Engineering Co., of Wichita, Kans., are starting a 10,000 bushel elevator for the Wichita Mill & Elevator Co., of Wichita Falls, Tex. The elevator is to be equipped with truck dump, automatic scale, 10 ton wagon scale, and have motor power. It will be completely iron clad and have a 60' warehouse.

Plainview, Tex.—The Star Engineering Co. of Wichita, Kans., has a contract to build a 30,000 bushel elevator to replace the fire loss for the Farmers Elevator Co. This modern house has 15 bins, is 42' to the square and will have engine power, 10 bushel automatic scales, large capacity elevator leg, 1,000 bu. cleaner, feed mill, chop leg, etc.

VIRGINIA.

Suffolk, Va.—The Suffolk Milling Co. has been incorporated with a capital of \$5,000 to \$50,000 by A. B. Burden, pres., Aulander, N. C.; J. W. Simmons, Jr., secretary, and F. E. Simmons, both of Suffolk, to engage in the milling and feed business.

WASHINGTON.

Seattle, Wash.—The Mikkelsen Flour Corp. has been incorporated for \$25,000 by John Mikkelsen, V. R. Asbury and L. E. Ensing.

Rosalia, Wash.—It is reported that virtually all winter wheat in this district and south was destroyed by the cold December weather.

Tacoma, Wash.—Fire damaged the John B. Stevens & Co. hay and grain

warehouse to the extent of \$35,000 recently, the loss fully covered by insurance. About \$10,000 worth of hay was burned. A little later, a second fire broke out in the warehouse causing a loss of \$1,000. A man was seen running from the building a few moments before the second fire, and officers are working under the theory that the first fire was also set.

WISCONSIN.

Union Center, Wis.—Fire destroyed the flour and feed warehouse of the Vernon County Milling Co.

WYOMING.

Lusk, Wyo.—A. T. Howard is planning the establishment of a grain and produce business.

Gibson, Wyo.—The plant and stocks of the Western Alfalfa Mfg. Co. were completely destroyed by fire, causing a loss of \$77,000.

Glendo, Wyo.—The Glendo Grain & Prod. Co. is being operated by E. A. and R. E. McClure, operating as McClure Bros., they having purchased same from A. T. Howard, Lusk, Wyo.

RESULT OF WORLD CONDITIONS.

Fred S. Lewis, acting president of the Chicago Board of Trade, tonight issued a statement in connection with a request from the Grain Futures Administration for evidence of possible attempts at price manipulation.

"Dr. J. W. T. Duvel, grain exchange supervisor, has requested the officers of the exchange to call to the attention of members regulation 7 of the rules and regulations for the administration of the Grain Futures Act. This requires members to report to the board of directors and to the grain exchange supervisor all information in possession of members of any attempted price manipulation.

"The board of directors," Mr. Lewis continued, "is therefore complying with the regulation by requesting that any member of the association having evidence of such a condition submit same to the directors as well as to the grain futures administration, but not to confuse ordinary business transactions with efforts to manipulate prices."

Mr. Lewis added that while market fluctuations have been rapid, in his opinion there has been nothing to indicate undue efforts to influence prices, but that price swings were a result of unprecedented world conditions.

"As in the past, however," Mr. Lewis continued, "the officers of the exchange will assist the government in every way possible to bring to light any violation of the law under which the government maintains direct supervision of the exchange."

Financing farmers, as distinguished from capitalizing them, was emphasized in a recent address before the Washington State Seed Association, by Ward M. Buckles, manager of the Spokane Intermediate Credit Bank.

ECONOMICAL SPEED REDUCTION FOR THE GRAIN TRADE.

Economy has long been known as the watchword of the grain trade, and elevator and mill operators are always keen to learn of devices which may save money, speed up operation and eliminate risk. As the electric motor for individual drive has come into general usage many methods of speed reduction have naturally been tried. Primarily, of course, the mill and elevator was always a place in which to find belting in large quantities, for it was by this medium that power was transmitted and speed reduced. Even with this method of speed reduction it was necessary to use the slower speed, more expensive electric motors, in order to utilize them even through a high speed reduction on some of the slower moving elevator units.

Elevator head pulleys in particular,

of the Cleveland Worm Gear Reduction Unit means even greater space economy, as illustrated in the photograph reproduced herewith.

The Cleveland Unit is completely self-contained, the gears operating in a bath of oil, are practically noiseless and maintain a high efficiency. There are no stretching, flying belts, no noisy, clanking chains and no nest of multiple gears where a Cleveland unit is used. There is just a simple, efficient unit with the motor coupled to the worm shaft, the elevator or other machine to be driven, coupled to the gear shaft, doing the job in an efficient, thorough and durable manner.

In all Cleveland units the worms are mounted on ball bearings and up to a certain size the gears are mounted on ball and roller bearings, the larger units, however, having the gear shafts mounted on journal bearings. The worm is cut from a solid forging of special low carbon metal steel, carbonized, heat

treating and gears for use in the automotive industry and today these units can be found in some of the foremost motor trucks and tractors in the United States. In addition to this it has sold within the last five years additional thousands of complete worm gear speed reduction

units in the country where Cleveland worm gear reduction units are driving elevators, feeders, conveyors, reels, fans, dryers, mixers, hoists, etc. All of this experience is available through a thoroughly trained engineering organization, the services of which are offered to the

This illustration from actual photographs of units side by side, indicates the wide range of sizes available.

running at from 55 to 65 r.p.m., are but one of the ideal applications for a speed reduction unit which will enable the use of the more economical higher speed motor. To meet this requirement the Cleveland Worm & Gear Co., Cleveland, Ohio, a number of years ago drew on their past experience and devised a speed reduction unit particularly ap-

plicable to elevator head drives. The first requirement of simplicity, which was an outstanding feature of the Cleveland Worm Gear Reduction Unit was the first qualification. The Cleveland unit consists of only two major moving parts, the worm and the gear. A single unit will allow of reductions of up to 100 to 1, while a double unit will take care of reduction as high as 3,600 to 1.

Cleveland Worm Gear Reduction Unit driving Elevator. Motor 75 H.P., 480 R.P.M., speed reduction 16 to 1.

heavy flange and wall section equipped with pet cocks for determining oil level, lifting rings, etc. Exceptional accuracy is the constant watchword in Cleveland construction, not only in the manufacture of the component parts, but also in their assembly. It is this accuracy which insures the high efficiency and durability of Cleveland units.

The Cleveland Worm & Gear Co. has been in business since 1912, being the first manufacturer of worm gearing on a commercial basis in this country. Today it is the only concern in the world which manufactures worm and gear units exclusively. In its earlier experience it supplied countless thousands of

units to practically every basic industry in the country. The tangible result of this experience is such that the company can make a specific recommendation based on actual facts obtained from installations in the specific industry.

In the elevator and grain trade it can point to installations in some of the largest elevators and cereal plants in

trade for consultation purposes without any obligation.

The Department of Commerce has warned American insurance policy holders of the risk they run in placing insurance with foreign companies not admitted to sell insurance under the laws of the U. S.

Cleveland Worm Gear Reduction Unit applied to Screw Feed Conveyor. Motor 10 H.P. at 720 R.P.M. Speed reduction 9 1/2 to 1.

The battle of speculative giants

in wheat, oats, and rye is apparently concluded, and we anticipate a more normal market. Our records show that after predicting the exact tops for all futures in all grains in our letter of March 2d, we continued the good work by accurately naming every retreat and advance until the war was ended.

"A friend in need is a friend indeed"

The service which protects one from serious losses in critical periods and at the same time places him in position to secure large profits is the one worth having at all times. Market Chart furnishes just such service.

Make Big Money with this Grain Loader

The Boss Air Blast (Fordson Type) Portable Car Loader loads cars without scooping in a dirty, dusty car. Improves grades. Moves about under its own power. You can load grain on the other R. R. if you cannot get cars on your own line.

SOON PAYS FOR ITSELF

Send for blue print No. 12. It shows low cost plans for receiving, storing and shipping grain.

If your present elevator is not large enough this plan will solve your problem at low cost, and give you additional storage and shipping facilities.

WHEN ELEVATOR BURNS this plan gives low cost means of receiving and shipping grain until you rebuild. A money-maker for small stations with no fire risk. Handles loose grain, ear corn, pop corn, maize, kafir corn, cotton seed, etc.

TIME PAYMENTS. Sold on time payments if desired. Soon pays for itself. We also make stationary outfits for installation in country elevators to save scooping grain. Combination cleaners and car loaders. Write today for complete information. It will pay you. Hundreds in use.

Maroa Manufacturing Co., Dept. PC, Maroa, Ill.

Barley

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
March 16.....	76	9	9	25	18
March 17.....	16	4	11	72	29
March 18.....	33	4	8	37	8
March 19.....	25	2	4	33	15
March 20.....	23	7	10	42	20
March 21.....	23	8	13	35	17
Total	196	34	55	244	107

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Mar. 16....\$0.90@0.95	Mar. 19....\$0.83@0.96
Mar. 17....\$.80@.95	Mar. 20....\$.83@.96
Mar. 18....\$.85@.95	Mar. 21....\$.85@.96

Receipts of barley at Chicago for week ending Mar. 21, 1925, were 93,000 bus., compared with 165,000 bus. same week 1924; shipments, respectively, 42,000 bus. and 104,000 bus.

BARLEY MARKETS.

CHICAGO—Demand somewhat better. Offerings ample, but not large, and prices compared with the sales of yesterday unchanged and about steady. Exports, 40,000 bu.; withdrawals for shipment, 1 car. Local receipts for week, 93,000 bu.; last year, 165,000 bu.; shipments, 42,000 bu.; last year, 104,000 bu. Malting, 85@96c, with fancy higher; feeding and mixing, 76@90c; screenings, 40@66c. Local inspection, 17 cars.

MILWAUKEE—After a weak start in which prices dropped as buyers held off maltsters and shippers became interested and offerings at the lower prices were readily taken with occasional sales above list. Choice and dry continued scarce and in demand throughout the week. Prices closed 2@3c lower for the period while receipts were 98 cars last week as compared with 156 the previous week and 69 in the same week of 1924. Choice to fancy, 48 to 50 lb. test, quotable at 94@96c; fair to good, 44 to 47 lb. test, 85@93c; light weight, 40 to 43 lb. test, 80@91c; feed, 65@83c.

Iowa quoted 80@95c, as to quality; Wisconsin, 80@96c; Minnesota, 80@95c; Dakota, 80@93c; feed and rejected, 65@82c.

DULUTH.—Business in barley was in better volume on this market during the last week. Demand from consumers was light, however, and the lower grades suffered a decline of 11c, but the best quality held fairly steady, receding just 2c. Closing spot prices ranged from 67c to 88c.

KANSAS CITY.—The 3 cars of barley that arrived this week were readily taken for feed manufacturing account, either locally or southeastward. There was an advance of 2@4c in prices, No. 3 closing at 90@93c and No. 4 at 88@90c a bushel. Stocks in the elevators were unchanged, at 10,000 bushels.

MINNEAPOLIS.—The weakness in other grades had the local cash barley market very badly demoralized part of the past week and in consequence, some rather wide ranges were quoted. One day the receipts would be in active request and the next, the demand would be equally dull. Fancy quality was in fair demand at the close of the week with oaty stuff very slow. Today's range of sales shows 70@86c. Stocks total 2,149,846 this week vs. 2,120,269 a week ago and 559,433 a year ago.

NO LIMIT TO GRAIN TRADING.

The government official in charge of the Grain Futures Administration expressed the desire to impress upon the grain trade over the country that the Grain Futures Act places no limit on the amount of wheat or other grains that an individual operator can buy or sell. This notice to the trade is due to recent inquiries asking whether it was a violation of the law to trade in more

than 200,000 bu. There has never been any restriction placed upon trading since the Grain Futures Act became operative, but at the time of its passage an erroneous report was circulated in the trade that such a limit was to be placed.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending March 21:

	Mpls.	Dul.	Chi.	Win.	Mil.
March 16.....	21	10	3	6	3
March 17.....	7	1	2	11	1
March 18.....	5	8	6	3	1
March 19.....	7	3	5	11	..
March 20.....	7	7	5	4	1
March 21.....	5	10	..	6	2
Total	52	39	21	41	8

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Mar. 21:

	Mar.	May.	July.	Sept.
16	1.24	@1.31½	1.14½@1.23½	1.05½@1.12½
17	1.10½	@1.18½	1.02 @1.10½	.97 @1.02
18	1.18½	@1.23½	1.10½@1.13½	1.04 @1.07
19	1.19½	@1.23½	1.10½@1.13	1.04½@1.07½
20	1.13	@1.21	1.06 @1.12½	1.01 @1.05
21	1.18	@1.22½	1.10½@1.13½	1.02 @1.07

Receipts of rye at Chicago for the week of Mar. 21, 1925, were 30,000 bus. vs. 80,000 bus. same week of 1924; shipments were 1,600 bus. vs. 4,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Mar. 21, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Mar. 16	1.15½	\$1.17½	\$1.25½	\$1.21½	\$1.26
Mar. 17	1.05	1.07½	1.10½	1.12½	1.10
Mar. 18	1.13	1.14½	1.16	1.20½	1.16
Mar. 19	1.13½	1.13½	1.19	1.19½	1.19
Mar. 20	1.14½	1.14½	1.17½	1.20	1.14
Mar. 21	1.13	1.13½	1.16	1.20½	1.18

RYE MARKETS.

CHICAGO—Closed ½@2c lower for futures and steady for car lots. Trade was of moderate volume and the market not as active as during the past few days. There was a fairly good class of buying early that indicated export business. Considerable pressure developed later on the advance and prices weakened. Seaboard reported a better export demand and 250,000 bu. sold. Carlots were in good demand at 3c under May for No. 2. Offerings light. Local inspection, 3 cars. Seaboard clearances none. No. 3 sold at \$1.14½@1.16.

MILWAUKEE.—Rye quotations improved steadily on Monday and throughout the week except on Tuesday when the market was demoralized and prices dropped 15@20c. Receipts were light and shipping demand was fair. Considerable Wisconsin sold on a forward shipping basis, but on arrival grades were slower. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Dry was scarce and wanted. For the week prices closed 3@4c lower and receipts were eight cars as compared with 18 the previous week and 15 in the same week of 1924. Market closed at \$1.14½@1.15½ for No. 2, inside for Wisconsin, ranging at 4@5c under May price.

NEW YORK.—The export demand for rye was somewhat disappointing and business for the week did not exceed one million bushels, according to reports available. Cash rye premiums, however, remained steady to firm.

MINNEAPOLIS.—Good quality rye, whether road offerings or elevator stocks, was in good demand from milling and shipping interests during the week closing today, but on the other hand, the poor and medium quality stuff was in rather poor request. The rapid fluctuation in the futures was rather discouraging to holders and as far as can be learned, there was nothing worked for export out of this market during the week. There was a slow but steady betterment in the premiums, starting out Monday at May price at 2c over for No. 1 and going up to ½@3c over, today. Elevator stocks total: this

week, 1,112,490 bu. vs. 1,161,787 last week and 7,971,892 a year ago.

DULUTH.—Sharp declines were set in the rye market during the last week under the influence of the erratic course of wheat. Export demand was slow and it was met from stocks held either afloat or in elevators in the East. The public was claimed to be now practically out of speculative trades in the rye market as a result of its recent severe declines. Split No. 1 rye closed 16½c off at \$1.13½.

Beans and Potatoes

BEAN MARKET LOWER.

LEROY, N. Y.—The pea bean market is lower at present than it has been in some time and as the stocks are not more than sufficient to take care of requirements for this season, we believe it would be a good policy on the part of the trade to buy on this decline. Red kidney beans are very closely picked up and market on this variety is very firm with prospects of further advance.

—O. C. Curtis Fruit & Produce Corp.

BEANS QUIET.

DENVER, COLO.—The Pinto and Great Northern bean markets have been a little quiet here, and supplies are getting low.

Apparently there are about 300 to 350 cars of Pintos unsold, and about half of what we had last year. While the Great Northern crop was larger than ever before there is apparently now about 17 per cent of the supplies, or around 150 cars at the outside available in dealers' and growers' hands.

Nearly all the beans held by growers now are in large lots, and cannot be moved at present prices. At the rate beans are moving at this time, the supplies of both these varieties will be exhausted long before any of the new beans commence to move.

The same can be said also of Pintos. The Great Northerns are almost entirely raised by irrigation, and their supply of water seems reasonably sure the coming season.

Pintos are largely raised on dry land, and the crop that will be raised of these depends entirely on rains.—Ady & Crowe Mercantile Company.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of March 21:

Beans—

Chicago—In light supply and good demand at steady prices. Per 100 lbs.—Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.

Boston—Car lots, per 100 lbs., N. Y. and Mich.—Choice hand picked pea beans, \$6.85@7; fair to good, \$6.50@6.60; California small white, \$8.30@8.50; yellow eye, extras, \$6.90@7.10; red kidneys, choice, \$10.50@10.75; fair to good, \$9@9.50; California limas, \$14.50@15; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75. Jobbing prices 25 to 50 cents above car lots.

Portland, Ore.—Small white, 8@9¼c; pink, 8¼@9¼c; bayo, 8¼c; lima, 14½c; red, 9¼c.

San Francisco—Whites, small, 8¼c; do, large, 7¼c; pinks, 8½c; limas, 15c; cranberry, 8½c; kidney, 12½c; Mexican garvanzas, 12c; lentils, large, 9c; do, small, 8c; black eye, 10¼c; Mexican reds, 8¼c; speckled bayos, 9c; bayos, 8¼c. Peas (per lb.)—Split peas, yellow, 8c; green peas, 6½c.

New York—Trade almost at a standstill and market without any apparent life with feeling generally easy and prices unchanged. Domestic, 100 lbs.—Marrow, \$9.75@10.25; pea, choice, hand picked, \$6.90@7; pea, screened and prime, \$6.50@6.75; red kidney, \$10.50; white kidney, \$9; lima, Cal., \$14.75. Imported, 100 lbs.—Marrow, \$9.25@9.50; white kidney, \$8.25@8.50. Lima, Mad.—1924-25, \$12.75; 1923-24, \$12.25@12.50; 1922-23, \$9.50. Lima, Europe—Large, \$11.75; medium, \$11.25; small, \$10.50. Green—Japan, \$6.50@6.75; Holland, \$5.75@6; yellow split, \$5.50@6; green split, \$8@8.25. Chick. Mex.—Im-

perial, \$12@12.50; monster, \$11@11.50; large, \$9.50@10; small, \$7.50. Chick., Alg.—Large, \$7.50@8.

Potatoes—

Chicago—Market quiet and steady. The trade was slow and light, even for a week-end, and very little interest was shown in the market by buyers. Most of the regular buyers were holding off and the demand was restricted to filling some urgent orders. Shippers and outside interests were the best supporters and the bulk of sales were made at \$1@1.05 and an occasional car higher. Idaho sold at \$2.30@2.50. Red Rivers sold at \$1.25@1.30. Receipts were 75 cars and cars on track 221. Sales reported today were: Per 100 lbs.—Round white, Wisconsin, sacks, 6 cars at \$1.2 cars at \$1.05, 1 car at \$1.10, 1 car at \$1.15; Michigan, bulk, 1 car at \$1.20; Idaho russets, 1 car at \$2.30, 1 car at \$2.35, 1 car at \$2.40, 2 cars at \$2.50; Red Rivers, 1 car at \$1.25, 3 cars at \$1.30. Bulk, per 100 lbs., Wisconsin, \$1.20@1.25; ordinary and poor, \$1.10@1.15; round white, sacks, Wisconsin, \$1.10@1.15; ordinary and poor, \$1@1.05; do, Minnesota, 95c@1; Idaho russets, \$2.30@2.50; Ohio, Red Rivers, \$1.25@1.30; do, cobbles, \$1.10.

New York—Receipts yesterday included at Pennsylvania R. R. pier 29, 2 cars Florida barrels and 1 car Virginia second crop barrel potatoes. New Potatoes: Fla., bbl.—No. 1, \$9@13; No. 2, \$7@8; No. 3, \$2.50@4. Crate—No. 1, \$3; No. 2, \$2; No. 3, \$1.50. Old Potatoes: Me., bulk—180 lbs., \$2@2.50; 165 lbs., \$2.10@2.35; carlots, cwt., \$1@1.15; 150-lb. sk., \$1.75@2.15. State, bulk—180-lb. sk., \$1.90@2.15; 165-lb. sk., \$1.75@1.90; 150-lb. sk., \$1.50@1.75. L. I., bulk—180 lbs., \$3@3.40; 165 lbs., \$3.10@3.25; 150-lb. sk., \$2@3.15; 3 bu. sacks, \$2.50@2.75; Jy., bsk., \$1@1.50. Bermuda, bbl.—No. 1, \$15@15.50; No. 2, \$12.50@13.50; No. 3, \$7@8.50; Cuba, crt., \$3.50@4. Sweet Potatoes—Jy., bsk., 75c@3.25; Del. and Md. bskt., 75c@2.50. Yams—S. C., bsk., \$1.75@2.

MORE RUSSIAN ORDERS.

A Moscow dispatch says: "To meet the shortage of grain, which continues to give the authorities considerable anxiety, the Soviet government has ordered from abroad 370,000 tons of grain and 242,000 tons of flour. Acute shortages of bread have already occurred in some provinces and the peasants are mixing Indian corn with their white flour. In Moscow the shortage of flour is evidenced by the long lines of people waiting outside the state and coöperative bakeries to buy bread."

TEXAS CROP CONDITIONS.

Have talked to a number of people interested in the grain business recently from both Panhandle and Central Southern sections of the state. All report extremely dry weather and pessimistic as to new crop prospects. Panhandle dealers state early sown grains have a fair chance, if rain comes but can't go much longer. Central and south Texas extremely dry, with no vegetation and too dry to risk seeding. Business fairly good.—Federal Commission Company, Ft. Worth, Tex.

BUCKWHEAT MARKETS.

MILWAUKEE.—Current buckwheat quotations in the Milwaukee market at the close on Saturday, March 21, were: Silver hull, \$2.10@2.15; Japanese, \$2.20@2.25.

MINNEAPOLIS.—Japanese, spot, \$2.10; silver hull, spot, \$2.05; mixed, spot, \$2.05.

BUFFALO—Per 100, \$2.30.

ST. LOUIS—Quoted nominal at \$2.30 to \$2.40 per 100 lbs.

CHICAGO—Fancy Jap, \$2.35@2.45, and fancy silver hull, \$2.25@2.35, with dirty seed less.

News of the Country Grain Trade

ARKANSAS.

Mt. Holly, Ark.—The Mt. Holly Lumber Co. is building a wholesale feed house.

Van Buren, Ark.—A large grist mill has been opened at Figure Four by H. B. Shelly.

Lonoke, Ark.—The Lonoke Grain Co. has bought the building formerly occupied by Bell & Hanston and have opened for business.

Little Rock, Ark.—H. M. Snare of Amarillo, Tex., will succeed E. M. Jones as manager for the Red Star Milling Co. Mr. Jones has been appointed assistant manager of branch plants for the company with headquarters at Wichita, Kans.

CALIFORNIA.

Corcoran, Cal.—Cutler Bros. are building a new warehouse and plant, installing grinding machinery. The work is being done by John R. Gray, Inc. of San Francisco.

CANADA.

Ft. William, Pt. Arthur, Ont.—The terminal elevators are overhauling their plants before navigation opens once again.

Vancouver, B. C.—4,200,000 bushels of wheat are reported in the elevators, available for purchase. Vancouver has shipped 17,241,507 bushels of grain this year.

West Minster, B. C.—The Golden West Milling & Elevator Co. recently organized with \$100,000 capital, are contemplating the erection of a \$50,000 flour mill, providing a lease can be obtained on lot 90 on the waterfront.

COLORADO.

Holly, Colo.—The Holly alfalfa mill has closed and will remain so until the new crop of hay comes in next June. It is estimated they handled 6,800 tons of hay this season.

FLORIDA.

Jacksonville, Fla.—The Edwards Feed Co. has been incorporated with a capital of \$10,000. J. L. Edwards is president and M. H. Jackson, secretary.

GEORGIA.

Waynesboro, Ga.—The elevator is doubling the capacity of its meal making plant.

Augusta, Ga.—The Atlantic Milling Co. at Turpin Hill has let contract for the erection of a \$25,000 poultry mash mill and warehouse with a daily output of 100 tons.

IDAHO.

Bonnors Ferry, Ida.—The Bonnors Ferry Grain & Milling Co., owned by Ralph E. Clapp, contemplates the erection of a 25,000 bushel elevator.

ILLINOIS.

Harpster Station, Ill.—George C. Tjardes of Emington purchased an elevator here.

Nekoma, Ill.—George Ward, manager of the Farmers Elevator committed suicide, while temporarily insane.

Triumph, Ill.—George Spainhauer is succeeded as manager of the Triumph Coöp. Supply Co. by Archibald Diesholder of Oswego. Ira Geft is the new assistant manager.

Galva, Ill.—The Galva Coöp. Farmers Elevator Co. elected officers as fol-

lows: President, J. S. Collinson, Vice President, Alf Bolling, Secretary, Charles Stoneberg, Treasurer, Grant Litton.

Ridgefarm, Ill.—The following directors were elected at a meeting of the Ridgefarm Coöp. Grain Co.: Frank Busby, Robert Fletcher, M. L. Lawrence, George Castle, John Chamberlain and Frank Baird.

Arenzville, Ill.—At the annual stockholders meeting of the Arenzville Hagener Farmers Grain Co., W. H. Witt Sr. and Albert Lovekamp were re-elected as directors with the former as president of the association.

Plainfield, Ill.—George Boardman, John Wheeler, Lewis Meyer and Bert McCauley were re-elected directors of the Plainfield Grain Co. Other members are: John Book, Fred Fiddymont, George Spangler and William Webb. A 10 per cent dividend was declared.

INDIANA.

Lawrenceburg, Ind.—The Lawrenceburg Roller Mills Co. has added 65,000 bushels storage capacity.

West Union, Ind.—Fire of unknown cause severely damaged the elevator of the Linebarger Elevator Co.

Oakley, Ind.—Whiteman Bros. & Co. has purchased the interest of Haslet Bros. in the Oakley elevator. Lote Haslet will be manager.

Summitville, Ind.—The Gordon Grain Co. has changed its name to the Hinshaw Grain Co. and increased its capital stock from \$15,000 to \$30,000.

IOWA.

Levy, Ia.—The Levy Grain Co. succeeded Taylor & Patton Co.

Malcom, Ia.—The Farmers Elevator Co. installed a \$7,000 grinder late last year.

Lewis, Ia.—Jacob Stevens, age 78, retired mill owner dropped dead at his home.

Jamaica, Ia.—Garland & Clark is the new name for the former firm, Garland & Towne.

Rock Valley, Ia.—The Farmers Elevator Co. is now managed by John Roetman of Lake Park.

Nora Springs, Ia.—The Nora Springs Farmers Elevator Co. report for 1924 shows a net gain of \$3,702.71.

Albion, Ia.—A meeting will be held soon to decide whether or not the Farmers Elevator will be continued.

Cedar Rapids, Ia.—Local news papers recently featured the Quaker Oats plant here as the world's largest cereal mills.

Fontanelle, Ia.—C. H. McDermott, who resigned as manager of the Farmers Coöp. Co. will be succeeded by Ed. Snethan of Brooks.

Marion, Ia.—The late E. W. Fernow, who died late last month, is succeeded by W. A. Brunemeier as manager of the Farmers Exchange.

Blanchard, Ia.—Fire of unknown origin, destroyed the D. G. Danner mill with a loss estimated around \$10,000, partially covered by insurance.

Belmond, Ia.—J. W. Hayes of Omaha has purchased the elevator holdings of the Moore Grain Co. at Belmond, Mersevey, Thornton and Wightman.

Swea City, Ia.—The Younglove Construction Co. will repair and remodel the elevator of the Farmers Coöp. Ele-

vator Co. A Link Belt Distributor with new boot and rope transmission and a Link Belt manlift will be installed.

Laurel, Ia.—The following officers were elected at the annual meeting of the Farmers Elevator Co.: Henry Cavell, president; D. H. Paul, vice-president; W. S. Murdock, secretary; Fred A. West, treasurer; et al.

Tama, Ia.—A receiver has been appointed for the Farmers Coöp. Co., the receivership being a friendly one, with the creditors amply secured and Mr. Herrig remaining as manager. Their assets have been filed at \$22,596.22 and liabilities \$17,700 plus capital stock of \$10,000.

Lake View, Ia.—Sealed bids for the Farmers Union Grain Co., of which O. M. Steward is secretary-treasurer, will be received until March 28. All bids must be accompanied by certified check or other evidence of good faith for 10 per cent of the bid, and are subject to rejection.

Clutier, Ia.—At a meeting of the Farmers Elevator Co., Will Jones was re-elected president; M. A. Caslaska, secretary and treasurer. Albert Kosnar and Louis Peters succeed Dan Kearney and P. J. Foley who resigned as directors. Ed. Hadacek was retained as manager.

Fairfax, Ia.—The Farmers Grain Co. was sold to W. J. Behle, mgr. for \$7,500. This amount and the accounts receivable and other property held by the company will about meet the company's debts, according to J. Stallman, president. The company was chartered 18 years ago and there are 300 stockholders.

Greene, Ia.—At a meeting of the stockholders of the Farmers Inc. Co-operative Elevator Co., the following officers were re-elected: President, Joe Merfeld; Vice-President, James Snell; Secretary-Treasurer, G. W. Stauffer. The following directors were chosen: Gus Heidenwirth, Wes Hesalroad, Wm. Meyne, Abe Shook, Dick Vahlsing, Henry Murphy, George Montgomery, Wm. McRoberts and John Fisher. Their business for 1924 was nearly \$140,000.

KANSAS.

Salina, Kans.—A retail poultry, produce and feed store has been opened by W. L. Kier.

St. George, Kans.—Governor Paulen has appointed State Senator W. B. Dalton of St. George state grain inspector.

Hutchinson, Kans.—George Gano, local grain man, will erect a grain terminal elevator with a capacity of 500,000 bu.

Wellsford, Kans.—The Dickhut Grain Co. are increasing their capacity by

adding two bins and are making extensive repairs.

Cunningham, Kans.—The Cunningham Grain Co. elevator has been purchased by the Bowerstock Mill & Elevator Co. of Larned.

Preston, Kans.—The Dickhut Grain Co. now owns the elevator formerly belonging to J. H. Magruder. L. J. Kirkwood remains as manager.

Dundee, Kans.—Fire recently destroyed the grain elevator of Urban McGreevey, south of Dundee, together with more than seventeen hundred bushels of wheat, a grain wagon and tools.

Topeka, Kans.—Horner & Wyatt are designing plans for a 200,000 bushel addition to the Topeka Flour Mills Co. elevator capacity. As soon as plans are completed, contract will be awarded.

Enterprise, Kans.—Bins and new elevators will be added to the Hoffman Mills and a new head house, equipped with receiving and cleaning machinery, with a capacity of 60,000 bushels, will be erected.

Fowler, Kans.—The Star Engineering Co., Wichita, has started a feed mill plant for the Fowler Equity Exchange which will contain 15 retail bins, a large capacity hammer mill, chop elevators, motor power, etc. There will also be a 30' extension of their warehouse.

Climax, Kans.—The Star Engineering Co., Wichita, has just taken a contract for a 16,000-bushel studded, ironclad, complete elevator plant with 50-foot warehouse for H. A. Bonnell, Climax. It will be equipped with large capacity sheller, corn cleaner, roller mill, automatic scales, truck dump, motor power and will be thoroughly modern throughout.

KENTUCKY.

Lebanon, Ky.—Fire recently destroyed the Lynn Roller Mills, property of G. W. Beard, with an approximate loss of \$20,000.

MASSACHUSETTS.

Chelsea, Mass.—A petition in bankruptcy has been filed by Robert Krentzman, grain and hay dealer here.

Greenfield, Mass.—George H. Sander-son, senior member and manager of W. N. Potter & Sons, died Feb. 24th after a brief illness.

Boston, Mass.—Louis W. DePass has been elected secretary of the new Boston Grain & Flour Exchange. Mr. DePass has been identified with the Boston Chamber of Commerce since its organization in 1886.

MICHIGAN.

Chesaning, Mich.—The Chesaning Elevator Co. was incorporated with a capital of \$40,000.

Portland, Mich.—The Valley City Milling Co. will add a two story addition to their local plant as soon as weather conditions permit.

MINNESOTA.

Goodhue, Minn.—Fire totally destroyed the Robert Stock feed mill and contents.

Osakis, Minn.—Ted Harris bought the Lake Street Roller Feed mill from T. B. Lunceford.

Duluth, Minn.—Percy H. Ginder of the Barnes-Ames Co. now heads the Duluth Board of Trade.

Roseau, Minn.—Leonard, Crossett & Riley and J. T. Lyell lost their potato warehouse and stock by fire.

Ada, Minn.—Following the remodeling of their elevator office, the St. Anthony and Dakota Elevator Co. will handle groceries, flour and feed.

Weaver, Minn.—The R. E. Jones Elevator is now managed by Fay Martin, following the promotion of Wayne Martin, former manager, to a larger station.

Fergus Falls, Minn.—75,000 bushels of grain was handled by the farmers elevator last year, handling 100,000 bushels of oats and 75,000 bushels of wheat. A meeting will be called soon to discuss the enlarging of their plant.

MISSOURI.

Bedford, Mo.—The Farmers Grain & Elevator Co. will be managed by Wm. Wells.

Boonville, Mo.—Jonah Verts, former grain dealer at Nelson, Billingsville and Boonville, died from a stroke of paralysis.

Springfield, Mo.—The building occupied by the Springfield Seed Co. will be remodeled this spring. Mr. McConnell, the owner, has let the contract.

Lamar, Mo.—Separate petitions in bankruptcy have been filed by Clarence W. Koehler and George D. Koehler of the Koehler Bros. Hay & Grain Co.

Burlington Junction, Mo.—W. W. Jones will open up a feed store within a few days. Machinery will be installed and a mill will be run in connection with the feed store.

NEBRASKA.

Murray, Neb.—Font T. Wilson is manager of the B. Wilson Grain Co.'s elevator.

Brock, Neb.—The Farmers Union Co-op. Ass'n contemplates discontinuing business.

Alliance, Neb.—Lightning protection has been added to the plant of Geo. Neuswanger.

Merna, Neb.—The oil business and buildings, used in connection, of the Farmers Grain & Supply Co. have been sold.

Polk, Neb.—When the affairs of the Farmers Grain & Stock Co. have been settled, following the discovery of the difficulties of Manager L. O. Glad, a shortage of at least \$50,000 is anticipated.

NEW JERSEY.

Bridgeton, N. J.—On March 17th, a total loss was sustained by fire by the Bridgeton Milling Co.

NEW MEXICO.

Clovis, N. M.—The Clovis Mill & Elevator Co. has erected a warehouse with capacity of 60 carloads of flour and feed.

NORTH DAKOTA.

Bembina, N. D.—A new mill has been opened by Tom Prittie.

Lehr, N. D.—The Eichorn grain elevator together with about 15,000 bushels of grain was destroyed by fire of undetermined origin.

Stanley, N. D.—The farmers have formed a cooperative organization and will build an elevator. C. G. Johnson is temporarily secretary.

Bantry, N. D.—Fire, originating in the grain pit destroyed the Imperial Grain elevator here with 12,000 bushels of grain. It is believed insurance covered the loss.

OHIO.

Wheelersburg, O.—Coburn Bros., Portsmouth, will open a branch plant here.

Monroeville, O.—Lightning caused a total loss to the J. P. Easton elevator and warehouse.

College Corner, O.—The recent loss by fire of the College Corner Milling Co. was partly covered by insurance. The elevator will be rebuilt.

OKLAHOMA.

Sentinel, Okla.—The Clinton Milling Co. was slightly damaged by fire of unknown origin.

Kingfisher, Okla.—The Johnson Grain Co. will soon have their new elevator ready for operation.

Tulsa, Okla.—The Central West Flour & Feed Co. has been incorporated with a capital of \$7,500 with headquarters here.

Chickasha, Okla.—W. C. Newcomb is now secretary-treasurer of the Linton Grain Co. in which he has bought an interest.

Altus, Okla.—Another large warehouse will be erected by the Cox Henry Grain Co. of which J. J. Salwalchter is local manager.

Reeding, Okla.—El Reno Mill & Elevator Co., El Reno, will remodel the

LIGHTNING

Strikes Elevators

Shinn-Flat Lightning Rods are particularly adapted to protect Grain Elevators. Cable is braided in Flat form, providing for expansion and contraction when elevators are loaded or empty. Your liberal discount on fire insurance warrants this investment.

STOCKS SMALL.

WILLOW HILL, ILL.—The seeding of
timothy seed and red top seed and the
clovers are about over for this spring
and we have had a very fair trade. The
trade on soy beans is just opening up
and we anticipate a large trade on them.
There are no stocks of timothy or red
top seed in farmers' hands that I know
of and stocks in dealers' hands are
small. The stocks of cow peas are here
and are the smallest in years, due to the
frost catching them last fall. There-
fore the crop of cow peas to be sown
here this year will be very small. But

We buy and sell all standard va-
rieties of grass, clover and farm
seeds. Correspondence solicited.
WM. A. WARD SEED COMPANY
Sacramento, Calif.

soy beans will take the place of cow
peas with our farmers here on account
of the difference in price.—T. F. Money.

Last season.....	13,900	7,750	7,136

TOLEDO SEED MARKET.

TOLEDO, O., March 23.—Both cash and
March clover were lower this week with
offerings liberal on the scale down. A
fair trade was uncovered on the decline
and some support shown around the
\$17 level. Cash clover lost its premium,
selling at the same price as March.
March deliveries were heavy as soon as
the cash lost its premium. Shipments
of prime delivered on March contracts
are expected to be generous, as many
dealers bought with the intention of
taking the seed for their trade. Deal-
ers report a very good demand for seed
from the trade and they expect stocks
here to be cleaned out within the next
few weeks. Bad weather has caused
a check in the trade as farmers are not
able to sow clover. The soil has been
filled with moisture in many sections
and this is unfavorable to sowing of
field seeds. The buying should continue
for several weeks if spring is late and
this may develop some strength in
clover. Receipts this week 536 bags and
shipments 1,261 bags. Prime inspected
this week 450 bags.

A fair demand for October clover, the
new crop future was shown during the
week. Many of the dealers are favoring
purchases as the seed making season is
a long one and offers many changes in

Field and Grass Seeds

crop conditions. The present discount
under cash seed is considered low
enough to discount a possible bumper
crop this season.

Alsike was strong and higher, ad-
vancing 50c for cash and March. The
cash demand is said to be excellent at
the big discount under clover and this
has stimulated the interest in alsike.
Receipts this week were 83 bags and
shipments 239 bags.

Timothy remained firm all week with
a light trade. The stocks of timothy
here will be reduced some by shipments
to dealers who have taken deliveries.
The cash demand has been slow and this
has made the timothy market rather
dull. Receipts for the week were 140
bags and shipments 239 bags.

ST. LOUIS SEED MARKET.

Quote: Timothy—average country
seed at \$5.25 to \$5.45 (bright, clean seed
worth more), low-grade weedy and dark
at \$2 to \$5; Clover—fairly clean to high
grade clean seed at \$26 to \$28, heavily
to slightly weedy lots at \$10 to \$24—
screenings and tailings less; Alsike at
\$15 to \$20; Alfalfa at \$16 to \$20; Redtop
at \$11.50 to \$11.80 for clean seed—chaf-
fy at \$2 to \$10; German Millet at \$4;
White wonder at \$3.50; Hog Millet at
\$2.05 bulk basis.

Stock Peas—Quote per bu.: mixed
and new era at \$3.25@3.30 and whip-
poorwill at \$3.50 to \$3.60. Car Virginia
Soy Beans sold at \$3.16 per bu.

Sorghum Cane Seed—Quote black am-
ber nominally at \$1.60 per 100 lbs.

SEED DEMAND ACTIVE.

LOUISVILLE, KY.—The general demand
for seeds during the past sixty days has
been active and possibly a normal
amount of seeding will be done this
spring.

There has been some substitution of
alsike and sweet clover for red clover
on account of price, otherwise not much
difference to note in the consumption.

Up to the present time there has been
a very small demand for seed oats and
this is quite surprising in view of recent
prices on grain.—National Seed Co.

KANSAS CITY SEED MARKET.

KANSAS CITY, March 21.—Trade in
grass seeds has veered into the "filling-
in" stage. Original orders were liberal
and they have generally been filled. If
the secondary business proves as good
as the first run, dealers will be satisfied
with the spring trade. It is reported
that alfalfa seed is being planted ex-
tensively with oats in Kansas. Sweet
clover is going in this way, also. Red
clover seed was well taken for awhile,
but it is handicapped by high prices,
giving an advantage to sweet clover and
alsike. Timothy is so plentiful that no-
body is anxious about it except the sell-
ers. There is a normal call for blue
grass seed, with no disturbance of prices
from recent levels. Interest in forage
seeds is light, with cane especially dull
for either sowing or feed-mixing ac-
count. Several cars of cane seed
dragged through the week in the open
market, selling 15c lower than the pre-
vious week's quotations. While local
houses asked about \$2 per cwt. for
cleaned and sacked cane seed, country-
run was merchantable at only \$1.25@
1.35. Inquiry for millet seed was light,
due partly to its heavy premium over
cane and Sudan. Still, the supply of
millet continued small, with nothing ar-
riving from the country. Dealers here
asked the following prices for cleaned
and sacked seed: German, \$5 per cwt.;
common, \$4; Siberian, \$3.50; hog, \$3.

Wholesale prices of grass seeds, per
cwt., sacked, are: Blue grass, \$17@23;
timothy, \$5.50@7; alfalfa, \$16@22.50;
red clover, \$25@34; sweet clover, \$10@
14; alsike, \$17@22; Sudan, \$5@6.

In view of light marketings by farm-
ers thus far, dealers are fearful of a

limited supply of soy beans and cow
peas. Planting demand is two or three
months away, and before that date there
may be more in sight. Local houses are
quoting prices for resale as follows per
bushel: Cow peas, \$4@5; soy beans,
\$2.50@3.50.

FOREIGN SEED SITUATION.

EDINBURGH, SCOTLAND.—Referring to
our report of October last, we can now
supplement same with some recent in-
formation.

CLOVER SEEDS.

The almost entire failure of English
red clover and single cut cowgrass has
been confirmed, so that dealings have
been confined to yearling seeds, of which
the better qualities are now scarce, but
a quantity of brown and discolored seed
is in the market yet which will have
to meet competition from Chilean and
Continental offers, which, although not
representing any formidable quantities,
are quoted at comparatively moderate
figures.

English white clover is in small com-
pass now, but the Continental crop is
quite sufficient to make up any shortage,
and something similar may be said of
trefoil.

Alsike clover—The Canadian crop al-
though not so abundant nor of such fine
quality as last year has been sufficient
to cover requirements so far, but from
all accounts stocks are much reduced
now and supplies from other quarters
are not much in evidence.

No change in American timothy, but
some very fine quality is coming from
Saxony, which will take the place of
Scotch and Canadian seed, quality and
price of which are not very desirable.

Tares—English winter are plentiful
Scotch goes not coming out, but we can
supply large Swedish tares at a mod-
erate price.

Rape, sowing winter—Very short
crops in England and Holland getting
stiff prices.

GRASS SEEDS.

Perennial ryegrass—The Ayrshire
crop has been largely drawn upon owing
to the better condition and stronger
germination, but the Irish seed, al-
though the germination and bushel
weight are not up to the average, is in
better condition than was generally ex-
pected.

The same may be said of Italian rye-
grass which is supplemented by the
good French crop which is now quoted
at a more reasonable figure.

Natural grasses—The leading kinds
cocksfoot, meadow fescue, hard fescue
are in good supply, of fair quality and
moderate prices. The demand for other
grasses, meadow foxtail, the poas, etc.,
is restricted owing to the disproportion-
ate values.—Peter Lawson & Son, Lim-
ited, March, 1925.

DULUTH FLAXSEED MARKET.

DULUTH, March 21.—Operators in the
flaxseed market experienced another
strenuous period during the last week.
A break of 13c on Tuesday under a wave
of liquidation signalized the six days'
operation. A five-point recovery served,
however, to relieve the strain under
which traders were operating, and from
then on to the end of the week the
market was more stable and dealers
consequently felt more cheerful.

On the net result of the six days'
operations, spot and March seed eased
5 to 7c and the April, May and June
futures eased from 5 to 7c. Apart from
on Monday when the movement from
the country was better than it had been
in several days, receipts were light, the
aggregate for the week being 41,375 bus.
With shipments to interior crushers
amounting to 132,611 bus., stocks of
450,000 bus. remained in the elevators.

A survey of the recent trading served

to show that the interest of crushers was negligible, and they were in fact sellers on balance on some days. The market in flaxseed continued to reflect the course in wheat, being affected by the movement either up or down in that grain. Crushers complained of dullness in the current demand for linseed oil and they were therefore disposed to go slow as regards increasing their commitments until they were able to obtain a more accurate lineup of the season's trade outlook.

Wariness on the part of traders generally was prompted by the heavy supplies in store and in sight in this country and in Canada and speculation regarding its absorption in the face of a possible large increase in the movement of Argentine seed to the Atlantic ports as a result of the slow demand for it from the European countries.

Closing prices of flaxseed on the Du-luth market on Saturday, as compared with the previous Saturday and the same period last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track.....	\$2.84-85	\$2.89-92	\$2.45-59
To arrive.....	2.84	2.89	2.45
March.....	2.84	2.89	2.45
April.....	2.84	2.89	2.45
May.....	2.84	2.90	2.39 1/4
July.....	2.81 1/2	2.88 1/2	2.37 3/4

MINNEAPOLIS SEED MARKETS.

The local seed market shows practically no change during the past week with the exception of a narrowing up in the buckwheat market. Other seeds in fair demand at current quotations. Japanese buckwheat quoted at \$2.10 and silver hull and mixed buckwheat at 10c less. Timothy sold at \$5@5.30; red clover, \$25@27.50; sweet clover, \$7.50@9; alsike, \$15@17; broom corn millet, \$1.65@1.85; and Early Fortune, \$2.20@2.25.

WEEKLY LINSEED REVIEW.

NEW YORK, March 21.—United Kingdom: The linseed situation in the United Kingdom has been somewhat easier during the past week with shippers pressing offers, but crushers are now displaying rather more interest.

Linseed oil has been dull. The consumptive demand continues moderate. Cotton oil remains neglected.

India: Shipments of linseed this week amount to only 172,000 bus. compared with 308,000 bus. last week. Cutting has commenced.

Argentina: Clearances of linseed from this country continue small, being less than 1/2 million bus. this week as compared with more than 1,000,000 bus. this time a year ago. Port stocks are 3,400,000 bus. against 3,600,000 bus. last week and about 7 1/4 million bus. last year. Markets during the week have been nervous, declining sharply early, but later firming with less pressure of country offers. The yield from the new crop of linseed is now expected to be smaller than previously estimated. Threshings are about completed.

SEED LAW EXEMPTIONS.

The Missouri State Board of Agriculture, to meet the springtime questions arising at the opening of the seeding season, has authorized the administrative statement that farmers may sell field seeds of their own growing without labeling under the conditions herewith set forth, but that a farmer can not advertise farm seeds and deliver same through a common carrier without becoming fully subject to the seed law requirements. A farmer can sell field seeds of his own production at his own farm without furnishing a detailed label, provided he has not advertised such seeds for sale to bring them into competition with legally labeled seed.

There are four different conditions under which farm field seeds may be found without detailed label under the seed law, the exemptions from labeling being as follows:

When possessed, exposed for sale or sold for food purposes only; when sold to merchants to be recleaned before being sold or exposed for sale for seeding purposes; when in storage for the purpose of recleaning or when not possessed or owned or sold or offered for sale for seeding purposes within the state.

No labeling is required on agricultural seeds grown and sold by the owner thereof on his own premises. However, if said grower makes representations as to quality or purity of such sale on his own farm he shall be responsible fully for such claim. Further, if the grower advertises farm seeds for sale, or if he delivers same through a common carrier he becomes fully liable for labeling provisions and other requirements of the seed law.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Mar. 21 previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	453	638	136	103	422	133
Prev. wk.	804	942	586	226	329	247
1924	341	603	478	464	404	681
1924-25	33,372	23,430	9,373	4,588	14,923	14,940
1923-24	26,651	16,466	8,584	6,036	21,142	10,681
1922-23	29,632	26,483	9,310	7,521	21,860	5,599

Timothy—Unchanged. Light inquiry and moderate offerings. Prices unchanged. Fair country run \$5.25@5.50 per 1,000 lbs.; good country run about \$5.70@5.80, high grades \$5.85@5.90, choice \$6 and fancy at \$6.25@6.50.

Alfalfa Seed—Steady. Recleaned country lots \$21@22 per 100 lbs.

Clover Seed—Market unchanged. Country lots \$22@24.75 for 100 lbs., good \$25.50@26.50, choice \$27@28, fancy \$29@30 and Mammoth \$25@30.50, according to quality.

Flax Seed—Easier. No. 1 Northwest-ern closed at \$2.97@2.99 nominal.

Alsike—Steady. Fair country lots \$14@15 per 100 lbs. Good seed \$15.50@17, choice \$18@19 and fancy at \$20@21.50.

SEED SEASON SLOW.

CELINA, OHIO.—The seed season is rather slow, owing to most of the people waiting to see if the wheat is going to be strong enough to permit them sowing seed in it. Otherwise the seed trade will be late and live up a little later on. Up to the present time we have had the lightest season of seeds we have had for several years.—Model Milling Co.

JAVA EXPORTS WHEAT.

A consignment of 10 tons of wheat grown in Java has arrived in Holland, this being the first shipping of any considerable quantity of wheat suitable for bread which ever reached that country's shores from an East Indian dependency.

THE PROTECTION OF YOUR BROKER.

We like to believe in the business integrity of everybody. The recent decline in all grains has severely tested the longs in all grains. We had customers on our books whose margins were exhausted and losses seemed inevitable to us. The fact that our customers are protecting us, not only to the market, but furnishing us full protection against any further drastic decline is worthy of comment. We never

of such coöperatives as compared with the corresponding costs of other types of distributors, the Senate approving a resolution sponsored by Senator Shipstead.

The resolution also directs the commission to look into the extent and importance of the interference with and obstructions to formation and operation of coöperative organizers of producers, distributors and consumers by any corporation or trade association in alleged violation of the anti-trust laws.

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
Wheat	9,699,000	10,474,000	11,198,000
Oats	640,000	1,000,000	1,190,000
Rye	869,000	972,000
Barley	813,000	866,000	142,000

The Spanish government has fixed the price of wheat at the mill at 63 pesetas per 10 kilos, which equals \$2.40 per bushel.

Feedstuffs**FEED SLOW.**

ANDERSON, IND.—The stocks of feed on hand in this territory are breaking down storage houses and are very slow sale. Farmers and feeders are short of money and are managing every way to avoid buying feed. Using up the last of everything they have on the farms before purchasing anything.

Growing wheat in the ground is most discouraging. About one-half of it in this locality will have to be ploughed up and put in oats or some other spring crop.—The Union Grain & Feed Co., G. A. Lambert, Mgr.

FEEDS MOVING SLOWLY.

RISE SUN, MD.—Feeds in this territory have been moving very slowly. The farmers had quite a lot of corn last year which was not properly matured and they had to feed this corn to their cattle and save out what good there was for their horses. The demand here of late has been picking up a little, as the corn has been getting scarce.

We find there is going to be quite a lot of corn for sale, but there does not seem to be any place to put it, for the city buyers will not pay the price for this kind of grain.

We were of the opinion that feed would pick up this spring and it has picked up of late, but not nearly as much as we had expected.—Stewart M. Ward Co.

GIVING DUE CREDIT.

Our readers will recall interesting comment in this column on vitamins in molasses. One of the articles on page 32, the PRICE CURRENT-GRAIN REPORTER of March 18, did not properly credit the joint authors of the paper with its splendid information, Dr. V. E. Nelson, V. G. Heller and Dr. E. I. Fulmer. We stated that the article as written was by several professors of Iowa State College at Ames, Ia., but we neglected to give their names which should have been done.

A WELL GOTTEN UP BOOKLET.

The Collis Products Co., Dept. 165, Clinton, Ia., is circularizing the trade this spring on a well gotten up booklet, "Feed—from the Egg to the Market." It explains in language easily understood the value of adding dried buttermilk to poultry feeds, publishing also instructive and helpful information on feeding baby chicks, growing hens, and the place dried buttermilk has in high egg production. A copy will be sent to interested readers by addressing the manufacturer as above.

NEW YORK OATS MARKET.

Oats: Receipts, 124,000 bushels bonded, 236,000 bushels domestic. The market moved within a narrow range, and while futures are somewhat lower, premiums showed a fair advance. The movement from first hands has now fallen below consumptive requirements, so that the visible supply should soon show a substantial decrease. There has been no further sales of importance of American oats, while those of Canadian were of small volume. Western markets reported considerable improvement in the shipping demand, but in nearby territory the inquiry was light. There was some improvement locally, with

offerings moderate and prices firmly held. Sales to dealers being principally of Duluth 36 lb. 3 white oats now at Buffalo, which are offered at about 2c per bus. below the cost of Western oats of similar feeding quality.—L. W. Forbell & Co.

COTTON SEED MEAL.

KANSAS CITY, March 21.—Orders for cotton seed meal are irregular and business averages only normal for March, with prices tending lower. April and May usually are dull months in the trade. Offerings from Oklahoma and Arkansas continue liberal, but Texas mills are selling mainly to exporters or to feeders in that state. The Texas price is \$35 per cwt., or \$1 lower than a week ago. Prices in Arkansas are off \$1, at \$35.50@36.50, but the Oklahoma product is only 50c lower, at \$36@36.50. Kansas City dealers are selling carlots at \$41.60 and ton lots at \$45.60, indicating a decline of about 20c, as compared with the prices quoted a week ago. Weakness in corn was a bear factor in the market early in the week.

The trade in linseed meal has gone from bad to worse, with prospects of lighter sales in April, a traditionally poor month for the product. Offerings by Minneapolis mills, at \$40 a ton, are \$1.50 cheaper than a week ago and resale meal is available at \$39.50. The Kansas City market is nominally \$44.30 for carlots and \$4 more for ton lots.

Manufacturers report improvement in the demand for tankage, due entirely to a stronger hog market. Prices are quoted on the previous basis, which is \$55 a ton for carlots and \$60 for ton lots. Meat scrap, also, is unchanged at \$60 and \$65. Poultry interests are said to be good buyers.

OIL MEAL MARKET.

There is a tight condition existing in the oil meal market. It is almost impossible to get out any kind of meal for quick shipment and pea size meal cannot be shipped faster than two weeks. Demand the last day or two has been exceedingly good from scattered sources in one and two car lots, although there has not been any big round lot buying.

Although production in the Chicago market is about as heavy as it has been all through the winter, Minneapolis is running much lighter and the relatively high prices prevailing in Minneapolis has resulted in large shipments of meal from Chicago into western territory. This has apparently cleaned up the surplus here. On the other hand the Eastern markets continue weak with export cake in slow demand and the Buffalo Markets very draggy.—The Bertley Bulletin, Chicago, March 21.

MINNEAPOLIS FEED MARKETS.

The past week has been an exceptionally quiet one in the local millfeed market; as a matter of fact, each succeeding week seems to be worse in this respect than its immediate predecessor. The smaller jobbers report nothing going on and the larger ones say that they have never seen anything like it, as far as lack of actual consumptive demand is concerned, in this market. For example, one of the larger handlers said yesterday that he had only sold three cars of feed so far this month.

Output has been very light, however, and one of the big local mills was forced to buy some more bran yesterday; understand that they paid \$24 for it. Immediate feed from local mills is hard to get and this kind of shipment is strong, but the deferred is easy on account of the light demand. Shorts have been see-sawing around with bran, taking the lead in actual demand one day and losing it again the next.

The heavy feeds are slow sale gener-

ally. Country red dog is being offered fairly free at as low as \$36 per ton while the city stuff is holding very firm at the top of the range.

Today's asking prices were as follows: Standard bran, \$23@23.50; pure bran, \$24; shorts, \$23.50; red dog, \$36 @40; flour middlings, \$27.50@29.

Weekly shipments totaled 12,502 tons vs. 11,341 last week and 14,888 a year ago. Season shipments total since Jan. 1, this year: 142,760 tons vs. 175,927 last year; since Sept. 1, this year: 388,273 vs. 446,831 a year ago.

MINNEAPOLIS CASH FLAX.

Early in the week current receipts were comparatively heavy and were in excess of crushing requirements, but as the week progressed, crushers came into the market in heavier volume and took the offerings in fair shape. Receipts not quite so heavy toward the last. Mch. 21 range of sales show No. 1 seed, on track, quoted at May price 1½c under and the to arrive at May price 2c under. Local stocks total 31,580 bus. vs. 348,429 last week and 209,558 a year ago.

R. E. PAGE & COMPANY.

A new feed jobbing firm was recently launched in the Chicago market as R. E. Page & Co., at 327 S. LaSalle St., Room 1141.

The firm will do a general jobbing business in feed materials of all kinds such as mill feeds, oil meal, cotton seed meal, alfalfa meal, tankage, and other products. Mr. Page has been prominent in the Chicago market for years and prior to that traveled the feed belt through Illinois, Indiana and Ohio.

The PRICE CURRENT-GRAIN REPORTER joins his many friends in wishing him a big success in his own business.

THE FEED MARKETS.

MILWAUKEE.

Milwaukee, Mar. 21.—Millfeed quotations generally narrowed within the lower limits of the ranges during the past week, closing in most cases lower for the period. Demand from the consumers continued slack and considerable selling pressure was being exerted from most quarters in an effort to move stocks. Current quotations at the close, Saturday, Mar. 21, were: Winter bran, \$26.20@26.70; spring bran, \$25.50@26; standard middlings, \$25.50@26; flour middlings, \$30.50@31.50; red dog, \$37.50@38.50; rye feed, \$26@26.50; linseed oil meal, \$42@42.50; cottonseed meal, \$38.50@43.50; hominy feed, \$37@38; oat feed, \$6@7; gluten feed, 30 days, \$33.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

NEW YORK.

New York, Mar. 21.—Quite some weakness prevailed in both city and Western feeds, with reductions of about \$1 per ton in both instances during the past week.

Consumers were inactive and the majority of the buyers were covered with material bought some time ago at prices about \$4 per ton over current levels.

City bran is quoted at \$29, middlings \$30 and red dog \$45; while Western bran rules at \$29.25, middlings \$30.25 and red dog \$45.50 per ton.

BALTIMORE.

Baltimore, Mar. 21.—The recent decline in wheat prices has had its effect upon the wheat feed market, which is again easier and dull. Stocks of bran and middlings on hand here are more than ample for trade wants. Hominy feed quiet at about former asking prices. Gluten feed steady, but this line selling sparingly. Alfalfa meal dull. Dried beet pulp selling moderately in a jobbing way. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$30@30.50; Western middlings, per ton, 100-lb. sacks, \$30.50@31; hominy feed, per ton, \$45@46; gluten feed, per ton, \$39.50@40; alfalfa meal, per ton, \$31@32; dried beet pulp, per ton, \$38.

DULUTH.

Duluth, Mar. 21.—Mill feeds held steady during the last week, but ground feeds registered declines extending from \$1@1.75, with the maximum drop coming in No. 2 ground feed. Business in feeds was reported slow by dealers, being affected by the practical cleaning up of demand from woods operators. Other consumers pursued an immediate requirements policy in their buying. Closing prices of feeds per ton on this market follow: Bran, \$24.50; shorts, \$25.50; Boston mixed, \$25.50; red

dog, \$38; flour middlings, \$31; ground oats, \$28.75; No. 1 ground feed, \$38; No. 2 ground feed, \$33.75; No. 3 ground feed, \$33.50; cracked corn, \$42.50; coarse cornmeal, \$42.50.

MEMPHIS.

Memphis, Mar. 21.—The feed market continues dull, and buyers are taking only small lots. Cottonseed meal is steady, but there is no snap to the market and quotations are unchanged at \$34 for 36 per cent, \$36 for 41 and \$38 for 43. Mills are not pushing offerings at these figures, but will sell all that buyers want. Alfalfa meal is very dull and quotable at \$27.50@28.50 for one grade. Receipts for the week were 29 cars. Millfeed has been fairly steady, but sales small. Wheat bran is quotable at \$28 and gray shorts at \$33, although the latter held at \$34@35 by some shippers.

PHILADELPHIA.

Philadelphia, Mar. 21.—The market for feedstuffs continues dull under a very slow demand, but receipts and offerings are light and values are fairly well maintained. We quote carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$33.50@34; winter middlings, \$35@36; spring bran, Western shipment, \$31@32; standard wheat middlings, W. S., \$29@32; flour middlings, W. S., \$36.50@41; red dog, W. S., \$44@45; low grade flour, W. S., \$55@56; rye middlings, W. S., \$30@31; reground oats feed, \$13@24; fine yellow hominy, W. S., \$41.50@42; fine white hominy, W. S., \$41.50@42; cottonseed meal, 36% protein, W. S., \$42@42.50; cottonseed meal, 41% protein, W. S., \$44@44.50.

CINCINNATI.

Cincinnati, Mar. 21.—The demand for millfeeds was limited to the immediate needs of buyers, but scarcity of offerings and reports of smaller production, due to the dullness of flour, gave the market a steadier tone and excepting a dollar reduction for standards prices were well maintained. The advices to the trade that many mills had closed down and that those operating were sold up on millfeeds created confidence among dealers that higher prices will prevail until grass comes into pastures. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$30.50@31; hard winter wheat bran, \$30.50@31; spring wheat bran, \$29.50@30; standard middlings, \$29.50@30; soft wheat middlings, \$35@35.50; gray hard middlings, \$35@35.50; mixed feed, \$33@33.50; No. 1 alfalfa meal, \$30; hominy feed, \$38.50@39.

BOSTON.

Boston, Mar. 21.—Millfeed—Prompt shipment, per ton: Spring bran, \$29@29.50; winter bran, \$30@31; middlings, \$29.50@35; mixed feed, \$32.50@39.50; red dog, \$46.50; gluten feed, \$40.95; gluten meal, \$48.70; hominy feed, \$41.50; stock feed, \$44; oat hulls, reground, \$15; cottonseed meal, \$43@48; linseed meal, \$43.50@44.

Oatmeal—Per 90-lb. sack, rolled, \$3; cut and ground, \$3.30.

Oats—All rail, fancy, 40 lbs., 61@62c; fancy, 38 lbs., 59@60c; regular, 38 lbs., 58@59c; regular, 35 lbs., 57@58c; regular, 34 lbs., 56@57c.

COÖPERATIVE COMPANY GOES OUT OF BUSINESS.

The Farmers' Grain Company which was incorporated at Fairfax, Ia., eighteen years ago, has sold its elevator and good will to W. J. Behle who has been manager of the concern for several years, for \$7,500.

There were 300 stockholders and they will not receive a cent for their holdings, according to John Stallman, president of the company. Only one dividend was paid by the company during its existence.

It has always handled a large quantity of grain for the farmers in the western section of this county.

BEAN OUTLOOK BRIGHT.

The present outlook in the bean industry of the United States is unusually bright. The raising of this product has become increasingly popular during the past few years, and each season brings reports of new territory untillized for the planting of beans and a substitution of bean production for other less profitable crops. This is emphasized by the fact that The Rocky Mountain Bean Dealers Association has extended its membership in the states of Texas, Montana, Wyoming, and Idaho during the past few years, since its organization in Colorado and New Mexico, and, as new territory is opened up additional applications are added to the list.

CALIFORNIA.—Statistics show a total of 150,000 bags of pink beans on hand in California. This bean is considered the closest competitor to the pinto, and, the limited supply of this variety left available for shipment emphasizes our expectation of higher values on pintos. Owing also to poor prospects in California for the coming season, and a shortage of beans in the Orient, it is very unlikely that buyers may look for lower figures, at least until the coming harvest.—H. G. Mundhenk, Secretary, Rocky Mountain Bean Dealers' Association, Denver, Colorado.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending March 21 (000 omitted):

ing sellers for shipment. For April-May discounts are offered with very little demand and very little buyer's interest.

MINNEAPOLIS.—Bran, \$23.50; standard middlings, \$23.75; flour middlings, \$29; red dog, \$36 to \$37.

CHICAGO.—Bran, \$26.10; standard middlings, \$26.35; flour middlings, \$31.60; red dog, \$38.60 to \$39.60.

KANSAS CITY.—Bran, \$24; gray shorts, \$28.

ST. LOUIS.—Bran, \$26.40; gray shorts, \$30.40.

ALFALFA MEAL.

Market unchanged from week ago; if anything, a little less buyer's interest. No real anxious selling with the exception of scattered lots here and there and slight discounts offered where directions are necessary. Nominally quoted, second hand bag basis, choice, \$27.50; No. 1, \$26.50; No. 2, \$23. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Market more or less unchanged from a week ago with possibly slightly more seller's interest than buyer's, particularly for nearby shipment. Nominally quoted, reground oat feed, \$7; unground oat hulls, \$9.

HOMINY FEED.—Very little offered. Most of the cheaper hominy feed originates from points East of Chicago. The corn milling business from points West of Chicago is none too brisk; consequently, not much hominy feed being offered. From the West, nominally quoted sack basis, white, \$40; yellow, \$39.50. In bulk, where available, \$1.50 to \$2 a ton less.

LINSEED OIL MEAL.—For March shipment, slight premiums being asked. For beyond March, slight discounts offered. Nominally quoted for prompt shipment, sack basis, Chicago \$40. In bulk, \$2 to \$2.50 per ton less.

DRIED BUTTERMILK.—Demand is very good and market in good shape. Baby chick raisers are buying heavily just now and are expected to absorb the entire production for some weeks. Quotations are as follows: Creamery in carlots at 6½¢ per lb. and L. C. L. up to 7½¢.

COTTONSEED. MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop, but with a present reduction in meal production has given the market a somewhat better tone and a clean up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Demand is slower, orders are smaller and of a hand to mouth character, as the season is about ended. Quotations follow: Gluten feed in bulk \$31 a ton, sacked \$33.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slackening somewhat but at the lowered prices all packers' products are moving in fair volume, last week's movement being unusually good. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$60@65 a ton; 60 per cent protein digester tankage, \$55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

FREIGHT RATES AND FARM PRICES.

Economic factors other than freight rates have been responsible for the wide fluctuations in farm prices received for wheat during the past eighteen months, according to a study just completed by the Bureau of Railway Economics into the relationship of wheat prices to transportation costs.

"The study," says the bulletin, "develops these important conclusions:

1. "That the farm prices of wheat fluctuated during the whole period, the general trend of the fluctuations being consistently upward:

2. "That the freight rates on wheat were practically stationary throughout the same period.

3. "That other economic factors than freight rates were responsible for the fluctuations in farm prices of wheat."

18 Months' Record.

The study covers the prices paid for wheat from August, 1923, to January, 1925, at 144 points of origin in twenty-one states located in practically all the wheat producing areas of the United States and shows "that there is no relationship between the freight rates on wheat and the fluctuations in prices paid to the farmer for his wheat."

The detailed results of the study show that:

"(1) The area of the greater proportion of wheat production and wheat milling consists of a group of states lying within the northern central section of the United States, and therefore, the initial haul on wheat from the farm to the local elevator, the mill or to the primary market is confined to a relatively small area.

"(2) Freight rates, since they were stationary during the period, were not responsible for the fluctuations in farm prices of wheat. The same deductions would have followed had the prices gone down instead of up.

"(3) Marked fluctuations not only occurred between different kinds and grades, but occurred also upon the same reported grade at different points on the same day, and at the same point on different days. Fluctuations even occurred on the same reported grade at the same point on the same day.

"(4) Prices were different on the same reported grade of wheat on the same day at different origin points, even though the freight rate to primary market from those points was the same, or practically the same.

"(5) In some cases the farm prices on wheat from points with a higher freight rate to primary market were greater than the farm prices from points with a lower freight rate.

"(6) Many origin points from which the freight rates to the same market were different, although stationary, showed varying fluctuations in farm prices throughout the entire period.

"(7) All of the fluctuations in the farm prices of wheat varied widely, although the general tendency was upward, and the spread between the highest and lowest prices recorded during the period was in most cases several times the total freight rate to market."

MAY WHEAT.

From the way the wheat market acts, you would think that No. 2 red wheat, Edinburgh, Scotland, or No. 2 hard wheat, Liverpool, England, would apply as contract wheat Kansas City, Mo., or Chicago, Ill., for May delivery. Either that or some of our leading bears expect the movement of our new crop to move the latter part of March. These two theories are the only ones I can think of that would justify the big downturn at the present time in the face of a de-

crease in the visible of 3½ million bushels and a good milling and export demand for our dwindling supplies.

Did it ever occur to you, Old Top, that premiums are only paid for something that's scarce, and the premiums for ordinary wheat are getting stronger day by day?

Chicago's stocks of wheat are about 5½ million; Kansas City stocks are about 8 million; very little in either market contract wheat. When you get too bearish add up the figures of the wheat available on May contracts; will make you dizzy, thinking how high May wheat can go. Then consign instead of selling on these bids.—*Tod Sloan, B. C. Christopher & Co., Kansas City, Mo.*

WHEAT TO SPAIN.

In view of the shortage of the 1924 Spanish wheat crop and as a result of the pressure which is being brought to bear on the Spanish food administration, this body is investigating the advisability of raising the prohibition against the importation of wheat and permitting the entry of a preliminary shipment of 50,000 tons, Commercial Attache C. H. Cunningham reports to the Department of Commerce from Madrid.

The Barcelona Millers' Association states that there will be a shortage of wheat this year of approximately 250,000 tons. They furthermore protest against having to expend 51 pesetas per 100 kilos of wheat in Valladolid and then pay freight on it to Barcelona, when foreign wheat can be secured there for about 41 pesetas per 100 kilos.

TRADE COMMISSION'S POLICY CHANGED.

The Federal Trade Commission has announced a policy of providing informal settlement of trade disputes without issuance of complaint wherever possible, the granting of hearings before complaints are issued, and the consideration of only such cases as clearly involve the public interest.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, March 21.—Due to hay weakness, lack of new buying and slow shipping directions on old orders, the local mills made a further reduction of 50c to \$1.50 a ton in prices of alfalfa meal this week, except on the choice grade. Most of the reduction was on No. 3, which is made from brown hay, a quality that is abundant and cheap. Prices of meal in carlots were quoted, per ton, as follows: Choice, \$27@28; No. 1, \$24@25; No. 2, \$19@20; No. 3, \$18@18.50. As far as medium and low grades are concerned, Kansas City mills have a pronounced advantage over the Colorado product. For this reason there is a feeling here that sacrificial prices are unnecessary. March orders are being filled as fast as mixed feed interests can take care of them, but April and May bookings are light.

Cheaper corn and other grains are enabling the molasses-grain feed producers to meet bids and do a fair business, especially in horse, cattle, dairy, hog and poultry feeds. Prices quoted this week were generally \$1 to \$1.50 a ton lower, and poultry feeds fell \$2 to \$4 in most cases. The list was quoted as follows, basis of carlots, per ton: Dairy feeds, \$36@47; cattle feeds, \$39@45; hog feeds, \$45@51; pig meal, \$70; horse and mule feeds, \$32@41.50; alfalfa-molasses feeds, \$26.50@34; scratch poultry feeds, \$46.50@52; mash poultry feeds, \$50@78.

GOOD ALFALFA SEED IS PROFITABLE.

Alfalfa growers should purchase their seed with care.

"There are several things to consider in seed selection," says L. F. Graber, alfalfa specialist of the Wisconsin College of Agriculture. Where winter-killing is known to occur, hardy strains such as Grimm and Cossack should be grown, as the extra cost is returned in better yield. Where a winter-killing is not serious and short rotations are practiced, good common strains have proven successful.

Another advantage of Grimm alfalfa is in seed production which may occur every other year or so. The higher price received for the seed makes this strain much more profitable. Some growers have realized as high as \$60 an acre from this source. A crop can be expected only when the season is dry at blossoming time. In regard to seed crop, alfalfa does not differ so much from clover as seed from that crop is not a certainty.

"The safest Grimm seed to buy is that which has had a field inspection and certification by the officials of the Western states where it is produced," Graber states. Of this there is an enormous quantity, much of which is in bags, branded or sealed or both, by these officials, which certifies its purity. This seed is available through regular commercial channels of dealers and seed companies.

The strains which Graber has found best because of the resistance to winter-killing are those from South Dakota, Montana and Kansas.

INSPECTION BILL PASSED.

The bill in the Kansas state legislature providing for a reduction in the cost of inspection, sampling and weighing of grain from \$1 per car for both inspection and weighing, to 60 cents per car, of all grain when the amount

in the revolving fund reaches \$80,000, was passed and will become a law as soon as published in the official state paper. Owing to the depletion of this fund, at this time, it is hardly probable that the amount in this fund will reach the maximum amount provided for before Oct. 1. With economical management of the department, there is no reason why the amount in the fund should be reduced below \$40,000, as provided in the act.

These are the Fastest
Selling and Most
Profitable Feeds for

FEED DEALERS

Sugared Schumacher Feed and Boss Dairy Ration are the fastest selling and most profitable feed for feed dealers because—

1. They are **QUALITY** Feeds that exactly meet the requirements of farmers and dairymen.
2. They produce such splendid results for feeders that they always come back for more.
3. They make a **COMPLETE** dairy ration. Sugared Schumacher Feed supplies the carbohydrates and Boss Dairy Ration the protein part of the ration.
4. Sugared Schumacher Feed is an "all 'round" feed—good for hogs, horses and dairy cattle.
5. They are extensively advertised in the farm and dairy publications. These convincing advertisements send thousands of customers to the stores of dealers who handle these feeds.

If you are not handling these fast selling and profitable feeds write us today for our attractive dealer proposition.

ALFALFA HAY

ALFALFA MEAL

A. B. CAPLE, Toledo, O.

Hay Department

GOOD HAY.

GRAND LODGE, MICH.—Abundance of good quality hay around here. There has not been over 25 per cent shipped to date. There will be a big carryover this season, inasmuch as hay is so cheap and chances of shipment so poor; farmers all say that they are going to plow up all their hay land this season.

Bulk of the oats, rye, barley and wheat gone from this territory, either been fed at home or shipped.

Think that the clover seed crop has about all been disposed of in this locality.

In regards to hay prices will say that the farmers have all lost money on all hay sold this season; freight rates so high that being taken out the farmer must lose from \$1 to \$5 per ton. No wonder they are sick.—N. H. Holt & Co., per W. H. Holt.

HAY MARKET REVIEW.

The hay market was draggy during the week ending March 21 with farmers pressing their surplus of inferior hay on the markets, according to the Weekly Hay Market Review of the U. S. Department of Agriculture. Receipts were ample for current need and although top grades were scarce and wanted the offerings of medium and low grades continued in excess of the demand and moved with difficulty. Pastures showed improvement in the Southeast and were greening up in the Middle Atlantic area and the interior valleys and shipments of alfalfa to this section were falling off.

Timothy was barely steady. The Boston market was practically unchanged, but light receipts reduced the accumulation at New York and prices advanced 50c with the exception of low grades, which were hard to move at any price. Demand was slack at Pittsburgh and medium and low grades at Cincinnati moved only at concessions, although top grades sold at top quotations. Light offerings strengthened the Chicago mar-

ket and held prices steady at Minneapolis and St. Paul.

Alfalfa was easier. Receipts at Omaha were fully equal to trade needs and prices on lower grades declined slightly. The bulk of the receipts at Kansas City consisted of low grades which moved with difficulty even at wide discounts. There was practically no shipping trade to the South and Southeast. Some alfalfa was cut in the Yuma Valley of Arizona and No. 1 alfalfa at San Francisco declined to \$20 per ton.

Prairie averaged lower. Prices declined \$1 at Chicago with practically no demand. Light offerings held prices steady on a narrow market at Minneapolis and St. Paul and St. Louis quotations were unchanged.

Receipts fell off at Omaha, but demand was inactive and prices declined 50c. Prairie was weaker at Kansas City with the demand centered on top grades. Low grades were slow sale even at reduced prices. The shipping trade was light and the stock yards wanted only good quality hay.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Owing to rain during the forenoon of Wednesday, the hay market was adjourned for the day.

According to the latest report of the banquet committee, the annual dinner of the Kansas City Hay Dealers' Association will be held at the Hotel Savoy between April 1 and April 10.

"Judging from the poor quality of all alfalfa hay I have seen from Iowa, Illinois and Michigan," said William Dwyer of North & Co., "it can hardly be profitable to grow this hay in those states. The alfalfa of Kansas and Colorado is far superior. I believe the states northward and eastward generally will find alfalfa production unprofitable in the long run, especially as a marketing factor. Nebraska, Kansas and Colorado are the legitimate surplus alfalfa producers. Only the high freight rates prevent these states from selling hay so

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

cheap that northern and eastern feeders would rather buy western hay than to grow for their own use."

A shipper at Tekamah, Neb., wrote to a Kansas City hay dealer this week that Omaha, as a market for alfalfa, had almost ceased to function, making it necessary to ship to Kansas City in order to dispose of his product.

On a tour of Kansas last week Victor Paris found many farmers sowing alfalfa with oats. Some wheat fields planted last fall also showed alfalfa as an accompaniment.

James P. Campbell of the Wilhelm-Campbell Hay Co., who returned this week from a trip to Colorado, said the hay surplus of that state had been well cleaned up. Alfalfa meal millers in both northern and southern Colorado denied having any considerable stocks of meal on hand. Mr. Campbell reported general business active in the Centennial state, but he found farmers in the irrigation districts uneasy over the possible shortage of water next summer, owing to the fact that snow in the mountains during the winter was deficient.

"I sold a car of alfalfa hay this week for shipment to Maryland," said C. D. Carlisle Wednesday. "This is the first sale I have made east of Ohio this year." In a further discussion of market conditions, Mr. Carlisle said he had never known medium and low-grade alfalfa to sell as cheap as at present. He claims the honor of handling the first alfalfa hay ever marketed in Kansas City, back in 1898.

HEARINGS ON TENTATIVE GRADES.

W. A. Wheeler, in charge of the hay, feed and seed division, P. S. Department of Agriculture, Bureau of Agricultural Economics, reports that the tentative grades for alfalfa, Johnson and wild hay are being well received at the hearings held on a trip throughout the Southwest and West. Hay grade hearings were held at El Paso, Phoenix and Los Angeles during the last week. At El Paso the growers and dealers expressed general approval of the grades. At Phoenix, Ariz., one of the most representative and enthusiastic meetings was held on the 19th. Both dealers and producers were well represented and by a unanimous vote they approved Federal grades and expressed a desire to have a Federal inspection service for all important shipping points in Arizona. A start was made toward the formation of a state hay association, which would cooperate with the department in the establishment of an inspection service. At Los Angeles the grades were also highly recommended.

HAY MARKETS.

NEW YORK.

Mar. 19.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons	304	71
Receipts previous week	1,488	18
Receipts from Sept. 1.....	35,392	685

Receipts at all harbor points have been light during the week, accumulation considerably reduced and the situation on the whole shows some improvement, with prices strengthened about \$1 per ton, with the exception of low qualities, as reflected in the table of quotations. Trading has been restricted and irregular.

Notwithstanding the reduction in receipts and offerings, demand has been rather inactive at times, buyers taking hold slowly at the advanced prices and seem inclined to limit their purchases to bare needs.

There is practically no No. 1 timothy in the offering at this writing and No. 2, as well as a top quality No. 3 timothy, are in light supply, and these classes, especially in large bales, are readily salable, but there still continues on hand several lots of a mixed common undesirable stock, the tail end of the recent accumulation, which seem to be receiving comparatively little or no consideration from the buyers.

NORTHERN HAY & FEED CO. N

92 Corn Exchange Minneapolis Minn.

HAY Shippers Write for Quotations
WESTERN UPLAND ALFALFA AND TIMOTHY

Rye straw situation is irregular, offerings moderate with demand likewise; prices nominal.

New invoices are reported light.

Federal grade quotations for large bales follow: Timothy—No. 1, \$25@26; No. 2, \$24@25; No. 3, \$19@21. Light clover mixed—No. 1, \$22@24; No. 2, \$20@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$20@22; No. 2, \$17@18. Light grass mixed—No. 1, \$22@24; No. 2, \$20@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$17@18.

KANSAS CITY.

Mar. 21.—Liberal reduction in the alfalfa movement and somewhat smaller arrivals of prairie and other varieties gave the market less than 600 cars of hay this week. The exact total was 595 cars, as compared with 743 a week ago and 382 a year ago.

The offerings of alfalfa were 440 cars, or 114 less than for the preceding week. Only 261 cars of this hay were handled during the corresponding week a year ago. From day to day there was a fair trade in the better grades, particularly as to the dairy qualities, but milling hay and inferior stuff ruled slow. There were no quotable price changes.

A cut of 25 cars brought the prairie receipts down to 115 cars, considerably relieving the pressure of supplies. As in the case of alfalfa, the demand for good to choice hay was adequate, while damaged grades and poor qualities were slow, some finally remaining unsold, with bids below previously ruling prices. Official quotation ranges were the same as on the previous Saturday.

Timothy comprised most of the arrivals of other kinds of hay. Total receipts were 40 cars, or 9 less than a week ago. Generally the trade was slow on the different varieties. The best No. 1 clover sold 50c higher, but there was no other price change.

One car of straw came in. There was a steady tone, though inquiry was not urgent. The price was unchanged.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$24.50@29; choice, \$22@24; No. 1, \$18.50@21.50; standard, \$14.50@18; No. 2, \$12@14; No. 3, \$6@11.50. Prairie—No. 1, \$10.50@11.50; No. 2, \$9.90@10; No. 3, \$6.50@9; packing, \$5@6. Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13. Clover—No. 1, \$12@14.50; No. 2, \$7@11.50. Straw—Wheat, \$7.

CINCINNATI.

Mar. 22.—The hay market throughout the week was of a routine kind with receipts smaller, but enough for the immediate needs of the trade. The quality of the offerings was much the same as recently, and mostly of medium and common stuff, which necessitated concessions to stimulate buying. Lack of shipping orders and limited demand from local sources were depressing influences, though top grades and choice timothy and mixed sold readily at full values on all days. The market, however, afforded little of this quality. While the country movement was comparatively smaller, advices during the closing days of the week indicated an increase in receipts as judged from the number of invoices and reports of cars loading received by the trade. Timothy—No. 1, \$17.50@18; No. 2, \$15@16; No. 3, \$13@14.50; threshed, \$8.50@10.50; no grade, \$8@10. No. 1 heavy clover mixed, \$15@16; No. 1 light clover mixed, \$16@17. Clover mixed—No. 1, \$14.50@15.50; No. 2, \$12.50@13.50; no grade, \$10@11.50. Clover—No. 1, \$15@16; No. 2, \$11@13; no grade, \$8@10. Second cutting alfalfa—No. 1, \$21@23; No. 2, \$17@19. First cutting alfalfa—No. 1, \$15@16; No. 2, \$13@15. Sound sample grassy hay, \$9.50@11. Straw—Wheat, \$8.50@10; oats, \$8.50@9.50; rye, \$13@14.

PHILADELPHIA.

Mar. 21.—The market for hay is dull, but supplies are small and values are fairly well sustained. Straw is quiet and steadily held under light receipts. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$18@19; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$13@15. Heavy clover mixed—No. 1, \$15@16. Light grass mixed—No. 1, \$17@18. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

DULUTH.

Mar. 21.—Business in hay remained slow here during the last week and in spite of small receipts jobbers' stocks accumulated in the lower grades. The movement of the better grades of hay from the country was just enough for needs. Prices per ton are unchanged, but the tendency is easier, as follows: Timothy—No. 1, \$16; No. 2, \$14. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

MEMPHIS.

Mar. 21.—The hay situation is slightly better, although lower grades have been rather slow sale during the week and are relatively easier than are the good grades

Receipts for the week were 103 cars, bringing stocks up considerably. Buying continues only for necessities. Quote: Timothy—No. 1, \$22; standard, \$21@21.50; No. 2, \$19.50@20. Alfalfa—No. 1, \$26.50@27; standard, \$24@25; No. 2, \$19.

MINNEAPOLIS.

Mar. 21.—The hay market shows little if any change during the past week. Receipts are rather normal and demand manages to take care of them in nice shape. Today's market quotations on the various grades were: No. 1 timothy, \$17.50; No. 2 timothy, \$16; No. 1 upland, \$16.50 and No. 2 upland, \$15; No. 1 midland, \$13 and No. 2, \$10. 1 alfalfa, \$21 and standard alfalfa, \$19.

BALTIMORE.

Mar. 21.—The general hay market here is easier under increasing receipts and accumulating stocks, due to the slow outward movement of hay during the last ten days to two weeks. Another factor contributory to the dullness is the constant influx of nearby hay by farmers' wagons and auto trucks. This class of receipts is supplying the bulk of requirements. Low grade and inferior hay especially hard to move. Straw of all kinds is in ample offering and market easier on wheat and oat blocks. Quotations follow: No. 1 timothy, \$20.50@21; No. 2 timothy, \$19@20; No. 1 light clover mixed, \$18.50@19; No. 1 clover mixed, \$18@18.50. Straw—No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.

MILWAUKEE.

Mar. 21.—Both receipts and demand were light in the Milwaukee hay market during the past week. Current quotations continued unchanged as follows: No. 1 timothy, \$15@16; No. 2 timothy, \$13@14; No. 1 mixed, \$14@14.50; No. 2 clover mixed, \$12@13; sample hay, \$7@9; marsh feeding, \$11; packing, \$10; rye straw, \$10@10.50; oat straw, \$10@10.50.

TOLEDO.

Mar. 23.—Hay is still under the influence of large stocks and a slow trade from buyers. The price trend has been downward for some time and how long this will continue dealers say is largely dependent on the demand. Stocks here and elsewhere are large enough to take care of a big trade and this is what is needed to bring the market out of the rut it has been in for months. Receipts and shipments are very light, with the country inclined to hold hay for better prices.

Prices were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8; f. o. b. Toledo.

PITTSBURGH, PA.

Mar. 21.—There is no surplus offerings of the better grades of timothy and choice light clover mixed hay and with a fair inquiry for these descriptions the market is rather firm on these grades. Common and low grade stuff is very hard to move, however, and then at uncertain values. Quotations: Timothy—No. 1, \$19.50@20; standard, \$17@17.50; No. 2, \$14.50@15.50; No. 3, \$12@14. No. 1 H. C. mixed, \$16.50@17; No. 1 L. C. mixed, \$16@16.50. Clover mixed—No. 1, \$16.50@17; No. 2, \$12@14. Clover—No. 1, \$16.50@17; No. 2, \$11@14. Straw market continues dull. Sufficient arriving to keep demand fully supplied and not much encouragement for any improvement at this writing. Quotations: No. 1 wheat, \$11.50@12; No. 2, \$11@11.50; No. 1 oat, \$11@11.50; No. 2, \$10.50@11; No. 1 rye, \$12.50@13; No. 2, \$11.50@12.

OMAHA.

Mar. 20.—Prairie hay: Receipts heavy. Quality of arrivals fair to good. Sales being made generally in line within quotations. Damaged prairie very slow sale, and wet prairie not wanted at any price. Prices lower. Alfalfa hay: Receipts light. Good alfalfa selling within quotations, but no demand for poor grades. Damaged alfalfa not wanted and can only move at heavy discount. Prices lower.

Prices below are for carload lots: Upland prairie—No. 1, \$10@11; No. 2, \$8@9; No. 3, \$7@8. Midland prairie—No. 1, \$10@10.50; No. 2, \$8@9; No. 3, \$6@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Choice alfalfa, \$17; No. 1, \$15@16; standard, \$11@14; No. 2, \$8@10; No. 3, \$6@7. Straw—Oat, \$7@8; wheat, \$6@7.

BOSTON.

Mar. 21.—No. 1 timothy, \$26@27; No. 2 timothy, \$24@26; No. 3 timothy, \$18@20; eastern, \$16@24; clover mixed, \$21@25. Straw—Rye, \$21@23; oat, \$13@15.

PORTLAND, ORE.

Mar. 18.—Buying prices f. o. b. Portland: Alfalfa, \$18.50@19 ton; valley timothy, \$19@20; eastern Oregon timothy, \$22@22.50; clover, \$15.50@16; oats, \$19@20; oats and vetch hay, \$18.50@19.50; straw, \$7.50@8.

CHICAGO.

Mar. 21.—Receipts, 589 tons; shipments, 23 tons. Arrivals small and demand good for the choice hay. Low grades fair sale. Choice timothy, \$21@22; No. 1, \$19@21; No. 2, \$15@17; No. 3, \$11@14. Timothy and clover—Light mixed, No. 1, \$17@19; No. 2, \$13@16; heavy mixed, No. 1, \$15@15; No. 2, \$11@13. Timothy and grass—Light mixed, No. 1, \$17@19; No. 2, \$13@15; heavy mixed, No. 1, \$14@15; No. 2, \$11@13. Clover—No. 1, \$14@15; No. 2, \$10@12. Mixed grass—No. 1, \$12@14; No. 2, \$11@12. Oklahoma, Kansas, Nebraska and South Dakota prairie hay, \$12@15. Marsh hay, feeding, \$10@12; packing, \$10@12.

Sales were: On track—No. 2 timothy, 1 car at \$17; marsh hay, packing, 1 car at \$9.

Rye straw quotable at \$10@11; oat straw at \$8@10; wheat straw at \$8@10. Sales were: On track, wheat, 1 car at \$3.50.

ST. LOUIS, MO.

March 23.—The receipts of hay continue to be light. High grades of timothy and light clover mixed in good demand at stronger prices. All medium grades continue dull and hard to place.

Clover.—Very little demand. High grades only thing selling to any advantage. Medium grades neglected and extreme low prices taken in order to move it.

Alfalfa.—High grades in fair demand; medium and low grades still difficult to sell.

Prairie.—Dull and hard to place. Medium grades very low in price.

Straw.—Steady. No. 1 timothy, \$21@22; standard timothy, \$19@20; No. 2 timothy, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2 clover mixed, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2 clover, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$14@15; No. 2 prairie, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

Receipts continue light and there is quite a demand for quality hay. Country loading is light and if it continues so, market should show improvement. Poor quality hay is still selling low and clover and clover mixtures and gross mixtures too, if of poor color are dull. There is some inquiry for alfalfa and all kinds of straw.—*Bridge & Leonard.*

Continued light receipts and an improved demand, especially for the better grades of timothy and light mixed hay has caused a firmer feeling to develop and today and we were able to get above quotations on some of our sales. It is necessary to keep hay moving right along if we are to dispose of the surplus before new hay is ready. All kinds of straw are in demand.—*Albert Miller & Co.*

Receipts of timothy are running lighter and if they will continue so, we will without doubt have better market conditions. The trade, however, is pretty well filled up on the low grades. Hay of good quality and packing hay is wanted. Straw steady.—*Van Wie & Moorhead.*

Better grades of timothy finding a ready market at firm prices while the common grades are on the bargain counter, low grades being next to unsalable. Prairie feeding hay dull, soft packing in fair demand.—*Walters Brothers.*

SORTING BALED HAY.

Piles of baled hay in the barn or in the field provide an excellent opportunity to grade and sort the hay prior to loading for shipment to market, says the Department of Agriculture. At this time in the preparation of hay for market, all widely different classes and grades should be sorted and separated prior to loading. If any bales of distinctly low quality were pressed from bunches of weeds or from spoiled hay they should be culled out and reserved from shipment. If different classes of hay were baled from different meadows, such as timothy, medium clover mixed or light grass mixed, the various classes should be separated so far as possible because it is not good policy to load a number of classes of hay in the same car if it can be avoided. Similarly, if a portion of the hay is No. 1 grade, cured without rain damage, and another portion is No. 2 grade because of excessive sun bleach or moderate rain damage, it is best to separate the two grades prior to loading.

If different grades are loaded in the same car it is very difficult for the terminal market inspector to place a proper grade on the entire carlot. When two distinct grades are present he cannot average the grades and designate one grade for the carlot. The best he can do is to count the bales of each grade and certify that he inspected so many bales each of No. 1 and No. 2. In case of car-door inspection, the presence of bales at different grades raises doubt in the buyer's mind as to what percentage of the entire carlot is No. 1 and what percentage is No. 2 and the result of this situation may be that the hay will not

sell to the best advantage. The better policy is to load hay of uniform grade.

BROOM CORN MARKETS.

The general impression and belief at this time is that the acreage will be curtailed due to prices not being what were expected and the fact that bankers who finance farmers on harvesting and baling expenses are advising their patrons against growing large broom corn crops, with land owners in some instances placing a clause in the lease on rented land, either restricting the acres to be devoted to broom corn or prohibiting it entirely.

Field conditions as relating to the situation have not undergone any material changes. Buyers are not numerous in the various districts and as heretofore are noted as operating either in the Lindsay Standard district or the area in southwest Kansas, due to the fact that in these sections the larger end of the field supply is held. Other districts advise that corn is available but that the holdings on the farms are scattered, limited and difficult to buy. Prices paid range usually from \$70 to \$100 in the Dwarf sections with the larger part taken from \$75 and \$80 to \$95. Crops with merit command \$100 and above, however not any amount of this grade is available as the supply has been topped for quality throughout the season.

In the Lindsay Standard district prices paid the past week ranged from \$95 to \$140.

The field situation has reached a basis where there is not much activity and it is expected that this will continue until the 1925 crop situation has reached a point where either the buyers will make an effort to secure crops or the growers seek a market.—*Broom Corn Review.*

CONFERENCE PROPOSALS.

"One proposal of the President's Agricultural Conference has raised doubts in the minds of experts and economists," says the "Index," just published by the New York Trust Company.

"The tariff is to be used as a prop while United States agriculture is being made self-sufficient through diversification. The difficulty with this point of view is found in the theory that we can at will change the whole current of international commerce by an academic decision to do so.

"It is to our advantage to raise those crops which give us the greatest return whether the product is sold abroad or at home, and the natural play of economic forces will compel us to continue in that course. When through growth of population and the natural gradual shifting of world trade it becomes economically more profitable for us to change our course, then the change will come about gradually and naturally."

REDUCING CORN IN SWINE RATION.

With corn scarce and high in price, other feeds may profitably replace all or a part of the corn in feeding swine. The relative value of different feeds as shown by feeding tests are discussed in a recent monthly bulletin by W. L. Robison, in charge of swine investigations at the Ohio Experiment Station.

Plump, well-filled oats have a correspondingly higher value than light oats and may be valued at 60 cents a bushel. Because of their bulk, due to the presence of hulls, it is not advisable to feed oats alone to fattening shots.

The worth of middlings for hogs depends largely on their fiber content or grade and on the manner in which they are fed. With the corn at \$1.12 a bushel a good grade of middlings is worth about three per cent more than an equal weight of the corn fed with tankage.

A given amount of corn can be made to produce much larger gains by supplementing it with a small quantity of some dairy by-product, fish meal, or tankage. The present high price of corn and relatively low price of these feeds make their use especially worth while.

Recent experiments suggest a still

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

RUST PROOF WHEAT FOUND.

RUSHFORD, MINN.—A new variety of wheat which will resist all attacks of rust, a species of Marquis which is said to yield from four to six bushels to the acre more than the ordinary variety, has been developed by Samuel Larcombe, a grain grower of Birtie, Manitoba. The new wheat has been tried out in areas in western Canada infested with rust and came through without damage according to Larcombe.

Larcombe has been a Manitoba farmer for 30 years and in that time has won 3,000 prizes on wheat at Canadian and American expositions. He won the world's championship for wheat at the Peoria International fair in 1917, and in 1918 the sweepstakes for the best individual farmer's exhibit as well as sweepstakes for wheat in the dry farming section of the International Soil Product Exposition in Kansas City.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past wk.	242,000	670,000	259,000	1,171,000
Prev. wk.	248,000	638,000	294,000	1,180,000
1924	227,000	838,000	268,000	1,333,000
1923	206,000	861,000	278,000	1,345,000
1922	207,000	500,000	247,000	954,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925	2,729,000	10,252,000	3,068,000	16,049,000
1924	2,735,000	11,601,000	3,061,000	17,397,000
1923	2,779,000	10,539,000	3,142,000	16,460,000
1922	2,647,000	8,097,000	3,042,000	13,786,000

CHICAGO PROVISION REVIEW.

CHICAGO, March 23. — Commission house liquidation of May lard and efforts to get prices down on the part of a few of the local packers, brought a lower level of lard values last week, after a big advance. Hogs were up to \$14.60 for the best or war time prices. This had a stimulating effect on buying but the trade was not heavy and the bulges brought out profit taking sales. Closing trades were at loss of 7½¢ to 12½¢ on lard, with short ribs 10¢ higher to 5¢ lower and dry salted bellies 27½¢ to 45¢ higher than the previous week's finish.

Lard stocks in Chicago decreased 3,517,000 lbs. in the first two weeks of this month, with the total 77,392,000 lbs., compared with 26,684,000 lbs. last year. The principal gain over a year ago was in contract stocks, which are 67,356,000 lbs., compared with 21,114,000 lbs. last year. Meat stocks decreased moderately.

LIVESTOCK PRICES AT LEADING MARKETS.

Following are livestock prices at five leading Western markets on Monday, Mar. 23, 1925, as reported to THE PRICE CURRENT-GRAIN REPORTER by the Bureau of Agricultural Economics, U. S. Department of Agriculture:

	CHICAGO.	KANSAS CITY.	OMAHA.	E. ST. LOUIS.	ST. PAUL.

Feeding Sheep and Lambs (Range Stock):					
Feeding lambs, med.-ch.	15.00-16.75		13.75-15.75		

except for dry salted rib bellies reflecting the reduction in the hog supplies.

Prices of hog products are high, yet consumption is of liberal volume and is checking trade somewhat as indicated by the decreased shipments as compared with last year when prices were materially lower. There is money in feeding corn to hogs and farmers are disposed to hold them back. The quality is good but the aggregate supplies are not likely to be increased for some months. Prices in leading markets follow:

	High.	Low.	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.

MOVEMENT OF PROVISIONS.

Following were receipts and shipments of provisions at Chicago for week ending March 21, 1925, and since Oct. 25, 1924, compared with the corresponding time in 1924:

	Received—	For week.	Since Oct. 25, 1924.	Same time 1924.
Cut meats, lbs.	5,664,000	138,718,000	65,165,000	
Lard, lbs.	4,320,000	170,694,000	92,444,000	
Shipped—				
Cut meats, lbs.	17,261,000	339,114,000	378,598,000	
Lard, lbs.	8,942,000	194,863,000	259,513,000	

HOG SLAUGHTERINGS.

The reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed in the West in the summer season beginning Mar. 2, 1925, compared with the same period of previous year:

	Through Mar. 21, 1925.	Through Mar. 15, 1924.
Chicago	286,200	490,200
Kansas City	96,300	148,100
Omaha	177,600	240,100
St. Louis	138,700	193,200
South St. Joseph	58,500	94,400
Indianapolis	55,900	82,000
Milwaukee	22,300	37,400
Cudahy	17,800	42,100
Cincinnati	38,900	49,000
Ottumwa	27,600	56,700
Cedar Rapids	21,500	48,400
St. Paul	171,600	130,200
St. Louis	170,300	195,400
Cleveland	36,100	93,200
Louisville	12,600	17,900
Wichita	28,700	45,000
Detroit	36,200	78,700
Nebraska City	15,100	22,300
Fort Worth	29,300	30,500
Oklahoma City	23,400	18,200
Above and all others	1,765,000	2,542,000
For the week	623,000	846,400
Previous week	609,000	824,000

Weights are reported as follows: 228, 230, 236, 228, 204, 235, 210, 214, 211.

HOG PRODUCTS.

Market somewhat unsettled. Outside buying moderate, but offerings free. Quotations for meats as of March 21:

Mess pork	\$39.00
Lard, round lots	16.70

EXPORTS OF HOG PRODUCTS.

The past week's clearance of hog products compared with previous week and last year:

	Mar. 21, 1925.	Mar. 14, 1925.	Mar. 22, 1924.
Pork, bbls.	320	1,655	
Pork, lbs.	60,800	314,450	
Meat, lbs.	14,196,000	11,652,000	15,128,000
Total meat	14,256,800	11,652,000	15,442,450
Lard	19,077,000	7,639,000	21,614,000
Total products	33,333,800	19,291,000	37,056,450

WEEKLY AVERAGE PRICES.

Weekly average prices at Chicago for good beef cattle, hogs, aged sheep and lambs, as compiled by the Chicago *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	Lambs.
Last week	\$10.05	\$14.05	\$8.65	\$15.75
Previous week	10.35	13.75	9.35	16.60
1924	9.65	7.30	9.50	15.80
1923	8.90	8.25	8.10	13.90
1922	7.95	10.00	8.50	13.95
1921	9.05	9.75	5.90	9.60
1920	12.80	15.00	13.50	18.75
Av. 1920-1924	\$9.65	\$10.05	\$9.10	\$14.40

LIVE STOCK MOVEMENT.

Receipts and shipments of live stock at Chicago the past week, with comparisons, follow:

	Hogs.	Cattle.	Sheep.
Receipts—			
Past week	153,804	51,598	77,521
Preceding week	153,963	52,838	85,084

Shipments—			
Past week	41,677	16,544	22,315
Preceding week	42,179	15,722	19,133
Last year	78,511	18,707	25,501

The flour milling industry of Italy advises the Italian Minister of National Economy that contracts already made assured an adequate supply of wheat until June, and that it is prepared to assume a formal obligation to import the additional quantity needed, from that time until the new crop is available, even if by so doing they should run the risk of a decline in prices.

MOVEMENT OF CATTLE.

Weekly receipts and shipments of cattle and calves at 6 Western centers the week ending Mar. 21, 1925, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

BUSINESS AND TRADE CONDITIONS

OFFICIAL comment from the members of the President's cabinet were given last week in summarizing the business situation over the country. The cabinet members agreed generally that a continued era of business prosperity was assured. Secretary Mellon told the President that the indices of prices and the ratio of operation to capacity in all of the key industries indicated that a high rate of production and consumption would be maintained in the United States for an indefinite period. There has been some recession of speculative activities in the stock markets and on the grain exchanges, but the fact is not regarded by the administration as important to the conduct of average business.

Secretary Davis of the labor department reported that while there is some unemployment it is not above normal for the season. Employers and employees are regularly settling disputes as to wages and working conditions, the secretary said, giving the impression that there is no danger in that field.

The Employment Situation

Two million unemployed persons in the United States is the figure now being used by the statisticians, interested in such problems. First off, it might seem a great many but on closer investigation it appears a rather conservative figure, especially when it is realized that the business recovery to date has not entirely overcome the 1924 period of depression. Organized labor circles estimate that there are 1,500,000 unemployed industrial workers. This matter frequently arises among those who endeavor to gauge the course of business for a season or two ahead, and who at this time favorably comment upon the fact that there is no forced boom under development. Uncalled-for optimism is tempered by facing such direct facts on supply and demand which tend towards leveling prices and the avoidance of sharp price advances and their unpleasant subsequent downfall.

Pressure on Stocks

The bearing of weakened margin accounts on the stock market came in for prominent attention last week as it had during previous weeks in the grain market. Weakness in stocks, with a hundred or more issues establishing new lows closed out many shoe string margin traders. Opportunities are now presented, however, for far-sighted investors to buy good stocks because there has been no essential change in fundamental conditions. The decline has either been warranted by news of the day as affecting particular issues or lower market prices have been part of a general and natural re-adjustment.

From strictly an investment standpoint, it is not necessary for the market to show continuous advances. Such investors are more concerned with the broad underlying business conditions of the industries represented by their favorite stocks.

In a speculative sense, traders appreciate the fact that security prices often advance faster than the business conditions surrounding such industries really warrant. They understand that for similar reasons such securities will return to their natural level and speculative sales, sometime prior to this period of declining prices, must be anticipated.

Foreign Investments

"All bosh," is our reply to the warning, frequently given by uninformed speakers and writers concerning the poor policy shown by those who purchase foreign bonds and other foreign securities. Such advice ranges from that given by a prominent United States Senator down to small-town editorial writers.

Among the true facts relating to the subject and which are undeniably favorable to the purchase of such foreign loans are the following. The United States has been exporting large quantities of wheat and other feed stuffs, cotton and copper. It must be realized that gold with which to pay for such purchases is an exceedingly scarce article abroad and therefore the exchange must either be in goods or through loans or credits. As American investors are attracted by high interest rates on foreign loans, a considerable credit is thus being established which materially assists our export trade without unduly

by even the most farsighted financiers several years back. We were then a debtor nation and now the beam is tipped far over on the credit side, in the safe guidance of which business men and bankers are giving close attention. There is some difference of opinion in gauging 1925 as compared with 1924 concerning the amount of new capital which will be loaned to foreigners. It is a certainty, however, that the Department of Commerce and private loans made by citizens and bankers of the United States are assured of a fairly steady annual increase. This so-called adverse balance is becoming considered a favorable balance of trade.

Crop Values

The Department of Agriculture has just made public figures on the combined value of crops and live stock which for 1924 amount to \$12,404,000,000, which is some \$56,000,000 more than for 1923. In supplementing this stupendous figure for the calendar year, we have an even greater advantage on the crop year, due to the marketing of cash grain and other produce during the early months of 1925 at extremely high prices. Broadly speaking, all of the wheat belt; certain parts of the cotton belt and most of the corn-producing area were greatly benefited on the last crop.

Wool growers were likewise benefited and rural agricultural districts everywhere are entering the Spring planting season and the several months of growing weather in splendid shape.

What Is Farmers' Position in Wheat?

If, for argument's sake, our farmers have little or no wheat to sell, what interest of the moment have they in wheat prices? It is, of course, understood that the marketing of cash wheat and the manner in which world markets are established is a subject of continued importance to the farmer, whether he has wheat in his store houses or not.

To those farmers placing entire dependance upon Governmental wheat reports, there must be considerable confusion following the last decidedly bullish report and the sharply declining markets immediately thereafter. Coupling such inaccuracies with the recent report of the Department of Agriculture concerning the rotation of farm crops, we should not be unduly impressed with the Spring planting plans of the farmer, insofar as Governmental recommendations are concerned. From a strictly economic angle, it is our judgment that there will be more seeding of grain and less of hay but this is influenced, as such things are, solely on a price basis; grain bringing during the past several months higher returns per acre than hay.

As practically all of the cash wheat in the West has been marketed, it is presumed our farmer friends have but little interest in the recent departmental investigation of the ups and downs in the wheat market, an investigation that has spread into the Canadian grain markets for reasons unknown to the trade.

Mail Orders Show Farmer Prosperity

The mail order houses of necessity keep close track of the farm situation, even outside of their merchandising plans in farm requirements. Following the sharp decline in grain prices, the several large mail order houses issued surveys and published statements of their business volume to the effect that declining grain markets had affected the farmer but little. These news releases state that the past crop year was one in which the farmer sold close to the top. They further venture the opinion that grain is likely to advance in price between now and the new harvest.

WINTER WHEAT SPOTTED

THE general reports given elsewhere in this issue indicate that the condition of the winter wheat crop is generally spotted in all of the States and there will be much uncertainty in the estimates of final production by crop reporters and undoubtedly a wide range in the comparison of such estimates. There has been considerable damage throughout the states of Ohio, Indiana and Illinois by freezing and in the southwest by drouth conditions.

increasing our imports from such foreign countries. This is an unquestionably better plan than to exchange our goods for their goods, thus through imported merchandise stepping upon the toes of American manufacturers who even under the present arrangement (part goods and part credit) are having some difficulty competing with cheap foreign labor and goods.

Considering the subject from strictly a financial standpoint, and to offset the objection that we are unduly diminishing our supply of gold, we find this—\$1,252,000,000 was loaned from American capital to foreign countries during 1924, in spite of which money or credit was obtainable here on better terms than in 1923. This is the best possible proof that there has not been and is not likely to be a scarcity of capital within our borders. We have ample funds for the expansion of our own industries, with a recent range of high bond prices which clearly indicates that the conversion of surplus funds continues to go into low interest bonds, and if American capital was really being seriously reduced, the bond market would be sluggish and prices low.

Associated with this discussion is an item of \$20,000,000,000 in the "invisible trade" covering credits, loans and investments made abroad, a rather complicated problem of international trade, not foreseen

World Trade

Readers of the PRICE CURRENT-GRAIN REPORTER are accustomed to juggling figures and will not be confused by the enormity of calculations just made by the National City Bank of New York showing for the year 1924 world international trade approximating \$58,000,000,000. For 1913, the year preceding the world war, the bank's estimate is \$40,000,000,000. The compilations are based on official figures from thirty of the principal trading countries of the world, estimated to handle eighty per cent of the total world commerce, in which the United States volume is placed at fourteen per cent for 1924 and ten and one-half per cent for 1913.

Railroads Support Business

Samuel O. Dunn, an authority in railroad circles, discussing general business as affected by freight service, in a public address last week said that during the past four years, the average daily car shortage has been reduced from 81,600 to 1,047. The latter means practically no shortage at all which was substantially the rail situation during the year 1924, despite the fact that for considerable periods all traffic records were broken. The saving in time and the increased earnings on the investment of merchandise in flow, which he estimates is delivered at destination in 40% less time than during periods of car shortage, will be appreciated under such circumstances.

MORE FREAK LEGISLATION

A BILL has been introduced in the legislature of Colorado which has for its purpose the regulation of the purchase and sale of agricultural products, in much the same manner as that has been done in a number of other states.

First of all the director of markets is named as the officer to apply and enforce the law. A license fee of \$50 per year is required before any one may engage in the business of buying or selling any agricultural, vegetable, dairy, poultry or market gardening products, this provision however, not applying to farmers or producers.

Dealers are required to post prices they will pay for agricultural products, quantities they will accept at these prices, and must report every ten days, or oftener if requested, prices actually paid, etc.

A seasonal or annual report, showing geographical source of the purchases, the amount, processed, conditioned or manufactured, the amount sold raw, and the amount still on hand, must also be made.

The market director is to hear and adjust complaints; he may require licenses to give surety bond; he may cancel the license when his judgment on any one of a dozen different conditions have not been met and he may arrange for arbitration where differences arise between farmers or groups of farmers and dealers, compiling the attendance of witnesses, with books, papers, documents, etc., for the purpose of bringing about conciliation or adjustment.

A wave of this same sort of so-called "farmer protective" legislation is just now sweeping over the country, much of which is one sided and some of which is actually vicious and about the only consolation the independent grain dealer can get out of it all is the that its manifest unfairness and injustice is sure to bring about its downfall when the court of last resort is reached.

DEFLATING FARM VALUES

IN an interview with the new Secretary of Agriculture, which has just been made public, he is quoted as saying the farmer is not in favor of deflating the value of his land, which, he says, is worth three or four times what it was in 1900.

A good many hundreds of other business men were not in favor of the post war deflation which confronted them, but they had to take the medicine even though it was bitter, and they took it like men, and were shortly on the way to financial recovery.

Farming land which costs four hundred dollars an acre or which is inventoried at that price, means

an interest charge of from \$24 to \$32 per acre, and if only an average yield of either wheat, corn, oats, rye or barley is grown thereon, it will not meet the interest charge.

Under such circumstances, three alternatives are open to the farmer.

He must grow more of the same or a more profitable crop; he must sell out and quit farming, or he must deflate.

The problem is for him to solve and we are confident he will, if given just a little more time, without too much governmental meddling, solve it, and solve it right.

THE PRICE OF WHEAT

WHOLE volumes have been written about the price of wheat never going up until practically the whole crop is off the farms, and while that, as the records show, is not a true statement, its frequent repetition leads many people to accept it as the whole truth.

An examination of the figures showing cash prices of contract wheat at Chicago, covering a period of sixty-three years discloses the fact that at some time within that period the peak was reached, one or more times during each of the twelve months.

Starting with once in March, twice in November, three times in January and September and running up to eight in December and nine in May, the records show that during two of the sixty-three years the same top price was reached during both April and May, during one of the sixty-three the same top was reached during September, October and November, and during another, February, April and September divided the honors.

The record, for the single month top prices, is as follows: January 3, February 6, March 1, April 6, May 9, June 6, July 5, August 5, September 3, October 5, November 2, and December 8.

The other side of the picture is equally interesting, for during this same sixty-three-year period the lowest prices were reached 7 times during January, 4 times during February, March, April and June, 5 times during July, 8 times during August, twice during September, 8 times during October and 5 times during November and December.

In this record, May was the only month registering no lowest price while January and June divided the honor once as did also July and September and November and December with the record going to August and September three times.

An interesting sidelight on this examination is the price range with a low record of 48¢ cents in January, 1895, when the wheat under most conditions would have been all off the farms, up to the high of \$3.50 during July and September, 1919, and November, 1920, when the larger part of it was still unsold.

AN OPPORTUNITY

SCARIFYING clover seed is an artificial means of hastening nature's plan of germination by cracking the hull of the seed. It will pay dealers in clover seed territory to purchase a scarifying machine and advertise the fact in their local papers to their farmer friends that they are prepared to scarify clover seed and render small charge for the service. A scarifying machine is too expensive for individual farmers to purchase and, as the country elevator is the community hub for rendering service to the farmer, this should be a laudable undertaking which will tend to increase the dealer's income and at the same time benefit his patrons.

UNSOUND LEGISLATION

UNSOUND legislation seems to be the insane desire of many who are elected to public office and it is not strange that Iowa legislators should try to run amuck without due consideration of what the ultimate result will be. The Busser Bill is this type of legislation, which has passed the Iowa

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Mar. 28, 1925.	Mar. 21, 1925.	Mar. 29, 1924.
Wheat—			
Primary receipts	3,205,000	3,860,000	3,336,000

State Senate and has for its object forcing the seed dealers of the state to guarantee productiveness of seeds; in other words, to be responsible for the out-turn of the crop. Seed dealers at the present time have on their invoices a non-guarantee clause and rightly so. Soil conditions, weather uncertainty and improper handling of seed after it is purchased would make it utterly impossible for a guarantee to be given. If this bill becomes a law, it will not only put the seedsmen of Iowa out of business in that state but will also work a greater hardship on the farmers for they will be unable to purchase seed as no dealer would care to take this risk.

CLEAN UP
